Why Hardware and Metal has Such a Large Western Canada Circulation

THERE are many reasons why Hardware and Metal covers Western Canada as thoroughly as the other parts of the Dominion. Some of the outstanding reasons are:—

Hardware and Metal is the *only* hardware paper giving a weekly market service from Western Canada.

Hardware and Metal is the *only* hardware paper giving a weekly news section for Western Canada.

Hardware and Metal is the *only* hardware publication giving the trade in Western Canada a weekly market service from Montreal, Toronto, London and Pittsburgh—and Westerners are even more interested than any others in the activities in the primary markets of the East.

Hardware and Metal is the *only* publication in Canada giving the Western hardware trade a weekly service covering the activities of the hardware trade in a National way.

Hardware and Metal is the *only* hardware publication giving the Western Canada trade a weekly market service on paints, oils, varnishes, etc.

Hardware and Metal is the *only* hardware publication giving the trade any Western Canada weekly information regarding, "What Other Merchants Are Doing," Legislation, New Hardware Goods, Illustrated Articles on Display, Advertising, Etc.

Hardware and Metal during the twelve months of the year, supplies the Western Canada hardware trade with more market information, more new goods information, publishes more illustrations of window displays, store interiors, and retailers' advertisements than all the other Canadian hardware trade publications combined.

Incidentally, Hardware and Metal is the only hardware trade publication in Canada that will supply you with an Audit Bureau of Circulations statement, thus proving what it really has in the way of circulation in Western Canada.

MORAL—*If you are interested in Western Canada trade, advertise in the paper that is read by the Westerners and has gained its present dominating position in the West, as well as in other parts of Canada through 34 years of honest effort to give the trade each week the best in hardware trade newspaper service.*

Member A.B.C. **HARDWARE & METAL** *Member A.B.P*

Canada's National Hardware Weekly since 1888

143-153 University Avenue, Toronto, Canada

Published every Saturday since 1888. The only weekly hardware paper in Canada and the only hardware paper in Canada that gives you a circulation statement audited by the Audit Bureau of Circulations.

"Hello—Central"!

"Give me International Business Machines Company, Limited, Toronto.

"Is that I.B.M. Company? Please ship me to-day one of your International Dayton Hardware Scales. Must have it at once!"

The Famous Dayton Hardware Scale

showing automatic weight and price indicator, detachable scoop, and platform accommodation for wire, rope, etc.

The International Recording Door Lock and Autograph Recorder give you complete protection against unauthorized or improper opening or shutting of your doors. Write for descriptive literature about this wonderful invention.

The above long distance telephone call was received by us the other day from Mr. W. C. Farley, a progressive hardware dealer in Kincardine, Ontario, and the order was filled the same day.

The point is that Mr. Farley regarded The Dayton Hardware Scale of so much importance to his business that he did not lose any time writing or even wiring us, but **telephoned,** in order that not a minute might be lost in getting the scale into service.

This attitude of mind is typical of all Canadian Hardware Dealers who have given a moment's investigation to the

DAYTON Hardware Scale

This is the finest, most accurate, most serviceable hardware scale ever made. Thousands of Canadian hardware dealers are to-day protecting their profits, speeding up their service and adding to the efficiency of their stores with this famous scale. Why not YOU?

Let us send you descriptive literature about the Dayton Hardware Scale. It will well repay your investigation.

The Dayton is sold on attractive monthly payments—discount for cash.

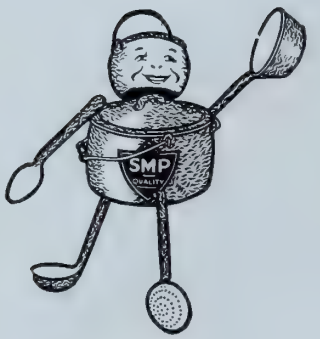
Turning Window Shoppers Into Real Buyers



Mr. SMP

Copyright Canada
by The SMP Co., of Canada

Wouldn't you like to convert a big number of those window shoppers into real buyers—steady customers?

A large number of merchants handling Diamond Ware and Pearl Ware in recent months have added considerably to their turnover in these goods by frequent use of our fine window trims and other dealer helps.

They dress up the window with a neat display of enameled ware, put in one of our window trims to "color up" the window, and on every article attach an SMP Price Tag with the price marked distinctly so that the passerby can see it.

It makes a very effective window. It attracts the eye and creates the buying impulse. It turns window shoppers into real buyers.

Try this plan for a week and then you'll become one of the large army of SMP window fans.

There is a Big Difference in Hinges

Every hardwareman and clerk has, at some time or other, experienced difficulty with heavy tee and strap hinges. You know the kind that binds when you attempt to open them—usually in the presence of the customer, who asks, "Why won't it work easily?" You have heard carpenters say, "Had to pry those hinges open, send me easy working hinges next time." Difficulties of this kind cause annoyance at the most inopportune time. These troubles are usually caused by hinges with a hammered or rivetted pin, and can be avoided (as hundreds of Canadian hardwaremen know) by selling heavy strap and tee hinges made by Canada Steel Goods Company, Limited. In order to properly perform its function a hinge must be constructed in a manner that will permit of free and easy action.

The **Pins** in Canada Steel Goods heavy strap and tee hinges are carefully spun, thus ensuring smooth working of the hinge on the pin. The spinning of the pin is a most important operation in good hinge making. The hinge joints are snug—but not too snug. The counter-sinks are heavy and clean—a feature that is always appreciated by contractors and carpenters.

These are only a few of the extra advantages you get when you demand Canada Steel Goods Co. heavy tee and strap hinges.

They are made in sizes from 4″ to 14″. Specify Canada Steel Goods Company Wrought Steel heavy tee and heavy strap hinges.

Have You Ever Tried to Sell Casters?

NOT just match a broken caster but actually sell them?

Casters can be made a money-making item with a quick turnover if you will really get behind them and sell them.

The average householder has both the need and desire for casters that will allow him to move his furniture about without wrinkling and tearing rugs and carpets or marring floors. In other words all the elements of easy and profitable sales are at your hand—your customers are in a receptive mood for buying good casters—and with Bassick Casters on your shelves you can offer them absolutely convincing selling arguments.

A little effort on your part, and Bassick Casters will build up a new, quick-moving, easy-selling item which will add considerably to your yearly revenue. Next time you have a caster customer, don't just give him a caster, but sell him a set of Bassick Casters designed particularly for his specific furniture and floor coverings.

Bassick Casters

Show Your Customers the Big Points of Leadership of the Westinghouse Type H Iron

It is every inch a leader, from the tip of its shiny beveled point to its handy grip plug. The beveled edge, an exclusive feature, permits the user to look directly down on the work; the broad ironing surface enables a greater volume of ironing to be handled more quickly; the ironing surface heats rapidly and evenly; the plug and handle are specially designed for greatest convenience.

You'll find that these are the features women are looking for in irons.

Point them out and you will reap the benefits in an increasing volume of sales.

TRADE MARK GP BRAND

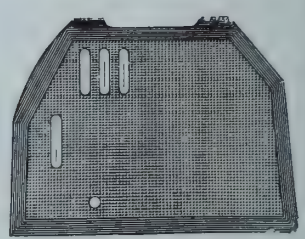
AUTO ACCESSORIES

The Tried and Proven

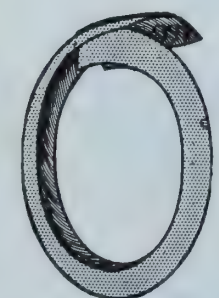
"GUTTA PERCHA" LINE

The Sealtite Patch has advantages over any similar device. In the first place, it sticks tight and gradually the heat of the tire practically vulcanizes it into the rubber of the tube. It is a safe prediction that your customers will always repeat their order for Sealtite because they will find a tube never leaks again where a Sealtite patch has been properly put on.

It pays to keep your line of "G-P" Auto Accessories carefully sorted. A man with a punctured tire on a car out in front of your store doesn't want something you can order for him "in a few days."



Windproof Mats (For Fords). These mats are one of the greatest comforts for motoring. The thin flaps that fit close around the gear and brake pedals and brake lever keep out heat, dust, and the odors from the engine. This mat is patented and only made by the "Gutta Percha" Factory.



"G-P" Reliner. A "lifesaver" when the casing is wearing down. With the Gutta Percha Reliner the motorist gets the very last mile out of the casing. It protects the weak spots and prevents "blow-outs." Never recommend reliners for new casings—they are not meant for them.

"Quality All Through"

—accuracy

In the keen, pushful competition of modern business, there is no time for mistakes.

Mistakes waste time, materials, money and labor.

Mistakes mean lost opportunities, lost business and the loss of prestige, the value of which cannot be computed; every mechanic knows these things.

Butterfield Tools are accurate. Without hesitation you can recommend them to mechanics who want the best.

You can, with confidence, promise your customer that the Butterfield Tool he buys will give him better service than he can possibly expect.

Butterfield Tools are Standard

These tools need no introduction to your customers. Either by reputation or from personal use every mechanic knows of Butterfield Tools.

Stock them, display them, sell them; satisfied users and gratifying profits will result.

The new Imperial Polarine non-returnable steel drums provide excellent storage for your own purposes. They are also ideal packages for passing oil on to your customers in quantity. Drums are constructed of good quality steel and handsomely painted. They come in three sizes, 15, 30 and 45 gallons.

A Line-up For Sales-

If you haven't lubricating oil storage, we suggest that you line up a battery of the new 45-gallon Imperial Polarine non-returnable steel drums. A suitable rack which can be easily constructed will certainly increase your convenience in handling Imperial Polarine Motor Oils.

Such a display will increase the number and the amount of your oil sales, too. The neatly stencilled drum heads are standing advertisements to your customers that you have all five grades of Imperial Polarine on "tap."

Don't overlook the sales possibilities of the attractive Imperial Polarine litho-sealed cans in various sizes to meet your customers' needs. Keep a good stock on hand and have a well-arranged display working for you all the time.

Another suggestion—hang up the Imperial Chart of Recommendations in a prominent place beside this rack and many sales will be automatically made while customers are waiting to be served.

Ask our salesman for your copy of the new Imperial Chart or drop a line to the nearest Imperial Oil Branch and we will see that you are supplied with the Chart and other profitable dealer business-builders.

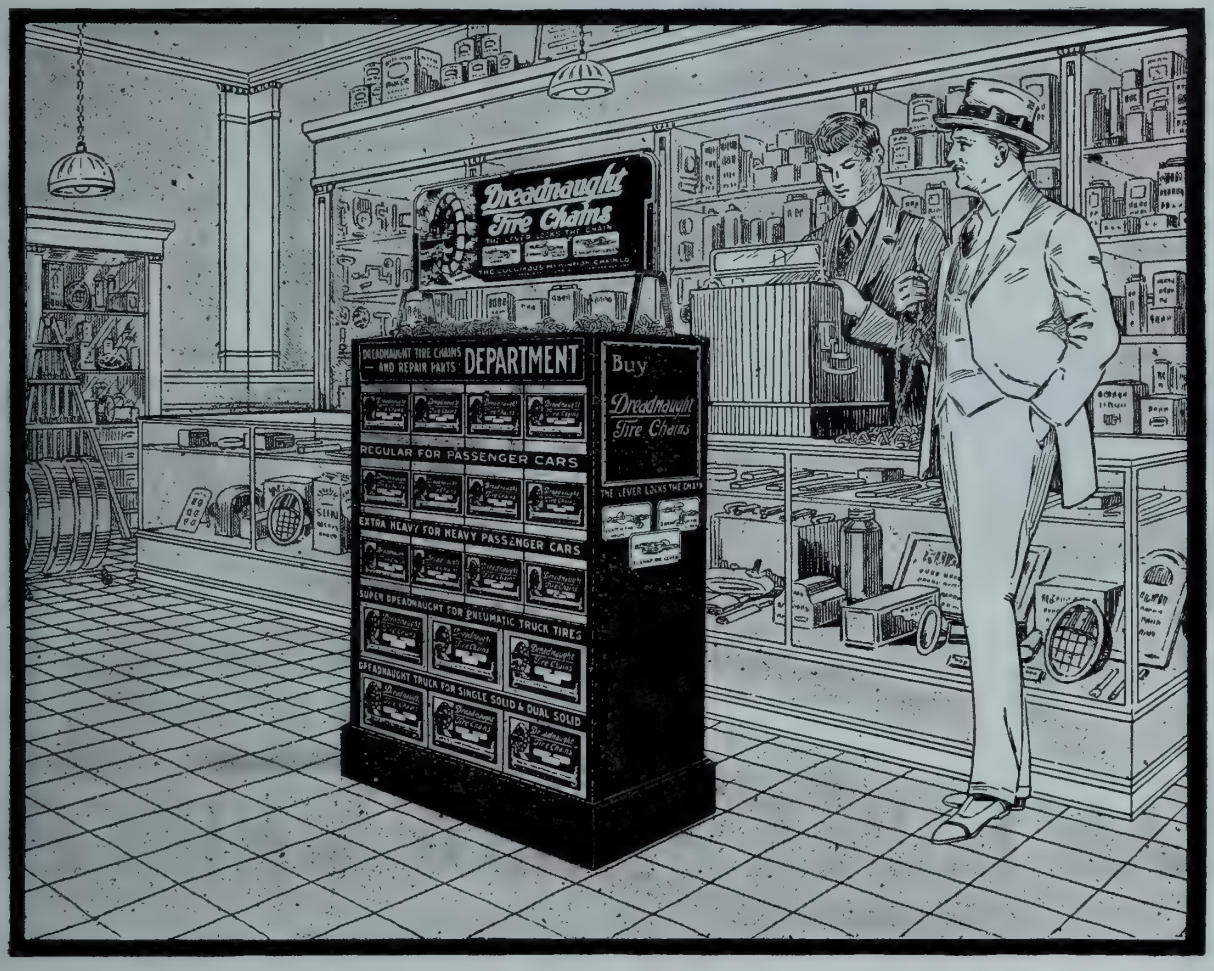
Dreadnaught Tire Chains



For the "Ask'-em-to-Buy" Dealer

Note the attractive container for each set of chains. So strong that the weight of a 200 pound man will not crush it.

"Ask-'em-to-buy and you'll make more sales." So we give every real Dreadnaught dealer, absolutely free, the use of the "Ask-'em-to-Buy" Cabinet.

This compact metal cabinet brings chains up from bins and basements — out of the barrel and the warehouse—from under the stairway and beneath the counter, and puts 'em on display neatly boxed and labeled. It reminds people that they need chains and repair links. It gives the customer a chance to examine the coppered cross chains and the lever fastener. It helps him get the right size and weight for his car—get it promptly. It gives you more chain and cross link business all year 'round. It helps you keep your stock inviting and complete with minimum expense.

You can't begin to make the profits possible in chains and repairs until you get one of these cabinets. You can get it with a very moderate stock order of Dreadnaught chains. Ask your jobber or write us direct.

Dealers have demonstrated that the Dreadnaught "Ask-'em-to-Buy" Cabinet will turn their chain stock three times a year as against the old-fashioned once-a-year method.

2,000,000 Canadian Women Wring their Mops by Hand!

They have electric washing machines, electric stoves, irons, churns, fans and vacuum cleaners, but they still wring their mops in the same barbarous, dirty fashion as did the ancient Egyptians—all because they have not been shown the advantages of a modern mop wringer.

Get Your Share of this Big Business by Stocking and Selling our New WHITE

"CAN'T SPLASH" MOP WRINGER

FAMILY AND JANITORS' MODELS

The New "CAN'T SPLASH" is the most efficient wringer on the market to-day. It fits any pail. A light handle pressure exerts a 400-pound squeeze on the mop. The patented "CAN'T SPLASH" feature prevents dirty water squirting out upon clothes or floor. Mops last five times as long when used in the "CAN'T SPLASH" as they do when used in any other style of wringer. The extensive use of linoleum floor coverings demands mops and mop wringers to-day more than ever before.

We offer effective advertising and merchandising aids which help you

Put "Can't Splash" Mop Wringers in the Big Selling, Quick-Turnover Class of Money-Making Hardware

How Do They Enter Canada?

Seizure of Another Weighing Scale Forbidden by Weights and Measures Regulations Brought About by Hardware and Metal—Inspector Wonders How Scales on Sale by Toronto Medical Supply Firm Got Through the Customs

EDITOR'S NOTE—An echo of the exposures made some months ago by Hardware and Metal in connection with the sale by a large Toronto department store of a baby weighing scale which failed to comply with the regulations of the Department of Weights and Measures, was heard this week when another case was brought to light by Hardware and Metal where a scale of this type was being openly sold at retail in Toronto. Here is the story:

A PROSPECTIVE buyer looking for a suitable scale with which to weigh a new baby visited a number of Toronto hardware stores, where he was unable to secure a scale of this type to weigh by ounces. He was advised by the hardware merchants that a scale of the type he described, and which he had seen in use in the United States, was not allowed to be sold in Canada, due to the fact that it was of the dead-weight spring type and thought to be so unreliable that it was barred by the Department of Weights and Measures.

Continuing his investigations this prospective buyer visited a well-known Toronto firm which deals in medical supplies, selling such equipment at retail. Here he found what he required, namely, a scale weighing by ounces up to 25 pounds, with a large dial face, adjuster and support, to which a hammock was attached for the weighing of babies. It was distinctly of the dead-weight variety, spring scale, the weight being suspended above the dial. It was of a very similar type to the scale which figured in the previous investigation conducted by this paper and which was subsequently rendered unsalable. The scale described has only the name of the maker, a Chicago firm, on the dial. It was offered to the prospective purchaser this week for $11.00 but was not purchased due to the fact that a bar scale at a lower price had been offered in the meantime by another retailer.

One Denied—Other Admitted

Upon the facts being related to Hardware and Metal enquiry was made of Inspector McConvey of the Weights and Measures Department, Toronto, as to why a United States manufacturer who wished to do business with the hardware trade in Canada with such a scale as this was denied permission to bring his product into Canada while two cases had been found where such a scale was being sold at retail in this country by other trades than the hardware.

Mr. McConvey came to the office of Hardware and Metal very much surprised that such a discovery had been made, firmly contending that such a thing was next to impossible. He pointed out that seven years ago scales of that kind were barred from the country and that the system followed by the Customs Department in promptly advising inspectors of any scales coming into the country gave practically air-tight protection against any scales being sold in contravention of the regulations. Asked as to the likelihood of these being some scales purchased more than seven years ago and just now being cleared out it was stated that this would be against the regulations as six months had been allowed after the prohibitory measure was enforced in which to clear out any stock. Scales on hand after that six months' period might be used for ornamental purposes or returned to the makers but if kept in this country they would have to be sealed up or some parts removed so that they could not be used as weighing machines. It was also impossible that these scales had been made in this country because there is no manufacturer producing such a scale in Canada.

The Investigation

Finally Mr. McConvey, accompanied by a representative of Hardware and Metal, proceeded to visit the medical supply firm in question. Entering the store and enquiring for a scale, the manager of the retail store led the way to where the scale in question was on display.

"What is that scale for?" asked Mr. McConvey.

"For weighing babies," was the reply.

"How many of them have you?" was asked.

"This is the last one. We had six but the others have been sold."

Here Mr. McConvey disclosed his identity and continued with further questioning to which answers were given in nervous succession by the much perturbed store manager.

"How long have you had them and where did you get them?" asked the inspector.

"We have had them for about thirteen months and we bought them from a salesman representing the manufacturer."

"Do you know it is against the law to sell such a scale?" enquired Mr. McConvey.

"The salesman from whom we purchased them said that he had been to Ottawa and fixed the matter up," was the reply.

Scale is Seized

The scale was immediately seized by the inspector and taken away, after advising the firm that subsequent action would be taken by the Federal authorities at Ottawa.

Predicts Fuel Shortage and Higher Prices on Steel Products During Coming Winter

Burning of All Coal in Centralized Plants and Gas Supplied for Heating Purposes—Fuel Shortage Will be Real Opportunity for Gas Companies—Will be Sold as so Many B.T.U.'s to the Dollar —Little Likelihood of Electrical Heating

Special representative's report on address of FLOYD W. PARSONS, industrial investigator, before convention of Gas Association of Canada in Hamilton, Ont.

HOUSES heated entirely by gas, locomotives operated exclusively by electricity, banishment of soot and ashes from the atmosphere and streets of the cities; burning of all coal in centralized gas plants, where every available atom of energy can be derived from the fuel, and where by-products can be properly controlled and collected; this was the picture which was painted for the future by Floyd W. Parsons, New York fuel expert who addressed the annual dinner of the Canadian Gas Association in Hamilton, Ont., this week.

Tension in the fuel situation, which is very real, in spite of everything which the newspapers say to the contrary, is one thing which will hasten the adoption of such a system of heating and power supply, the speaker thought. His address was as follows:—

"We have traveled a long way from the spinning wheel, the stage coach and the log fire. In those days each man shifted for himself. If I were to describe the present age, I would refer to it as the 'gas age.' The atmospheric gases will be used, not only to support our mode of travel, but will also supply oxygen and nitrogen, of which we now use but a small part.

"The future of manufactured gas is as assured as the longevity of the motor car. As surely as one assigns to the scrap pile the worn-out machine, so will the days of the future be the gas age!

"Waste of fuel, as sooty smoke, must stop. This process is inefficient. Fuel will soon be supplied as gas only. Let us at once dismiss all raw materials but bituminous coal," the speaker said. "Anthracite and similar substances are luxuries in the gas business.

Forecasts Fuel Shortage

"In spite of all that has been said to the contrary, I am sure that the coming winter is going to be one of unprecedented distress from the fuel point of view. But gas manufacturers here, as in the United States, will get coal. They get first call, but the price will be high. There should be a temporary measure to secure relief from contracts and franchises. I was amazed to read in newspapers to-day the statement that owing to re-opening of mines in New York state all our fuel troubles are over. This is nonsense. The situation is such that most industries will be handicapped this winter to a decidedly great extent.

Steel Is Going Up

"Prices are on the upward trend. Everything is going up, and no product will feel the jump more than the steel business. Small steel manufacturers will take advantage of the state of the market to jump their prices.

"It is for this reason that I have been advising the purchase of coal by manufacturers. I think I may take credit for the statement made a short time ago that gas manufacturers in the United States had a supply of coal to last 51 days.

"Buy all the finished and unfinished steel you can, if you are likely to need it. Don't forget that it takes four tons of coal to make a ton of steel, hence prices must rise.

Will Burn Soft Coal

"A result of the forthcoming winter is going to be a change in the minds of the people. They will have to use soft coal, because no matter what happens in the meantime we are going to be short 30,000,000 tons of anthracite. The soft coal which will have to be burned is going to mean a financial loss owing to the smoke nuisance, as well as a bad thing for the public health.

"Women who have been used to burning hard coal will have to use bituminous coal. You cannot shut out the soot, even if you clamp your windows, so it is this situation of which the gas manufacturers will have to take advantage in teaching people the advantage of burning gas rather than soft coal.

"The real future of the gas industry will not be assured until the people realize that the burning of raw coal is wrong, wasteful, uneconomic. Coke and gas are what should be used. If you could introduce these two into the homes you could never bring back the burning of anthracite. The only thing which prevents this development at the present time is the high cost of manufactured gas. You may think this an insurmountable obstacle, but I am convinced that present conditions will introduce within a few months cheaper methods of making gas.

"A cheap process is now working successfully in Germany, and the plan is being examined for application to this country.

Abandon Old Ideas

"Use of a gas of a lower calorific power will become popular, in spite of fancied objections," Mr. Parsons reports.

"Gas will be sold as so many British thermal units for a dollar.

"We have a huge supply of electrical current, white coal, but all of this will shortly be used up for power in the industries. Gas is the coming heating medium.

"Companies may sell electrical power for next to nothing just now, but the situation is entirely temporary. Electricity at one cent per kilowatt hour, a very low rate, is the equivalent of coal at $40 a ton.

Electricity Not a Fuel

"Put a whole city on electrical cooking, and your entire electrical plant will have to be remodeled. As for heating houses by electricity, the idea is preposterous.

"Initial expenditure is against the use of electricity anyway. For the average 6-roomed house, your electrical heating equipment would cost as much as the house itself.

"The only necessary improvement is the increased efficiency of gas manufacture and distribution. Attention will have to be paid to long-distance transmission.

"As far as long-distance transmission is concerned, oil can be shipped long distances in pipes, so why not gas? Natural gas can be shipped for 300 miles at a pressure of 1,000 pounds to the square inch, so why not the artificial product, too?"

What Customer Looks for in a Stove

Hardwareman Makes Some Enquiries and Finds Out Chief Points Which Stove or Range Must Have to Appeal to Certain Customers —Cultivating the Community Stove Prospects—How to Get a List of Live Prospects

THERE is no time like the present to put into effect plans for the sale of stoves, ranges and heaters during the fall season. There is a more buoyant spirit of optimism prevailing throughout the country which is a much better foundation for stove selling than for some years past, and many new ones will be purchased this fall by those who have been unable to do anything but repair old ones during the past few years. Here are some pointers on stove selling as gleaned from interviews with hardwaremen and which are particularly applicable to sales at this time.

A hardware dealer who has one of the most prosperous stove departments in the country is always on the lookout for genuine expressions of the mind of the folk.

The other day he had occasion to call at a certain office and while waiting to transact his business, fell into conversation with the young lady at the reception desk and said to her:

What They Look For

"What does your mother look for when she buys a stove?"

Without a moment's hesitation she answered:

"My mother wouldn't look at a stove unless it was a good baker."

Further conversation revealed the interesting fact that her mother did not care how many doodaddles the stove had or what kind of ornaments, whether it had rounded corners or square corners, or whether it was made of cast iron or of monel metal.

She wanted a stove that would do good baking.

And the stove dealer who could fool her into taking a stove that would not do good baking would have to lock up his store, and keep traveling until he hit the north pole if he wanted to avoid the wrath of this lady who insisted on having the right kind of a stove because she could not be deceived.

He might talk her into having the stove delivered and set up, but if it didn't perform properly, if it did not enable her to do good baking—and incidentally she is an artist in baking—she would not allow it to remain in her house.

He says a dealer in stoves has certain obligations to the public.

If you are going to stay in business you must honestly and continuously serve your patrons.

You are in business to make profit, it is true, but you are also in business to minister to the wants of the people.

Hence, it is a thing of utmost importance for you to select a line of kitchen ranges which has the reputation for uniform excellence and unvarying satisfaction.

Of course, cases will arise where the stove itself is not at fault.

Now and then a newly wed spouse lights the oven of a kitchen range for the first time in her life.

She follows the direction of the domestic cook book blindly and without understanding.

She may forget to put in some essential ingredient or let the oven get too hot or open the oven before the right time, and ruin a batch of biscuits, or a cake, or a pie.

That's not the fault of the stove nor is it your fault.

But with comparatively few exceptions, most people can do good baking with a good stove.

Cultivate Prospects

Some prairie hardware merchants tell means by which they are planning to develop business in stoves and ranges this fall. One merchant gives the following advice:—Cultivate to the full extent the possibilities of your trade territory if you wish to increase the volume of your stove sales.

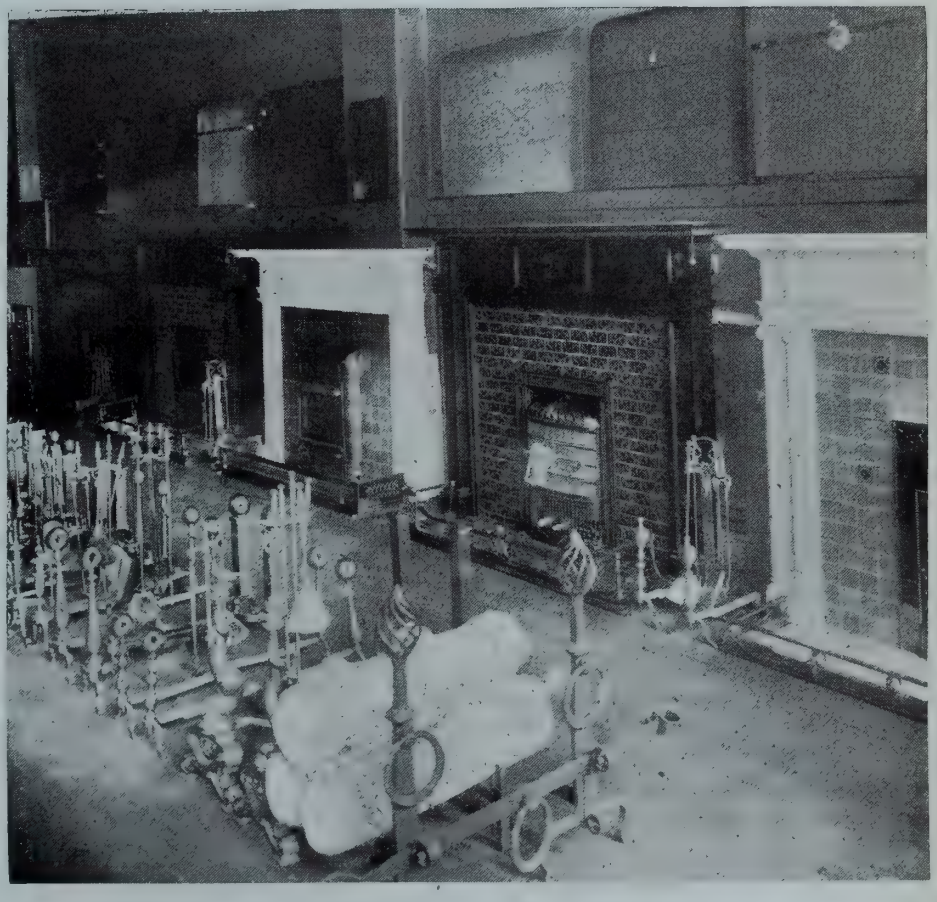
Analyze what this really means in terms of business.

Suppose that you had a farm of forty acres.

Your harvest returns would be very scant if you planned ten square feet of crops in every acre.

If, in addition to planting only ten

Soon Time for Fireplace Fittings



A variety of fireplace furnishings which lend themselves to attractive display and are to be found in many hardware stores are shown herewith in an interior arrangement by James Walker Hardware Co., Montreal. A number of mantels are on display, surrounded with fire irons, fenders, screens, logs, etc. Nine mantels are shown down one side of this display room.

square feet of every one of the forty acres, you did nothing to aid the growth of the crops, you would gather little more than weeds at the end of the season.

Sales grow only as the result of constant attention to their development, just as crops grow only as the result of continuous care and cultivation.

Your trade territory is your field of operation.

How much of it do you cultivate with such excellent implements as the comprehensive mailing list, circular letters, window displays, newspaper advertising, and personal solicitation?

For the sake of illustration, take the four square blocks in which your store is located.

How many people in these four square blocks have old stoves or ranges which are nearing the end of their usefulness?

How many families in the four square blocks can be persuaded to replace old equipment with new and improved stoves and ranges?

In this area of your territory there may be engaged couples who are planning to live somewhere within the four square blocks and to set up housekeeping in the near future.

They will need stoves and ranges.

Will they buy such stoves and ranges outside of your territory at some department store, or at your establishment?

What are you doing to induce them trade with you?

Getting a List of Prospects

If you watch the local newspapers carefully and keep in touch with other sources of neighborhood information, you will be able to get at least 90 per cent. of the names and future addresses of the soon-to-be-married couples in your trade district.

Through such channels as your church, lodge, and community society membership, you can get in touch with many of these prospects for personal interviews with regard to requirements for their new homes in the line of stoves, ranges, and other hardware.

The local real estate offices in your trade territory are another source for information during the weeks preceding the renting seasons, which are usually in May and September.

Here, then, is another way in which you can add to a list of prospective buyers of stoves and ranges.

"Co-Operation Takes Away the Element of Competition in Business"

Henry Watters, Treasurer of the Dominion Retail Merchants' Association, Speaking on Merchants' Day at the Canadian National Exhibition, Declares That Competition is Necessary to Develop Efficiency in Business

TORONTO, Aug. 30, (Special).—Henry Watters, of Ottawa and treasurer of the Dominion Retail Merchants' Association, was the principal speaker at the directors' luncheon at the Canadian National Exhibition today, the occasion being Merchants' Day. The attendance of retailers was very large, the seating capacity of the dining room being taxed to accommodate all desiring to attend.

"I feel it an uncommon compliment to be invited to speak on this occasion," began Mr. Watters, "and I take the opportunity to thank the directors for allotting a special day for merchants, so that the retailers of the country might have a chance to meet together at this Fair, to share views one with the other. It was a happy thought that designated a day to the agriculturists, a day to the manufacturers, to transportation and to the retail merchants. These I think represent the great factors that go to make up the industrial fabric of the country. Not one is entitled to pre-eminence over the other.

All Interests Must be Represented

"Where would the agriculturists be without the transportation, without the manufacturer, or without the system of distribution to the consumer? There is no more reason why we should have an agricultural, occupational group governing the country or any section of the country than we should have a retail group doing it. If we are to have a stable, responsible government, all interests must be represented. Any attempt to introduce into the administration a system of group interests is fatal to all responsible government.

No Idea of Social Conditions

"With all that has been said in regard to immigration here to-day, I am in hearty accord. We must go slowly. We have foreigners coming into the country who have no idea of social conditions prevailing, and who enter business ready to work any and all hours, twenty-four in fact, if customers will come. Canadian merchants find these foreigners an impediment, for the reason that they do not readily conform to our social customs, including limited hours of work, but whose only idea is to make the dollars. We want immigration from the same stock from which came the men that have made Canada what it is to-day. We do not want the immigrants that cannot be assimilated into our ideas.

"Co-operation as against competition in business is a subject that is uppermost at the present time. I am not an opponent of co-operation, but if one is looking for the marked success, one cannot look better than in the men engaged in the competitive field. All high types are developed in competition. It makes for a high standard of efficiency. Co-operation takes away that element of competition, that is valuable to business."

Continuing, the speaker denounced the "price cutter," characterizing him as an anti-social member of the community who should not be encouraged. He quoted the professor of economics of Harvard University, who, he said, declares that cutting of fair, normal prices is opposed to the general interests, and the people must make it up in some way.

"WEED'S CREED—If you can get it elsewhere for less, return it. We'll buy it back at full price"

NOTICING the above statement printed on the back of the counter check slips used by Weed & Company, hardware firm of Buffalo, N.Y., some enquiries were made by Hardware and Metal concerning its value and the possibility of difficulties which might be encountered in living up to such a policy. Discussing the subject, Sheldon Weed, president, stated that this creed was adopted some fifteen years ago and while at first they thought it might result in their being taken advantage of, they considered it would help establish confidence in the fairness of their prices.

"We must say it has had the desired result," said Mr. Weed, "and in very few instances have any unjust or unreasonable claims been made upon us because of this creed or guarantee.

"It had always been our custom, if for any reason whatsoever a purchaser desired to return the merchandise, to refund the amount of the purchase. Therefore, when we adopted the creed we only gave more publicity to a custom that has been in force for many years.

"You comment that you should judge that this might lead to some price cutting, but while we endeavor to keep our prices fair and right at all times and this creed makes us more careful along this line, yet we do not believe it has any effect on the cutting of prices."

"Dollar Day" Clean up of Summer Odds and Ends, Electrical Goods for Sept. Bride Gifts

SEVERAL Dollar Day sales are in progress among retailers in various parts of the country and reports coming to Hardware and Metal indicate that such sales have been particularly effective in cleaning out odds and ends of stock left over from summer sales. The experience has been that many people are bargain hunting to-day whereas formerly they paid little attention to the price. To these people such sales are a distinct help and incidentally they clean the shelves of the store of stock which otherwise might lie around until another summer when the charges for overhead expenses against them would have been much larger than the margin of profit that could be secured.

A glance over the Dollar Day ads shown herewith indicate a wide selection of lines suitable for such a sale. The ad by W. H. Thorne & Co. Ltd., St. John, N. B., represents a very broad list of such articles. The ad by F. W. Inman, Dundas, Ont., illustrates electric lamps, irons, spark plugs, auto jacks, kitchen utensils, tools, etc. The ad by the Woodstock Hardware Co. deals with screens, baseball goods. coaster wagons, paint, hammocks, lawn mowers, footballs, lunch kits, etc.

For the September brides, some ads might be used dealing with suitable lines for showers and wedding presents. An ad shown herewith by Ingram & Davey, St. Thomas, Ont., illustrates a number of suitable lines including electrical, china and cutlery lines stating "Usable gifts are most acceptable. The bride of to-day thoroughly appreciates receiving a gift of every day need and usefulness—a gift that will bring many years of comfort and convenience—that's the kind of wedding gifts that are popular now and this store is crowded with hundreds of practical gift suggestions—articles that many a bride of former years would also be pleased to receive. This store has provided carefully and the assortments offer almost unlimited choice—choose wedding gifts here and be sure to please the bride."

The ad by Brockville Hardware Co. deals with an end of August clearing out sale which might be duplicated early in September. It deals fith refrigerators, ice cream freezers, lawn mowers, electrical goods, oil stoves, lawn swings, etc. The ad makes a special appeal for telephone orders stating "Very likely there are times when you need hardware or housewares in a hurry and are unable to get down town. Just remember that we are always ready to attend to your phone order promptly and that you will receive the same satisfactory service as if you came to the store."

Another feature of the ads of this firm is the little editorial which in this case deals with confidence, stating:—"Every purchase made at this store carries with it an insurance policy against dissatisfaction. We value the confidence of our customers above all else and earnestly strive in our business efforts to merit it. This is a store where hardware, housewares and auto accessories can be purchased with safety and pleasure."

CATALOGS

Meakins and Sons, Ltd.. Hamilton, Ont., are preparing their 1923 brush catalog for distribution to the hardware trade after the middle of September.

"Cleaning up" with

O-Cedar Polish

NOW comes the big Fall "clean-up."

Fall "*house*" cleaning with the women.

Fall *profit* clean-up with the merchants.

And, since women use quantities of O-Cedar Polish in the course of their Fall cleaning, *you* can count on O-Cedar to bulk largely in your September—October profit-taking.

Bottle Sales *Versus* Tin Sales

At this season no dealer should be content with **"bottle"** sales of O-Cedar. It's easy to sell it by the tin.

With the average customer, it is merely a matter of making the suggestion.

Say to her:

"A quart tin contains 9½ times the Polish of a 4 oz. bottle—and yet the price is only 5 times as much. There is an even greater saving when you purchase by half-gallon or gallon tin."

She will readily see from this, the economy of purchasing by the tin.

It is by such suggestions that a merchant increases his turn-over.

"More volume" is your aim—go after it by selling goods in quantities where possible.

O-Cedar is one product you **can** sell in quantities—especially at Fall House Cleaning Time.

Retail Prices: O-Cedar Polish in Bottles, 30c and 60c. In Tins, $1.50, $2.50, $3.50.

O-Cedar Polish Mop, large size, triangular shape, $2.00.—O-Cedar Dusting Mop, large size, triangular shape, $2.00.

O-Cedar Polish Mop, small size, triangular shape, $1.25.

For the Man Behind the Counter

As Your Customer Sees You, Mr. Salesman

Average Customer "Takes In" the Salesman Thoroughly—Habit of Being Neatly Attired Creates Favorable Impression and Gives Salesmen More Confidence

Written for Hardware and Metal by A. G. KEENEY

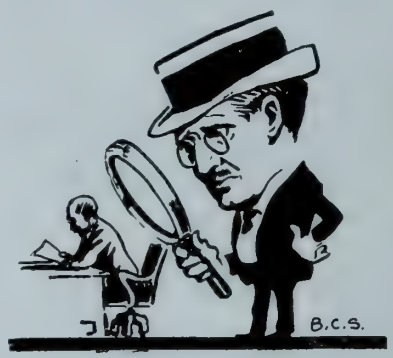
THE hardware salesman coming forward to greet a customer undergoes a swift but thorough inspection, whether or not he realizes it. Although he frequently does it unconsciously, the average customer almost invariably "takes in" a salesman thoroughly. The customer's eyes rove from the salesman's head to his feet. The suit may be neatly pressed, the linen spotless, hair neatly trimmed and combed and the face smoothly shaved, but if the shoes are unshined the customer's impression of the salesman is unsatisfactory. In fact, the good points of the salesman's appearance are frequently forgotten because of the unshined shoes.

Personal appearance, then, has an important influence upon the salesman's ability to make friends for himself and for his employer. A slovenly appearance causes a customer instinctively to regret having encountered a salesman possessing it, and this regret frequently includes the store itself. A customer's initial impression of a salesman often has much to do with his becoming a permanent customer of a store.

This habit of being neatly dressed has the double effect of creating a favorable impression upon customers and of imbuing the salesman himself with a feeling of confidence and self-respect.

Fostering Self-Respect

No salesman is capable of doing his best work when he is painfully conscious of frayed cuffs, a soiled shirt or unshined shoes. In order to make his best sales a salesman should be able to undergo a strict inspection without a moment's notice. This does not mean that the salesman's clothes need be of the species termed "snappy," or "loud," nor do they need to be expensive. Modest dress in the average store is most desirable, for no customer expects a salesman's salary to justify him in spending several thousands of dollars annually on his wardrobe. One salesman of my acquaintance sometimes finds it necessary to wear the same suit six days in succession, yet he reports for work every morning with clothes neatly brushed and pressed and his self-respect intact. No customer has ever resented the fact



that this salesman wore the same suit all week. In fact, the salesman's ability to present a prepossessing appearance despite his small wardrobe has been a point distinctly in his favor. Ability to dress neatly at small expense is a recommendation for this salesman and for all others of his type. It indicates that he wants to present a neat appearance and will not permit his slender purse to interfere with his desire.

A Novel Scheme

A group of retail salesmen recently conceived the novel idea of "taking inventory" of each other. Equipped with notebooks and pencils the salesmen critically inspected each other with the announced intention of assisting each other in correcting any shortcomings that might lower their efficiency as salesmen. Few of the group realized what the ultimate results of this little "inventory" would be.

It was agreed that points should be allotted in this fashion:

Suit	25 points
Shirt	10 points
Collar	10 points
Necktie	10 points
Shave and haircut	30 points
Shoes	15 points

After notes had been compared it was found, much to the chagrin of the majority of the salesmen, that none scored 100 points. Of the group of twenty better-than-average salesmen, only one scored 90 points. This salesman's personal appearance and his attire proved generally acceptable, he being docked 10 points because he wore a loud necktie! The majority of the group registered around 75 points. Two fell as low as 60 per cent.

Highest Salesman Most Popular

One of the most significant features of this friendly "inventory" was that the salesman who scored the largest number of points was unanimously conceded to be the most capable and most popular salesman in the store. The two salesmen who received the lowest marks were admittedly the least efficient.

The fact that this little plan was evolved without notice being given the salesmen in advance tended to make it all the more reliable as a standard whereby to gauge the "stock in trade" of the men inventoried. The salesmen appeared that day just as they appeared every working day, and it might be added that this little "inventory" proved a happy thought. It resulted in converting these salesmen into neater men and, what naturally follows, more efficient employees.

Think They Get Small Salaries

A staff of slovenly appearing salesmen gives a store a black eye, in that customers are prone to gauge a store by the appearance of its sales force. If the salesmen present a poor appearance, customers naturally decide that their employer pays them small salaries because they are worth no more. People like to trade at a store that is prosperous, and the only means by which the average customer can judge a store's prosperity is by inspecting its salesmen.

Personal appearance either attracts or repels customers and few salesmen ever have a second opportunity to correct a false impression once formed. The salesman who has the interests of his employer at heart will inspect himself thoroughly and unsparingly with a view to correcting his shortcomings as regards his personal appearance. In order to promote his own interests, as well as those of his employer, every salesman sooner or later will find it advisable to take a personal inventory.

Lack of ability to make friends easily can be attributed frequently to poor personal appearance. This fault corrected, a salesman's chances of achieving his ambition are vastly increased.

H. N. White, credit manager of Wood Vallance & Adams Ltd., Calgary, has returned from a visit to his old home in eastern Canada.

Distinguish "Shop Goods" in Explosives

Recent Cases of Unlawful Possession of Certain Explosives Reported by Authorities—Say Manufacturers Should List "Shop Goods" Separately From Other Fireworks

By Ottawa Representative of Hardware and Metal

A CASE of no little interest to the trade has just been dealt with in Winnipeg, and the facts supplied to Hardware and Metal by the chief of the Explosives Branch of the Department of Mines at Ottawa. Wing Yuen and Company, a Chinese merchandising firm, appeared before the police magistrate in Winnipeg on a charge of being in unlawful possession of Chinese basket bombs, which explosives had not been authorized by the Explosives Act. Upon pleading guilty the firm was fined fifteen dollars and costs and the bombs were confiscated.

The explosion of such bombs is a violent one and the danger to the public, arising from the force of the explosion, is augumented by flying pieces of bamboo which encase the explosive. For such reasons their importation has been prohibited. Under the operation of the Explosives Act, endeavors have been made to stop the importation and use of several fire-works which, while formerly freely sold, constitute a real danger in the hands of inexperienced persons. In this connection, mention might be made of the firecrackers commonly known as salutes, the explosive of which contain chlorate of potash. These have been prohibited, but some have recently been submitted and authorized, which ones contain a suitable composition in a limited quantity.

Distinguish Shop Goods

The most notable of the firecrackers which have been prohibited are: "Spit devils," "Son of a gun," and "Devils of the Walk." These contain phosphorus in their composition as well as safety torpedoes with a chlorate composition.

Some rather pointed remarks on the subject were made by Lt. Col. Ogilvie, chief inspector of the Explosives Division. He said in part:

"While any authorized manufactured fireworks may be kept for sale or other purpose subject to regulations governing their storage, attention may here be drawn to the distinction that is made between those classed as 'Shop Goods' and those not so classed. Those referred to as shop goods include in general the fireworks which are made with a view to sale to retail dealers. Fireworks which are not classed as shop goods are generally of a more powerful character and include many, which, while suitable for display purposes and when used under the control of responsible parties and handled by men accustomed to such work, can hardly be regarded as desirable goods to put in the hands of children. Such fireworks are, however, obtainable by retail dealers and, provided of course they are authorized fireworks, they may, without contravention of the Explosives Act, be kept subject to observance of the conditions as to storage prescribed in the regulations.

Have Caused Restriction

"I think that to the presence in retail stores, of some of these fireworks of a more violent character, and to the consequences of their sale to irresponsible youths, may be attributed, in part at least, certain of the restrictions that have been placed on the sale or discharge of fireworks in some municipalities. Whether this is so or not, an appreciation of the distinction which we endeavor to draw in making this broad classification of fireworks, may be of some value to those authorities and others who may be interested in the keeping of fireworks for sale. For this reason, and in view also of the inability of the many retail dealers to discriminate between shop goods and other fireworks, it is suggested that it would be of assistance to all parties if manufacturers, in their catalogues were to list their shop goods (as so classed by us) separately from their other fireworks. Wholesale dealers could then readily make their lists conform, and not only would all retailers know how their goods should be stored to meet the requirements of the Explosives Act, but the officers of local or other authorities would be able to readily ascertain what class of fireworks was kept, and if properly kept."

G. McClure, buyer for the Manitoba Hardware and Lumber Co. of Virden, Man., was a caller at the J. H. Ashdown Hardware Co. He reports crops better than for years, which stimulates business to quite an extent.

What do You Think of This Window?

A REPRESENTATIVE of Hardware and Metal on a recent trip to the Maritime Provinces spent an evening in a small New Brunswick town. He noticed a store window in which there was a very miscellaneous assortment of articles and proceeded to make a list which is reproduced herewith. One of the chief features of the window arrangement was the hit-and-miss way in which the articles were grouped, which indicates the hopeless chaos which can be achieved by sloppy window dressing. Fortunately such windows among hardwaremen are very much the exception, in fact almost impossible to find. Here is what was in this window and how they were grouped together:

- Curry comb next to bread knife.
- Violin string saddle next to dairy thermometer.
- Paint brush next to towel rack.
- Paring knife next to harness snap.
- Spring screen door fastener next to fish line.
- Umbrellas next to patent window lock.
- Door knob next to dressmakers' tracing wheel.
- Dry cell batteries next to vinegar barrel tap.
- Safety razor next to barn door bolt.
- Whitewash brush next to carpenter's gauge.
- Pair of hammock hooks next to whetstone.
- Fishing rod next to syrup barrel tap.
- Violin strings next to rings for pig's nose.
- Mouth organ next to patent soldering outfit.
- Carpenter's draw knife next to egg beater.
- Silver table spoons next to auto engine gas priming cups.
- Saw setter and wood hatchet next to spark plug and battery tester.
- Automobile oil can next to can of Sani-Flush.
- Bunch of carpet beaters next to couple of men's and women's raincoats.
- Set of steel plates for men's shoe heels next to can of floor paint.

The Only Weekly Hardware Paper in Canada

PUBLISHED EVERY SATURDAY SINCE 1888 BY

The MacLean Publishing Company, Limited

Montreal TORONTO Winnipeg

TORONTO, SATURDAY, SEPTEMBER 2, 1922

Visit the Exhibition

THE Canadian National Exhibition now being held in Toronto and continuing until September 9 represents an assembly of merchandise and ideas which would do every retail hardwareman in Canada good to examine. Those located a distance from Toronto are unfortunate in being unable to conveniently attend this big fair each year, but those within comparatively easy reach should take advantage of the opportunity before this year's Exhibition comes to an end. This annual event is fast growing in importance and the day is not far distant when it is expected it will be the annual World's Fair with exhibits representative of all parts of the world.

At the Exhibition the retailer will find exhibits of merchandise similar to that he is handling in his store and he will find new ideas for display and the selling of it. He will investigate the processes of manufacture of many of these lines, thus securing an intelligent knowledge of them to assist in selling. He will find himself in contact with social and business intercourse of a kind unknown in his home town and this is conducive to the broadening of ideas.

Every retailer will benefit by the recreation provided by a few days' visit to the Exhibition and the combination of business with pleasure on such a broad scale is offered by no other such event in the year. There is a week left yet this year.

Unsettled Condition in Steel

WHILE the situation in regard to the coal and railway strikes seems to ebb and flow from day to day, it is quite evident that the wage advances being made and higher prices on coal will bring nothing but advances in iron and steel. On the assurance of increased coal production President Harding has put coal on a priority basis, giving it precedence in transportation over food products. This should help relieve the shortage existing in many industries, though it is held by some that satisfactory conditions will not be restored before the end of the year. Speculation is now on as to how much of a check the higher prices on steel will provide. The extent of the increase may be speculated on the basis that the steel industry instead of drawing upon its surplus to pay the difference between old low-priced contracts still to be filled and the high costs under which the orders must be filled, will advance prices to the possible limit to make profits out of steel the consuming industries are still willing to buy. It is likely to be a period of moderate profits and uncertain operating costs.

Standardization of Hardware

STANDARDIZATION of products is a subject which has received much attention recently at the hands of hardware and other manufacturers and retailers have lent their support to progress along this line. Customers are "shopping" for best value and manufacturers have not overlooked the advantages of simplification in production as experienced during the war. In this connection some of the work of the Commercial Economy Board of the United States in dealing with hardware products is of interest.

It deals with the fact that paint manufacturers were induced to reduce the number of shades in each line of paint, varnishes and stains, and also to eliminate certain sizes of cans. The half-gallon and pint cans were dropped, but were reinstated after the war-time emergency was passed. One large paint company discontinued 44 colors in paints and enamels, and 14 colors of varnishes. The company in question found that it was possible to do as much business as before without making these extra lines. They were able to reduce their stocks in 48 warehouses, and also to reduce the stocks on their dealers' shelves. The large assortment of paints that was left gave consumers a splendid variety of colors from which to make their selections.

Since the price trend in paints and varnishes has been downward recently, it might be fair to assume that a policy of reduction and rigid standardization of colors has helped toward cheaper prices to the consumers.

A large manufacturer of builders' hardware took steps some time ago to have these lines standardized. Details were worked out by the leading manufacturers and architects. As a result of the investigations it was found possible to eliminate many items of hardware that were special to a certain extent. The object was to bring down the manufacturing cost and to enable the carrying of standard hardware in stock so that shipments could be made promptly.

A manufacturer of refrigerators discovered that the various parts, fittings and trim of refrigerators could be made interchangeable, making a very substantial saving.

A manufacturer of sharp-edged cutting tools decided to standardize his lines, cutting the number of axe patterns from 27 to 12. This was followed by satisfactory results. Dealers were ready to accept this standardization when the matter was explained to them. The retail dealers objected strongly to cutting a line of pocket-knives from three rolls to one, and the company had to go back to the three-roll assortment again.

A flashlight company has successfully standardized the flashlight battery business by making two sizes of unit cells which practically take care of the entire line of flashlights, for its own make and for any others. Dealers need to carry only two sizes of batteries and the length of desired size is provided for by placing two or more units together.

The result of standardization is that the dealer need not carry as many lines as formerly, obviating carrying charges on a great deal of dead stock. It is thus possible to offer goods to the consumer at a smaller margin of profit, benefiting all branches of business from manufacturer to consumer.

Editorials in Brief

THERE WAS a splendid increase in steel production in Canada in July despite fuel shortage and it is evident that splendid records would have been set in subsequent months if the strike situation had not taken such a turn for the worse as it has since July. The output in June was 32,805 tons, while in the month of July 62,767 tons were produced, constituting an increase of 91 per cent. The advance occurred chiefly in the open hearth basic ingots produced for further use.

Mix 'Em Right and You Get Profits

Why a Retail Business Is a Chemical Laboratory That Compounds Profits

or

How the Mixture of Retail Methods May Make Profits, Losses or Trouble

THE cartoon pictures for you a wise retailer—a man who understands that the retail business is a chemical laboratory where the merchant is a chemist who must carefully and accurately weigh and measure out the chemicals called Accounting, Advertising, Service, Display and the like to produce the mixture called Profits.

Much depends on the amounts and methods of mixing. For example, a good mixture makes Profits, while a poor one would result in Disaster. The store that used much Advertising and no Fairmarkup would of course be mixing its chemicals to make Disaster. The establishment that would mix Dishonesty with Noservice would be producing Trouble. Whereas the establishment that uses any or all of the following ingredients and mixes them in **proper proportions** cannot fail to make Profits. Study the list carefully:

Accounting system	Fairmarkup	Concentrated buying
Store meetings	Knowledge of goods	Prompt service
Display	Reading trade papers	Courteous service
Advertising	Knowledge of overhead	Joining trade bodies
Store arrangement	Turnover	Inventory system

To begin with, every establishment should have an accounting system. It is not always necessary to install an elaborate plan. That depends on the size and character of the business, but every retailer must know his daily progress, his receipts, his profits, his turnover, and so forth, and cannot be successful if he does not have a system that gives that information.

And there must be a proper proportion of advertising, a goodly and attractive amount of display, a maximum of efficiency and convenience in store arrangement. These are all among the chemicals that a first-class retailer-chemist will employ.

Fairmarkup is an important—even vital—ingredient. No business can turn out Profits without it. And don't forget that Fairmarkup has a lot of basic properties that must be included, such as rent, light, wages, advertising and other costs, as well as a fair return on the invested money and effort.

The reading of trade papers, membership in trade associations, attendance at conventions, good service and prompt service are all chemicals that will help to produce a bigger, more powerful portion of Profits. In your trade papers, among your associates, and at your conventions you will find ideas that will show you much about your advertising, display, turnover and general store arrangement. And the giving of service—prompt and courteous—is of course such a well-known part of Profits that no space needs to be spent on it here.

Note well the one ingredient—Concentrated buying—that is an important chemical and it must be **concentrated.** By concentrating your buying you make it more powerful, more influential. You give it strength. You make yourself an important person among your few wholesalers instead of being a minor individual among many concerns.

Study the entire list of ingredients thoroughly. Learn all you can about each. Get down to basic properties and basic principles. Study each, analyze your store and community and decide how much of each should be prescribed for **your** mixture of Profits.

Events in the Trade

BUSINESS CHANGES

Campbell's Bay, Que.—A. J. Rongier, hardware, is selling out.

Glencoe, Ont.—F. L. Charlesworth, has sold his hardware business to W. Cummings & Son.

St. Thomas, Ont.—The Ross Street hardware store of A. E. Campbell, which has been purchased by Frank N. Barrett, is closed for stock-taking. Announcement of the re-opening will be made shortly.

NEW FIRM

Quality Hardware and Electric Store, G. W. Collins, proprietor, has commenced business at 224 Greenwood Ave., Toronto.

TO OPEN NEW STORE

N. C. Baiden is preparing to open a new retail hardware store at 2266 Bloor street W., Toronto, on or around September 15. Mr. Baiden for some time past has been manager at the city office of Lyons & Marks, wholesale hardware specialties, Toronto.

FIRE LOSS

Hamilton, Ont.—Fitzgerald and Kent's builders' hardware warehouse at 232 King Street east, was damaged to the extent of $5,000 by fire.

INCORPORATION

The Canada Fence Co. Ltd., capital $1,000,000, head office Toronto, to manufacture and deal in iron, steel, copper, to operate foundries mills, wire mills, wire rod mills, wire fence mills, for the production of fencing and fence products.

DEATH OF J. FENNELL

The death of John Fennell, founder of the hardware firm of J. Fennell & Son, Kitchener, Ont., removes one who has for many years been prominent in hardware circles. This was one of the early hardware businesses founded in Western Ontario and has not only enjoyed a prosperous retail trade but has in recent years entered upon the wholesale end of the business. Mr. Fennell, Sr. was 85 years of age at the time of his death. He has been retired from the business for a number of years, it being under the direction of his son. The funeral was held from St. John's Anglican Church, Kitchener, on Friday.

PERSONAL

Charles Tew is succeeding N. C. Baiden as manager of the Toronto office, Lyons & Marks, wholesale hardware specialties.

PERSONALS

Grant Chater of Grant Chater Ltd., Toronto, visited the Montreal trade this week.

W. S. McLennan, general sales-manager, Brandram-Henderson Limited, accompanied by Mrs. McLennan, has left for an extended trip through the Western provinces to Vancouver. They will accompany the trans-Canada tour of the Montreal Board of Trade to their destination, but will not return to Montreal until October 5th.

G. Vincent White, of the Publicity Department, Sumner Co. Ltd., Moncton, N. B., was a visitor to the office of Hardware and Metal, Toronto, this week. Mr. White was much impressed with the details of the publishing business as employed in the publication of this paper, to the readers of which he is somewhat acquainted through the various articles he has contributed from time to time. Mr. White's complimentary remarks concerning the Annual Fall Number of August 19 were much appreciated.

OCCUPY NEW PREMISES

Owen Sound, Ont.—From September 1, T. I. Thompson, Ltd., who recently took over the R. P. Butchart & Bro. hardware business in this city as announced in a previous issue of Hardware and Metal, have occupied the store formerly used by the Butchart firm.

A "HARDWARE" FAMILY

Lorenzo Rousseau is opening a hardware store in Drummondville, Que. For a number of years past Mr. Rousseau has been connected with his father's firm, Rousseau & Fils, hardware merchants of Nicolet, Que.

Mr. Rousseau, Sr., is the proud father of a real "hardware" family. There are nine boys in the family and three of his sons have already branched out in business for themselves, while two younger boys are at present employed in the parent firm. J. L. Rousseau, Three Rivers, and L. Rousseau of Louis, Que., are the two older brothers owning a retail business of their own.

WILL ACT ON STEEL MERGER

When the holders of the present voting power of the Bethlehem Steel Corporation come together September 8, they will act not only on the merger with the Lackawanna Steel Company, but also on important changes in Bethlehem's entire scheme of capitalization.

Bethlehem becomes a democrat corporation. It is said that Chairman Charles M. Schwab, President Eugene M. Grace and associates are prepared to hand over the control of the company to the entire body of stockholders, including the owners of two large issues of "Non-voting" stock.

DANFORTH BUSINESS MEN VISIT OSHAWA

Oshawa.—Danforth Business Men's Association and friends, numbering more than 200, and including a number of hardware merchants held their first annual picnic at Lakeview Park. Mayor Stacey and other civic officials met the visitors at the entrance to the town with gaily decorated cars bearing the inscription, "Oshawa welcomes Danforth Business Men."

The cars proceeded to Lakeview Park, where they were extended a civic welcome. Addresses were given by Mayor Stacey of Oshawa, Alderman W. A. Summerville, Toronto, and Sergt.-Major Macnamara, M. P. P. for Riverdale.

During the afternoon a program of sports was run off, after which supper was served. A number of Oshawa business men joining with the visitors.

A baseball match was played between the men north of the Danforth and those south of it, the latter winning by a close score.

The outing was brought to a close with a dance in the pavilion, in which Oshawa and Toronto folk took part.

HARDWAREMAN OWNS HIS OWN CHURCH ATTENDED BY HIS FAMILY ONLY

Montreal.—A $15,000 church, with complete paraphernalia for the celebration of a service is a little "souvenir" of which E. Martel, 631 Frontenac st., who owns a hardware business on Roven st., is the proud and sole owner.

Whenever Mr. Martel feels so inclined he rings the bell of his church, summoning his neighbors to worship, but not in the year of his ownership have any except the proprietor and his family filled the pews.

The priestly robes of a clergyman of the Greek Church have been donned by Mr. Martel.

Some trouble arose between this and a rival church and the property was auctioned off when Mr. Martel became the owner. Since that time he has enjoyed the unique distinction of being sole owner of a church fully equipped for worship.

"Do I wish to rent it? No, I wish to keep it for myself," said Mr. Martel. "That is my souvenir."

Upholds Mutual Plan of Fire Insurance

Charges Made by Stock Insurance Companies Against Principle of Mutual Insurance Are Dealt With by Manager of Canadian Company Which Carries Certain Hardware Retailers' Insurance

Editor's Note—In view of the fact that the Ontario Retail Hardware Association has linked up with a mutual insurance company for the securing of protection for its members and in view of the fact that certain stock companies have been making charges unfavorable to mutual insurance, Hardware and Metal has secured from C. L. Clark, of the Canadian Hardware and Implement Underwriters, the following statement:

STOCK fire insurance companies to-day are claiming there is no money in the business of fire insurance. Extensive tables are prepared which to the laymen appear conclusive evidence that every dollar of his premium is eaten up in either expenses or losses and that there is nothing left for the stockholders. They cite these instances in support of their claim that Mutuals cannot hope to return any dividends to policy holders. But the key in the whole tabulation lies in the fact that the ratios are computed on premiums earned and not on premiums written. If a $1,000 premium is written on January 1st it is clearly to be seen that on July 1st $500 has been earned, but is it proper to state that the company's expenses and losses in the acquisition of this $1,000 premium amount to $500 that there is nothing left? Yet that is exactly what certain insurance journals published by stock fire interests would have you believe. In a recent issue of the publication "Insurance" a tabulation appeared setting forth the expenses and losses of the Canadian Hardware and Implement Underwriters and the Northwestern Mutual Fire Association on the basis of premiums earned. Naturally when the acquisition cost and losses incurred are put on a percentage basis to only one half the actual premiums written the percentages so obtained will be double the actual experience. To obtain the true experience the losses and expenses should be figured proportionate to premiums written and not premiums earned.

Congested Liability

Another point often brought out is that of congested liability. Again the whole truth is not advanced. No mutual company in operation to-day on the Cash Plan (such as the Canadian Hardware and Implement Underwriters and the Northwestern Mutual Fire Association) keep net over certain amounts. The amount kept net depends on the fire protection, the construction of the risk, the exposures and the like. All over this net amount is reinsured with other strong mutual companies. By this operation the mutual's liability on any one risk is kept to a minimum and the liability is hence scattered. A conflagration under present systems of re insurance **could not** seriously injure any one of the companies named above.

The funds held by the above mutuals, whether in the United States or in Canada, are available for the payment of losses wherever they occur. This has been decided by the Supreme Court of the State of Minnesota in the case of Strampe vs Minnesota Farmers Mutual Insurance Company, 109 Minn., Rep., page 364, decided December 1909.

Assessment Liability

The question is often raised by stock interests of the possible assessment liability of members of mutual companies. There can be no assessment beyond the policy conditions, for this point has been decided by the Supreme Court of the State of Oregon, Beaver State Insurance Association vs Smith, 97 Oregon, 579 (1929). In connection with the question of assessment liability it must be kept in mind that the above companies are Cash Plan Mutuals. In the latter case the receiver attempted to collect an assessment from defendant on a fire policy on which the premium had been paid in cash in advance. The Supreme Court of Oregon hold that (p. 585) "the liability to pay an assessment is a matter of contract.—Only members who have assumed a contract obligation to pay assessments are liable therefore. A member in order to become liable for assessments must contract to pay the same or assent to some plan or provision for levying assessments required by the by-laws or constitution of the mutual association or by the statute authorizing the organizing of the company. 3 Joyce on Ins. 2nd Ed., par. 1251,1253. Members insured exclusively on the cash premium plan and who have paid their premium in cash as defendant has done are not liable to an assessment for the purpose of paying losses and expenses."

Stock company representatives also claim there are no old mutual companies. It may be of interest to the reader to know that the oldest fire insurance company in America is a mutual—The Philadelphia Contributionship, organized in 1752. It is still operating and has accumulated a net cash surplus of over $6,000,000. And yet there is no money in the insurance business!

Naturally the two above organizations, being of exceptionally good strength, are the target of all the stock fire insurance companies. It occurs to the management of the Mutuals that they can equal the record of the Canadian Fire Insurance Company of Winnipeg which in the five year period 1916-1920 received premiums of $1,709,362, paid claims of $584,915, paid expenses of $675,888 and paid Dividends to stockholders of $855,000. These figures are taken from the Canadian Fire Insurance Year Book of 1921 pub-

(Continued on page 56)

News of Western Canada

F. Caron, hardware, Montmartre, Sask., has discontinued business.

C. H. S. Bamford is taking a well earned rest at Kenora enjoying himself boating and fishing.

T. E. Yuill, manager of the Calgary branch of the J. H. Ashdown Hardware Co. Ltd., is enjoying a motor trip through the mountain roads of eastern British Columbia.

J. W. Mingle hardware, Bromhead, Sask., suffered fire loss.

John Cleverly, hardware, Strassbourg, Sask., has sold out to R. S. Hunter.

A deal is announced this week involving the sale by Wood Vallance & Adams, Ltd., of Calgary of their automotive equipment department to The Motor Car Supply Co., of Canada Ltd., with warehouses at Calgary and Edmonton. Wood Vallance & Adams, Ltd., were pioneers in the motor accessory field in Alberta, carried a large stock, and due to their splendid organization commanded a large share of this business. The Motor Car Supply Co. of Canada Ltd., are an amalgamation of The Chapin Co., Ltd., and the Motor Car Supply Co., Ltd., and this addition to their stock and business will put them among the largest dealers in automotive esuipment in Canada.

DEATH CALLS WINNIPEG HARDWARE MAN

The death occurred of John Pethick, aged 56 years, at Preeceville, Sask., while visiting his son, William H. Pethick. He left London, Ont., in 1891 to assume the management of the retail department of the James Robertson Hardware Co. Ltd., which position he occupied until they discontinued their retail business, when he became connected with the J. H. Ashdown Hardware Co. Ltd., Winnipeg, for a number of years. He left for Vancouver in 1902 to assume the management of the McLellan, McFeely Hardware Co. Ltd. Some years later he returned to Winnipeg and resumed his connection with the J. H. Ashdown Co. Ltd., with whom he had been until a few months prior to his death.

He is survived by his wife and two sons, William H., of Preeceville, Sask., and Lou H., of Winnipeg. Mr. Pethick resided in Winnipeg and the west for more than 30 years.

Letters to the Editor

The Editor welcomes letters on any subject of interest to the hardware trade.

Grand Prairie, Alta.

Editor, Hardware & Metal.

Dear Sir:—Re Bank Commission.

There was a sitting of Bank Commission here to-day.

Perhaps this will be of some benefit, but am doubtful.

There is one point that was brought out to-day. That is the bond and money lenders have practically all of their loans that are past due covered by chattel mortgages. Therefore the Retailer is at the mercy of the banks, as to getting in collections, and we are forced to put our business upon a cash basis. This may be the best thing for the Retailer, but is a sure thing unless he does, under present conditions, nothing but the Credit Men's Trust Asociation is where he will land.

While writing the above might inform your paper that farmers will be cutting ruby wheat by the 10th and general wheat harvesting by the 15th and 20th. The yield will average from 10 bushels to 20 bushels oats and coarse grains very pass.

We have had practically no rain this season, a little over one half inch. You will agree with the writer that we have some soil that will raise a 15 to 20 bushel wheat crop in 1-2 plus 1-10 of inch of rainfall. Yours truly,

Porteous Hardware Co., Ltd.,
L. E. Porteous.

Hardware Letter Box

Information on trade topics will be gladly supplied to subscribers through this department.

HENDRYX BIRD CAGES

Geo. A. McMurtry Company, St. Thomas, Ontario.—We would appreciate the address of makers of Hendryx bird cages.

Answer.—Andrew B. Hendryx Co., New Haven, Conn.

NATIONAL SCALES

Collingwood Hardware Company, Collingwood, Ont.—Will you please inform us where we can secure repairs for the National platform scales?

Answer.—The National Scale Company, of Chicopee Falls, Mass., U.S.A.

LUNN SKATES

The George Taylor Hardware Company Limited, Timmins, Ont.—Kindly advise us the name and address of manufacturers of the Lunn Skates.

Answer.—The G. J. Lunn & Company, of Montreal, Quebec.

SPINNING WHEELS

H. W. Reimer, Steinback, Man.—Can you advise us where we can procure Spinning Wheels in Canada?

Answer.—The Chinic Hardware Company, Quebec City.

ANILINE DYES

The Auto Specialties Manufacturing Co., Inc., Buffalo, N.Y., U.S.A.—Can you put us in touch with a firm in Canada who handles Aniline Dyes? These are for use in manufacturing auto top linings.

Answer.—The Boston Blacking Company, of Montreal, Quebec. The head office of this concern is in East Cambridge, Mass., U.S.A.

WOODEN BOOK RACKS

S. R. Peart, General Hardware, Rockwood. Ont.—Kindly give us the names and addresses of firms making wooden book racks for church pews.

Answer.—The Globe Furniture Company, Limited, Waterloo, Ont.; The Otterville Manufacturing Company, Limited, Otterville, Ont., and the Valley Seating Company, Ltd., Dundas, Ont.

COAL WINDOW & FRAME

The Collingwood Hardware Company, Collingwood, Ont.—Would you kindly tell us who manufactures the Coal Window and Frame for receiving coal into a bin or basement?

Answer.—The Katie Foundry Company, Galt, Ontario, and the Galt Stove and Furnace Company, Limited, also of Galt, Ont.

TILE PIPE

W. D. Edge, Limited, Toronto, Ont.—Could you kindly give us the name of the firm in St. Johns, Quebec, who manufacture tile pipe?

Answer.—No doubt you have in mind the Dominion Corrugated Steel Pipe Company, St. Johns, Quebec.

Catalogues and Booklets

Those interested in any of the catalogues described below can procure a copy of the same by writing direct to these firms. Mention that you noticed this in Hardware and Metal

STERLING WHEELBARROWS

Catalog No. 11, issued by the Meaford Steel Products, Ltd., of Meaford, Ont., is being distributed to the trade. Wheelbarrows, road scrapers, garden barrows, steel drag scrapers, barrel, bag and railway trucks, are fully described therein, with a number of practical illustrations and useful pointers regarding the manufacture of these products. Among other things referred to by the manufacturers in this booklet are such parts as standardization in construction of the various styles and sizes, self-lubricating wheels, the riveted legs, the make of the riveted trays, wooden handles, and the style of finish and original design of the Sterling and Meaford lines.

FIREPOTS AND TORCHES

Clayton & Lambert Mfg. Co., of Detroit, Mich., have recently presented to the trade a small catalog covering fire pots, torches and braziers. This little booklet is styled Catalog "T," and it contains a full description of these various products, together with a number of illustrations and other useful information. A repair parts booklet has also been issued in conjunction, this showing the various parts with numbers, description and list prices. In Catalog "T," a description of manufacturing facilities is also given.

ENTERPRISE CATALOG NO. 20

Complete in detail and attractive in design is Catalog No. 20, recently issued by the Enterprise Foundry Co., of Sackville, N.B., containing illustrations and descriptions of the Enterprise line of stoves, ranges and furnaces. In the foreword, factors pointed out by the manufacturers include the methods of operations, the style of finish, design and durability of these products. Color plates and precise electros offer a clear-cut impression of the general appearance and build of the various lines listed, while full information regarding size of parts, weight and capacity, supplies all necessary data. The different types catalogued include steel ranges of many classes, several groups of cast ranges, cooks, heaters and laundry heaters, as well as hot air furnaces. A special section has also been added describing the Enterprise pipeless furnace in a most comprehensive and easy style. There are also a number of useful hints relating to the installation and operation of these products, many suggestions in connection with furnaces, lists of repair parts and instruction re ordering same, and illustrations of a number of advertising cuts available to the retail merchant.

HOOVER DESCRIPTIVE FOLDER

The Hoover Suction Sweeper Company of Canada, Ltd., Hamilton, has prepared a six-page folder descriptive of model 961, a new improved heavy-duty Hoover electric suction sweeper designed for use in clubs, hotels, offices and larger homes. This folder contains a thorough description of the merits of the Hoover model. It is also of a convenient size to be mailed as an enclosure with either a letter or a statement.

Twenty Years Ago

Following items are reproduced from Hardware and Metal of August 16, 1902:

Another stove manufacturing company is being formed, to be known as the Western Stove Co., Ltd., with capital of $50,000. The chief promoters are F. J. Taylor, for some years buyer for the Gurney Foundry Co., and J. J. Cunningham, formerly mechanical superintendent of that company. The National Iron Works plant at Wingham has been purchased.

The picnic of the McClary Mfg. Co., London, Ont., to Port Stanley, Ont., was a record-breaker, the railways estimating that nearly 5,000 were present. Col. Gartshore filled the position of umpire of the baseball match and the tug-of-war was refereed by J. K. H. Pope.

Decatur, Bull & Co., Montreal, have taken the Canadian agency for the sale of the precision tools manufactured by the Massachusetts Tool Co., of Greenfield, Mass., this company being the precision tool branch of the Goodell-Pratt Co.

A carload of "Jewel" paints, manufactured by the Wadsworth Howland Co., Chicago, has just been received by their Eastern Canadian agents, the Canada Hardware Co.

A meeting of the retail clerks of Peterboro was held, about 40 clerks being in attendance. R. J. Begley was elected president, and R. K. Brown secretary.

The Canada Paint Co. are now doing considerable business by telephone, the long distance telephone system having been introduced throughout the building.

W. H. Evans, of the Canada Paint Co., has left for the Adirondacks on a hunting and fishing excursion accompanied by Mrs. Evans.

W. G. Harris, of the Canada Metal Co., Toronto, is spending a few weeks in Atlantic City, N.J.

Markets at a Glance

THOUGH some progress has been made in settling the coal strikes this week, fuel shortage and the threatened difficulty of moving coal even when it is available has given further strength to the already firm market for iron and steel and advances are being recorded on iron and steel products throughout.

As to whether further revision will be made in stoves, ranges and furnaces is somewhat indefinite. Bookings are comparatively light as yet, due in part to the fact that some stock was left over from last year. Other price revisions this week include reductions on lantern globes, lamp chimneys, Lufkin rules, linseed oil, putty, asphalt roofing and shingles. Advances are noted on wrought couplings and nipples, being a reflection of higher iron and steel prices in primary markets. The booking date for white lead at unchanged prices has been extended until November 30. Ammunition and other hunting equipment is moving well, some jobbers, particularly in Eastern Canada, reporting much heavier requirements than for some years.

The settlement of the coal strikes in Western Canada has improved the tone of trade as miners will purchase considerable hardware at this season. Orders for crop needs of hardware have been continuous though in small quantities. Collections in the West are about stationary with the period of liquidation of debts following the sale of the crop urgently looked forward to. Price revisions as result of the coal and railway strikes are now effective on hardware commodities in the West.

Building activity is continuing throughout most parts of the country and dealers are featuring substitute lines in case of fuel shortage, such as oil stoves, wood cutting equipment, etc. Special steps are being taken to stimulate business, such for instance as a dealer's offer to instal furnaces and stoves now and accept payment later in the fall.

Montreal. Que.

MONTREAL, August 31st.—A general revision of Lufkin boxwood and spring joint rules has been made. Many lines are slightly reduced in price, while others show little or no change from former quotations. New lower prices are given on lamp chimneys and both long and short lantern globes are reduced approximately ten cents per dozen. Lower prices are now generally announced by manufacturers of asphalt roofing and shingles, certain producers having made no change in quotations when others made the announcement two weeks ago. Advanced quotations are recorded on wrought nipples and couplings. A firm attitude is still evident in the steel industry, with a strong tendency on bar products, galvanized sheets, and other lines appertaining to the industry. Higher prices are recorded on many of these commodities on American markets. Metals on primary markets now display an irregular market tone although quotations show little change. Trade in jobbing circles is commencing to reflect the usual Fall season, an improvement being noted, especially in lines for earlier dealer trade.

BRISK DEMAND RECORDED FOR METAL LATH

Montreal.

Building operations are still demanding supplies of metal lath and distributors report a brisk movement. No change in prices has been made and following are present quotations:

METAL LATH—

Painted—	per sq yd.
26 gauge	23c.
24 gauge	28c.
32 gauge	32c.

Galvanized, 10c. per sq. yd. extra.

GUNS AND AMMUNITION NOW SELLING WELL

Montreal.

With the Fall sporting season fast approaching jobbing houses report an active sale of guns, rifles and ammunition. Although earlier bookings were comparatively light, the present movement is said to be sufficiently heavy to overcome this and if sales continue in their present volume a good Fall trade is assured. Dealers in many cases are even now buying in smaller quantities than in previous years and repeat orders are expected in good quantities as soon as the season is really under way.

REVISED QUOTATIONS ON LUFKIN RULES

Montreal.

A revision in quotations is announced on the Lufkin line of boxwood and spring joint rules. Certain lines are reduced approximately 5 to 10 per cent., while others show little if any change. Following are quotations on some of the well known lines:

BOXWOOD—

	per doz.
No. 171	$ 5 10
No. 372	7 35
No. 386	7 80
No. 388	11 25
No. 475	2 15
No. 478	5 95
No. 651	2 15
No. 651B	1 95
No. 751	2 70
No. 752	4 25
No. 752B	6 35
No. 760	4 05
No. 761	3 85
No. 762	5 40
No. 771	6 10
No. 780	7 80
No. 781	7 80
No. 851	3 55
No. 861A	7 45
No. 861	4 85
No. 881	9 40
No. 882	10 90
No. 3851	5 25
No. 3881	15 50

ZIG-ZAG—

No. 8512	1 35
No. 8513	2 00
No. 8514	2 75
No. 8515	3 40
No. 8516	4 10

LOWER PRICES ON C. B. LANTERN GLOBES

Montreal.

A reduction of fifteen cents per dozen in one doz. cases, and ten cents per doz. in 3 and 6 doz. cases is announced on lantern globes, both long and short patterns. Following are present quotations:

	Per doz.
1 doz. cases	1 20
3 doz. cases	1 10
6 doz. cases	1 05

REDUCTION IN QUOTATIONS ON LAMP CHIMNEYS

Montreal.

Reduced prices are also given on lamp chimneys, and "A" chimneys are now quoted at $8.40 per case of 8 dozen, "B" chimneys at $7.00 per case of 6 dozen.

FAIRLY GOOD TRADE CONTINUES IN RANGE BOILERS

Montreal.

Range boilers are reported to be in fairly good demand, activities in building circles continuing to demand supplies. Manufacturers, however, state that distributors are still making purchases in a conservative way, orders being small but quite numerous, and stocks in the hands of the latter are comparatively low notwithstanding the better demand. The undertone of these products is described as fairly firm owing to the strong tone in galvanized sheets and other raw materials of minor importance. The market is also a little steadier at present at following quotations:

RANGE BOILERS—

Size	List Price
6 gallon	$13 50
12 gallon	14 00
18 gallon	15 00
25 gallon	16 50
30 gallon	17 50
35 gallon	20 50
40 gallon	22 75
52 gallon	38 00
66 gallon	60 75
82 gallon	74 00
100 gallon	103 00
120 gallon	117 00
144 gallon	164 00
168 gallon	187 00
192 gallon	210 00

Discounts:—Standard weights, 50 per cent. Extra heavy, 40 per cent.

REVISION IN ROOFING PRICES NOW GENERALLY ANNOUNCED

Montreal.

As announced two weeks ago certain manufacturers of asphalt roofing and shingles reduced quotations on their various brands while others at that time announced no price change. The latter however now state that a corresponding revision has been made, and roofing prices generally are from fifteen to twenty cents per square less. In discussing the situation this week these manufacturers again point out that lower quotations are given in face of a firm undertone in the market. There is a strong tendency in felt, asphalt is on a very steady basis, and production costs are now increased by the fuel situation. Keen competition therefore would appear to have a strong bearing on the market at the present time, and if cost of production is to be considered a firm market seems likely for the fall trade.

ADVANCED PRICES ON WROUGHT COUPLINGS AND NIPPLES

Montreal.

Accompanying the new higher list on steel piping is the announcement that both wrought couplings and nipples have increased quotations. Discounts on all sizes of both lines are lowered five per cent., thus showing an advance of varying extent. Other fittings are unchanged in price, and following are prevailing discounts:

PIPE FITTINGS—

Cast iron fittings	30%
Plugs, cast iron	30%
Do., solid	30%
Do., countersink	30%
Bushings, small	32%
Bushings, cast	**32%**
Unions, ¼ in. to 2 in.	47%
Unions, ⅛ in., 2½ to 4 in.	47%
Flanged unions	30%
Flanged fittings	30%
Dart Unions, blk., ¼ to 2 in.	33½%
Do., ⅛ in., 2½ in. and larger	23%
Do., galv., add to black	80%
Niples, black and galvd. ⅛ to 4 in., close and short	55%
Do., 4½ in. and larger	45%
Do., long, ; in. to 4 in.	60%
Do., 4½ inch and larger	50%
Do., runing thread	35%
Couplings, 4 in. and under	25%
Do., 4½ in. and larger	5%

MALLEABLE FITTINGS—

Price list effective June 1st, 1922. Discount 70-5 per cent.

SEASONAL TRADE CONTINUES IN TROUGH AND PIPE

Montreal.

Current trade in eavestrough, conductor pipe and sundry lines continues in seasonal proportions. The harvesting season in rural districts is now at hand and sales usually show a decided slackening at this period, although the movement this year has been quite satisfactory to date. With the opening of September the volume of business is expected to increase and the outlook is said to be good for Fall trade. Quotations are unchanged as follows:

EAVESTROUGH:

O. G. round and half round, per 100 ft. 8 in., $16.90; 10 in., $18.70; 12 in., $22.20; 15 in., $29.80; 18 in., $37.80.

O.G. Square bead, per 100 ft.: 8 in., $15.90; 10 in., $17.70; 12 in., $21.20; 15 in., $28.80; 18 in., $36.80.

Discount 70|10 per cent.

Conductor Pipe, Round, Plain and Corrugated, per 100 ft.; 2 in., $18.40; 3 in., $22.30; 4 in. $29.60; 5 in., $40.00; 6 in. $49.00.

Discount 70|10 per cent.

Plain or corrugated, price per doz.
2 in., $5.25; 3 in., $6.00; 4 in., $10.50; 5 in., $24.00; 6 in, $29.00.

Discount 60 per cent.

FURTHER STRENGTH ADDED TO DOMESTIC STEEL MARKET

Montreal.

Although the announcement of higher prices on iron and steel bar products has been withheld up to the present, the undertone of the market remains very firm, with a certain amount of strength being added by recent developments in Southern producing centres. In discussing the anticipated revision in prices, which has been expected on the local market for the past two or three weeks, a local producer stated that notwithstanding the upward tendency no action has been taken, domestic manufacturers still awaiting further developments with regard to the coal, coke and pig iron situations. It is noted that a general increase in quotations has been made in the United States on pig iron and billets, with numerous independent mills quoting higher on certain finished products, these revisions following the increase in wages put into effect by both the Corporation and other companies. Considering these changes the position on domestic markets is such that higher prices may be expected at any time, according to this informant. There is still the general feeling that the future market will be upward. Prices continue fairly steady at following levels:

IRON AND STEEL—

Common bar iron, 100 lbs.	3 15
Refined iron	4 65
Irish finish machinery steel	3 20
Mild steel	3 15
Single reeled machinery steel	5 25
Band steel	3 50
Spring steel	4 75
Sleighshoe steel	3 15
Tire steel	3 35
Harrow tooth steel	3 30
Toe caulk steel	4 05
Mining tool steel, per lb.	0 20½
Black Diamond tool and cast steel, per lb.	0 20½

NOTE.—Refined iron is approximately $1.50 per 100 pounds over base, but fluctuates owing to unsettled market.

Band steel in scroll bundles, 50c per 100 lbs. extra.

SOLDER MARKETS REFLECT TREND OF PRIMARY METALS

Montreal.

The undertone of solders has been recently affected by the trend of tin on primary metal markets, which has shown a degree of strength. This tendency is regarded as temporary by manufacturers of finished products, and for this reason no change in prices has been decided upon. Continued improvement, however, will in all probability have a direct bearing on solder quotations, especially if other metals used in manufacture remain on a steady basis. Lead has eased a little but this is also expected to record a gain in the near future. Other lead and zinc products are steady with prices unchanged as follows:

LEAD AND ZINC PRODUCTS—

Lead pipe, per 100 lbs., up to 2"	13 00
Do., 2" to 8"	14 00
Do., 8" and over	15 00
Lead waste, per 100 lbs.	14 00

Note—Lead pipe is subject to a discount of 10 per cent.

Lead traps and bends	15%
Lead wool, lb.	0 13½
Lead sheets, 2½ lbs. sq. ft., lb.	0 10½
Lead sheets, 3 to 3½ lbs. sq. ft. lb.	0 10¼
Do., 4 to 8 lbs. sq. ft., lb.	0 9½

Cut sheets ¼c. lb. extra, and cut sheets to size, ¾c. lb. extra.

Solder, guaranteed, lb.	0 26½
Do., strictly, lb.	0 24½
Do., commercial, lb.	0 21½
Do., wiping, lb.	0 22½
Do., wire, lb.	0 35
Zinc sheets, casks	0 11
Do., broken lots	0 11½

GALVANIZED SHEETS STILL ATTRACT ATTENTION

Montreal.

Galvanized sheets continue to attract attention on the local sheet markets, these recording more activity than other lines with marked strength still evident in the market. Demand is a little quieter than in earlier weeks of summer but the present movement is described as quite seasonal and a gradual improvement should soon be felt with the

approach of Fall months. Black sheets continue only in moderate demand owing to inactivity in industrial circles, while the sale of tin plate and Canada plate reflects the usual summer slackness, it still being considered a little early for active Fall trade.

Reports from southern mills announce that prices on both galvanized and black sheets were further advanced last week, the market in these centres remaining decidedly firm owing to curtailment in production in face of an impoved market position. This is again pointed out by local distributors as an indication that insofar as this source is concerned shipments will be scarce for future Fall trade. Local stocks, however, are in fair shape owing to continued arrivals of overseas sheets, and following are average quotations:

BLACK SHEETS—		
10 gauge, base	4 00	4 50
12 gauge	4 10	4 60
14 gauge	4 20	4 70
16 gauge	4 30	4 80
18—20 gauge	4 55	5 05
22—24 gauge	4 60	5 20
26 gauge	4 65	5 25
28 gauge	4 75	5 35
GALVANIZED SHEETS—		
Queens Head—		
28 gauge	7 25	7 50
26 gauge	7 00	7 25
24 gauge	6 40	6 65
22 gauge	6 05	6 30
18—20 gauge	5 35	5 60
Other Brands—		
10¾ oz.	7 00	7 25
28 U. S. gauge	6 60	6 85
26 U. S. gauge	6 30	6 55
24 gauge	6 15	6 40
22 gauge	6 15	6 40
18—20 gauge	6 00	6 25
16 gauge	5 85	6 10

These prices are for full bundles, an extra charge of from 25c. to 35c. is made for broken lots. Extra for sheets 3 ft. wide, 28 gauge and 10¾ oz., 20 cts. per 100 lbs. Further extra for sheets 4 ft. wide, according to gauge.

TIN PLATE—Coke	
20 x 28 x 100 lb. basis	12 50

Galvanized, 60s	7 75

IRREGULARITY NOW SHOWING IN INGOT METAL MARKETS

Ingot metals have been somewhat irregular during the past week, having been depressed owing to the European situation, although some recovery has more recently been made. Owing to the uncertain outlook both in Europe and the United States at the present time the future trend of the metal markets is considered problematic.

TIN.—Tin has shown some recovery from last week's low price but it is not considered probable that prices will go much higher in view of diminished consumption on this side. Reported supplies are ample to meet present demand, with the local market steady at 36 cents.

COPPER.—This market is quiet with no special feature of interest. Demand is fairly good but delays in deliveries are affecting consumption apart from the shortage of coal. Export demand is reported as moderate, with Germany now naturally experiencing some difficulty in financing her purchases. Quotations are unchanged at 17¾ cts, for electric, and 17½ cts. for casting.

LEAD.—Irregularity is also noted in the lead market, although prices are practically unchanged. Supplies are reported as a little more plentiful while demand is slightly less. Local quotation at 7 cents.

SPELTER.—East St. Louis holds steady at about $6.25, but production is on the increase. It is considered possible that higher labor costs may affect prices for later deliveries. Local demand is fairly good with market quoted at 8½ cents.

ANTIMONY.—Quotations on antimony are practically unchanged with the market reported in a dull position. Chinese is priced at 6½ cents, high-grade English at 7½ cents.

ALUMINUM.—Aluminum remains featureless with little or no variation on primary or domestic markets. Local quotations 24 cents.

Toronto, Ont.

TORONTO, August 31.—Considerable variation is evident in hardware prices this week involving higher prices on wrought nipples and couplings following the recent increase in wrought pipe. A base price of $3.40 has been reached by some distributors on bar iron due to continued strength in the primary steel markets. The galvanized sheet market is very strong with the likelihood of early advances. Lead and zinc goods are reflecting the strengthening of prices on virgin metal. Brass and copper products are moving out well, and some reaction is noticed in copper and tin ingot metals. Some other lines, including Lufkin rules, lanterns, etc., are reduced.

LUFKIN RULES ARE REDUCED

Toronto.

Some lines of Lufkin boxwood rules are reduced 5 to 10 per cent. All spring joint rules, both yellow and white are reduced approximately 10 per cent. Existing prices on certain lines are shown in the Montreal report.

ONLY MODERATE CALL FOR RANGE BOILERS

Toronto.

No change has been announced in range boiler list prices, and current trade in these products continues on a slightly improved basis. Manufacturers point out that owing to the increased prices on the flat galvanized sheets, the upward trend of raw materials tends to increase production costs and firm up current prices on the finished articles. The moderate demand for range boilers offsets this tendency to some extent. Prevailing discounts remain unchanged at the following levels:

RANGE BOILERS—

Size	List Price
5 gallon	$ 13 50
12 gallon	14 00
18 gallon	15 00
25 gallon	16 50
30 gallon	17 50
35 gallon	20 50
40 gallon	22 75
52 gallon	38 00
66 gallon	60 75
82 gallon	74 00
100 gallon	103 00
120 gallon	117 00
144 gallon	164 00
168 gallon	187 00
192 gallon	210 00

Discounts:—Standard weights, 50 per cent.; Extra heavy, 40 per cent.

UPWARD CHANGE IN PIPE FITTING COSTS

Toronto.

Higher quotations are now in effect on wrought nipples and couplings, through a revision in discounts. This price change follows on the increase announced in wrought steel piping, and the extent of the higher level varies between five and ten per cent. The discounts are lower by five points all through the list, thus bringing the following quotations into effect on the local market for these products.

Cast and malleable fittings are also considered in line for a price adjustment. It is noted that costs have been advanced approximately five per cent., and the selling prices on these products are expected to record a similar increase in the near future.

PIPE FITTINGS—	
Cast iron fittings	30%
Plugs, cast iron	30%
Do. solid	30%
Do., countersink	30%
Bushings, mall.	32%
Bushings, cast	32%
Unions, ¼ in. to 2 in.	47%
Unions, ⅛ in., 2½ to 4 in.	47%
Flanged unions	30%
Flanged fittings	30%
Dart Unions, blk., ¼ to 2 in.	33½%
Do., ⅛ in., 2½ in. and larger	23%
Do., galv., add to black	30%
Nipples, blk., and galvd. ⅛ to 4 in., close and short	55%
Do., 4½ in. and larger	45%
Do., long, ⅛ in. to 4 in.	60%
Do., 4½ inch and larger	50%
Do., runing thread	35%
Couplings. 4 in. and under	25%
Do., 4½ in. and larger	5%

MALLEABLE FITTINGS—

New piece list, adopted June 1, 1922. Discounts 70 and 5 per cent.

BAR PRODUCT PRICES NEAR HIGHER LEVELS

Toronto.

In spite of the slightly improved coal situation brought about by the agreement in soft coal areas, iron and steel production in primary centres is still seriously handicapped by lack of fuel. It is growing more apparent that even under the best conditions, mill operations cannot be restored to a satisfactory rate before the end of the year.

The local price tendency is towards higher levels in conformity with the southern market, where higher quotations on bar products are appearing from time to time. In certain quarters the current local price has reached the base of $3.40, as noted in last week's issue, but the average level remains, at least for the present, at $3.25. That the market will gradually reach the higher mark is the opinion of local distributors, who point to the fuel and transportation difficulties as primary factors in this direction. Wage advances in mill localities also support this trend, it being well realized throughout the industry that in a scarcity market such as prevails, these advances in cost mean higher prices for steel. Therefore, the uppermost question around local warehouses is how far will any further rise tend to check business. Current trade is significant of the usual quiet summer session, with average prices as follows:

IRON AND STEEL—

Mi'd steel bars, base		3 25
Mild steel bands 3-16 in. base		3 75
Bar iron, base		3 25
Angle iron, base		3 35
Horse shoe iron		3 85
Tire steel		3 45
Spring steel	7 00	8 00
Sleigh shoe steel		3 25
Cold drawn steel		4 50
Hoop steel		4 50
Norway iron		12 50
Toe cau'k iron		4 10
Crucible cast sheet steel		28 00
Mining drill steel		18 50
Cast tool steel, high grade		30 00
Cast too' steel, medium		18 00

QUIETNESS RESTRAINS BOILER TUBE PRICES

Toronto.

The local boiler tube market is still in a nominal condition, although the recent upward climb of raw material and production costs is reflected in the prevailing tone. There is only a fair movement of tubing at present and this quietness naturally prevents distributors of boiler tubes from marking up prices in accordance with higher levels recently effective on numerous other manufactured steel products. A slight upward revision in prices has been announced on eastern centres, this change being principally on larger sizes. The upward movement noted in southern primary markets has not yet been followed locally, due to the elements described above. Following is the current average list of prices on lapweld and seamless tubing:

BOILER TUBES—

	Seamless	Lapweld
1 inch	19 00	....
1¼ inch	20 00	....
1½ inch	20 00	....
1¾ inch	21 50	....
2 inch	20 00	16 00
2¼ inch	22 00	19 00
2½ inch	23 00	20 00
3 inch	27 00	24 00
3¼ inch	32 00	28 00
4 inch	41 00	35 00

IMPROVEMENT NOTED IN CORRUGATED SHEETS

Toronto.

A firmer tendency has recently developed in corrugated sheets, which is described as principally due to the prevailing strength in the flat galvanized sheet market. The upward climb of prices on these products has contributed in a large degree to the firmer undertone in corrugated, and local distributors have expressed the opinion that there is liable to be a similar movement in corrugated sheet quotations in the near future. Although the current demand for these products has been affected by the customary summer quietness, an improvement in this direction is looked for during the fall period. In southern primary centres, corrugated prices have attained higher levels, while flat galvanized recently moved up again on both primary and domestic markets. With the current strength of the steel industry generally continuing in effect throughout the ensuing weeks, some change in the following quotations on corrugated sheets is considered in most quarters as quite reasonable:

CORRUGATED SHEETS—

	Per 100 sq. ft.
No. 28 gauge	6 50
No. 26 gauge	7 00
No. 26 U. S. gauge	8 00
No. 24 gauge	9 00
No. 22 gauge	11 00
No. 20 gauge	12 50
No. 18 gauge	16 50
Less 10 per cent.	

Lighter than 24 gauge and wider than 27 ins 75 cents per sq. extra.

STRENGTH OF METALS SEEN IN LEAD GOODS

Toronto.

The renewed strength now apparent in ingot lead prices, naturally reflects in the market for finished lead and zinc products. For some time past the virgin metals have been steadily gaining, and while minor fluctuations have occurred, the general trend has undoubtedly been upward, until the current position is described as strong, with the future statistical position good. No further price developments on the finished products have been reported on the local market since the last revision in quotations on lead sheets, lead pipe and traps and bends. This movement has been further confirmed by the recent improvement in primary centres. Current business in these goods is reported very fair for this season of the year, at the following quotations:

LEAD AND ZINC GOODS—

Lead pipe, list per lb.		0 13
Lead Waste, pipe, list, per lb.		0 14
Do., over 8 in., list per lb.		0 15
Lead pipe is subjected to a discount of		10%
Lead traps and bends		15%
Lead sheets 4 to 6 lbs. sq. ft. in rolls, lb		0 09½
Cut sheets, ½c to ¾c lb. extra and cut sheets to size 1c lb. extra.		
Solder, wire, per lb.		0 30
Do., strictly, lb.		**0 22½**
Do., wiping, lb.		0 21
Do., guaranteed, lb.		0 24
Do., commercial, lb.		0 21
Zinc sheets, per lb.	0 09	0 10

HIGHER PRICE TREND IN SHEET MARKETS

Toronto.

The market tendency in galvanized sheets continues very strong, and the current feature revolves around the upward developments in price recently apparent in southern primary markets. Whether local distributors will follow suit depends upon the trend of the transportation strike during the ensuing days, but slightly higher levels on sheets are anticipated within the next week or two. It is generally considered probable that domestic sheet producers will announce a similar advance on galvanized sheets, as fuel difficulties are mounting on practically all markets. The delivery situation is reported as getting even more complicated, the present position being that current orders will hardly be filled for eight or nine weeks. Domestic production of galvanized is at the heaviest ratio in seasons, and a brisk demand for these products is expected throughout the fall period. Tin plate prices continue unchanged, and following are prevailing price levels on sheet products generally:

BLUE ANNEALED SHEETS—

10 gauge, base	**4 00**
12 gauge	**4 05**
14 gauge	4 10
16 gauge	4 15

BLACK SHEETS—

18-20 gauge	4 80
22-24 gauge	4 85
26 gauge	4 90
28 gauge	5 00

A charge of 25c. per 100 lbs. is made for less than case lots. An extra 10c. per 100 lbs. is also charged on sheets 26 in. wide.

GALVANIZED—

	Queen's Hd.
28 gauge	7 50
26 gauge	7 25
24 gauge	6 65
22 gauge	6 30
18 and 20 gauge	5 80

	Premier and	Apollo
10¾ oz.	6 75	7 30
U. S. 28 base	6 35	6 90
U. S. 26 base	6 05	6 60

SLIGHT GAIN IN COPPER PRODUCT SALES

Toronto.

An improved tone is noted in copper and brass products such as sheets, tubing and rods. The slow mill deliveries have reflected a firm tendency in this market and shipments are described as between eight to twelve weeks behind. Recent sales reports show a slight gain in volume, while virgin metal prices on primary centres keep up well and naturally serve to swell the stronger tone in these semi-finished products. Following are unchanged price levels:

BRASS—

Sheets base, per lb.	0 23
Tubing, base, per lb.	0 28
Rods, base, per lb.	0 20

COPPER—

Rods, base, per lb.	0 28
Soft Sheets, plain, 16 oz. and heavier, per lb.	0 29
Do., plain tinned 16 oz. and heavier, per lb.	0 36
Do., polished and tinned, 16 oz. and heavier, lb.	0 41
Tubing	0 32

GOOD MOVEMENT OF SOIL PIPE AND FITTINGS

Toronto.

Manufacturers and distributors state that there is a good seasonal trade apparent in soil pipe and fittings. The prevailing movement of these products is described as quite satisfactory for the current season of the year, and compares well with previous records. The higher quotations recently announced through the issuing of revised discounts, is stated to have acted as a stimulus to the market, and with fall building programs reaching a fair volume, the movement of soil pipe and fittings is expected to continue to an approximate extent during the ensuing weeks. Additional increases which have recently taken place in pig iron prices, serve to add further strength to the undertone of these finished products. Following are prevailing discount levels:

SOIL PIPE—

2 inch	Less 33 1-3 per cent.
3 inch	Less 33 1-3 per cent.
4-inch	Less 33 1-3 per cent.
5 and 6 inch	Less 33 1-3 per cent.
8 inch	net

FITTINGS—

2 to 6 inch fittings	Less 45 per cent.
8 inch fittings	net

RISE IN FLAT SHEETS REFLECTED IN TROUGH

Toronto.

Manufacturers and distributors continue to report brisk sales of eavestrough and conductor piping, the call for these products keeping up in good proportion, due to the heavier building activities this year. Present prospects indicate a fairly sustained movement throughout the fall period, with the undertone of the market strong, and current price levels firm. It is noted that flat galvanized sheets have recently been advancing in cost, and with a shortage in this class of raw material having developed in some quarters due to the various strike elements, the market for such finished products as trough and pipe naturally reflects the upward tendency in primary centres. Prevailing quotations are unchanged at the following levels:

TROUGH (Eave)—

O. G. Square Bead—

Per 100 ft.		Per. 100 ft.
8 inch	$15 90	15 inch $28 80
10 inch	17 70	18 inch 36 80
12 inch	21 20	

O. G. Round and Half Round—

8 inch	16 90	15 inch	29 80

5 inch, list	24 00
6 inch, list	29 00

Less 60 per cent.

STEADY QUOTATIONS ON BRASS VALVE GOODS

Toronto.

The tone of brass compression goods remains steady to firm, with the current call for these products continuing on a fairly satisfactory basis. A recovery in virgin metals and the slightly upward trend in primary circles has served to sustain current price levels on the manufactured brass goods. Quotations are unchanged at the discounts given below, it being pointed out that seasonal building activity has created a better call during recent months for cocks, bibbs and valves, a movement which is expected to be more or less apparent throughout the ensuing Fall season.

COMPRESSION GOODS—	
Compression work, standard	45%
Fuller work, standard	30%
Bath cocks, compression	41%
do., Fuller	25%
Flat way stop and waste cocks, standard	54%
Brass steam cocks, standard ¼ in. to 2 in.	60%

CAST IRON SCRAP IN UPWARD TREND

Toronto.

There is reported an increasing small movement in copper scrap, but the activity is not large. Aluminum is now showing up considerably stronger than has been the case for some time, and cast aluminum is described as difficult to obtain.

Cast iron is now on the upward trend, due to the rising costs of pig iron, and under prevailing conditions which reveal a shortage in cast iron, an upward price change which will diminish the large spread between cast and pig iron quotations is looked for in certain quarters. Stove plate is also stated to be hard to get.

Scrap rubber continues in the slump, and is not being sought, while prices are nominal. The following are the usual averages of local dealers' buying prices for fairly large quantities of scrap materials:

SCRAP MATERIALS—		
Scrap Iron		
Heavy melting steel (Hamilton)	13 00	13 50
Borings and turnings	6 00	7 00
Rerolling rails	12 00	13 00

Solid tires	6 60	1 00

SEASONABLE EBB AND FLOW IN METAL MARKETS

Toronto.

Business continues to ebb and flow in the ingot metal markets, with prices on primary markets registering minor fluctuations. These changes, however, are not considered of sufficient extent to affect local quotations, which are unchanged all through the list. The midsummer customary conditions are now apparent in the non-ferrous group, and quiet trading is the general rule. This week a reaction is noted in copper and tin, while even lead and spelter, although remaining the strongest metals in the group, are slightly quieter.

COPPER.—Domestic consumers' orders are light in volume, and the general tone of the copper market is quieter. This condition is evident both on domestic and primary centres, where export enquiries are lacking and prices have slightly fluctuated as a result. Producers, however, are not pressing sales on an unwilling market which reflects the usual summer condition. Local quotations remain unchanged at 17½ cents.

TIN.—This metal continues to record slight declines in primary centres, and the local price is now around 36 cents. More interest is being shown by consumers at the slightly reduced levels, and while actual trading is limited, the position is not generally considered unfavorable. The reaction is naturally attracting some buyers in limited amounts.

LEAD.—A fair amount of consuming business is evident in lead, but the tone of the markets has reacted since the strengthened position of this metal was recently noted. Demand is not quite so active as was formerly the case, but current trading is considered fair and the local price remains unchanged at the $7.50 mark.

SPELTER.—The zinc market remains steady with an average consuming demand in evidence. The majority of commitments are for future delivery throughout the last quarter. The gains recently recorded in spelter have put an end to price shading which was formerly noted. The local quotation of $8.25 remains firm.

ANTIMONY. — This market is steady but relatively quiet. No changes of any note have been in evidence, sales being the exception rather than the rule. Prices are unchanged, the local level being between 6 and 7 cents.

ALUMINUM.—Previous levels continue to obtain in this market, which remains dull and uninteresting, both in domestic and primary centres. Local quotations range as before around 20 and 21 cents.

London, Ont.

LONDON, August 31.—Hardware business here continues seasonably good and merchants report a fair volume of sales. Builders' hardware is in good demand at present and early fall lines are selling now.

Price changes this week although not heavy show revisions each way. With the end of the holiday season, collections which have been good show further improvement.

LANTERN GLOBES AND LAMP CHIMNEYS LOWER

London, Ont.

New lower prices are now in effect on lamp chimneys and lantern globes. Chimneys have been reduced approximately 15 per cent., while lantern globes are lower around ten per cent. Following are revised local quotations:

LAMP CHIMNEYS—

O—6 doz. to case, $7.25 case.
A—8 doz. to case, $9.00 case.
B—6 doz. to case, $7.75 case.

LANTERN GLOBES—

Short or Long Pattern—1 doz. to case, $1.25 doz.; 3 doz. to case, $1.15 doz. 6 doz. to case, $1.10.

LUFKIN PRODUCTS AT LOWER PRICE LEVELS

London, Ont.

New price levels on the Lufkin line of boxwood and spring joint rules and measures, effective September 1, show a reduction of approximately five to ten per cent.

POTTS IRON HANDLES AT HIGHER PRICES

London, Ont.

In conjunction with the advance in price on Potts sad irons, an increase in quotations on handles is noted. These are now priced at $1.50 per dozen for the No. 1 japanned, an advance of ten cents per doz.

POTTS SAD IRON PRICE TEN PER CENT. HIGHER

London, Ont.

An increase of approximately ten per cent. has been made in the prices on the Potts line of sad irons. The No. 50, nickel-plated, are now quoted at $1.90 per set, while the new price on the No. 55 plain, is $1.80.

GRINDSTONE FIXTURES ON HIGHER PRICE LEVELS

London, Ont.

Some higher prices are in effect this week on grindstone fixtures. The revised levels on these products follow:

GRINDSTONE FIXTURES—	
No. 1 x 15"	8 10
No. 2 x 17"	8 50
No. 3 x 19"	10 00

NEW LIST PRICE ON STEWART HORSE CLIPPER

London, Ont.

A reduction of $1.25 has been made in the list price on No. 1 Stewart horse clipping machine. The revised list quotation is $12.75 each. The horse clipping attachment is also reduced, the lower price being $7.75 each. These are quoted at a discount of 25 per cent, as formerly.

All other Stewart machines and parts remain unchanged in price.

INCREASED QUOTATIONS ON WROUGHT NIPPLES

London, Ont.

Higher prices have been announced on wrought nipples, these products being about ten per cent. higher. Following are the revised levels:

NIPPLES—

Close and Short:
4" diameter and smaller, 55% off list; 4½" to 8" diameter 45% off list; 4" diameter and smaller, running thread, 35% off list.

Long:
4" diameter and smaller, 60%; 4½" to 8" diameter, 50%; 4" diameter and smaller, running thread, 30%.

HIGHER PRICES ON WROUGHT COUPLINGS

London, Ont.

New prices approximately seven per cent. higher are in effect on wrought couplings. Four inch and under are now quoted at list less 25 per cent., while 4½ inch and larger and list less five per cent.

BOOKED ORDERS MOVING FOR CATTLE CHAINS

London, Ont.

Booked orders are now going forward for cattle chains. These products continue at the quotations announced for this season of list less 25 per cent.

ORDERS BEING PLACED FOR ICE SKATES

London, Ont.

Merchants are now placing orders for future delivery of ice skates. These products are unchanged in price, the quotations on the Starr make being list less thirty per cent.

FALL BOOKINGS EVIDENT FOR SNOW SHOVELS

London, Ont.

Fall orders are now being taken at prevailing price levels for snow shovels. Current quotations on these products are as follows:

SNOW SHOVELS—	Per doz.
Prince or No. 20, Long Handle	5 75
Prince or No. 20 D. Handle	7 00
King or No. 40, D. Handle	7 80
Moose or No. 50 D. Handle	9 60
WOOD SNOW SHOVELS—	
No. 76	8 75
No. 77	9 50

ORDERS FOR HAND SLEIGHS ALSO NOTICED

London, Ont.

Many dealers are now placing their seasonal orders for hand sleighs. These products are practically unchanged in price, the prevailing quotations on the Canadian Buffalo Sled make being list less thirty-five per cent.

AMMUNITION MOVING IN SEASONAL VOLUME

London, Ont.

Ammunition is now reported to be generally moving in good seasonal quantities. Quotations remain steady at the following levels:

AMMUNITION—

Dominion make—Rim and Centre Fire Cartridges, List less 55%.

	List Less
Crown Loaded Shells	50/2½%
Sovereign Loaded Shells	50/2½%
Regal Loaded Shells	50/2½%
Canuck Loaded Shells	50/5%
Imperial Loaded Shells	50/5%

IMPROVEMENT IN SALE OF ALARM CLOCKS

London, Ont.

A number of merchants have noted an improved demand for alarm clocks recently. This movement is usually apparent during this season of the year. Prices on these products remain at the following levels:

ALARM CLOCKS—

	Each
Good Morning	1 37
America	1 37
Lookout	1 88
Sleepmeter	2 06
Jack-O-Lantern	3 08
Big Ben Plain Dial	3 43
Big Ben Luminous Dial	4 80
Baby Ben Plain Dial	3 43
Baby Ben Luminous Dial	4 80

GOOD SALE EVIDENT FOR HARVEST TOOLS

London, Ont.

Distributors generally report that a good sale for harvest tools continues. These products remain at the quotation of list less sixty per cent.

SCOOP SHOVELS NOW IN SEASONAL ACTIVITY

London, Ont.

Scoop shovels for grain and coal are now reported moving in good volume. Quotations continue at list less 53 per cent. Following are local net prices on some of the good selling lines:

SCOOP SHOVELS—

Black Cat	Per doz.
No. 2	15 04
No. 4	15 74
No. 5	16 09
No. 6	16 44
No. 8	17 14
No. 10	17 84
Moose	**Per doz.**
No. 2	16 22
No. 4	16 92
No. 6	17 62
No. 8	18 32
No. 10	19 02

UNIVERSAL FOOD CHOPPERS NOW LOWER

London, Ont.

New lower prices are being quoted on the Universal line of food choppers, these products now moving in seasonal volume. Following are revised quotations:

FOOD CHOPPERS—

Universal, 0—$16.25 doz. Universal 1—$19.25 doz. Universal 2—$23.50 doz. Universal 3—$31.50 doz.

BOOKED ORDERS FOR ASH SIFTERS MOVING

London, Ont.

Booked orders for ash sifters are now going forward in some instances. Bookings of similar seasonal lines are reported to be coming along nicely. Following are prevailing price levels:

ASH SIFTERS—

Common Wood Sides—$2.65 doz. Banner No. 2, $2.65 each. Banner No. 3—$1.95 each.

Calgary, Alta.

CALGARY, ALTA.—Quite the most important news item this week for Western Canada is the definite settlement of the local coal strike. The settlement is of intimate interest to every householder and comes at a time when the general public were beginning to show signs of impatience. Some of the mines have already started operations, and it is expected that Monday will see all the mines open and taking on men as fast as they can be absorbed. Some 10,000 miners in Southern Alberta will be at work before the week end after being idle for five months. The settlement shows what is considered a good wage for the men and full time is assured to supply the winter demands. Reports are current that Alberta coal will be needed in markets generally supplied from eastern and southern fields, but the regular trade demands of the three prairie provinces will assure steady employment and the coal districts can confidently expect a return to prosperous trading conditions. Hardware jobbers state that orders for mining supplies are already coming in and they expect this department to show more than usual activity during the next month. This hardware retailer in the coal fields is keeping in mind the miners' well known spending ability and is preparing to handle current requirements as well as the deferred needs due to a long period of inactivity.

Activity in Crop Needs

A general review of the jobbing trade shows quite a marked activity over recent weeks, especially in crop requirements. Orders are very plentiful but the quantities small and the general volume still short of the years of freer buying and higher prices. Jobbers generally are encouraging the retailer in careful buying and in careful credits and look for the returns from this crop to be used for purposes of liquidation rather than expansion. Collections can be described as about stationary. Current purchases are pretty well taken care of, but little impression is being made on overdue paper and it is probable this item will continue to drag until final crop returns are realized.

A certain activity in heating stoves draws attention to the approaching stove season. Placing orders on this line have been lighter than usual, although it is thought that retailers stocks are low. The retailer is evidently inclined to buy sufficient for his usual display and back up his display by quick deliveries from jobbers stocks. Range business although a marked feature in advertising is still under normal. Prospects seem to push the need on for a decision in the near future, and some good business is in sight as soon as crop returns are definitely known.

The important price changes this week have been expected and seem to be a direct result of the coal strike and th consequent scarcity of coal and coke in eastern industrial centres. This, together with the reported activity in heavy metals has affected a number of heavy lines. Changes on the more expensive lines of finished shelf hardware are mostly downward.

The advance in soil pipe and fittings forecasted in Hardware and Metal and put in effect by manufacturers three weeks ago has shown up in local quotations this week end. The advance was expected and local buyers have shown some activity in covering up on jobs that are in sight. Present prices Calgary, Edmonton and Lethbridge are as follows:—

Soil pipe 2 and 3 in. plus 5 per cent., 4 in. less 10 per cent., 5 and 6 in. less 5 per cent.; fittings 2 and 3 in. less 22½ per cent.; fittings 4 to 6 in. less 30 per cent.

A correction of last week's advice on putty in 1 lb. tins is noted; changing price from 15 cents to 13 cents each.

Telegraphic advices confirm the expectation of an advance on iron pipe, which will no doubt be made effective in local markets early in the coming week. This advance also covers wrought couplings and nipples.

Penberthy injector prices which have shown some unevenness in local markets have been adjusted to 55 off.

The recent stiffening in flat sheets is reflected in increases in eavestrough, conductor pipe, corrugated iron, metallic shingles, etc., and following prices are now in effect, Calgary, Edmonton and Lethbridge.

EAVESTROUGH—

	O.G. Pattern	Slip Joint	Half Round
8 in	6 20	6 85	6 60
10 in.	6 95	7 60	7 35
12 in.	8 35	9 00	8 65
15 in.	11 45		12 30
18 in.	15 05		15 90

Conductor pipe, corrugated or plain round, 2 in. $7.40; 3 in., $8.65; 4 in., $11.05; 5 in., $15.60; 6 in., $19.35.

Conductor Elbows, corrugated or plain round 2 in., $2.30; 3 in., $2.60; 4 in., $4.10; 5 in., 10.40; 6 in., $12.15.

Corrugated iron, galvanized, 28 B.W. Ga., $7.70; 26 B.W., $8.50; 26 U.S. Ga., $9.45; 24 U.S., $12.00; 22 U.S., $14.45; 20 U.S., $17.00; 18 U.S, $21.75 per 100 feet.

Corrugated iron, painted, 28 B.W. Ga., $6.50 per 100 feet.

Galvanized shingles, standard grade, 10.35 per square.

Galvanized Shingles, painted, standard grade, $8.25 per square.

Galvanized small sheet siding, standard grade, $8.70 per square.

Galvanized small sheet siding, painted, standard grade, $6.60 per square.

Winnipeg, Man.

BOOKINGS FOR FALL IN GOOD QUANTITY

Winnipeg.

Fall bookings for heaters, stove pipe and elbows, lanterns, and other seasonable products, are reported to be coming along in satisfactory fashion. While commitments are not of marked extent, the aggregate constitutes a fair amount of business.

WHITE LEAD IN OIL HAS FAIR MOVEMENT

Winnipeg.

White lead in oil remains on a fairly steady basis at present, with trade of a moderate nature. There have been no further price developments, the present levels being unchanged. Some extension in the booking date is looked for.

TROUGH AND PIPE STILL ON ACTIVE MOVEMENT

Winnipeg.

A fairly active movement and the continued firmer tendency in flat galvanized sheets still contribute a strong undertone in eavestrough and conductor pipe. With harvesting in full swing the demand for these goods from the country districts has slackened up slightly but in the cities the demand is fairly steady. Quotations continue firm.

LINSEED OIL PRICE RECEDES FIVE CENTS

Winnipeg.

Linseed oil has recorded another decline in price, to the extent of five cents per gallon. This change brings the revised current level to $1.15 for raw and $1.18 per gallon for boiled in one barrel lots.

STRENGTH MAINTAINED IN TURPENTINE MARKET

Winnipeg.

Quotations on turpentine are locally unchanged. The general market situation maintains a firm tone and quotations at $1.85 per gallon are unchanged.

NEW LIST ISSUED ON IRON PIPING

Winnipeg.

The feature of the current hardware markets is the advance in wrought iron pipe prices. A strong undertone has been noted for some weeks past due to the rising costs of pig iron, and other production costs, and the increase was not surprising. Following are the revised levels:

WROUGHT PIPE—	Black	Galv'z'd
⅛"	6 84	9 24
¼"	4 68	7 12
⅜"	4 82	7 26
½"	6 15	8 00
¾"	7 48	9 55
1"	10 45	13 72
1¼"	14 15	18 56
1½"	16 90	22 26
2"	22 72	28 87
2½"	36 00	47 22
3"	47 00	67 77
3½"	61 10	78 28
4"	72 36	93 28
4½"	84 27	107 15
5"	98 28	124 92
6"	127 47	162 08

EASIER TENDENCY NOTED IN PRIMARY OIL MARKETS

Winnipeg.

Gasoline and coal oil prices are unchanged at the revisions of a few weeks

ago. There is however an easier tone reported in primary centres, further price recessions being announced on crude oil, with lower quotations also appearing on gasoline and other products in the south. September usually brings a heavy consumption of gasoline, and in months following coal oil is used more extensively. Whether this will offset the softer tone and assist in maintaining a steady market is considered problematic by local refiners, but the opinion is expressed in certain quarters that with a continued easier tendency in the undertone of these products a further recession in prices on domestic markets would not be surprising.

St. John,

ST. JOHN, N. B.—A committee of the St. John branch of the Retail Merchants' Association of Canada is arranging for special parking places for visitors' automobiles during the St. John exhibition.

In promoting this plan the members had in mind the desirability of making all possible arrangements for the convenience of visitors. Many visitors come by car, and the assurance that they can find adequately protected parking places in convenient locations for their cars, the merchants think, will be welcomed by them. A committee has also been appointed to watch the methods of the concession holders on the "pike," in order to ensure fair play for the public. It has been announced that this year the various exhibitors are going to give away samples, as was the custom in pre-war days, but after the war manufacturers felt that conditions did not allow for any expense that could be avoided, with the result that at the last exhibition very few manufacturers indulged in this method of advertising.

One or two of the large hardware merchants are exhibiting a display of hardware, including shelf goods and builders' supplies and automobile accessories. The St. John Board of Trade is giving a good deal of publicity to the Port of St. John, and is publishing considerable reading matter dealing with the advantages of this city as a distributing centre.

Active Building In Maritimes

F. R. Sumner of Moncton, N. B., was in St. John and stated that the people of Moncton were continuing their extensive building campaign, and that more houses than ever were going up, and although money seemed to be pretty tight, Monctonians were confident of the future of their city, and were erecting substantial and attractive homes. Mr. Sumner referred to the large increase in the population of Moncton, and said it was imperative that the city should carry on its extensive building campaign to take care of the many new residents.

Contracts have been awarded for four more new bridges in the province of New Brunswick. These bridges are to be built of concrete. Messrs. T. McAvity & Sons, Ltd., have been making a special display of garage door hardware, and have also been advertising this class of goods largely in the local papers. W. H. Thorn & Co., Ltd., are now commencing to advertise and display fall sporting goods. It has always been the policy of this firm to make their display just a little before the season opens for any particular class of goods. Emerson & Fisher, Ltd., are making a drive on pipeless furnaces, and advertising the fact that a pipeless furnace costs very little more than the old fashioned heater, and is much more efficient and economical. Philip Grannan, Ltd., are also pushing pipeless furnaces, and as an extra inducement to customers to have installations made at once, were offering to install furnaces immediately, and accept payment in the fall, so Mr. Grannan stated to Hardware and Metal. Robertson, Foster & Smith, Ltd., are going after the loaded shells and cartridge business and are also advertising rifles and shot guns. They are urging customers to get ready for the game season. P. Campbell & Co. are taking advantage of the coal shortage, and are advertising oil stoves, calling attention to the fact that it is a good way to save coal by using the oil stove as much as possible. A. R. Williams Machinery Co., Ltd., are advertising drag saws, and equipment for lumbering operations. They too are taking advantage of the coal shortage, and advising their customers to lay in as much wood as possible, and are offering special gasoline driven saws for firewood cutting.

Some Price Changes

Following are price changes made this week:

Latest price on chisels are as follows, indicating an advance.

CHISELS—
¼, $6.60; ⅛, $6.60; ⅜, $6.60; ½, $7.20, ⅝, $7.80; ¾, $7.80; ⅞, $8.40; 1", $9.00; 1¼, $9.60; 1½, $10.20; 1¾, $10.80; 2, $11.40.

SOCKET FRAMING—
¼, $12.75; ⅜, $12.75; ½, $13.60; ⅝, $14.45; ¾, $14.45; ⅞, $15.30; 1, $15.30; 1¼, $17.00; 1½, $18.70; ¾, $20.40; 2, $22.10.

MARTIN-SENOUR NEU-TONE PAINTS:
White—Gal., $3.55; ½, $3.70; ¼, $3.85.
Red—No. 672—Gal., $3.95; ½, $4.10; ¼, $4.25.
All other colors—Gal., $3.45; ½, $3.60; ¼, $3.75.
Martin-Senour—Ordinary Colors and Black—Gal. $3.70; ½ Gal. $3.85; ¼, $4.00; ⅛, $4.30.
Outside, Inside and Gloss White—Gal.—$4.05; ½, $4.20; ¼, $4.35; ⅛, $4.65.
Inside Flat White.—Gal.—$4.05; ½, $4.20; ¼, $4.35; ⅛, $4.65.
Bench Axes, XXX—No. 1, $17.50; No. 2—$20.00; No. 3.—$22.50; No. 4—$24.50; No. 5—$27.00.
King Air Rifles—No. 21—$17.40; No. 22—$20.30; No. 4—$29.00; No. 5—$31.90; No. 14—$8.70; No. 15—$2.90; No. 10—$10.45.
Tents are quoted as follows:—7 x 9—$12.00; 8 x 10—$12.70; 10 x 12—$18.15; 12 x 14— $24.15.

Hamilton, Ont.

Building Supplies Continue Active Feature of Current Hardware Trade

HAMILTON, August 31.—Although there has been no material change during the past week in current business conditions, the strengthening effect of continued favorable crop advices and of reports of extensive preparations for the elargement of industrial activities is clearly perceptible, and both merchants and manufacturers confidently anticipate a good fall and winter trade. While the majority of orders are still moderate in amount and mainly for immediate requirements, they show a steady increase in number, and include almost all kinds of staple commodities. There is also a growing disposition on the part of retailers in numerous sections to place orders for deferred delivery, which is regarded as reflecting depleted supplies and the definite return of confidence in the future. Collections seem to be slowly improving.

Speaking generally, the local price situation remains unchanged except for a few primary adjustments, practically all of which indicate a continued upward tendency.

Building supplies continue to be one of the most active features of the local market. This classification must also include hand tools, nails, roofing paper, roofing nails, metal laths, lock sets, casement hardware and the various small articles needed by contractors and builders. Hand tools of all kinds are particularly in demand. Seasonal goods are generally in active demand and dealers are getting ready to do a good business in early winter items.

Additional orders for ammunition of all kinds have been booked by the local jobbing trade the past week. It is safe to state that a very large percentage of the retail hardware trade have covered their fall requirements for this class of merchandise.

The mining resumptions in certain soft coal areas are not being counted upon to relieve the iron and steel industry to a great extent, as the rail strike, shortage of cars and priority orders combine to offset the immediate effect. Steel products in general, therefore retain their recent strength, with no decided easing in prices being looked for as wages have been advanced by many steel producers, thus adding to production costs.

There has been no appreciable increase in the supply of coal, and the iron and steel plants are still very short of coal, and are steadily slowing down their plants in operations. The general rate of operations of blast furnaces and steel works in southern production centres is now about 50 per cent., while only a month ago it was 75 per cent. or more. All this means that supplies of steel of all kinds are growing less, and on some lines stocks are about exhausted.

Pittsburg, U.S.A.

THE PAST week has been the most important one in iron and steel trade developments for a year if not for several years. In a nutshell, the trade has joined the inflationary movement that has been asserting itself in some lines for several months, and it goes farther, in that it will push inflation instead of resisting, as it was doing vigorously only two months ago.

The cause of the change in attitude is the rapacity of labor. It is necessary to be frank in order to give the news. It has been decided, with the advice of banking interests, to go with the tide, letting the unreasonable demands of labor work out into higher costs until the inevitable break, dictated by economic laws, is precipitated.

Coal mining costs are outrageously high, by the re-establishment of the 1920 wage scale, and the scarcity produced by a five months' strike is such that coal will command tremendous prices right into, if not through the winter. Unwillingness on the part of building trades labor to do a reasonable amount of work has brought fancy wage rates in building operations, even in some cases for common labor, and the steel industry has been unable to stand the competition, hence it raises its wages to a level not warranted by economic conditions.

The costs of producing pig iron and steel will be very high by the double influence of high wage rates and shortage of materials and transportation. Instead of the steel industry drawing upon its surplus to pay the difference between old low-priced contracts still to be filled and the high costs under which the orders must be filled it will advance prices to the possible limit to make profits out of steel the consuming industries are still willing to buy. This will be a year of very moderate profits for the producers, but a year ending with prices that cannot last indefinitely. When the end comes, some time in 1923, lessons in economics will be taught labor in the hard school of adversity.

Connellsville Wages

The H. C. Frick Coke Company, the fuel subsidiary of the United States Steel Corporation, posted notices in the Connellsville region that it would revert to the wage scale of September 1, 1920, the highest scale ever paid in the region, and independents promptly followed. There was no offer of union recognition. The region has been strictly non-union for more than 30 years but the United Mine Workers, in connection with their general strike inaugurated April 1 last, organized the men to an extent. The notices were posted four days ago, but up to this writing only a few men have gone back to work, just as men were straggling back from time to time previously. The Frick Company had built up a moderate production of coke, but was shipping very little coal to the corporation's mills and by-product ovens, compared with normal. Independents have been operating very poorly. The members of the Pittsburgh Coal Producers' Association, which have had a regular union strike on their hands, offer the men the 1920 scale but without the check-off, which means without union recognition, and the strikers have failed to go back. In various other districts the operators have yielded, having suffered a defeat that was unimaginable last March.

The United States Steel Corporation announced that, effective September 1, it would advance wages at its mills and furnaces 20 per cent. Some independents followed almost instantly with announcements, and the advance will no doubt be complete. For the central west, Pittsburgh, Wheeling, the valleys, the Lake Erie front, Chicago, etc., this means an advance in common labor from 30 to 36 cents an hour. The prewar rate, set by the advance of February 1, 1913, was about 19 cents, while in 1898 the usual rate had been 13 cents. In 1898 bars, shapes and plates sold down to a cent a pound. Now wages are practically tripled and freight rates are much higher. According to the Connellsville Courier the average value of Connellsville coke in 1894 was $1.00, and in 1898 $1.55. Now $11.50 is quoted and blast furnaces assert they will not buy until the price gets down to $7.00. Competition among merchant furnaces to get coke and be the first to resume will probably result in more than $8.00 being paid, when the time comes that coke is offered in sufficient volume to enable any furnace to run. To date, as indicated above, the offerings are too small to make it worth while to try to buy, in such tonnages as a blast furnace must have.

Steel Price Advances

On August 15, independent pipe mills advanced their prices three points (a point is about $2 a net ton) on black and two points on galvanized steel pipe. Eight days later than these announcements, and one day after the Steel Corporation had announced its 20 per cent. wage advance for mills and furnaces and the advance of 40 per cent. or more in the Connellsville region, the National Tube Company, the pipe subsidiary of the corporation, announced an advance equal to that of the independents.

A fortnight ago the American Sheet & Tin Plate Company advanced its price $2 a ton on blue annealed and $4 a ton on black, galvanized and automobile sheets, to levels independents had previously been securing. Now the independents are advancing to a level $3 above the corporation prices. The market is thus quotable at 3.35c to 3.50c for common black.

The Carnegie Steel Company has withdrawn practically all prices. It had been selling bars, shapes and plates, for altogether indefinite delivery, at 1.80c. It is reported that some purchases might be made from it at 1.90c for bars and 2.00c for plates and shapes, but the company will not admit having these or any other prices. Independents generally are asking 2.25c, and obtaining the price without difficulty on anything like early delivery.

Connellsville coke has been declining and has reached $13 on foundry and $11.50 on furnace, the latter price not interesting furnaces.

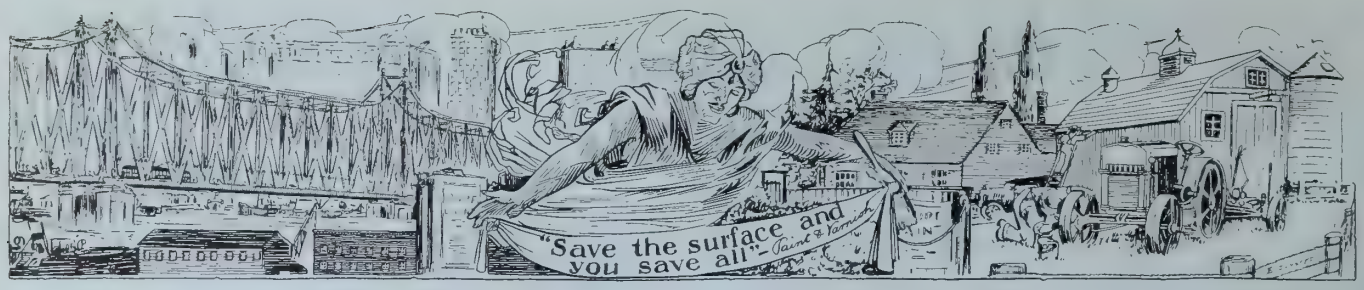
The pig iron market is one for prompt shipment out of stock only. Neither producers nor consumers are disposed to consider forward deliveries. Producers do not know when they will again be able to make iron. There is no more valley foundry iron offered, and apparently the point nearest Pittsburgh from which any foundry iron can be had is Buffalo, at say $32, Buffalo furnace, making a price delivered to Pittsburgh equivalent to $33.50, valley basis, allowing for freights. A week ago the market was quotable at $30, two weeks ago at $28 and five months ago at $19. Over 2,000 tons of Bessemer iron have been picked up at $30, a $3 advance in the week, and it is thought this took all the iron to be found. Last sales of basic seem to have been at $26, valley, some time ago. Now there are no offerings but it is claimed $33 was bid.

BELGIUM OFFERS OPPORTUNITIES FOR TRADE WITH CANADA

Montreal. — Opportunities for trade between Canada and Belgium during the next few years, when Belgium is preparing for her rehabilitation after the German destruction, and also preparing for an increased import and export trade, were outlined by H. Laureys, principal of the Commercial High School at a meeting of the Montreal Chambre de Commerce. Although Belgium was undergoing a rather hard time at present, she was rapidly recovering both her powers for import and export trade, especially in the metal and allied trades.

Dealing with the commercial relations during the past year between the two countries it was pointed out that Canada had exported more than $40,000,000 to Belgium, whereas Belgium had only sold about $4,500,000 worth to Canada. Belgian industry was of considerable extent and had much to offer in exchange for food products and raw materials which she bought from Canada. Articles at present exported to Canada included glass and glassware, which formed more than half of the total exports, textiles, canned vegetables, cut diamonds, books, firearms, wallpaper, zinc and its derivatives, basket-work and chemical fertilizers.

In conclusion, M. Laureys urged that Canadian exporters make a careful choice of agents at Brussels.



Eighty Per Cent of Farmers Use Paint and Varnish to "Save the Surface" of Barns, Etc.

Investigation in Rural District Reveals That Local Dealers Are Getting Only a Small Share of Possible Business in Paint and Varnish—Average Return Shows Farmer Paints Once in Six Years—Makes Use of Four Gallons of Paint and Varnish a Year

THE SPREADING of the gospel of "Save the Surface" in the farming communities is the problem which faces the hardware merchant right now. Farmers in most parts of the country are engaged in harvesting a bountiful crop which will show them good returns and they will be ready to heed the warnings of possible destruction to buildings, implements, etc., due to inadequate protection against the elements. A recent investigation conducted by governmental agencies indicates that farm trade has increased very greatly during the past two or three months. In most lines, sales have been ahead of last year in volume of goods and equal or greater in value.

Farmers are cheerful and hopeful and there is now very little resentment at prices of most goods. Prospects for good crops and fair prices for farm produce have given farmers confidence and they are not afraid to spend cash in hand and moderately to anticipate future income in order to buy the things they need.

Farmers need large quantities of goods in all lines, for farm buying was greatly restricted during a considerable period. County seat merchants are generally expecting still better business as soon as harvest is out of the way, and the live merchandisers are already planning more extensive advertising campaigns through the mail and the country newspapers to reach the farmers and village people. They feel that a drive for farm trade during the next few months will be especially profitable. Most of the farm trade with these merchants is cash business, and is particularly appreciated at this time.

Merchants in the larger towns and cities find that advertising to farmers is increasingly profitable every year, because automobiles have greatly enlarged the distance farmers come to buy and the frequency of the farmers' trips to town. Moreover, farm standards have improved so that a great proportion of farm people are only satisfied with a large selection and the best grades of merchandise, which can usually be secured only in the larger places.

In so far as paint and varnish trade is concerned this condition contains real possibilities. Investigation of the farmers' purchasing power in a certain rural section indicated that local dealers were getting only a small portion of the paint business to be procured. The farmer is a big potential buyer of paint and varnish but his trade must be sought aggressively. This investigation brought out the following facts:

How Often Does Farmer Paint?

The farmers themselves say they paint their houses and barns once every 4.4 years on the average.

The hardware dealers' replies indicate the farmer paints once every 7.1 years.

The lumber dealers' replies indicate the farmer paints every 6.4 years.

The average shows once every 5.9 years.

In any event, these facts point out that the farmer is a buyer of paints, and can be made a still better one by greater educational and advertising contact.

The hardware dealer averages 8.4 gallons per farmer sale on house and barn paints.

The lumber dealer averages 10.9 gallons.

The average shows that the farmer buys about 9.6 gallons every 5.9 years.

If our country had 200,000 farms this would mean a consumption of 1,920,000 gallons every 5.9 years, or about 325,000 gallons per year.

The farmer estimates it takes an average of 20 gallons of paint at a time for his farm buildings.

The farmer estimates he paints his implements and farm machinery once every 2.5 years.

He also estimates it would take an average of 4.2 gallons if he painted all his machinery and implements.

The farmer estimates he uses an average of 4.7 quarts of interior varnish and enamel a year.

Paint to Save the Surface

Eighty per cent. of farmers interviewed say they paint outside for protection, showing the Save the Surface message is getting in its work, and "appearance" is only a factor.

About 12 per cent. more farmers say they paint in fall as against spring and other seasons.

Eighty per cent. of the farmers interviewed use prepared paints, as against mixing their own.

Eighty-five per cent. of these farmers do their own painting as against hiring it done.

About 50 per cent. more farmers paint their houses more frequently than their barns, although many farmers paint both at the same time.

About 2 per cent. more farmers interviewed prefer wall paints to wall paper.

Floor paint leads for inside use, with varnish stain a close second, and varnish a near third.

The majority do not paint the interior of their stock barns for better lighting or health, although some use whitewash.

There is some demand for a disinfectant paint for the inside of poultry houses, and considerable use for it.

No More Costly to Paint

Seventy per cent. of farmers interviewed at the "peak" price period said it was no more costly to paint than five years before, indicating their appreciation of the relation be-

Fall the Time to "Save the Surface"

As much of the need for surface protection on buildings, vehicles, implements, etc., is in the Fall season of the year before the dampness of early winter sets in, it would pay the hardware merchant to concentrate all his efforts on pointing out the advantages of adequate paint protection and then advertise his paint department as headquarters for advice on means to secure this protection. In this display such an invitation is extended by the use of cards inviting visits to the "Save the Surface" department. Samples of wood half painted or enamelled are shown along with brushes, color cards, etc.

EIGHTY PER CENT OF FARMERS USE PAINT

(Continued from page 50)

tween advanced paint costs and advanced building costs, or replacements.

Ninety per cent. of farmers interviewed on one investigation do not paint their implements and machinery.

Fifty per cent. of the dealers interviewed said the farmer was a good auto enamel prospect and buyer. The rest agreed there was a future possibility rapidly developing here. Seventy-three dealers interviewed said if they had the exclusive trade of 100 farmers they could sell them an average of 7.6 quarts of auto finish each.

We all know that investigations and surveys vary. They may not always be conclusive, but they are usually interesting and point to certain facts and conditions. Whatever the variants, we know the farmer is a real prospect for and user of paints, varnishes, stains and enamels.

The big question at this harvest time is to ask ourselves how much of his business are we getting?

Perhaps this is a typical cross section of the situation. If it is, it behooves the local dealer to establish himself as the real paint authority and headquarters for the community. It reflects a neglect and lack of appreciation of the farmer's paint purchases.

OPEN RETAIL STORE

Hamilton, Ont.—Scarfe & Co., Ltd., Brantford, Ont., manufacturers of paint, varnish, wax, etc., have opened a retail store at 266-268 King St. East, Hamilton, Ont., for the distribution of their products.

BRUSH COMPANY OPENS FIRST WAREHOUSE OUTSIDE OF CANADA

Meakins and Sons, Ltd., Hamilton, have just opened their first warehouse outside of Canada, putting in a stock at 52 South Castle St., Liverpool, England, for the convenience of hardware, paint and oil jobbers in Britain who have been handling this firm's line for the last ten years. C. W. Meakins will be in charge of this warehouse.

R. J. WALKER SALES MANAGER INTERNATIONAL VARNISH CO.

R. J. Walker has been appointed sales manager of the International Varnish Co., with headquarters at general offices and factory at Toronto.

Mr. Walker's connection with the above company dates from its formation in Canada some years ago, and during this time has filled various positions in an able manner. Being of a cheerful and genial disposition, Mr. Walker has won for himself many friends both among his fellow employees and acquaintances outside the company who wish him continued success in future.

VALUE AND EXTENT OF LINSEED IMPORTS

During the month of June, 12,220 pounds of linseed oil, valued at $1,427.00, was imported into Canada from the United States. This would amount to approximately 1358 gallons, showing the average price paid to have been in the neighborhood of $1.05 per gallon.

Weekly Paint Markets

Montreal

MONTREAL, Aug. 31.—Price developments on the paint markets this week include a recession in linseed oil prices and a further advance in turpentine quotations. Linseed oil is reduced from six to ten cents per gallon in sympathy with an easier flax market, a quieter demand and the appearance of foreign oil also said to be factors considered. Although the supply of flax seed is still reported as none too ample, the prospects of the new season's crop being marketed at an earlier date than usual has caused not only a softer tone in the market for future but eased the flax seed market considerably, a drop of ten points being recorded. The upward climb in the turpentine market is not only noted locally but southern producing centres record a substantial advance during the past week. Demand in the south is remarkably good, with inquiries from over-seas now developing into sales in greater proportion. Importers state that from present indications a firm tone in turpentine seems altogether likely for the weeks following.

New lower prices are issued on putty for Fall trade, the reduction varying on the different sized containers and quantities. The booking date on white lead in oil is extended with prices unchanged to November 30th.

LINSEED OIL MARKET DEVELOPS WEAKER TONE

Montreal.

An easier flax-seed market through anticipation of the new crop, a quieter demand and the appearance of English oil on this market are given as factors responsible for a softer tone in linseed oil and a reduction of from six to ten cents per gallon this week. This change in the undertone of oil came as more or less of a surprise to some well informed, who anticipated an easier market toward the latter end of September, but were of the opinion that a steady tone would prevail until new seed was actually on the market.

It is reported that the new season's seed crop will be marketed earlier this year, and a considerable amount of this will be offered in the West during September. This had its effect on the cash market also, prices having declined approximately ten points during the week. Demand for future oil deliveries is described as quite active, but only a moderate amount is said to be wanted for immediate delivery, and this has had a tendency to soften the market tone. The third factor, that of imported English oil being marketed locally offers a new phase to the situation, this being the first appearance of the foreign product for some months. Although it is admitted that this is having some effect on the market, little information as to quantity and price was obtainable up to the present, nor prospects of further arrivals from this source. With the advent of the new crop in the near future it is considered probable that lower prices may follow during the following weeks.

LINSEED OIL—

1 to 2 bbl. lots, per gal.	1 02	1 06	1 04	1 08
5 to 8 bbl. lots, per gal.	1 00	1 04	1 02	1 06

Less quantities, add ten cents per gallon.

TURPENTINE PRICES ON A HIGHER PLANE

An upward climb is again evident in the turpentine market this week and prices are generally advanced five cents per gallon. There is still the variation in quotations among local distributors, a quotation as low as $1.65 being given, while others announce a new high level of $1.80 per gallon in one barrel lots. A firm situation is reported from primary centres in the south and prices showed a further substantial advance during the week. Demand is keeping up remarkably well, with buyers displaying a keen interest in the present market. Inquiries from over-seas are also good, this assisting in the maintenance of a stronger tendency. Although the recent gain in this product has been quite rapid, the opinion is expressed by local importers that still higher price levels are likely on southern markets. Local stocks are only fair, due to transportation difficulties, and following are average quotations:

TURPENTINE—

1 barrel lots	1 65	1 80
2 to 4 barrel lots, per gal.	1 63	1 78
Broken lots	1 75	1 90

WHITE LEAD BOOKING DATE EXTENDED TO NOVEMBER 30TH

Montreal.

Manufacturers of white lead in oil annnounce that no change from present prices is made for Fall trade, and the booking date is extended to November 30th.

NEW LOWER PRICES ANNOUNCED ON PUTTY

Montreal.

A reduction of varying extent, according to sizes of containers and quantity is announced on putty. Drums or tins, 25 lbs. loose, are now quoted at $4.00 per 100 lbs. in five ton lots, with a differential of 25 cents in one ton lots and a further increase of 25 cents in less quantities. This is a reduction of $1.25, former price being $5.25 per 100 lbs. The differential between standard putty and pure linseed oil putty is also reduced from $1.50 to $1.25 per 100 lbs. Booking date extended to November 30th. Following are new quotations:

PUTTY—

Standard, per 100 lbs.	5-ton.	1-ton.	Less.
Bulk barrels, 800 lbs.	$3 25	$3 50	$3 75
Bulk drums, 100 lbs.	3 75	4 00	4 25
Bulk drums or tins, loose 25 lbs.	4 00	4 25	4 50
Do., loose 12½ lbs.	4 25	4 50	4 75
Tins, cased, 25 lbs.	4 75	5 00	5 25
Tins, cased, 12½ lbs.	5 00	5 25	5 50
Bladder barrels, 400 lbs.	5 00	5 25	5 50
Bladder cases, 100 lbs.	5 25	5 50	5 75
5 lb. tins	8 00	8 25	8 50
1 lb. tins	10 00	10 25	10 50

Pure linseed oil putty, $1.25 per 100 lbs. advance over above prices.

Toronto

TORONTO, August 31.—With the new crop of flax seed now coming on the market linseed oil has declined in price this week. Turpentine is still a scarce commodity among certain distributors and this condition brings about a maintenance of last week's high price level on the one hand while others are reducing the low price formerly shown. The result is to show an even wider range in prices this week. Following the meeting of lead grinders comes the announcement that white lead prices are to be maintained with booking date extended from September 15 until November 30. Putty prices have undergone considerable reduction this week and a brisk trade anticipated this Fall. Some small revisions are made in some brush prices effective from the beginning of this month. Both advances and declines are represented in these revisions.

LOWER QUOTATIONS ON PUTTY

Toronto.

Reduction in putty prices is made, the present costs being under consideration in view of a brisk movement anticipated during the ensuing weeks. For some time past, rumors of shading in putty quotations have been in evidence, thus rendering the tone of the market more unsettled. With the active Fall season at hand, trade is resuming a brisk note and it is felt that

Meakins'

Displays Create Business

The display cases herewith illustrated, when placed on your counter or in your window, give your brushes a chance to sell.

Ordinary methods of display fail with brushes; they don't look well in bins or hung upon racks.

Meakins containers specially made to display brushes to advantage at once attract the eye. Meakins quality brushes then practically sell themselves.

At this time of year be sure to suggest a new brush with every purchase of paint or varnish.

TORONTO MARKETS

(Continued from Page 54)

a price adjustment would undoubtedly stimulate the movement in this direction. Following are new prices:

PUTTY—

Standard, per 100 lbs.	5-ton lots	1-ton lots.	Less
Bulk bbls.	$3 70	$3 95	$4 20
100-lb. drums	4 20	4 45	4 70
25-lb. irons	4 45	4 70	4 95
Bladders in bbls.	5 45	5 70	5 95
Do., less quantities ...	5 70	5 95	6 20
1-lb. tins	10 45	10 70	10 95

Pure Linsed Oil Putty, $1.25 per 100 lbs. advance over above prices for similar quantities.

DECLINE IN LINSEED OIL

Toronto.

With the new crop of flax seed now coming on the market, linseed oil quotations have registered a gradual decline during the past few days. Following are current prices:

LINSEED OIL—	Per Gallon	
	Raw	Boiled
1 to 2 barrels ...	1 05 1 10	1 08 1 13
3 to 4 barrels ...	1 04 1 09	1 07 1 12
6 to 9 barrels ...	1 02 1 07	1 05 1 10

Less barrels, 15 cents per gallon.

WIDE RANGE IN TURPENTINE PRICES

Toronto

Some distributors of turpentine are maintaining last week's high level prices due to the fact that available supplies are very scarce. Others claim to be able to supply reasonable quantities at the low price level represented in the following range:

TURPENTINE—	
1 barrel lots	$1 70 $1 85
2 to 4 barrel lots	1 69 1 84
5 gallon lots	1 85 2 00

Less than one barrel lots, 15 cents per gallon extra.

Turpentine steel drums galvanized, 5c per gallon less than barrel price. Drums charged $10 each, returnable in 30 days, freight paid.

All quantities sold f.o.b. Toronto, Hamilton, London, Brantford, Collingwood, Guelph, Windsor, or Montreal but freight may be equalized from any of these points.

Carload lots of 70 barrels, price on application.

EXTEND BOOKING DATES ON WHITE LEAD

Toronto.

Another extension in the booking date on white lead in oil has been made. The last booking date was to September 15. No change is made in quotations on white lead, the undertone of the market remaining firm. The current movement is described as fairly good, and is generally satisfactory for this season of the year. Improved activity can be looked for as the fall period develops. Following are unchanged prices:

WHITE LEAD IN OIL—	
In 5-ton lots	12 70
In 1-ton lots	13 45
Less quantities	13 80

SMALL DOWNWARD CHANGE IN BRUSH QUOTATIONS

Toronto.

The expected new price lists on brushes are now being prepared by manufacturers, these being effective from September 1. As pointed out in recent issues of Hardware and Metal, a variety of price changes have been issued, including some declines, also a few increases, while a number of other lines remain stationary as regards price. The average revision represents a slight reduction, although many quotations, as pointed out, remain unchanged. A few odd lines show a tendency to higher levels, while other types of painters' and household brushes are consequently reduced. The general re-adjustment has been based on the quality and length of the bristles, it being generally recognized that the bristle supply market governs the prevailing price situation.

EXPECT BRISK TRADE IN WINDOW GLASS

Toronto.

A big improvement in the current demand for window glass from now on is generally anticipated by manufacturers and distributors, owing to the heavier requirements caused through seasonal building activities. A large number of erections are now nearing the stage of completion and other construction work, especially dwelling houses, has been on a much larger scale during the past few months than in recent years. Warehouse stocks are described as in fair shape, while general reports indicate that dealers' stocks are only moderate, the current call from builders' needs during the summer months having made inroads on supplies of both plate and window glass. Under these conditions the recently revised quotations on glass are generally expected to remain fairly firm.

SHELLAC GUM EASIER WITH MODERATE CALL

Toronto.

In the shellac market primary quotations are remaining on an unchanged basis from the recent revised levels, with the easier tone recently noted still being in evidence. Prices on shellac gum are described as slightly receding owing to the quieter demand for this product during the mid-summer period. This situation has reflected to some extent on domestic shellac markets, and while quotations show no drastic change, the bullish element apparent during earlier weeks has now subsided. Average local levels follow:

SHELLAC	White	Orange
In bbls.	5 10	4 70
Gal. Jugs	5 40	5 00

FAIR SEASONAL TRADE IN PAINT PRODUCTS

Toronto.

Ready-mixed paints, varnishes and paint products generally are still enjoying a moderately good sale, and one manufacturer described the current movement as mighty good for this time of the year. While this activity was not being looked upon as the commencement of the fall trade, yet the call for paints, varnishes and enamels has kept up exceptionally well throughout the present period. Mid-summer is usually the quiet session, but the spring movement lasted longer than in previous seasons, while many distributors expect that the fall trade will become manifest a little earlier than usual owing to the ideal weather conditions for painting.

UPHOLDS MUTUAL PLAN OF FIRE INSURANCE

(Continued from page 39)

lished by Stone and Cox of Toronto, page 241.

Policy holders, or prospective policy holders, of the two above organizations should bear in mind that the above companies now under fire have received the same criticism for the past twenty years. But a final analysis shows all of them with more than sufficient surplus, reinsurance reserves accumulated on the same basis as stock companies, and all of them doing what their competitors say they cannot do and that is paying dividends and substantial ones at that.

HOW DO THEY ENTER CANADA

(Continued from page 27)

Mr. McConvey stated to Hardware and Metal that the Minister of Customs was empowered to levy a heavy fine for this breach of regulations if he so desired. He stated that it was most unlikely that the salesman could have "fixed the matter with Ottawa" as claimed, because he would have been advised of any such action sanctioning a scale which was to be sold in the district under his supervision and which he knew to be against the regulations.

Apart from the question of shutting off the sale of such articles in other retail trades in Canada when such cannot be marketed through the hardware trade, Hardware and Metal is interested in the subsequent investigation now being made to find how these scales came through the Customs Department. Surely there would not be leaks through which such scales could pass the several officials who handle such parcels and surely certain firms are not being deliberately favored in the application of the regulations?

REMOVE RESTRICTIONS AGAINST MOTOR TOURISTS

Amended regulations governing the temporary admission into Canada of automobiles, motor-cycles and bicycles, which do away with a number of annoying restrictions and thereby offer a greater inducement to tourist traffic, have been issued by the Department of Customs and Excise. The former regulations provided for the granting of a permit to a non-resident of Canada or temporary visitor for the use of his automobile in this country for a period of thirty-three days for touring purposes only, with the condition that such automobile could not be re-imported for touring purposes within six months from the time of its exportation under such permit. The amended regulations remove this restriction in respect of automobiles brought in for touring purposes for a period of over twenty-four hours and not exceeding thirty days, and provide that where the automobile remains in Canada for more than thirty days the tourist reports to nearest Customs Collector.

ANOTHER fine campaign this Fall — just as strong as it was last Spring! Pratt & Lambert advertising, like Pratt & Lambert products, constantly sets the pace for quality business wherever any surface-saving material is sold. If you would give the highest kind of surface-saving service — and cash in on this unusual advertising campaign in MacLean's, Saturday Evening Post, Good Housekeeping, American and House Beautiful — write for the introductory proposition on Pratt & Lambert Varnish Products.

To Holders of Five-Year 5½ per cent. Canada's Victory Bonds

Issued in 1917 and Maturing 1st December, 1922

CONVERSION PROPOSALS

THE MINISTER OF FINANCE offers to holders of these bonds who desire to continue their investment in Dominion of Canada securities the privilege of exchanging the maturing bonds for new bonds bearing 5½ per cent. interest, payable half yearly, of either of the following classes:—

(a) Five year bonds, dated 1st November, 1922, to mature 1st November, 1927.

(b) Ten year bonds, dated 1st November, 1922, to mature 1st November, 1932.

While the maturing bonds will carry interest to 1st December, 1922, the new bonds will commence to earn interest from 1st November, 1922, GIVING A BONUS OF A FULL MONTH'S INTEREST TO THOSE AVAILING THEMSELVES OF THE CONVERSION PRIVILEGE.

This offer is made to holders of the maturing bonds and is not open to other investors. The bonds to be issued under this proposal will be substantially of the same character as those which are maturing, except that the exemption from taxation does not apply to the new issue.

Dated at Ottawa, 8th August, 1922.

Holders of the maturing bonds who wish to avail themselves of this conversion privilege should take their bonds AS EARLY AS POSSIBLE, BUT NOT LATER THAN SEPTEMBER 30th, to a Branch of any Chartered Bank in Canada and receive in exchange an official receipt for the bonds surrendered, containing an undertaking to deliver the corresponding bonds of the new issue.

Holders of maturing fully registered bonds, interest payable by cheque from Ottawa, will receive their December 1 interest cheque as usual. Holders of coupon bonds will detach and retain the last unmatured coupon before surrendering the bond itself for conversion purposes.

The surrendered bonds will be forwarded by banks to the Minister of Finance at Ottawa, where they will be exchanged for bonds of the new issue, in fully registered, or coupon registered or coupon bearer form carrying interest payable 1st May and 1st November of each year of the duration of the loan, the first interest payment accruing and payable 1st May, 1923. Bonds of the new issue will be sent to the banks for delivery immediately after the receipt of the surrendered bonds.

The bonds of the maturing issue which are not converted under this proposal will be paid off in cash on the 1st December, 1922.

W. S. FIELDING,
Minister of Finance.

Barrett Roofings, Cements Industrial Paints etc.

DURING the next few weeks there will be a big demand for roof repair materials. For many property owners have neglected to put on new roofs this summer and now they'll have to patch up the old ones to make them last through the winter.

The two famous Barrett Specialties described below are the greatest materials on the market for making old roofs last longer.

You can recommend these products to your customers with absolute confidence that they will give complete satisfaction. Send in your order at once, and be ready for the big rush.

Everlastic Liquid Roofing Cement

One coat of Everlastic Liquid Roofing Cement makes old prepared and "rubber" roofings almost as good as new. It forms a smooth, tough, durable surface that adds years of extra service.

Mention this to your customers. They'll thank you for the money-saving suggestion. Everlastic Liquid Roofing Cement is easy to apply and comes all ready for use in packages ranging from 1-pint tins to 40-gallon barrels and steel drums containing 43 gallons.

Anyone can apply it

Plastic Elastigum Patching Cement

No wonder this famous Barrett product is called "the plastic cement of a thousand uses!" Patching leaks and holes in all kinds of roofs, repairing flashings, relining gutters and cisterns—these are a few of the uses for which it is unequalled. It's easy to apply and sticks to either a wet or dry surface. Don't be without a stock.

Relining a gutter with Plastic Elastigum

Sold in 1 lb. tins (24 to the case), 5-lb. packages (12 to the case), 25-lb. and 100-lb. packages, half barrels (about 300 lbs.) and barrels (about 600 lbs.)

"Diamond A" Quebec Heater
(with taper pipe)

The Trade Mark
Behind the Hardware House
of Quality

DIAMOND A BRAND — ASHDOWN'S GUARANTEE

The Largest
Wholesale Hardware Dealers
in Canada

"DIAMOND A"
QUEBEC HEATERS

Are well built, and great heat producers. Has sheet steel body, brick lined, triangular grates, large ash pit. In fact, it embodies all the latest improvements in this type of heater. A taper pipe, tapering to 6 inches, is included with each heater. You can strongly recommend this heater to your customers, confident that they will be fully satisfied.

Write to-day for our catalog of stoves and heaters with illustrations and descriptions.

The J. H. Ashdown Hardware Co., Limited
CALGARY WINNIPEG SASKATOON

A Real Sanitary Convenience

The Wakyte Closets are for installation where water works are not available. It gives residents in such localities practically all the advantages and sanitary conveniences of an up-to-date plumbing system at a small cost.

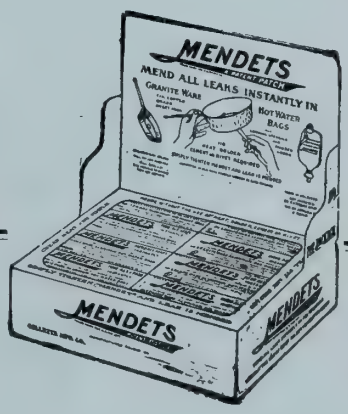
A great number of dealers have built up a splendid business and are making money through the sales of the "Wakyte" Closet.

Surely you can do the same.

Write us for any further particulars.

We also sell the "Comfort" Weather Strip made from selected quarter-cut oak. A complete set consists of two pieces 7 ft. and two pieces 3 ft. long. Will appeal to all Buyers.

S. H. Whyte Mfg. Co., Ltd., Winnipeg, Man.



Is Your Counter A Guide?

It is if it displays **Mendets** because then it will be a guide to valuable service for your customers and a money-making guide for yourself.

Mendets are used in the home for mending pots, pans, rubber goods, etc., and they have given satisfaction to thousands of purchasers.

Ask about them to-day.

A Very Important Message
About Trade Mark Goods

The SELFBLO Alcohol Torch, which we have produced, developed and trade marked, requires no blowing, no pumping, no priming. It BLOWS ITSELF in 20 seconds after lighting, and requires no rubber tube.

Electricians, mechanics, radio operators, garage men, automobile owners, jewelry manufacturers, plumbers, home tinkers and, in fact, all owners of torches are appreciating these facts, and our sales are growing by leaps and bounds.

In ordering torches, ask for them by the TRADE MARK name—SELFBLO. This name is our guarantee and your protection.

Six SELFBLOS are packed for display in a handsome red, white and blue, inclined Display Container, with theft-proof attachment.

Send for descriptive literature and prices.
Order from your jobber.

Be sure you get what you ask for. TRADE MARK Goods are your protection.

Retails for $2.00
In Canada $2.50

SELFBLO

1. Needs no rubber tube.
2. Blows itself.
3. No pumping. No priming.
4. Full blast in 20 seconds after lighting.
5. Emits clear, intense flame of 1,400° Fah.
6. Will flow any solder.

—a self-fluxing solder for automotive and general work. Flux and solder are applied in one operation, because the flux is contained inside the hollow wire of genuine tin-and-lead solder. In great demand by all solder users because it saves two-thirds of the workman's time and gives a strong bond the first time. Comes in convenient packages and spools that are easily stocked. Write for free sample—investigate this easy-to-sell, easy-to-use, easy-to-stock solder.

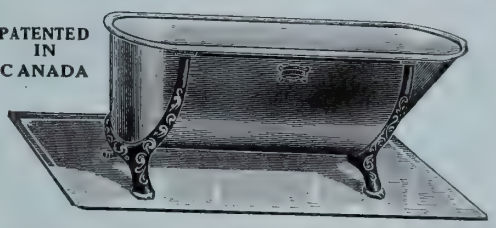
TWO BEST SELLERS

PATENTED IN CANADA



Better Selling Value Than Ever

We have equipped our Steel Baths with **Pressed Steel Removable Legs** and 3 inch **Roll Rim** around the top, for which we have secured a Canadian Patent. This **Roll Rim** adds greatly to the selling value of

TWEED ENAMELLED STEEL BATHS

They now look like the expensive cast enamel baths but are the **same price** as before.
Our new patent Roll Rim Enamelled Steel Baths are now ready for shipment.—Order samples.

TWEED SANITARY CHEMICAL CLOSET

Stamped out of Black Sheet Steel and is very strong, durable, attractive, and guaranteed to be absolutley sanitary, and to satisfy every user or money refunded.

Up-to-date facilities and special machinery enable us to produce these superior grade closets at a very low price.

We will help you to get started by sending you circulars, talking points and cut for local advertising.

Large stock on hand, can ship promptly. Get after Fall business.

Write for catalogue.

No. 310 Combination Assortment

GTD

"The Sign of Accuracy"

Assortment No. 473

Essential Tools for the Garage and Auto Trade

Every garage or repair shop can recall a job held up by lack of threading tools. Good service requires adequate tools—be the one to sell them to your trade.

The "Little Giant" Combination Screw Plate No. 310 will do the trick. Supplement it with the "Hexagon" Rethreading Die Set—the dies that go anywhere a nut will go, without any expensive holders. Fit any sort of wrench.

Remember that GTD goods stay sold—because they are RIGHT.

Strong Padlocks
Are What People Choose!

Sell "CANADA" and "VICTORY" Padlocks and keep your customers satisfied.

Compare these padlocks with any other make, and you'll be convinced of their superior quality.

They cost no more than the so-called "cheap" padlocks.

Order from your jobber.

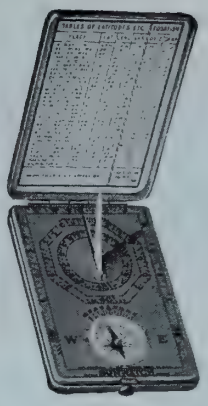
Compass and Sun-dial



Retail Prices:

$1.50

Trade Prices:

Dozens $2.10 List

Fifty $2.00 List

The Ansonia *Sunwatch*

The Ansonia Sunwatch is a combination Compass and Sun-Dial, in a thin, satin-finished brass case, with longitude, latitude and variation tables on inside of cover, giving corrections for all parts of Canada. (The American Sunwatch is not adjusted for Canadian longitude and latitude.) The Compass is accurate and reliable, and the Sun-Dial tells the correct time anywhere in Canada.

Invaluable to motorists, hunters, fishermen, canoeists, Boy and Girl Scouts, guides and all outdoor people. It sells for $1.50, and is so attractively made that it is bought on sight.

THE PROGRESSIVE MANUFACTURING CO.

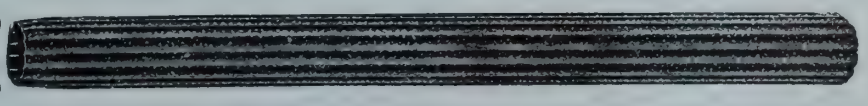
Torrington, Conn., U.S.A.

FORSTNER BITS

bore their way right through tough, hard, knotty cross-grained wood and leave a smooth hole and clean surface. That's performance. THEY DIFFER FROM ALL OTHER BITS, BEING GUIDED BY THE RIM INSTEAD OF THE CENTRE. That's scientific construction. They bore any arc of a circle and can be guided in any direction. That's adaptability.

Made for Brace-made Machines. Packed singly; packed in sets. That's convenience. And they sell to Wood Workers, Carpenters, Cabinet Makers and others. That's why you should sell them. Order through your jobber to-day.

OUR EAVETROUGH AND CONDUCTOR PIPE ARE NOTED FOR THEIR EASY FITTING QUALITIES.



Now is the time to order conductor elbows, ridge roll, valley iron, corrugated galvanized iron roofing and siding. All kinds of eavetrough and conductor pipe accessories, galvanized iron sheets, etc.

We ship while others are thinking about it.

A New Member of a Famous Family

BEACH PIPELESS FURNACES

Displayed at Toronto and Ottawa Exhibitions

The Beach Pipeless Furnace is not an experiment, hastily put together. It is the result of many years of careful study and is specially designed and built from the bottom up to uniformly heat and ventilate buildings more economically and systematically than they have ever been heated by other systems.

It is guaranteed to give absolute satisfaction.

An unusual sales opportunity is offered to wide awake dealers as we confine the line to one dealer in each town.

Write for folder and prices to-day.

A Pair of Money Makers

Here are two of the best selling ranges offered to-day.

The reason is because of the honest quality and service built into them. If you are not enjoying the profits from these rapid sellers, write to-day for full particulars.

Maple Leaf Thatsit, a six-hole top Quebec range of great capacity and wonderful thoroughness, is graceful and attractive in design and is the newest member of our big "Quebec" line.

The Maple Leaf Falcon Range. An aristocratic steel range that will back up every claim you can make for it. It is made in several handsome designs which makes it an ornament in any kitchen. It gives perfect satisfaction at all times. The Falcon is both a money-maker and a friend-maker for the dealer.

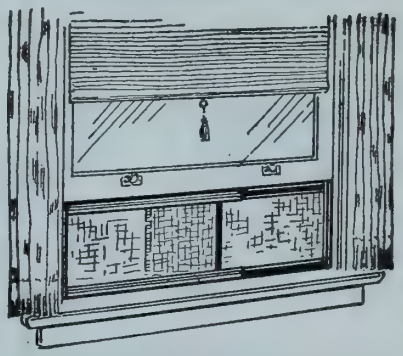
BRANTFORD

ALL YEAR AROUND

BUSINESS BRINGERS

STORM DOORS

COMBINATION
SCREEN AND STORM DOORS



WINDOW VENTILATORS

With coal scarce and high in price every live hardware man is going to put in a good stock of Brantford Storm and Combination Doors. These doors will save many a ton of coal and pay for themselves before the winter is half over. Get them on the floor as soon as the screen door and refrigerator season is over and get the all-year-around business.

Draft Screen Window Ventilators. There's going to be almost as much demand for them for the windows in winter as for fly screens in summer. Lets in the fresh air, keeps out the draft and snow, dust and dirt. Get some of this business; there is going to be a lot of it.

Refrigerators

30 different styles and sizes. The old reliable "Brantford Line," Canada's leading refrigerator for over a quarter century.

The reason—The best refrigerators made. All guaranteed.

Screen Doors and Window Screens

The complete line. Every style and size desired. 20 different patterns of doors. Only one standard of quality—the best.

Write for catalogues and prices.

SIMONDS CANADA SAW CO.
Limited
"The Saw Makers"
Montreal, Que.
St. John, N.B. Vancouver, B.C.

Men who use Cross--Cut Saws know the quality and efficiency of Simonds Crescent-Ground Saws. They buy by the name and that is why dealers carry this nationally known line.

Write for catalog and discounts.

SIMONDS

The Everlasting Veneer Toilet Seats

This is the strongest and cleanest toilet seat made. There are no cracks —made of 7 and 9-ply, air-seasoned wood veneer, held together by our special wood cement.
These seats are proof against heat, cold or dampness—will never crack, warp or split. They cost no more than the so-called "cheaper" toilet seats, and always bring repeat business.
Have you written for our prices?

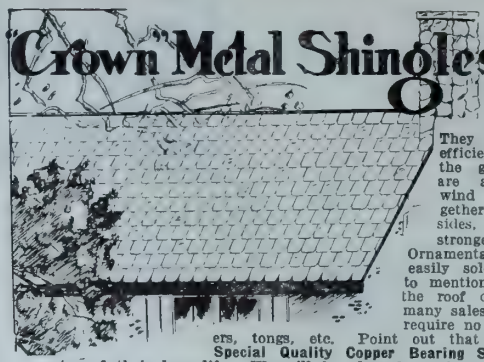
"Crown" Metal Shingles *Will Outlast Them All*



They are being used where efficiency in roofing is of the greatest concern. They are absolutely storm and wind proof. Locked together securely on all four sides, they make the strongest roof on the market. Ornamental in design; they are easily sold and you have only to mention the ease with which the roof can be laid to make many sales. Point out that they require no solder, mallets, seamers, tongs, etc. Point out that they are made from **Special Quality Copper Bearing Shingle Plate**, a guarantee of their long life. We will be pleased to give you further details or any advice on sheet metal work—write us.

DOES YOUR MONEY EARN FULL PROFITS FOR YOU?

Do you take profits out of your business each year? How are they invested? Is every dollar invested in securities that are earning for you the highest possible income? If not, you are losing profits.

You know all about Retailing?
How much do you know about Investing?

The average business man is so absorbed in his work that he has little time to make a study of investment. Turnover, stocks of merchandise—all are part of his daily studies. But there is another place where care and good judgment are as essential. The profits earned must be invested to do their part in increasing your income.

Only Safe Investments Count.

Your safe investments will educate your children, provide for your family, provide for yourself. But the investments must be safe and they must earn their full income if they are to accomplish your aims. Money not properly invested is idle money.

If you want to make the most out of your investments subscribe now for THE FINANCIAL POST, Canada's leading investment weekly. It will give you 52 times a year news and advice concerning investments. It will answer your own personal problems on investing. It discusses bonds, stocks, insurance, wills and other personal financial problems in an intimate, understandable way. You need THE POST. Fill in the coupon to-day and subscribe before you forget. Invest $5.00 to-day where it may save you $500 or $5,000.

SPECIAL OFFER

If you have any investment or financial problem at the moment write it on a separate sheet of paper, enclose it with the coupon and the editor will give you the benefit of his advice.

COUPON

THE FINANCIAL POST,
143 University Avenue, Toronto.

You may send me THE FINANCIAL POST for one year—52 issues—for which I enclose $5.00.

Name .....

Address .....

If interested tear out this page and place with letters to be answered.

WANT ADS

If you want a buyer, clerk, salesman, traveler, position, you can reach the best men in the trade through these columns.

If you wish to buy or sell a business, or dispose of overstocks, you can reach a larger number of hardware men through this page than in any other way.

Rates (payable in advance) 2 cents per word. An additional charge of 10 cents for each insertion is made when Box Number is required. Each figure counts as one word. When panels are desired a charge of $2.20 is made for a panel 1 inch deep by 2⅛ inches wide.

Address all advertisements for this section to HARDWARE AND METAL, 143-153 University Ave., Toronto, Can.

FOR SALE

STOVE AND FURNACE REPAIRS. FIRE brick, iron linings and grates for Supremes, Acmes, Garlands, Sunlights, Crown Hurons, Marvels, Champions, Huron Red Hots, Pen Esthers, Welcomes, Renowns, Magnet, Souvenirs, Colonists, Arklands. Write for complete list and prices. Grundy Bros., Strathroy, Ont.

PLUMBING AND TINSMITHING BUSINESS for sale in good live town, 50 miles from Toronto. Best reason for selling. Box 5, Hardware and Metal, Toronto.

UP TO DATE HARDWARE STOCK IN OKANAgan Valley. Splendidly equipped in every way. Stock and fixtures approximately $25,000. Best buy in interior of British Columbia. Splendid opportunity for party with necessary capital. Box 24, Hardware and Metal, Toronto.

OLD ESTABLISHED HARDWARE OF PURvis Bros., Ltd., in the prosperous town of Sudbury, in the centre of the world's greatest Nickle Mining District. Sudbury is a considerable Railway Point and is surrounded by much very productive land and the greatest lumbering centre of Ontario. Stock is reduced to under 12,000.00 and is in good condition. Established thirty-two years. Advanced age and failing health only reasons for selling. Premises can be rented or bought. The International Nickel Mines to re-open in September. Purvis Bros., Limited, Sudbury, Ont.

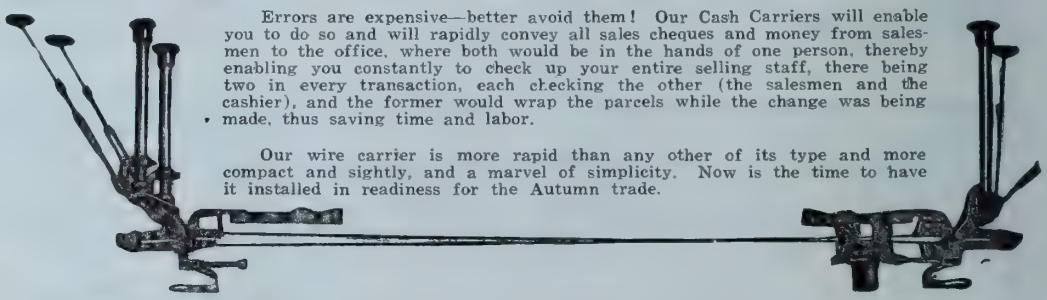
FOR SALE—OFFICE SAFE; TERMS CASH OR easy payments to responsible party. Inside measurements, 35" high, 13" deep, 27½" wide. (This space at present is divided into drawers and shelves for papers, books, etc.) Saskatoon Hardware Co., Saskatoon, Sask.

Further information for the asking. All kinds of wire Cash and Parcel Carriers, and Pneumatic Tubes.

Gipe-Hazard Store Service Co., Limited

113 Sumach St., Toronto, Ont.

Also 318 Homer St., Vancouver, B. C.



Errors are expensive—better avoid them! Our Cash Carriers will enable you to do so and will rapidly convey all sales cheques and money from salesmen to the office, where both would be in the hands of one person, thereby enabling you constantly to check up your entire selling staff, there being two in every transaction, each checking the other (the salesmen and the cashier), and the former would wrap the parcels while the change was being made, thus saving time and labor.

Our wire carrier is more rapid than any other of its type and more compact and sightly, and a marvel of simplicity. Now is the time to have it installed in readiness for the Autumn trade.

Subscription price for HARDWARE and METAL is $4.00 per year or less than eight cents per issue.

Why Hardware and Metal has Such a Large Western Canada Circulation

THERE are many reasons why Hardware and Metal covers Western Canada as thoroughly as the other parts of the Dominion. Some of the outstanding reasons are:—

Hardware and Metal is the *only* hardware paper giving a weekly market service from Western Canada.

Hardware and Metal is the *only* hardware paper giving a weekly news section for Western Canada.

Hardware and Metal is the *only* hardware publication giving the trade in Western Canada a weekly market service from Montreal, Toronto, London and Pittsburgh—and Westerners are even more interested than any others in the activities in the primary markets of the East.

Hardware and Metal is the *only* publication in Canada giving the Western hardware trade a weekly service covering the activities of the hardware trade in a National way.

Hardware and Metal is the *only* hardware publication giving the Western Canada trade a weekly market service on paints, oils, varnishes, etc.

Hardware and Metal is the *only* hardware publication giving the trade any Western Canada weekly information regarding, "What Other Merchants Are Doing," Legislation, New Hardware Goods, Illustrated Articles on Display, Advertising, Etc.

Hardware and Metal during the twelve months of the year, supplies the Western Canada hardware trade with more market information, more new goods information, publishes more illustrations of window displays, store interiors, and retailers' advertisements than all the other Canadian hardware trade publications combined.

Incidentally, Hardware and Metal is the only hardware trade publication in Canada that will supply you with an Audit Bureau of Circulations statement, thus proving what it really has in the way of circulation in Western Canada.

MORAL—*If you are interested in Western Canada trade, advertise in the paper that is read by the Westerners and has gained its present dominating position in the West, as well as in other parts of Canada through 34 years of honest effort to give the trade each week the best in hardware trade newspaper service.*

WHERE CENTS COUNT--
WHERE SECONDS COUNT--
WHERE SERVICE COUNTS--

Russill Hardware Company, Toronto

One of the most successful and progressive hardware stores in Canada—were one of the first to recognize the wonderful money savings guaranteed by the Dayton Hardware Scales. Be influenced by successful people—it pays.

The modern successful Hardware merchant can't afford to give away fractions of ounces any more than the successful grocer can. Or fractions of cents any more than the banker can. He must give quick service and accurate service, or his customers will go to his competitors. That's why the Dayton Hardware Scale is meeting with such an enthusiastic reception from progressive Hardware dealers all over Canada. It gives, instantly, correct weight and price to a fraction of an ounce or of a cent—you see them both at a glance. It has special features for counting by weight. It is built specially and only for Hardware stores. Let us send you full particulars.

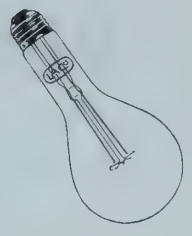
Dealers Pay for Laco Lamps after they are sold

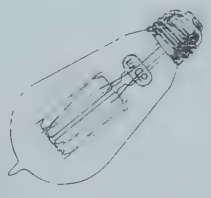
We are ready to make a contract with live business-getting Retail Dealers and place with them a stock of Laco Lamps on consignment.

You, as a Dealer, will have no money tied up in stocks. You will simply render a monthly statement with a **remittance for the lamps you have actually sold.**

The consignment stocks are arranged to fit every Dealer's requirements. You make a full margin of profit as the resale prices give you a profit on every sale. This also means you can handle all the lamp business in your vicinity, from household to the largest factory business.



NITRO TYPE
50 to 1,000 Watt.



STRAIGHT SIZE
10 to 100 Watt.

MILL TYPE
15 to 50 Watt.

ROUND BULB
15 to 40 Watt.

Our Guarantee

We absolutely guarantee Laco Lamps to be of the finest quality and unexcelled by any other make.

Laco Lamps are manufactured under licenses granted on the fundamental Canadian lamp patents which cover the best developments known in lamp-making science the world over.

THIS IS THE MOST ATTRACTIVE OFFER FOR ANY AND EVERY HARDWARE MERCHANT. WRITE TO-DAY FOR FURTHER PARTICULARS AND PRICES.

YOU ARE RIGHT!

WE ARE not doing you any favor or bestowing charity when we advertise *Tycos* Thermometers in a national way. We are doing what every manufacturer who expects favors from you should do.

Your good will, your profits, your sales are of deep concern to us. So we advertise to help you all that we possibly can, knowing that you in turn will be glad and anxious to get our good will, to help our sales and our profits by displaying and selling *Tycos* Thermometers.

Could anything be fairer than that?

There's a ***Tycos*** or ***Taylor*** Temperature Instrument for Every Purpose.

Our latest catalog shows how we fulfil our obligations to you. You are entitled to a copy because it is figured in the cost of the goods to you.

"What's in a Name?"

Says the Wise Old Owl

'Tis better far to make a name
Than to inherit it.
No name e'er yet endured in fame
That did not merit it.
There lives no man who has not heard,
From East to West "Gillette,"
'Twas once a name, 'tis now THE WORD
For the best razor yet.

Shakespeare asked the question and answered it with "That which we call a rose by any other name would smell as sweet."

But Gillette Safety Razors by any other name could not sell as well.

The Gillette is more than the best razor. It is the best advertised razor in the World.

No time consuming argument for the dealer, no explanations, no "ifs" or "buts."

The Gillette Safety Razor is tried, proved and established.

On your customers the Gillette name has a familiar, friendly influence that saves you time and money and gains good will--

-and every razor sold means a customer for blades-- a permanent satisfied customer calling on you regularly throughout the year.

Stray Cats and Dogs

THEY are a poor lot as a rule. You do not find pedigreed Boston bulls or full-bred Angora cats roaming through the streets, homeless. A dog that has a pedigree and a good name generally has a good home.

What have stray cats and dogs to do with sheet metal? Just this:

There are various kinds of sheet metal which wander through the trade like stray cats and dogs. They have no known name that can be depended upon, no real pedigree behind them that can be trusted absolutely, no qualities, visible or hidden, that you could be sure of in actual service.

Then, there is "Armco" Ingot Iron.

"Armco" Ingot Iron is the rust-resisting iron. It has a name and pedigree that is known nationally. You can find out exactly what it is and what it will do. It is stamped with a mark that guarantees responsibility in every sense of the word.

When people come to you to have sheet-metal work done, mention "Armco," and invariably they will know what you mean. They will be willing to pay a little higher price when you explain to them that they will get more years of service from "Armco" Ingot Iron than they would from ordinary iron or steel.

If you use "Armco" Ingot Iron you are using a product with a name that people know. Remember that stray dogs and cats never win blue ribbons. And the price of success in your particular business is not to be won except by the use of materials that are good, that have a pedigree, and are absolutely reliable.

The Question ? ? ?

THERE ARE TWO QUESTIONS THAT HARDWARE MEN ARE ASKING THEMSELVES:

1. How can I meet the reduced prices that are demanded of me when so much of my essential upkeep cannot be reduced? My rent or carrying charges are not coming down and I don't want to cut wages.

2. When I have reduced prices how can I convince my buying public that they are down as far as they can go?

The first question to fit most cases might be, how can I sell more goods? How can I do with less help? How can we get same turnover in a smaller store? To all these questions the answer is:

WALKER WALL CASES, COUNTERS & SHOW CASES

Save 25% of the space and labor for you and please your buying public by quicker service, clean goods, always on display.

Send your floor plan and ideas for catalog and prices.

THE WALKER BIN & STORE FIXTURE CO., LIMITED

Stove Pipes and Elbows

Davidson's "Sterling" Stove Pipes are made in three sizes in black, under an improved patent. These pipes are die cut, which ensures perfect fitting—they will not telescope and can easily be put together by hand (no tools required). Also ask us for Tee pipes, chimney thimbles and caps and stove pipe dampers.

The "Empire" elbow is well made in one piece of corrugated blued steel in three sizes and in three smaller sizes for gas stove pipes.

Two other Davidson lines, **"Standard"** and **"Bevel,"** are also one-piece elbows, both pleated and in two sizes

STOVE BOARDS, wood lined and lithographed in assorted colors and many sizes. A few sizes also in paper lined boards.

Prompt shipment guaranteed on all orders.

Basement Type Paint Oil Battery

Get More Profits From Paint Oils

Handle paint and lubricating oils in the new fashioned way—in tanks and with Bowser Pumps. That's the money-making way, because you avoid waste, check receipts and sales—and make profits a certainty.

Install a battery of Bowser tanks as illustrated—one tank for each oil. Line the Pumps up against the wall, neatly and compactly. Get your oils out where customers can see them, and they will be constantly reminded to buy more.

The Bowser piston-type measuring pumps deliver exactly the amount of oil required directly into the container, eliminating spillage. The evaporation-proof, all-metal construction eliminates leakage and gumming. Thus, Bowser equipment reduces costs, increases profits and insures against fire.

Write for illustrated booklet C-16 and find out how to make **more** money on oils.

Why Hardware and Metal has Such a Large Western Canada Circulation

THERE are many reasons why Hardware and Metal covers Western Canada as thoroughly as the other parts of the Dominion. Some of the outstanding reasons are:—

Hardware and Metal is the *only* hardware paper giving a weekly market service from Western Canada.

Hardware and Metal is the *only* hardware paper giving a weekly news section for Western Canada.

Hardware and Metal is the *only* hardware publication giving the trade in Western Canada a weekly market service from Montreal, Toronto, London and Pittsburgh—and Westerners are even more interested than any others in the activities in the primary markets of the East.

Hardware and Metal is the *only* publication in Canada giving the Western hardware trade a weekly service covering the activities of the hardware trade in a National way.

Hardware and Metal is the *only* hardware publication giving the Western Canada trade a weekly market service on paints, oils, varnishes, etc.

Hardware and Metal is the *only* hardware publication giving the trade any Western Canada weekly information regarding, "What Other Merchants Are Doing," Legislation, New Hardware Goods, Illustrated Articles on Display, Advertising, Etc.

Hardware and Metal during the twelve months of the year, supplies the Western Canada hardware trade with more market information, more new goods information, publishes more illustrations of window displays, store interiors, and retailers' advertisements than all the other Canadian hardware trade publications combined.

Incidentally, Hardware and Metal is the only hardware trade publication in Canada that will supply you with an Audit Bureau of Circulations statement, thus proving what it really has in the way of circulation in Western Canada.

MORAL—*If you are interested in Western Canada trade, advertise in the paper that is read by the Westerners and has gained its present dominating position in the West, as well as in other parts of Canada through 34 years of honest effort to give the trade each week the best in hardware trade newspaper service.*

DOES YOUR MONEY EARN FULL PROFITS FOR YOU?

Do you take profits out of your business each year? How are they invested? Is every dollar invested in securities that are earning for you the highest possible income? If not, you are losing profits.

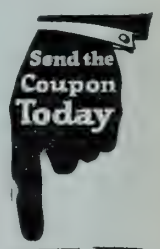
You know all about Retailing?
How much do you know about Investing?

The average business man is so absorbed in his work that he has little time to make a study of investment. Turnover, stocks of merchandise—all are part of his daily studies. But there is another place where care and good judgment are as essential. The profits earned must be invested to do their part in increasing your income.

Only Safe Investments Count.

Your safe investments will educate your children, provide for your family, provide for yourself. But the investments must be safe and they must earn their full income if they are to accomplish your aims. Money not properly invested is idle money.

If you want to make the most out of your investments subscribe now for THE FINANCIAL POST, Canada's leading investment weekly. It will give you 52 times a year news and advice concerning investments. It will answer your own personal problems on investing. It discusses bonds, stocks, insurance, wills and other personal financial problems in an intimate, understandable way. You need THE POST. Fill in the coupon to-day and subscribe before you forget. Invest $5.00 to-day where it may save you $500 or $5,000.



SPECIAL OFFER If you have any investment or financial problem at the moment write it on a separate sheet of paper, enclose it with the coupon and the editor will give you the benefit of his advice.

COUPON

THE FINANCIAL POST,
143 University Avenue, Toronto.

You may send me THE FINANCIAL POST for one year—52 issues—for which I enclose $5.00.

Name .....

Address .....

To Holders of Five-Year 5½ per cent. Canada's Victory Bonds

Issued in 1917 and Maturing 1st December, 1922

CONVERSION PROPOSALS

THE MINISTER OF FINANCE offers to holders of these bonds who desire to continue their investment in Dominion of Canada securities the privilege of exchanging the maturing bonds for new bonds bearing 5½ per cent. interest, payable half yearly, of either of the following classes:—

(a) **Five year bonds, dated 1st November, 1922, to mature 1st November, 1927.**

(b) **Ten year bonds, dated 1st November, 1922, to mature 1st November, 1932.**

While the maturing bonds will carry interest to 1st December, 1922, the new bonds will commence to earn interest from 1st November, 1922, GIVING A BONUS OF A FULL MONTH'S INTEREST TO THOSE AVAILING THEMSELVES OF THE CONVERSION PRIVILEGE.

This offer is made to holders of the maturing bonds and is not open to other investors. The bonds to be issued under this proposal will be substantially of the same character as those which are maturing, except that the exemption from taxation does not apply to the new issue.

Dated at Ottawa, 8th August, 1922.

Holders of the maturing bonds who wish to avail themselves of this conversion privilege should take their bonds AS EARLY AS POSSIBLE, BUT NOT LATER THAN SEPTEMBER 30th, to a Branch of any Chartered Bank in Canada and receive in exchange an official receipt for the bonds surrendered, containing an undertaking to deliver the corresponding bonds of the new issue.

Holders of maturing fully registered bonds, interest payable by cheque from Ottawa, will receive their December 1 interest cheque as usual. Holders of coupon bonds will detach and retain the last unmatured coupon before surrendering the bond itself for conversion purposes.

The surrendered bonds will be forwarded by banks to the Minister of Finance at Ottawa, where they will be exchanged for bonds of the new issue, in fully registered, or coupon registered or coupon bearer form carrying interest payable 1st May and 1st November of each year of the duration of the loan, the first interest payment accruing and payable 1st May, 1923. Bonds of the new issue will be sent to the banks for delivery immediately after the receipt of the surrendered bonds.

The bonds of the maturing issue which are not converted under this proposal will be paid off in cash on the 1st December, 1922.

W. S. FIELDING,
Minister of Finance.

Hot Protest by Retailers re Jobber

Delegation of London Retail Hardwaremen Attend Executive Committee Meeting of Ontario Retail Hardware Ass'n. to Outline Alleged Grievances Over Sale of Hardware by Retail at Wholesale Prices by Hobbs Hardware Co. of London—Company Official Denies Such Practice

A MEETING of the Executive Committee of the Ontario Retail Hardware Association was held in Toronto this week to meet a deputation from the London Retail Hardware Association and to discuss matters in connection with grievances of retailers regarding the sale by jobbers of hardware at wholesale prices direct to consumers and also to take up matters in connection with the forthcoming convention and exhibition to be held at Toronto.

The London delegation consisted of T. H. Purdom, Purdom Hardware Co.; H. Crummer, Cowan Hardware Co., and Wm. O'Dell, of O'Dell Hardware Co.

The subject was introduced to the committee by Secretary Macpherson, who stated that he visited the London Association in July at the request of the London merchants who advised him that they were meeting with very unfair competition from the Hobbs Hardware Co. of London, which firm, it was claimed, was conducting a regular retail business in their wholesale warehouse and were using their wholesale sample room for the purpose of retailing hardware and selling to the general public at the regular wholesale prices paid by retail hardware merchants. Mr. Macpherson stated that in connection with his visit to London and after hearing the claims made by the London retail hardwaremen that he had visited Mr. C. A. Whitwam, Managing Director of the Hobbs Hardware Co., but had not been able to receive any satisfaction from him regarding the matter.

T. H. Purdom Speaks

T. H. Purdom acted as spokesman for the London delegation and made the following statement: "Last January we hardwaremen in London thought it would be advisable to take up with Mr. Whitwam, of the Hobbs Hardware Co., the question of the unsatisfactory conditions which have been caused in London through that company selling by retail, articles of hardware at wholesale prices to any person coming into their place of business. We arranged for a meeting with Mr. Whitwam and asked if it would not be possible to stop the practice of allowing the general public to buy hardware at prices which were supposed to represent the prices to the retail trade only. Mr. Whitwam told us that we had to show him what we could do in regard to buying goods from them because London retail hardwaremen did not buy much from the Hobbs Hardware Co. due to this competition. It was decided to let the matter rest for three months during which time the retailers agreed that they would give the Hobbs Hardware Co. as much business as they possibly could. At the end of three months we again took the matter up with Mr. Whitwam and he told us that it would be well to wait for six months and then he could tell us what the directors of his company would do. This was in the best season of the year and they were getting the cream of the business but we waited and then went back to him again. Unfortunately we could make no progress at all. He talked of the crops and other things but would give us no satisfaction on the point in question and we went away disgusted. We felt that we had given them six months business for nothing and that they had treated us in a very discourteous way. Therefore we had Mr. Macpherson come to see us and on his suggestion we sent out letters to retail hardwaremen in the district to sound out their opinion on the matter.

Many Retail Customers

"The Hobbs Hardware Co. gets the builders' and factory trade and you will also find at times fifty to seventy-five retail customers buying every line of hardware at cost price over the counter in their wholesale warehouse. We did not ask the Hobbs Hardware Co. to stop selling factories or large builders but merely asked them to stop selling the people coming in off the street.

"We spent $15,000 with them in a few months and this money has just been thrown away, as far as this situation is concerned.

"The Hobbs Hardware Co. have advertised in a London paper with a local distribution and which is distributed from house to house. In this way they solicited business from the general public.

A Case in Point

"One instance of selling retail was in connection with Oneida Community silverware. The Hobbs Hardware Co. have been selling this to the public in a retail way at wholesale prices. This condition became so bad that the jewellers of London shipped back to the Oneida Community Co. plated ware to the value of about $6,000. The retail hardware merchants are planning to follow out a somewhat similar plan. We took this matter up with the Oneida Community Co. and they expressed a desire to eliminate unfair competition if such existed. Their representative came to London and we understand that he called upon the Hobbs Hardware Co. and was told that his company's goods were not being sold retail at wholesale prices. The official of Oneida Community Ltd. told us of the result of their visit and stated that they were handicapped unless actual proof could be secured to show that sales of their goods were actually made at wholesale prices. We have been able to secure evidence of these sales having been made and I have here two receipts or cash slips from the Hobbs Hardware Co. showing where private individuals have bought Oneida Community ware at wholesale prices. We are going to turn these over to this manufacturer and see what action they will take.

"To show what effect this condition of affairs has had in certain cases, one retail hardwareman who was a good customer of the Hobbs Hardware Co. but who was not known to the clerks in the sample rooms went into the wholesale house with a list of articles of builders' hardware. He entered the company's premises as a stranger to these clerks, asked for and secured prices on the articles listed. Upon receiving and examining the prices he found that they were the same as those at which he bought for his business and announced then that his business connections with the company would cease."

In closing his remarks, Mr. Purdom stated that Mr. Whitwam had told him on one occasion that if a person came to

their warehouse to buy a dollar's worth of goods that they could not legally refuse to sell him.

Howard Crummer, of the Cowan Hardware Co., was the next speaker and stated that the wholesale firm in question was doing such a large retail business right in London that it did not care anything about the local retailers' trade. If they could sell both to retailers and consumers so much the better for them. "We have humiliated ourselves and also agreed to give them 50 per cent. of business placed with jobbing houses if the unsatisfactory condition could be adjusted. We have been giving them 75 per cent. of our purchases from jobbers for many years. When talking with Mr. Whitwam I said: 'In view of this record do you think you are fairly entitled to this business?' His reply indicated that they did not care anything for the hardwareman. They say they are protecting the out-of-town merchants. This may be the case in Chatham, Strathroy and other such points where they do not get enough business from consumers to justify breaking connections with these retailers. I believe that the Hobbs Hardware Co. do a retail business of about $300,000 a year, that the wholesale department is busy constantly, selling in a retail way, and during the Christmas season it is crowded with customers. The business has grown to such an extent that where only two clerks were employed a few years ago, eight to ten clerks are now constantly employed. The clerks take the orders from the public in the sample rooms and there are messenger boys who take the orders up into the stock departments and bring the goods down to the customers. Deliveries are made of parcels to any part of the city. Salesmen are employed to call regularly upon contractors and the employees of these contractors are told that they can buy tools and any other hardware requirements at wholesale prices from this firm."

Wm. O'Dell, of O'Dell Hardware, London, stated that the condition has been keenly felt for many years but that it has been much worse within the past year than ever before. "We are practically all new merchants in London since the trouble had its inception," said Mr. O'Dell.

Farmer Buys From Hobbs

W. H. Bartlett, of the St. Mary's Hardware Co., St. Mary's, Ont., who is also an executive member of the Ontario Retail Hardware Association, stated that they had also felt the effect of what he stated to be unfair competition by this company. He told how a farmer visited a retail hardware store in his town and asked a price on a certain size of glass. On receiving a price he announced that he could buy it much cheaper from a neighboring farmer who had purchased more than his requirements direct from the Hobbs Hardware Co. Due to the fact that farmers buy glass chiefly of a certain size for use in stable windows, etc., Mr. Bartlett pointed out that the plan followed by this farmer and probably by others, was capable of great extension with resultant loss of and disorganization of legitimate business of local hardwaremen.

Letters From Retailers in Other Places

Secretary Macpherson then read letters which had been turned over to him by the London retailers, expressing the views of merchants in places outside of London. These were replies to the letter previously referred to as having been sent out by the London association. Names of these retailers have been withheld for the present but Hardware and Metal has seen the original letters and has taken copies of them with all names and addresses included. These letters are as follows:

"We have had the same competition from the Hobbs Hardware Co. A number of our customers have bought there at wholesale prices. We hope that you will be able to do something to put a stop to this class of competition, as it is anything but fair to the retail trade, and as far as we are concerned we do not buy anything from the Hobbs Hardware Co."

"We are right in line with you on your movement against Hobbs.

"We have not been so seriously affected out here as you have in the city but aside from that we do not approve of their principles at all after that class of trade and think it should be stopped if possible.

"We have been buying from Hobbs for about 20 years and for this very reason have given Howdens a share of the trade the last year or so. We have some warm friends at Hobbs but we cannot sanction this business principle and will gladly take a stand with you London men."

"We have always wondered why this sort of retailing by the Hobbs Hardware Co. was done.

"While it does not probably affect us as much as those nearer London still we are frequently told that customers can get and are getting goods from the Hobbs Co. at almost our wholesale prices.

"We take this opportunity of protesting against any such practice by any wholesaler, and trust that this will have its effect on them."

"Re Hobbs Hardware Co. selling to the public, I do not think it right and I have spoken to them about same but they say they have always done so and are selling at retail prices and they claim that they all do it; in fact I know others doing it in London. I have caught Howdens doing same and am at a loss to know how to stop it. If I can assist in stopping same I will be with you."

"I certainly appreciate the step your association is taking as I have been affected considerably that I know of and undoubtedly considerable that I do not know of and I do not think it fair competition for them to retail at the near wholesale prices which they are doing.

"Assuring you that I will be pleased to do anything I can to swell your protest."

"I certainly object to having to compete with wholesale houses doing a retail business with my customers. Several cases have come to my notice. A number of my customers have got their glass and one man that I know of got his builders' hardware, locks, etc., from Hobbs hardware.

"Trusting you will be able to do something to stop this unfair competition."

"We are a little too far away to have any trouble with our customers buying from Hobbs Hardware Co., but think it is not fair to retail men for wholesalers to sell retail and think we should stick together."

"We have not heard of The Hobbs Co. selling retail in this vicinity but it certainly is very unfair and we will put up a protest if we run up against this unfair competition."

"We have not lately noticed any unfair competition re Hobbs Hardware Co."

"I have often gone into the Hobbs Hardware Company and there met one of my customers, and the result is that I have quit dealing with them almost entirely.

"If the rest of the London merchants and those in nearby towns would do as I have done the Hobbs Hardware Company will have to be either wholesale or retail."

"While we agree that it is unfair for the Hobbs Hardware Co. to sell retail, still we understand there has been some friction between the retail hardware men in London and the Hobbs Hardware Co. and we do not like to pass judgment without knowing the other side. True, we sometimes have a customer who says they have bought something from the Hobbs Hardware Co. and we would like to see the London Retail Hardware Association call on Colonel Hobbs and get their little differences settled. If a deputation from the different towns would be of any assistance you can use us."

"Re Hobbs Hardware Company retailing throughout the Western Ontario district at practically wholesale prices:

"We beg to state that a year or so ago we entered this complaint direct with the Hobbs Hardware Co. and they replied to us that they never sold to any person except dealers. However, the writer has several times been in their salesroom and the impression has been made that they do sell retail when you see people buying such items as a pint or quart of paint or just one small item. We are therefore of the opinion that they sell retail and are quite justified in assisting you to enter a strong protest against this practice.

(Continued on Page 50)

Hardwaremen Oppose C. O. D. Post

Sudden Announcement of Early Enforcement of C.O.D. Service in Parcel Post Much Resented by Hardwaremen—Direct Advantage to Mail Order and Department Stores and a Burden on Country—Oppose Paying Stamps on Drafts—Ask Use of Revenue Stamps on Cheques, etc.

A NUMBER of important resolutions were adopted at the meeting of the executive committee of the Ontario Retail Hardware Association in Toronto on Monday. The first of these dealt with the C.O.D. service in connection with the parcel post, announcement of which came like a "bolt from the blue" to retailers. The resolution was as follows:

Whereas through the introduction of a C.O.D. Service, to become effective October 1, which in reality appoints postmasters, letter carriers and rural route mail deliverers collecting agents for large city departmental stores and mail order houses, and whereas it is our belief that this extension will work to the detriment of the retail stores who contribute largely to the taxes of the communities in which they are located and that it will be materially to the advantage of said mail order houses and department stores who contribute nothing to the municipal taxes except where they are located. And whereas we believe that the present Parcel Post is not a revenue producing service, it should not be burdened with additional expense. And further that competition with the National Railway Express Service which it is now claimed is not being operated at a profit, is not in the best interests of the country's finances.

BE IT RESOLVED That the policy of having Postmasters or Mail Carriers act as agents for the collection of accounts for the big city stores, be deferred for at least six months to afford various Boards of Trade and other local organizations an opportunity of expressing their views.

Recent developments in connection

Regulations Governing C. O. D. Service on Parcel Post Matter

THE OFFICIAL wording of the notice concerning the application of C. O. D. service to the Parcel Post, as appearing in the Canada Gazette, is as follows:

POST OFFICE DEPARTMENT, CANADA,
OTTAWA, 25th August, 1922.

PUBLIC notice is hereby given that a C. O. D. service in connection with mail matter will come into effect on the first day of October, 1922, under the following regulations:

C. O. D. SERVICE WITHIN CANADA

C. O. D. Fees

On and after 1st October, 1922, a C. O. D. service in connection with mail matter will be established within Canada whereby charges due the sender up to $100 may be collected from the addressee and remitted to the sender by post office money order. This service will apply only in the case of mail matter posted at a money order post office for delivery at another money order post office within Canada. Rural routes starting from money order post offices are for this purpose considered as money order post offices and may be granted a C. O. D. service.

The scale of C. O. D. fees will be as follows: 15 cents if the amount to be collected is not more than $50; 30 cents if the amount to be collected is more than $50; limit of collection, $100. The fee must be paid by means of postage stamps affixed to the article by the sender, and is additional to the ordinary postage.

The C. O. D. fee also covers insurance and registration.

(*a*) The C. O. D. fee covers insurance, in the case of parcels prepaid at parcel post rates, to the extent of the value, against loss, abstraction or damage, while in the custody of the postal service, not to exceed $50 when a 15-cent fee is paid, and not to exceed $100 when a 30 cent fee is paid.

(*b*) The C. O. D. fee covers registration in the case of articles prepaid at other than parcel post rates. This carries with it indemnity for loss only, which in no case shall exceed $25 or the actual value of the lost article when the same is less than $25.

Claims

(*a*) In case of C. O. D. parcels prepaid at parcel post rates the same general procedure is to be followed in regard to claims as in the case of insured parcels; the same restrictions as to the indemnity, etc., will apply.

(*b*) In the case of C. O. D. articles prepaid at other than parcel post rates the same procedure is to be followed in regard to claims as in the case of other registered articles; the same restrictions as to indemnity will apply.

General Regulations

In specifying charges to be collected, the sender may include postage and the C. O. D. fee paid.

It is forbidden to send articles C. O. D. which have not been ordered or requested by the addressees.

No article is to be accepted for C. O. D. which bears any wording to the effect that the article may be examined before acceptance as the C. O. D. service does not carry with it any examination privilege.

In the event of the addressee having paid the charges due on a C. O. D. article, and after examination of the same desiring to hand the article back and have the money refunded, such request is under no circumstances to be complied with. It is the duty of the delivering office to collect the amount due and remit it to the sender of the article, and it may be explained in the circumstances above indicated that any objection to the goods received or desire for return of the money, is entirely a matter for settlement direct between the addressee and the sender. The Post Office is not concerned in any way in this phase of the matter, and postmasters are not to exercise any discretion in regard thereto.

with the Stamp Tax, particularly the action of certain manufacturers and wholesalers in passing on to the drawee the amount of the tax stamp on drafts, brought about the adoption of the following resolution:

RESOLVED. That this association oppose any action on the part of manufacturer or wholesaler to charge stamps on drafts to the drawee.

Use Revenue Stamps Only

In view of the practice of using Post Office stamps on cheques, notes, drafts, etc., in place of Inland Revenue Department stamps, it was felt that no accurate record was available of the revenue produced by this tax, hence the following resolution:

WHEREAS. At the last session of Parliament a large increase was made in the Stamp Tax on cheques, notes and drafts, in order to produce required revenue, and Whereas under present arrangements postage stamps are permitted to be used for this purpose thus unduly increasing the postal revenue and making it impossible to definitely determine the revenue received from said stamp tax on cheques, drafts, notes, etc.

BE IT RESOLVED. That for the purpose of definitely determining the revenue of the two departments affected—regulations should issue requiring the use of proper revenue stamps on cheques, notes, drafts, etc., and that same be obtainable through Post Offices, Banks and Inland Revenue Offices.

All of which is respectfully submitted.

Discussing the intention of the Dominion government to inaugurate a C.O. D. service in connection with mail matter, to become effective on October 1st, E. M. Trowern, Dominion Secretary of the Retail Merchants' Association, declares that the association must first study the effect of the measure just announced by the Post Office Department, before seeking to oppose and upset it. As outlined on this page, charges due the sender of parcels up to $100 may be collected from the addressee and remitted to the sender by post office money order.

"On the face of it," Mr. Trowern stated, when interviewed by a representative of Hardware and Metal, "it would seem that this new legislation bestows a special favor on our mail order houses, and provides another contentious factor in the competition that the average retailer has to meet. But we have a great many merchants apart from our large mail order houses, who are doing and are building their business through the mails. Before taking any steps to prevent this legislation from being carried out, I would like to study the effect of it first. The Retail Merchants' Association is investigating postal rates and postal matters generally at the present time, and this is one of the questions that will be looked into. In the way of stamps for cheques and receipts when the new regulation in regard to the latter comes into force at the beginning of the year, we think that the Post Office stamps should not be used for these purposes, but only the Inland Revenue stamps. Where the latter are not used, the Post Office Department is getting the revenue that should go to the Inland Revenue Department to pay the war debt. We think that these special stamps should be sold in the post offices of the country where it is not convenient to secure them otherwise."

No Privilege of Examination

Asked as to the fact that the Retail Merchants' Association some years ago fought a similar measure as has just been brought down, Mr. Trowern stated that the new legislation is not quite the same as was opposed on a previous occasion. At the time in question it was proposed that people be permitted to have goods sent through the mails C.O. D., allowing them to examine the goods before acceptance was made, and, if not satisfactory, the same could be returned. Such a proposal, of course, never passed the proposal stage. The new regulations specifically state that no article is to be accepted for C. O. D. which bears any wording to the effect that the article may be examined before acceptance, as the C.O.D. service does not carry with it any examination privilege.

Direct Favor to Mail Order Houses

"The association is studying this C.O. D. parcel post question from every angle, you can tell retailers," Mr. Trowern added, "and their best interests will be served"

Make Plans for Next O.R.H.A. Convention

Toronto Armouries Secured for Exhibition at Next Convention of Ontario Retail Hardware Association—Approximately 200 Exhibitors Expected—Big Increase in Membership

PRELIMINARY plans for the 1923 convention of the Ontario Retail Hardware Association were discussed at the meeting of the executive committee in Toronto on Monday. The opening exercises took the form of formalities in adopting the Constitution and By-laws of the association by the directors of the newly incorporated organization as outlined in a recent issue of Hardware and Metal.

Secretary W. F. Macpherson briefly explained the articles of incorporation pointing out that the charter delegated the powers asked for, and that these were wide in scope. The cost of incorporation was $100 apart from certain minor charges. The word "Limited" is not being used in connection with the name as it is a non-share company not organized for profit.

Have Secured Armories

The special committee appointed in connection with plans for the Exhibition at the next convention reported having received permission to use Toronto Armouries in February and plans can now be gone ahead with. It was pointed out that the Armouries is an ideal location for the exhibition, being within ten minutes' walk of the King Edward Hotel which will be convention headquarters, and allowing plenty of floor space for a larger number of exhibits than have heretofore been arranged. Previous exhibitors will be given the advantage of fifteen days in which to book reservations, compared with new exhibitors. Some discussion took place concerning prices for booths but it was the opinion that no considerable increase was advisable. Such details will be left to the exhibition committee to decide.

Increase in Membership

The report of Secretary Macpherson showed good increases in membership and number of price books placed as result of his various trips during the summer. In March he secured 18 members and placed 20 price books in Toronto. In London in April he secured a 100% membership and price book service. In Oshawa, Lindsay, etc., in May he took in $140 in membership and price book fees. Later in May he visited Windsor and district securing 25 new members and placing 42 books. In July he visited Port Perry and district placing 14 books and securing 9 new members. In another trip through Brighton, Cobourg, up to Collingwood and district he secured 17 members and placed 38 books. The total membership to date is 663 with 511 price books in use.

The secretary contemplates an early visit to Sarnia and district.

The first renewals on the price book service are due on September 1 and the result of these renewals will be an indication of how the service is being received.

The financial statement showed a very healthy condition of affairs. Mr. Macpherson here outlined his visit to London, Ont., in July on the request of the local association to advise on the situation existing in that city, as dealt with in another article in this issue.

OBSTACLE TO CANADIAN ASBESTOS INDUSTRY

Montreal.—An obstacle to the development of Canada's asbestos industry, was recently pointed out by Col. P. Pelletier, Quebec's agent-general in London. A complaint was received from a Quebec asbestos firm that owing to discriminatory ocean freight rates they had been prevented from obtaining a big order. Upon investigation it was found that although asbestos can be brought from South Africa to England for $12 per ton, it costs $17 per ton to ship from Canada to England. Moreover, while Canadian asbestos can be shipped to Cherbourg or Havre for $13 per ton, it costs $4 more if consigned to an English port.

Plans Four Departments of Hardware

Gives Salesmen Opportunity to Serve Customers to Better Advantage—Store Now Divided and Sub-divided, Each Half Having Separate Entrance—Shelf Hardware and Paint, Household Goods, Wall Paper and Electrical Goods—Seven Display Windows Instead of Three

The front of the A. Goyette Hardware, Montreal, as it now appears with the renovation allowing the use of seven splendid showrooms, is evident herewith. This allows a wide range of seasonable hardware to be shown at the same time. In the windows, from left to right are shown displays of kitchen utensils, glassware, wheel goods, chinaware, thermos bottles, shaving supplies, etc., and in the corner window appear vacuum cleaners, washing machines, bathroom accessories.

HAVING in mind ways and means of obtaining a store layout which would allow greater efficiency on the part of salesmen when serving customers and at the same time improve the appearance of the store both inside and outside, A. Goyette, 124 Mount Royal Ave. E., Montreal, planned a re-arrangement by which he has certainly attained both. It has meant altering certain shelving, utilizing space which was formerly more or less useless and acquiring extra floor space by establishing a department on the second floor with a stairway leading from the centre of the ground floor. The idea, according to the proprietor, was to form separate departments and run each as a separate unit in the store. Salesmen could work to a better advantage, and by some of them specializing in a certain department greater sales results should be attained. There were lines in a hardware store usually purchased by the women folk, and others which held the attention of the men customers. It was intended, therefore, to separate the store in as practicable a way as possible, at the same time having easy access between the two.

Four Separate Departments

According to plans, four distinct departments are laid out; shelf hardware and paint, household goods, electrical supplies and wall paper. To accomplish this the store front was re-modelled and a double entrance built. On the one side the customer enters the hardware and paint department, and the other door leads to the household goods section. Immediately inside the door on the former side is builders' hardware, followed by the tool section, both boxes and built-in show cases being used to display the various lines carried. Towards the rear of this side is general shelf hardware with a separate counter. Show cases line the floor from front to rear and here is where the smaller tools, cutlery and silver flatware are displayed.

In front of these sections and receiving the same prominence is the paint department, the arrangement of which is both neat and practicable. A complete line of paint, varnishes, stains and allied products is so shelved that the salesman loses little time in attending the customer. Lines which are in biggest demand are within easy reach from the floor, while the larger tins and surplus stock are on the higher shelves. Each kind is numerically placed, or according to colors and shades, thus the desired can is easily located.

The feature, however, of this department is the display of brushes. Apart from a large display board on which are samples of stocked brushes is the stock itself which is kept in a glass fronted case almost the whole length of the shelving. This is placed on the floor immediately in front of the department and, as Mr. Goyette stated, "there are few who enter the store who do not see our line of brushes." The various kinds and prices of brushes each have a separate bin, these being in rows, one on top of the other. Tickets on each bin tell both the customer and salesman in plain figures the number and cost of the brush. After selection from the samples it is only necessary to open the glass door and pick out the brush desired.

Electrical Goods Department

Particular attention has been paid to the electrical goods section, this department being separated from the remainder of the store by a partition. The line of fixtures being an extensive one it was necessary to devote a considerable amount of space for a proper display. The ceiling is adorned with all kinds, and here too the various fixtures are hung according to price and size. Arranged in lines across the entire room, each row can be lighted by a separate switch on a wall switch board. Silent salesmen are also used in this department for showing smaller electric goods such as flash lights, batteries, accessories and "everything electrical."

Household Section

The household section is on the opposite side to the shelf hardware and paint department, separated also by a partition, and as stated, may be entered into either through a wide door on the inside or by a separate front door. Here is kept the full line of household requirements, from the smallest article of tinware or enamelware to stoves and ranges. It was designated by the store proprietor as the women's section. From the center of this floor is the stairway leading to the wall paper department on the floor above. Although wall paper is very closely related to paint and varnishes, and very often a purchase of one meant also a sale of the other, it was pointed out by Mr. Goyette that wall paper was also a household requirement and usually bought by a woman customer. If she was on a shopping tour, in all probability some of the articles on the shelves of the household goods department would be on her list and if wall paper was asked for it was only natural that she should want to inspect samples

The paint and brush departments of the Goyette Hardware, Montreal, are very important. A complete paint stock handy to customers is here shown with a grouping of brushes in sections according to price and size. The top of this cabinet is a good place for color cards, paint literature, etc. At the rear of the store is shown a display of electrical goods, bathroom equipment, etc.

in a quieter and a more secluded section of the store than the busy hardware and paint department. The whole upper floor is devoted to bins, sample boards and panels, with plenty of lines to choose from for any room in the home.

The New Front

As has been stated the store front was re-built, and the store now has a double entrance and seven distinct display windows in place of three formerly. Apart from having a much more attractive appearance, the extra space for display purposes is really the striking feature. Each entrance has a window on either side, while directly in the centre is a window which might be termed an ideal silent salesman with glass on three sides and a mirror for a background. This is securely locked at all times, but will be dressed just as frequently as the other windows, according to Mr. Goyette. "We are fully convinced of the value of our windows as advertising mediums, and we realized more and more how we were formerly handicapped in this respect. Although we lose about four feet on the inside to allow depth of the new layout, we gain this and much more when this space is devoted to displaying goods which can be seen by the passers-by."

Hot Battle Over Tariff on Cutlery

Fordney-McCumber Tariff Bill of U.S. Now Before Joint Committee of House and Senate to Consider Amendments—Rates on Cutlery Boosted Sky High by the Senate

A VERBAL battle has been in progress among administration officials of the United States for some time over the provisions of the Fordney-McCumber tariff bill. Big differences of opinion were expressed in the House and Senate on this bill which is now before a joint conference committee of these two bodies. There are several thousand amendments in the Bill, hundreds of which will receive special consideration. One of the chief points of contention is the question of valuation for duty on importation. The schedules fixed by the House were based on U. S. valuation while the Senate recast the schedules on the basis of foreign value with certain exceptions.

In the metal schedule much interest is centering in cutlery because of the conditions existing in the principal countries competing with the United States in the manufacture of cutlery. The rates on cutlery were already fixed at a high figure by the House but the Senate undertook to raise them to much higher levels. Discussing the subject in the House one of the members stated that upon cutlery articles of common use if it was necessary to pay more than 100 per cent. for the American product it would be better to import them for a while.

Paragraph 355 of this schedule dealing with cutlery which was the center of so much controversy was as follows:

"Par. 355. Table, butchers', carving, cooks', hunting, kitchen, bread, cake, pie, slicing, cigar, butter, vegetable, fruit, cheese, canning, fish, carpenters' bench, curriers', drawing, farriers', fleshing hay, sugar-beet, beet-topping, tanners', plumbers', painters', palette, artists', shoe, and similar knives, forks, and steels, and cleavers, all the foregoing, finished or unfinished, not specially provided for, with handles of mother-of-pearl, shell, ivory, deer, or other animal horn, silver, nickel silver, or other metal than iron or steel, or without handles of any kind, 20 cents each; with handles of hard rubber, solid bone, celluloid, or any

pyroxylin, casein, or similar material, 10 cents each; with handles of any other material, if less than four inches in length, exclusive of handle, 3 cents each; if four inches in length or over, exclusive of handle, 10 cents each; and in addition thereto, on all of the foregoing, 55 per centum ad valorem: Provided, That all articles specified in this paragraph when imported shall have the name of the maker or purchased and beneath the same the name of the country of origin die sunk legibly and indelibly upon the blade in a place that shall not be covered."

"Stork" Display Sells Baby Carriages

Discussing plans for the fall and winter trade Lawrence Davey, of the Ingram and Davey Hardware, St. Thomas, stated that they are looking for a record trade in toys and have placed larger orders than ever before.

"We are looking for a big demand for electrical and mechanical toys," said Mr. Davey, "although the business in general lines will be excellent. Now that we can obtain mechanical toys from Germany, there is no doubt we will do a splendid trade in them. We are selling more than 1,000 dolls every year now. We boost this trade by our store display which includes three big show cases, two upstairs and one down."

Mr. Davey stated that baby carriages have come to be an all year line with the firm. Up to the middle of August 150 have been sold this year. The firm goes after this trade by special advertising, special "Stork" window displays and by sending a letter to every mother when the birth of a child is announced.

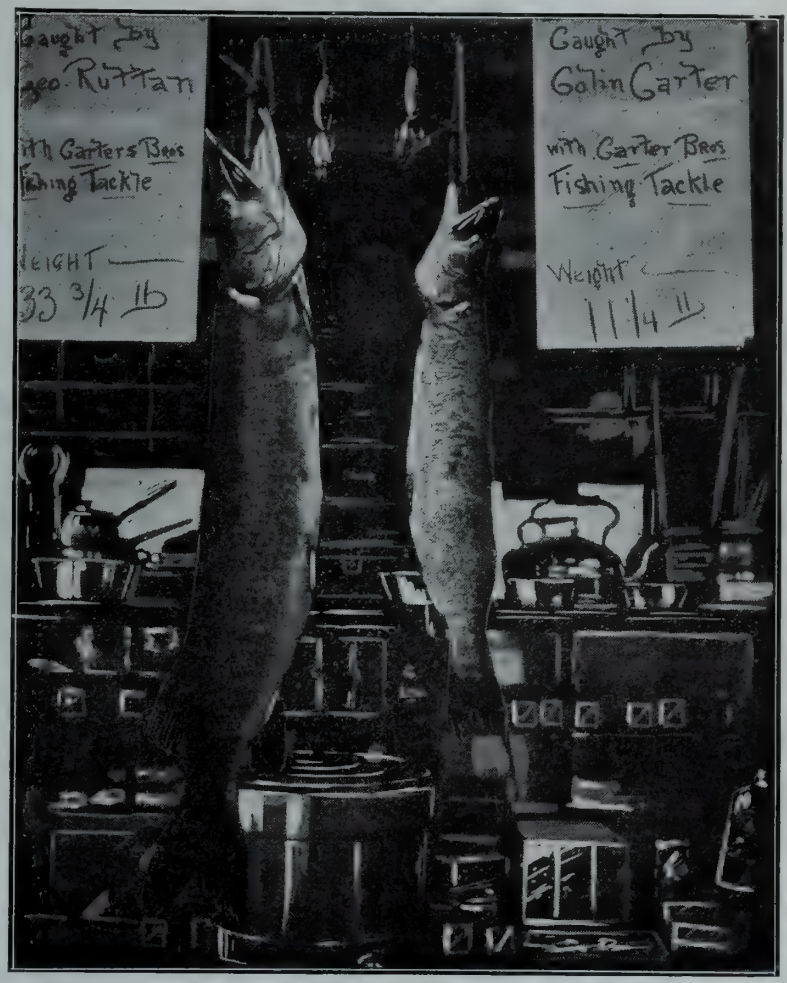
The firm keeps a large and attractive display of carriages on the second floor and at regular intervals makes a special drive for business by arranging window displays and putting on special advertising profusely illustrated.

This week the firm closed a most successful season in selling refrigerators. Mr. Davey stated that 72 were sold and all at regular prices.

While Ingram and Davey are handling wireless outfits and equipment at the present time they are undecided as to whether they will continue.

"I am rather inclined to think that interest in it will flag soon," said Mr. Davey. "It is rather an expensive line to maintain also as there are many repairs to be made and adjustments. I don't know yet whether we will continue to handle it or not."

Big Fish Are Centre of Much Interest



A MERCHANDISING scheme which helped stimulate holiday trade in seasonable hardware was the hanging of two good sized fish outside the Carter Bros. hardware store, Picton, Ont. The two large fish as illustrated herewith were caught by Mr. Carter's son and a friend. Mr. Carter states that the fish were used to splendid advantage being hung outside in the vestibule entrance. They were no sooner placed than interested people began to gather. Crowds examined the fish up until 10 p.m. on Saturday evening. Fortunately the day was cool and the fish were left hanging outside the store until the sun was upon them when they were put in a long box on ice. The fish kept well throughout their display and were later cut up and given away to customers.

The use of such novelty ideas constantly maintains interest in the Carter store. The fact that a cash business is done helps keep business active, considerably increased trade being done in the last few weeks than at this time last year. The total increase of trade in this store for August compared with a year ago was $1,032.39. This speaks well for the methods used.

BEACH FOUNDRY ERECT NEW FACTORY

The Beach Foundry Co., Ltd., Ottawa, have recently erected a new factory, which has a number of special features. The manufacturers point out that this plant is of modern fireproof construction throughout, and provides some 85 - 000 sq. feet of floor space. The buildings are of all brick and cement, with no artificial light. It is adjacent to the railway and provisions have been made for future extensions.

This company moved from Winchester in 1914 and took over the Butterworth Foundry at Ottawa. After three years the Beach Foundry Co., outgrew this plant and state that they have been forced to build. The latest labor-saving devices and machinery are installed, and visiting foundrymen have paid high tribute to the new plant operation. This increased capacity enables an output of six thousand furnaces per year, both piped and pipeless. Branches are at Winnipeg and Vancouver.

The MacLean Publishing Company, Limited

Montreal TORONTO Winnipeg

TORONTO, SATURDAY, SEPTEMBER 9, 1922

THERE ARE TWO outstanding surprises in connection with the announcement of the enforcement on October 1 of a C. O. D. service in connection with mail matter. One is that such regulations are to be put into effect at all, the other is that they are sprung on the business men of the community with such startling suddenness that no opportunity is given to consider the matter. Such important legislation should be withheld for at least six months in order that its effect may be clearly investigated and authorities not forced to make alterations afterwards to offset the demoralizing effect which it may have on certain branches of business.

A "Bolt From the Blue"

LIKE A "bolt from the blue" came the announcement from the Post Office Department this week of the enforcement from October 1 next of regulations providing for a C. O. D. service in connection with mail matter. These provide that charges due the sender up to $100 may be collected from the addressee and remitted to the sender by post office money order. This service is to be only between money order post offices or such offices which are at the start of a rural route. The fee is to be paid by postage stamps affixed to the parcel and this covers insurance and registration. A protective element is contained in the fact that it is forbidden to send articles C. O. D. which have not been ordered or requested by the addressee, nor can any such article be examined before acceptance.

While some retailers in Canada may be benefited to some extent by these regulations it is quite evident that they will be of outstanding assistance to the business of mail order houses and city department stores. In view of the fact that such stores pay municipal taxes only in the centres in which they are located it is obviously unfair that they should be assisted by the government in this manner to take from the other districts the business which rightfully belongs to the retailers located in those centres and who are largely responsible for such settlements. It is difficult to see where the Post Office Department will benefit from the regulations and it is quite evident that this department will be called upon to take risks in carrying parcels which may not be paid for and in carrying large sums of money by its employees; risks which heretofore have been slight. Furthermore if the Parcel Post department had been a revenue producer since its inception it might be more expected to give consideration to such extensions than under the conditions existing whereby this branch of the service is alleged to operate at a great loss.

The question of a C. O. D. service in connection with mail matter has been considered before and there was a great deal more excuse for it being introduced at the time the Parcel Post service was commenced than there is now. At that time such a service would have placed the Parcel Post on more of an equal footing with the C. O. D. service extended by the express companies, but now the introduction of such a service puts it in direct competition with the National Railways Express, another government service which is not a paying proposition.

It is unfortunate that such a far reaching measure as this should have been precipitated on the business of this country without any opportunity for discussion or suggestions from business authorities. Especially is such action surprising in view of the fact that this portion of the Parcel Post regulations was dropped at the time these regulations were enforced.

This new regulation has been made effective under the general powers granted the Postmaster General under Section 9 and 10 of the Post Office Act.

Such an important piece of legislation as this should not be put into effect until the best possible counsel can be secured from business men representing the various branches of trade which it will affect. It is most extraordinary for such a far reaching regulation to be sprung on the business men of this country with only a few days to consider it. Every influence should be brought to bear to have this measure held up for at least a period of six months, as set forth in a resolution from the Ontario Retail Hardware Association.

No Discrimination Wanted

IN CONNECTION with the article appearing in last week's issue of Hardware and Metal concerning the seizure of a weighing scale in a Toronto medical supply store, this being a type prohibited by the regulations, Hardware and Metal takes the viewpoint that such a scale has a market in Canada and that if it is to be sold in this country the hardware trade should be enabled to sell it on an equal basis with medical stores, department stores or any type of retail business. Hardware and Metal is not so much desirous of helping rid the country of such scales as in eliminating any discrimination whereby department stores could sell these scales while hardware stores would be denied the privilege. With all due respect to the standards of the Weights and Measures Department there would seem to be a profitable market for the sale of such a baby weighing scale at a fair price and hardwaremen are anxious to get a share of any such business.

Flirting With Death

THE DEATH of four prominent business men from motor accidents occurring within the short period of three days, to say nothing of the dozens of other minor accidents from motor vehicles directs attention forcibly to the chances which some business men will take when driving motor cars. These men in most cases are heads of important businesses who have achieved their positions through the exercise of caution and wise judgment, yet many of them fail to exercise these same faculties in the operation of their motor cars, oftentimes with serious result. Their endeavor to make up a few minutes' time with excessive speeding compels them to take chances which not only endanger their own lives but those who may be driving with them. It may be that continued neglect to exercise caution in driving may make it necessary for motor cars to be equipped with governors or some other attachment which will curb the present tendency toward excessive speeding on the part of motor car drivers. The lives of pedestrians are endangered as well as those driving in the car, and the community suffers a distinct loss in the premature death of capable executives who succumb to this craze for speed.

The Sales Tax and the Cash Discount

Manufacturer Receives Letter From Retailer That Sales Tax Need Only be Paid After Cash Discount is Deducted—General Practice is for Retailer to Take Discount on Whole Amount Including Sales Tax and Manufacturer Debits Government for the Difference

TAKING this matter up with government officials and other manufacturers, some interesting facts have been secured. The subject is dealt with in a ruling made by the Commissioner of Customs as follows:—

"Cash discounts may be allowed for excise tax purposes if allowed and deducted on the face of the invoice by the seller. If the invoice is subject to a cash discount conditional upon payment within a stated period and if the purchaser when making settlement of the bill avails himself of the condition under which the discount is allowable, a credit may be taken by the seller in his next succeeding tax return for the tax paid on the amount of such cash discount—provided that such next succeeding tax return is made within 60 days of the payment of the tax to the government. If the foregoing adjustment cannot be made within 60 days the overpayment can only be corrected by application of the seller to the Department of Customs."

One manufacturer discussing the subject with Hardware and Metal pointed out that the above policy is followed by them, and the total of all cash discounts is deducted from sales before making returns to the government monthly.

Would Be Much Confusion

As to the suggestion for a plan which would render unnecessary this adjustment by the manufacturer, the president of a large Hamilton firm states: "We do not believe it would be possible to make an arrangement whereby the sales tax might be assessed on the invoice value, less cash discount.

"A large proportion of our several hundred accounts do not avail themselves of the cash discount, and it would cause great confusion were we to attempt to meet the individual wishes of our customers. We would either have to assess the sales tax without deducting the cash discount, or else make a general rule to deduct the cash discount before computing the sales tax. This latter arrangement would, we believe, cost us too much in the course of a year to be seriously considered."

Makes No Difference

A Montreal manufacturer states he has gone thoroughly into the matter and cannot see that it makes any difference to the retailer whether the sales tax is added before or after discount is deducted. Following are two examples bearing out this contention:—

(1)	Goods	$100.00
	Tax 4½%	4.50
		$104.50
	2% discount	2.09
		$102.41
(2)	Goods	$100.00
	2% dis.	2.00
		98.00
	4½% tax	4.41
		$102.41

"As you suggest the matter could hardly be adjusted in advance of payment and we have experienced no difficulty with this phase of the Sales Tax question," he stated.

The general manager of a large Ottawa firm states that as a general practice, manufacturers from whom they buy permit them to deduct 2% cash discount from the full amount of the invoice including sales tax and they charge back to the government the amount represented by 2% of the sales tax.

The manager of a Montreal paint firm states that his firm eliminates much trouble in the matter by stamping each statement and invoice as follows:—"Cash discount is not allowable on Sales Tax."

HERE IS THE ENQUIRY

A large Western Ontario manufacturer writes as follows:

"Editor, Hardware and Metal:

"We recently received a circular letter from a retailer to the effect that Sales Tax need only be paid after the cash discount is deducted and requested in future that we deduct cash discount before adding sales tax.

"As an example—if an invoice is for $100.00 and cash discount is deducted as they suggest, it means a difference of 9c in their favor which may be in order, but in so far as the individual dealer is concerned we question if the aggregate will be very large.

"If the ruling, as they outline, is correct it would add considerably to the manufacturers' and jobbers' difficulties for the reason that it is practically impossible at the time that statements are sent out to say what dealers are going to pay cash. Supposing we make a draft on the dealer covering his several purchases during the month, which are taken from a ledger, how are we going to tell what cash discount he is entitled to without going over all our files and referring to each individual invoice?

"This may seem a small matter from the view point of dollars and cents, but the loss of time entailed is worth considerably more than would appear on the surface."

Not General Practice

A Hamilton manufacturer states that he has requests from certain retailers that Sales Tax be paid only after cash discount is deducted but no general practice is made of doing it.

"There are certain firms which we know take care of their account regularly every month deducting the cash discount; with such firms we have made it our policy to deduct the cash discount before adding the sales tax. In all other cases sales tax is being added in the normal way.

"We do not think that a practice should be made of deducting the cash discount before adding the sales tax, because in a great many cases customers do not take advantage of the cash discount; they may take advantage of the cash discount some months but not others, and it would only mean confusion would arise in this connection.

"Regardless of what the discount may be, or when it is made, the sales tax must be based on the actual selling price of the article. That is, if the article is sold at $1,000, less two per cent. discount. for cash, and the purchaser pays cash, then the sales tax is based on $980."

The above ruling was secured from R. R. Farrow, chief commissioner of the Department of Customs and Excise, by Hardware and Metal, as a result of the complaint of a prominent manufacturer that certain retail hardware merchants had taken the stand that the sales tax need only be paid after the discount was deducted. These merchants had requested that the cash discount be deducted from the invoice before adding the sales tax.

The ruling means that retailers are justified in changing the amount of the sales tax on the invoice from a manufacturer or wholesaler where they take the discount and therefore pay a less amount than the bill is made out for.

Of course this will obviously be difficult for manufacturers and wholesalers as they do not know when sending out the invoice whether the retailer will be paying cash and taking the cash discount or let the bill run and pay the gross amount.

Mr. Farrow's attention was drawn to this point and he said that while he appreciated the difficulty, he thought the retailers and manufacturers might get together and come to some happy arrangement without violating the regulations.

Events in the Trade

OCCUPY NEW STORE

A. J. Stephens and Son, of Walkerville, Ont., are moving into a larger store in the Imperial Block and will add a complete line of auto accessories and supplies to their stock.

INCORPORATION

Parsons Automatic Window Appliance Co. Ltd., head office Toronto, capital $360,000, to manufacture window appliances and hardware.

OBITUARY

Born in Essex, England, and a resident in Toronto for the past 34 years, James Westwood is dead. Deceased, who was in his 81st year, came to Canada when a youth, and settled for some time in Western Ontario. He later came to Toronto, and founded the firm of James Westwood, stove retailers, which he conducted until fifteen years ago, when he retired and the business was taken over by his sons.

Personal

G. M. Roche, manager of the London, Ont., branch of the Gutta Percha Rubber Co. Ltd., is holidaying in Toronto for a couple of weeks.

Col. T. S. Hobbs, of the Hobbs Hardware, London, Ont., who has been indisposed for several weeks, is much improved.

George A. Wenige, of London, Ont., president of the Canadian Bicycle Dealers' Association, left on Thursday to attend the convention of the National Bicycle Dealers' Association in Atlantic City. Mr. Wenige is vice-president of the National organization and was recently chosen by the executive to preside at next week's meeting which lasts from the 13th to the 16th. The Canadian dealers meet in London on September 27 and 28.

H. S. Campbell, of D. F. Jones Mfg. Co., Gananoque, spade and shovel manufacturers, was a Montreal visitor this week. Mr. Campbell reports that business during the past spring and summer season has been particularly active. There has been a consistent demand for spades and shovels since the opening of spring weather, and with this continuing, sales this year promise to be as large as any previous year in the history of the firm.

WESTERN ONTARIO NEWS

F. C. Bishop, of Norwich, Ont., has just completed the installation of a large new curb gasoline pump in front of his hardware store.

George G. Swalwell of the Cowan Hardware Co., London, Ont., has just returned from a six weeks trip through the Canadian Rockies.

Work is rapidly nearing completion on the new store of the Cowan Hardware Co., at London, Ont., and the show windows which have just been completed are of unusually attractive design and size. The firm expects to occupy the premises early in October.

WILL ERECT NEW PLANT

It is reported a large manufacturing plant, costing approximately $1,000,000 will be erected soon by the Dominion Glass Company in the vicinity of Montreal. The company now operates two plants in Montreal, but it is understood the proposal is to erect one large plant which will not only look after the business now being handled by these two plants, but will also provide for any expansion of the company's business.

NICKEL PLANT RESUMES

Sudbury, Ont.—The plant of the International Nickel Co. at Coppercliff, has commenced operations after having been closed down for eighteen months. The company is operating at one-third of its wartime capacity. Regular shipments of the matte will be made to the refinery at Port Colburne, where all the refining will be done hereafter, the refinery at Bayonne, N. J., having been scrapped. The refined nickel will be shipped to the new $2,000,000 rolling mills at Huntington, Va., where it will be rolled into malleable metal and marketed mostly in the United States.

NOVELTY IN BUILDING CONSTRUCTION

London, Ont.—The most active demand in years for builders' hardware is being experienced locally and there is every indication that the trade will continue very brisk for some time yet. In spite of the largest amount of home building on record, contractors are still being called upon to figure on numbers of new homes. They state that those for whom they are figuring are anxious to start work as soon as possible and they expect to be rushed right up to the time the snow flies.

Rather a novelty will be started here shortly in the way of homes by Ex.-Ald. E. R. Seabrook who is busy with plans for two dwellings to be built of asbestos lumber and roofed with asbestos shingles. He believes fully modern six-roomed dwellings of this construction can be erected for $3,500 and intends putting up two as an experiment.

SECURE NEW AGENCY

T. Mortimer and Co. Empire Bldg., Toronto have been appointed agents for Ontario for Societe Generale de Coutellerie et Orfevrerie, 31 Rue Pastourelle, Paris, France, who are manufacturers of French cutlery including pocket and pen knives, etc. Mr. Gonon jr. has just completed a satisfactory trip through Canada on behalf of this firm.

WESTERN BUYERS AT BIG FAIR

F. N. Rowat, buyer for Marshall Wells Ltd., Winnipeg, Man., and J. Mohr, buyer for Marshall Wells, Alberta, Ltd., Edmonton, are among the westerners visiting Ontario at the present time, and visited the Canadian National Exhibition under the guidance of James Hossack, sales manager Lufkin Rule Co. of Canada, Limited.

PURCHASE STEEL & RADIATION LTD.

The Imperial Radiators, Limited, have purchased the entire assets of the Steel and Radiation Company, Ltd., including plant and property, which went into the hands of the receiver some time ago. The purchase price, which was $400,000, covered many acres of land and buildings in Toronto and St. Catharines.

HARD COAL STRIKE SETTLED

Anthracite miners and operators having settled their wage differences, after more than five months controversy, every effort will be made to start production of coal as soon as possible. Leaders expressed the opinion that the hard coal mines would be in operation the first of next week, and that normal production would be reached quickly. Production is estimated to be about forty million tons behind last year.

ADOPT NEW SERVICE POLICY

A new service policy adopted by the Hoover Suction Sweeper Co. is designed to keep every machine operating efficiently in spite of consumers' abuses and neglect. "Authorized Hoover Service" as the new policy is called will form the foundation of all future service work. It calls for nation-wide organization of service men located in prominent central points, each headquarters being a completely equipped and stocked service station. Each station is in charge of a factory trained expert. Forty-eight service stations of this kind are said to have been opened in Canada and the U.S.

SYDNEY STEEL WORKERS GIVEN WAGE INCREASE

Wage increases running from ten to fifteen per cent. and affecting all classes of workers at Sydney steel plant, have been announced by E. P. Merrill, general manager of the British Steel Corporation. Approximately 2,800 men are affected by the new order. The new schedule will include a general levelling-up of rats in different departments.

NO ADVANCE AT MINES IN ANTHRACITE PRICES

It is officially announced by the Anthracite Operators' Association that on the resumption of mining, the prices of coal at the mines will not be advanced, though bids of $12 a ton, or $4 more than list prices, are being made.

Inasmuch as freight rates are ten per cent. lower than last spring, when prices were made, they say there will no excuse save ability to get higher prices for any advance by retailers.

WESTERN CANADA NOTES

The hardware store of John Mingle, at Browhead, Sask., was entered by burglars and $1,000 in cash and victory bonds taken.

Friends of Fred Vine of the traveling staff of J. H. Ashdown Hardware Co., will regret to learn that he is seriously ill and in hospital at Calgary.

R. E. Doherty, manager of the Calgary branch of Crane Ltd., has returned from a three weeks' trip by motor through the mountain roads of southern Alberta and eastern British Columbia.

The cotton shed of the Alaska Bedding Company (Simmons, Limited), Winnipeg, was gutted by fire. The shed contained 20 car loads, a considerable part of which had recently been received, and the loss is estimated at between $45,000 and $50,000.

J. F. McMullen, general manager of Marshall Wells Alberta Co., Edmonton, passed through Calgary this week on a motor trip to Banff. Mr. McMullen has just covered the north country by motor and confirms recent reports that the crop there is turning out much better than was thought possible a month ago.

BUMPER YEAR SLOGAN FOR 1923

A conference of the Canada Paint Company Ltd. staff was held at the Toronto branch of the company and promotion plans were discussed for the coming fall and winter months. The consensus of opinion was that there are excellent prospects for the sale of paints and varnishes during the balance of 1922 and for all of 1923. The slogan for next year is "Bumper Year 1923" and an attractive lapel button bearing the slogan has been made up for the travelling representatives of the company.

Hardwaremen Losing Money on Stamp Tax

Kingston Retail Hardware Merchants Complain That Drawers of Cheques Are Overlooking New Regulations—Some Drafts Are Returned and Retailer is Out the Stamp Tax

KINGSTON, ONT.—Local merchants report that they are suffering because of the fact that many people do not put sufficient stamps on cheques. Taxation is never the most popular gift of governments but the new tax on cheques and drafts provided by the last budget takes the prize for unpopularity.

"Every day I have cheques coming into my place without sufficient stamps," said one merchant this week, "and I have to fork down in my pocket for the money, for in these times I am mighty glad to get the cash. Sometimes I get cheques without any stamps but generally there is only a two-cent stamp attached, and if the amount is over fifty dollars, I have to make up the deficit. You may not think that this amounts to very much but if you consider the number of cheques that come into my place every day throughout the year, you can readily realize that I am paying out enough money to pay another man in wages. What I would like to see would be for the government to permit the banks to add the amount of tax deficit deducted from the issuer's books when the cheque is returned after being paid. Then the issuer would have to pay the tax on the cheque."

Another merchant had a different story of his troubles in addition to the chronic complaint about insufficient stamps on cheques. He stated that on a number of occasions he had drawn on customers for fairly large amounts and the drafts had been refused. The result was that as the stamps on the drafts had been cancelled, he was out that much on the deal, and this had to be added to the losses sustained through insufficient stamps.

The obvious need is for all issuers of cheques to put on the stamps called for by law, that is two cents for every fifty dollars or multiple thereof.

Retailer Asks If Manufacturers and Wholesalers Are Compelled to Collect Whole of Sales Tax on Transactions

AN ENQUIRY was made of Hardware and Metal this week by a retailer as to whether or not manufacturers and wholesalers were compelled to show the Sales Tax on their invoices and collect the full amount of tax on each transaction or whether it was optional with them as to whether or not they absorbed part of the Sales Tax on sales to the retailer. It was pointed out that one large Toronto manufacturer of hardware who had formerly absorbed part of the Sales Tax when it was 3% on sales to the retailer, now collected from the retailer the whole of the Sales Tax of 4½% and when questioned regarding the matter is said to have replied that the government no longer allowed manufacturers or wholesalers to absorb part of the Sales Tax but that the whole amount had to be collected on the transaction.

In this connection the following ruling has been secured by Hardware and Metal from the Commissioner of Customs and Excise at Ottawa:—

> "The Act as finally passed imposing tax on sales provides that the purchaser must be supplied with a written invoice of any sale which invoice must show the amount of tax payable thereon as a separate item. From this provision you will note that the full tax payable on any sale must be shown on the invoice."

From the above it will be noted that it is necessary for the manufacturer or wholesaler to show the total amount of Sales Tax payable on the transaction, as a separate item on the invoice. No mention is made in the new regulations that manufacturers and wholesalers are compelled to collect the whole amount of the Sales Tax from retailers, though it is admittedly the government's intention that this should be passed on to the final consumer. The absorption of a part of the Sales Tax was formerly achieved by the revising of prices on the part of manufacturers and wholesalers, and the decision to discontinue absorbing any part of this tax since the increase has resulted, in many cases, in a thorough revision of prices. Thus manufacturers and wholesalers might continue to absorb part of this tax through a revision of prices while continuing to show the total amount of the Sales Tax payable on the transaction as a separate item on the invoice.

Hardware Letter Box

Information on trade topics will be gladly supplied to subscribers through this department.

1900 ELECTRIC WASHER

D. Mistele, hardware merchant, Rodney, Ont.—Can you advise us who makes the 1900 electric washer?

Answer.—The Nineteen Hundred Washer Co., 357 Yonge St., Toronto.

VACUUM FREEZERS

R. H. Cowan, Alexandria, Ont.—Where can I procure a vacuum ice cream freezer?

Answer.—The Auto-Vacuum Freezer Co., 220 West 42nd St., New York City.

LOCK WASHERS

Messrs. Frank Fales & Sons, Ltd., St. John, N. B.—Kindly advise us who manufactures lock washers.

Answer.—Union Iron & Metal Co., 1951 Dundas St., W., Toronto.

DANDY LAWN MOWER

The Collingwood Hardware Co., Collingwood, Ont.—Please inform us who makes the lawn mower called the "Dandy."

Answer—The Taylor-Forbes Co., Guelph, Ont.

BAKERS' PANS

J. W. Fleming & Son, Blenheim, Ont.—Kindly advise us who makes bakers' pans.

Answer.—The Thos. Davidson Mfg. Co., Montreal; The Hamilton Stove & Heater Co., Hamilton; Edwin Chown & Son, Kingston, Ont.; Fletcher Mfg. Co., Toronto; Brantford Oven & Rack Co., Brantford, Ont.; Keenan & Ratchford, St. John, N.B. Standard Tin Works, Toronto; White & Thomas, Toronto; Wilson Scale Works, Toronto.

CATTLE MARKERS

A. Spratt & Sons, Inglewood, Ont.—Please advise us where we can procure cattle markers.

Answer.—The Rideau Specialty Co., Smith Falls, Ont.

CEDAR CHESTS

Foster Hardware Co., Orono, Ont.—Would you kindly advise us who makes cedar chests?

Answer.—The Lindsay Woodworkers, Ltd., Lindsay, Ont.; Keenan Woodenware Mfg. Co., Ltd., Owen Sound, Ont.; Waterloo Furniture Co., Waterloo, Ont.; Czerwinski Box Co., Ltd., Winnipeg.

SUCCESS OIL STOVE

McKinley & Northwood, Ltd., Ottawa, Ont.—Kindly advise where we may secure parts for the Success oil cook stove.

Answer.—The Huenefeld Co., Cincinnati, Ohio.

BAKE OVENS

J. W. Fleming & Son, Blenheim, Ont.—Kindly advise where we can secure bakers' steel bake ovens.

Answer.—Gurney Foundry Co., Toronto; Fletcher Mfg. Co., Toronto; Bedford Stove Co., Bedford, Que.; Brantford Oven and Rack Co., Brantford, Ont.; John Burns & Co., Montreal, Que.; Robt. Gardner & Son, Montreal; MacNab & Roberts, Ltd., Winnipeg, Man.; Marsh Patent Bakers Oven Supplies, Toronto; John Turner & Son, Toronto; Warren Mfg. Co., Toronto· Winnipeg Oven & Tool Co., Winnipeg, Man.

BAKERS' SCALES

J. W. Fleming & Son, Blenheim, Ont.—Where can we secure bakers' scales?

Answer.—International Business Machines Co., Ltd., Toronto; Fletcher Mfg. Co., Toronto.

SQUARE "V" IRONS.

Messrs. Hawkins & Miller, Clinton, Ont.—Kindly advise us the manufacturers of square "V" irons for coopers' use.

Answer.—Mack & Co., Rochester, N. Y., are the makers of Barton tools, which include these products.

FISH NETS

The Marks Clavet-Dobie Co., Ltd., Port Arthur, Ont.—Please advise us where we can secure fish nets.

Answer.—Messrs. John Leckie & Sons, 77 Wellington St. W., Toronto.

LINOFELT

J. R. Myers & Son, Stratford, Ont.—Can you tell us who manufactures Lino-felt?

Answer.—Lionfelt is an insulating and building paper made by the Union Fibre Co., Winona, Minn.

The Phillip Carey Co., Toronto, are the Ontario representatives.

Catalogues and Booklets

Those interested in any of the catalogues described below can procure a copy of the same by writing direct to these firms. Mention that you noticed this in Hardware and Metal

NEW GURNEY CATALOG

Catalog No. S-221, covering stoves and ranges, has just been issued by the Gurney Foundry Co., Ltd., Toronto. This book contains forty-eight pages, prepared in typical Gurney style, attractively illustrated and skilfully arranged. Gurney products are depicted in a wide variety of finishes, and while the fundamental features of the ranges are the same, the makers point out that this permits a larger selection according to individual tastes. The numerous clear-cut illustrations provide an adequate idea of the style, type and finish of the different ranges and stoves referred to in this catalog. Special attention has been paid to giving full details and specifications, with sizes of the various parts, the individual features of each product, and the approximate shipping weight. Among the ranges and stoves catalogued are the Royal combination coal and gas range, the Oxford combination range, the Chancellor, the Laurentic, the Arcadia, the Royal Oxford, the Glenwood, and the Royal Keystone. Several pages are devoted to the Royal Quebec heater with oven, Rockland heaters, and numerous other lines. Tubular heaters, laundry stoves, cauldron furnaces and Gurney enamel products complete this useful book.

LANDERS, FRARY & CLARK

Landers, Frary & Clark, New Brittain, Conn., are now completing their new catalogue, No. 262, which carries their full line of "Universal" goods, with net prices applying to same. This will be ready for distribution within the next week and copies will be forwarded from A. Macfarlane & Co., Montreal, upon request.

HACK SAWS AND THEIR USE

An interesting little booklet is now being distributed to the hardware trade by Clemson Bros., Inc., of Middletown, N.Y. It contains a collection of interesting news regarding the hack saw industry, from the introduction of the first hack saw blade up to a full description of the present product. Various subjects dealt with in the booklet are as follows:

The dimensions of the hack saw blade the size of teeth, the endurance of hack saws, the hack saw frame, the cutting of metals, the speed of cutting, and many other subjects such as special saws, their uses and the testing of hack saws. Copies of this booklet may be secured from J A. Evans, the Canadian representative, No. 15 Barnesdale Ave., Hamilton, Ont.

Hardware Hits

THE PROOF

A Toronto hardware retailer and a jobber's salesman were angling in a river while on a holiday when one suddenly dropped his rod.

"Say!" he ejaculated. "Did you see that feller fall off that cliff over there into the river?"

"Don't get excited, Bill," soothed the other. "Mebbe it was a movie actor makin' pictures."

"But my stars! How kin we tell?"

"Well," counselled the judicious one, "if he drowns, he ain't."

NOT TAKING CHANCES

The secretary of a stove company sends the following:

It was the small boy's first long tour and he had watched with greatest interest while his father overhauled the car and strapped the extra tires on the rear.

They had just crossed into Quebec when they passed a farmer who had three mules hitched on behind his wagon and the boy exclaimed:

"Say, dad, I bet he's goin' a long way too—he's carrying three spares."

SILENCE IS GOLDEN

A new version of the old proverb that silence is golden is given by the sales manager of a stove company, in the following tale:

A Scotsman wanted to treat himself and his wife to an advertised trip of ten minutes in the air for ten dollars, and offered the aviator five dollars for the ten minutes' ride.

"I'll tell you what I'll do," the aviator said. "I'll take you and your wife up for ten minutes, and if from the time we start till the time we land neither you nor your wife make a sound, I'll charge you only five dollars."

The Scotsman and his wife agreed to it and the trip began.

Almost immediately after leaving the ground, the aviator began to do many alarming stunts. When the plane was high enough in the air, he looped the loop, did the falling leaf and in fact tried every difficult feat imaginable to make his passengers protest; but there wasn't a peep out of the Scotsman or his wife.

At last the aviator descended to the ground and when he stopped the engine, the Scotsman tapped him on the shoulder.

"Can I speak now?" the Scotsman asked.

"Sure you can," the aviator replied.

"A-weel, I wad like to tell you," the Scotsman said, "that the gude woman fell out ten minutes ago."

New Hardware Goods

Offered to Canadian Hardwaremen

WALLACE GLUE POT

J. D. Wallace and Co., Chicago, have a new product called the Wallace bench glue pot. One of the principal features is the fact that this is equipped with an automatic heat control device, which, it is claimed, keeps the temperature of the glue between 140 deg. and 150 deg. at all times.

There is a tube above the heating element, containing a sensitive volatile substance, which contracts and expands with the change in temperature, and provides action of ample power to actuate the control switch. When the heat reaches the proper temperature, the control turns off the current. When the temperature falls a few degrees, the heat is turned on again. The temperature gauge dial shows the heat attained.

This glue pot operates from any electric lighting circuit. The manufacturers also point out that this functions either as a water bath, hot air or dry heat pot.

There is a cast aluminum glue container, supported by retainer lugs, which prevent floating when the pot is but partly filled. The escape of moisture is minimized by this method of suspension. The base cover forms a dead air heat insulator chamber between the heating unit and the bench, and the air gap which surrounds the heating unit is further insulation between the heat unit and the base casting. They are made in two, four and eight-quart sizes, and weights range from 20 to 40 lbs.

This glue pot is adapted for heating any substance which requires a definite working temperature, such as heating or melting glue, wax, pitch, tar, sealing compound or resin.

THERMOMETER ASSORTMENT

A new assortment of thermometers is being featured by the Wilder-Pike Thermometer Co., of Troy, N. Y. These consist of 24 instruments, 12 of which are attached to an attractive cardboard display for counter use. These thermometers are moderately priced, and the makers point out are fully tested and entirely dependable. This company also have a half dozen assortment display consisting of two styles of red liquid Easy Reading thermometers, mounted on cardboard for counter use. The mountings of these thermometers are in assorted colors. This is known as Assortment No. 25.

"WATER-GAS" FUEL

A new fuel—"water gas"—produced by fusing disintegrated water and crude oil in a temperature of 900 degrees, Fahrenheit, has been produced, which, it is claimed will do the work of coal at one third the cost.

This oil water fuel maker is styled the Automatic Siphon Fuel Burner.

The burner is a simple coil of pipe about three-quarters of an inch in diameter, with a nozzle faucet at the outer end. The coil is set in a pan, and under it is a pilot light, lighted with oil, used only to get the flame started. On the right side is a container of crude oil and on the left is a container of water.

The water is first turned on through the coil. In passing through over the pilot light it attains 900 degrees of heat, Fahrenheit, so that its elements disintegrate. In the nozzle faucet these elements mix with a current of oil turned on after the water is heated. When the faucet is opened the oil atomizes and the mixture vaporizes, blowing out through the nozzle as vapor or permanent water gas. As the vapor strikes the heated coil, combustion takes place and a furious flame springs up, at first yellow, then blue and finally violet colored, the coil turning to red, then to white heat. The pilot light is shut off, and the operation thereafter is continuous as long as the fuel is turned on. The whole operation requires less than two minutes. There are 815 volumes of water gas generated to one of water and oil.

RELIABLE RADIO BATTERY

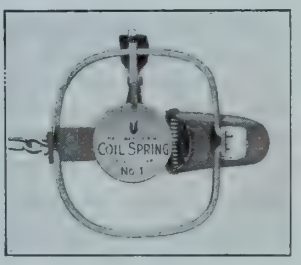
After considerable experimenting, the Dominion Battery Co., Toronto, state that they have produced a battery which does away with the difficulty most radio fans have experienced in changing the voltages of the battery circuit, without disconnecting the leads.

This new product is named the Reliable radio battery "B" variable switch, and the makers claim it is unexcelled for simplicity in changing the voltages, as described above. It is further pointed out that the amperage of the battery is not altered by this switch, such as would be the case where resistances are used.

In operation, by pointing the regulating arm to the voltage required, this is increased, while the amperage remains the same. It is stated that with the Reliable variable switch, the negative and positive leads may be kept stationary.

COIL SPRING GAME TRAP

A new coil spring game trap is being placed on the Canadian market by the Triumph Trap Co., Oneida, N. Y. These products are called the coil spring "never break" traps by the makers, who claim they will not clog when in operation, will stand unusual abuse and are not affected by climatic conditions. It is pointed out that the problem of the broken spring has been the point receiving the close attention of trap manufacturers as well as the chief cause of complaint from trappers. The principle of the coil wound wire springs is not new, but the inclusion of this feature in game traps and their introduction on the Canadian hardware market are features receiving the attention of dealers at this season.



ROADFINDER DEVICE

It is claimed that this product named "The Roadfinder," is a device that adds to the safety and pleasure of night driving. It is being manufactured by Roadfinder, Limited, Hamilton, Ont., and distributed throughout Western Ontario by the Roadfinder Sales Company.

The principle of operation in the Roadfinder is that it finds the road as it turns the headlights with the wheels, so their rays follow the direction of the wheels. When taking curves, or following a winding road the lights are therefore always on the road. When meeting or turning out from another vehicle, it directs the rays so the driver can see the edge of the road, and avoid the ditch. In this manner the makers point out that the bright rays are also kept out of the eyes of the approaching driver.

Weekly Hardware Market Reports

Markets at a Glance

NUMEROUS important revisions in hardware prices once again demand a close survey of the market situation. The budget of current changes includes both advances and declines. The upward movement on many basic materials has resulted in another more or less general inflation of values. Higher price levels are apparent this week on single and double bit chopping axes, boys', hunters' and bench axes, galvanized sheets, blue annealed and black sheets, both seamless and lapweld boiler tubes, plain wire base prices, single loop bale ties, Canadian makes of files, cast and malleable pipe fittings, cut hay wire, and the Mrs. Potts line of sad irons and handles. Several lines of builders' hardware are described as on an upward price trend, thus reflecting the swing in other manufactured products, while a similar revision of ten per cent. is pending in quotations on eavestrough and conductor pipe.

PROMINENT among this week's price reductions are the new lists on various makes of clothes wringers. The discount remains unchanged but revised list prices bring these machines to a lower level. Other declines appear on tarred felt, asphalt felt, various makes of alarm clocks, aluminum ware kitchen utensils and similar goods; while quotations on mirrors, linseed oil and shellac are again reduced.

PIG IRON remains noticeably scarce on domestic markets and the price is purely nominal. This shortage may assist in boosting scrap prices, but current trade in waste materials is decidedly quiet. Ingot metals are also showing a lack of aggressive trading which is quite in keeping with this season of the year. Whether the higher prices on galvanized products will also be noted in corrugated sheets is considered in some quarters as problematic as certain quantities of damaged corrugated have appeared on the market. Primary cotton centres again record advances, resulting in a firmer trend in manufactured cotton goods and also cotton wastes.

CURRENT hardware business continues seasonably good, steadily increasing as various fall lines commence to move. Marked attention is being paid to electric and oil heaters, while stoves and stove accessories are numbered among items recording activity. Reports covering Western conditions show improvement and the general impetus to current trade of crops safely harvested is expected to bring a revival of business which is already apparent in some quarters. Wholesalers state that buying is on a somewhat broader scale, although quantities are limited. Binder twine is in heavy demand, orders exceeding expectations.

BOTH hard and soft coal fields are now pretty well opened up, but the problem of adequate fuel supplies seems to hinge on transportation facilities. Under existing conditions, no matter how much may be produced at the mines, the ability of the railroads to handle it faster than the consuming demand is pointed out as the keynote to the situation.

Montreal, Que.

MONTREAL, September 7.—Price developments on the hardware markets this week cover a wide scope, many important lines being affected by price revisions both in an upward and downward direction. One of the chief changes is a reduction in prices on clothes wringers, manufacturers announcing new lower list prices on all lines. Reduced prices are also in effect on many aluminum kitchen utensils and sundry articles. Quotations on certain alarm clocks are lower, and mirrors are again slightly reduced.

The upward trend of prices is also prominent, important changes of this nature being noted on plain wire, single loop bale ties and cut hay wire. Each of the above lines are advanced fifteen cents per cwt. Cast and malleable pipe fittings are higher in price through a revision in discounts. Mrs. Potts' sad irons and handles are advanced approximately ten per cent. Single and double bit axes show a substantial price increase, while boys' and hunters' axes are also higher. Quotations on various makes of files record a similar advance.

FIRM TREND PRONOUNCED IN CORRUGATED SHEETS

Montreal.

The firming tendency in the undertone of corrugated sheets, noted for some weeks past, and principally due to the strength in the market for flat galvanized sheets is now said to be even a little more pronounced than formerly, owing to further increases in prices on both products on southern markets. Locally there is the same effect from markets to the south as other domestic centres, because of the easier access to overseas markets which have supplied most of the galvanized sheets used this year. However it is pointed out that prices on corrugated have not recorded the corresponding advances shown on flat sheets during the past summer. Unchanged prices and discounts are the following:

CORRUGATED SHEETS	Per 100 sq. ft.
No. 28 gauge	6 50
No. 26 gauge	7 00
No. 24 gauge	9 00
No. 22 gauge	11 00
No. 20 gauge	12 50
No. 18 gauge	16 50

Less 10 per cent.
Lighter than 24 gauge and wider than 27 ins., 75 cents per square extra.

HIGHER WIRE NAIL BASE EXPECTED AT ANY TIME

Montreal.

As pointed out in recent issues of Hardware and Metal, the undertone of the market for wire nails has been very firm, although unsettled. Higher prices have been expected in more recent weeks, but any change in this direction has not been made up to the present, pending a settlement whereby new

price levels in accordance with replacement costs could be agreed upon. It is now learned that an advanced base quotation is under consideration and same will be announced to the trade within the next few days. An increase of approximately twenty cents per keg is generally looked for.

ALARM CLOCK PRICES ARE REVISED

Montreal.

A revision is made in quotations on the various priced alarm clocks, the Big Ben and other well known lines being slightly lower in price. Following are revised quotations:

ALARM CLOCKS	each
Big Ben	3 18
Baby Ben	3 18
Big Ben Luminous	4 17
America	1 40
Ironclad	2 45
Early Bird	1 75
Sleep Meter	2 18

IRON HANDLES INCREASED TO $17.50 PER GROSS

Montreal.

Accompanying the new higher prices on sad irons is the announcement that Mrs. Potts' handles are advanced to $17.50 per gross.

ADVANCED QUOTATIONS ON MRS. POTTS' IRONS

Montreal.

New higher prices are given on Mrs. Potts' sad irons and polished is now quoted at $1.81 per set, nickel plated at $1.87 per set.

REVISED PRICE LIST ON ALUMINUM WARE

Montreal.

Effective from September 1, the Aluminum Ware Mfg. Co. are issuing revised prices on aluminum kitchen utensils and sundry lines. Price reductions of varying extent are made on many lines, while certain articles remain at former quotations.

PLAIN WIRE ADVANCED TO $3.80 BASE

Montreal.

Following the upward trend of other steel products is the announcement that plain wire has been advanced 15 cents per 100 lbs., which is now quoted at $3.80 base. Bright, annealed and coppered wire have the usual extras.

INCREASED PRICES ON SINGLE LOOP BALE TIES

Montreal.

An advance of 15 cents per 100 lbs. is recorded on single loop bale ties, and following are new quotations.

No. 12, $4.70; No. 13, $4.80; No. 13½, $4.85; No. 14, $4.90; No. 15, $5.20; No. 16, $5.40 per 100 lbs.

BUILDERS' HARDWARE ON UPWARD TREND

Montreal.

The upward swing in the steel industry, with its continued firming tendency and higher prices on such basic commodities as bar products, sheets, wrought pipe, fittings, soil pipe, etc., is gradually reflecting on other commodities and builders' hardware is no exception. Up to the present time the stiffening tendency has been very gradual and only a few lines have been shown at increased quotations. It would appear, however, that further announcements might be expected as prices on various lines are reported as firmer. In this connection it is worthy of note that a large American builders' hardware supply house advises that from September 1st, prices generally will be advanced 10 per cent., and contracts placed prior to September 1st will be received at former prices only until September 20th. Although there is no present indication on domestic markets that a general advance will be made, the trend of many smaller products which have not yet registered increased price levels is undoubtedly in an upward direction, and furhter advances are thought likely by some who have given the question some consideration during recent weeks.

HIGHER PRICES ON CUT HAY WIRE

Montreal.

New higher prices are also given on cut hay wire, and following are present quotations:

6 to 11 ft., per 100 ft.—No. 12, $4.70; 13. $4.80; 13½, $4.85; 14, $4.90; 15, $5.20; 16, $5.40.

AXES NOW QUOTED AT HIGHER FIGURES

Montreal.

The various kinds of axes are now advanced in price. Chopping axes, both single and double bit, are increased $2.50 per dozen, while boys' and hunters' axes are $1.50 per dozen higher.

RISE IN STEEL PRICES NOT YET ANNOUNCED

Montreal.

Higher prices on the local market for bar iron and steel products are still awaited, but the feeling among local distributors that higher prices will be reached in the near future becomes stronger, and $3.25 is given as the anticipated new price level. Discussing this change in an upward direction with one large jobbing house it was pointed out that other domestic markets were still climbing upward, and the situation at production centres has yet failed to show any great improvement with prospects of curtailed operations until the end of the year. There was little doubt but what an announcement would be made in the near future, and it was suggested that one of the reasons why higher prices were not in effect before this date was because of the apparent lack of confidence on the part of buyers notwithstanding the present position of the market. With the firmer tendency evident for some weeks past, distributors have been willing to dispose of stocks, offering price concessions for larger inquiries. Although the price of $3.15 base has been fairly steady there have at the same time been instances where a price as low as $3.00 was quoted in the hope of securing business. There is now a slight improvement in demand and it was thought that a more active trade during the following months would greatly assist any price-shading.

Following are prevailing price levels:

IRON AND STEEL—	
Common bar iron, 100 lbs.	3 15
Refined iron	4 65
Irish finish machinery steel	3 20
Mild steel	3 15
Single reeled machinery steel	5 25
Band steel	3 50
Spring steel	4 75
Sleighshoe steel	3 15
Tire steel	3 35
Harrow tooth steel	3 30
Toe caulk steel	4 05
Mining tool steel, per lb.	0 20½
Black Diamond tool and cast steel, per lb.	0 20½

NOTE.—Refined iron is approximately $1.50 per 100 pounds over base, but fluctuates owing to unsettled market.

Band steel in scroll bundles, 50c per 100 lbs. extra.

PRIMARY COTTON MARKETS AGAIN RECORD ADVANCES

Montreal.

The undertone of the cotton waste market is further strengthened by the firmer tendency in raw cotton circles, the markets in primary circles showing another advance in prices. Although this tendency may reflect on certain finished products, domestic manufacturers of cotton wastes anticipate a steady market and look for little or no change in prices for the balance of the year. Trade continues in seasonal proportions at following prices:

COTTON WASTE—	Per lb.
Cream polishing	0 18
White, XXX extra	0 16
White XX grand	0 15
White XLCR	0 14
X Empire	0 13
X Press	0 11½
Colored—	
Fancy	0 13½
Lion	0 12
Popular	0 09
Keen	0 07½
Wool Packing—	
Arrow	0 24
Axle	0 20
Anvil	0 16
Dominion Wipers—	
White cotton	0 20
Colored cotton	0 14

NEW HIGHER PRICES ON BENCH AXES

Montreal.

Through a revision in discounts bench axes have new higher net prices. These are now quoted less 50—10—5 per cent., and net quotations are as follows: No. 2, $17.50; No. 3, $19.20; No. 3, $20.95 per dozen.

ANOTHER NOMINAL CHANGE IN BOILER TUBE PRICES

Montreal.

A further nominal change is made in quotations on boiler tubes in certain sizes, the smaller seamless being reduced approximately $1.00 per hundred feet. The movement of boiler tubes is reported as only fair at present, this having its effect towards maintaining lower price levels which are said to be not in accordance with replacement costs, and not in sympathy with the general trend to higher prices in the steel industry. The market also has been very unsteady, a slight revision in an upward direction only being made within

the past two weeks on local markets. The undertone however, is firmer, the recent upward movement noted in Southern primary markets denoting the stronger tendency. Following are average quotations locally:

BOILER TUBES—	Seamless	Lapweld
1 inch	18 00	....
1¼ inch	20 00	....
1½ inch	19 00	....
1¾ inch	22 00	....
2 inch	19 50	18 00
2¼ inch	22 50	20 00
2½ inch	25 00	21 00
3 inch	31 50	27 00
3½ inch	37 00	31 00
4 inch	46 75	39 50

ENGLISH MARKET SUPPLY GALVANIZED SHEETS

Montreal.

There is still a strong tendency in galvanized sheets due to recent developments in Southern producing centres, but it is now considered doubtful whether local distributors will follow the lead of these markets and further increase prices because of the importance of the English market as a source of supply. Although there is no great surplus, stocks are said to be in fair shape, and there is no indication that overseas markets will not still be in a position to supply locally from now until the close of navigation. It was thought some weeks ago that increased demand in later summer and fall months would tax available supplies to a considerable extent, but with continued shipments arriving there is every hope that ample cargoes will reach here before November. The English market is still reported in a steady to firm position, and following are average local quotations.

BLACK SHEETS—		
10 gauge, base	4 00	4 50
12 gauge	4 10	4 60
14 gauge	4 20	4 70
16 gauge	4 30	4 80
18—20 gauge	4 55	5 05
22—24 gauge	4 60	5 20
26 gauge	4 65	5 25
28 gauge	4 75	5 35
GALVANIZED SHEETS—		
Queens Head—		
28 gauge	7 25	7 50
26 gauge	7 00	7 25
24 gauge	6 40	6 65
22 gauge	6 05	6 30
18—20 gauge	5 35	5 60
Other Brands—		
10¾ oz.	7 00	7 25
28 U. S. gauge	6 60	6 85
26 U. S. gauge	6 30	6 55
24 gauge	6 15	6 40
22 gauge	6 15	6 40
18—20 gauge	6 00	6 25
16 gauge	5 85	6 10

These prices are for full bundles, an extra charge of from 25c. to 35c. is made for broken lots. Extra for sheets 3 ft. wide, 28 gauge and 10¾ oz., 20 cts. per 100 lbs. Further extra for sheets 4 ft. wide, according to gauge.

TIN PLATE—Coke	
20 x 28 x 100 lb. basis	12 50
20 x 28 IC. 112s	13 00
20 x 28 IX. 112s	15 00

Galvanized, 60s	7 75

FURTHER REDUCTIONS IN MIRROR QUOTATIONS

Montreal.

A reduction of from five to ten per cent. is made in quotations on the various sizes of mirrors.

ADVANCED PRICES ON CAST AND MALLEABLE FITTINGS

Montreal.

Following the revision in an upward direction on wrought nipples and couplings last week is the announcement of higher prices on cast and malleable fittings this week. Increased costs have resulted in a revision in selling prices to the extent of from 3 to 5 per cent. on the various lines. Cast iron fittings are now quoted at less 27 per cent., former quotations being less 30 per cent. Malleable fittings are now 70 per cent. off list, effective from June 1 last, former discount being 70 and 5 per cent. Following are the new discounts:

PIPE FITTINGS—	
Cast iron fittings	27%
Plugs, cast iron	27%
Do., solid	27%
Do., countersink	27%
Bushings, small	30%
Bushings, cast	30%
Unions, ¼ in. to 2 in.	45%
Unions, ⅛ in., 2½ to 4 in.	45%
Flanged unions	27%
Dart Unions, blk., ¼ to 2 in.	331-3%
Do., ⅛ in., 2½ in. and larger	**23%**
Do., galv., add to black	30%
Niples, black and galvd. ⅛ to 4 in., close and short	55%
Do., 4½ in. and larger	45%
Do., long, ; in. to 4 in.	60%
Do., 4½ inch and larger	50%
Do., runing thread	35%
Couplings, 4 in. and under	25%
Do., 4½ in. and larger	5%

MALLEABLE FITTINGS—

Price list effective June 1st, 1922. Discount 70 per cent.

NEW DISCOUNTS ON FILES BRING HIGHER PRICES

Montreal.

New higher quotations are announced by Canadian file manufacturers. New selling prices are not yet available, but it is understood that revised discounts will show an advance of approximately 5 per cent, and same will be issued within the next few days.

QUIETNESS PREVAILS ON INGOT METAL MARKETS

Montreal.

Although minor fluctuations on some metals are reported from outside markets, there is little or no change on domestic markets and a quiet condition prevails. Quotations are unchanged and there is no special feature in any line.

TIN.—After making some recovery from its former low level tin is showing minor fluctuations, but with little change in the market situation. Business is of a hand to mouth nature, buyers showing little interest at recently reduced levels. Local quotation remains at 36 cents.

COPPER.—Demand for this metal continues fair with export business as good as can be expected considering the unsettled conditions in Europe. Electro is quoted at 17¾ cts., casting at 17½ cts.

LEAD.—This market is a little firmer especially in the United States. Prices, however, are not expected to go much higher when it is considered that plentiful supplies are available and demand is only of moderate proportions. Local price remains at 7 cents.

SPELTER.—Although spelter remains the steadiest metal on the list, the market has relapsed into dullness and is reported in a quieter condition than it has been for some time. Local demand continues fair with market quoted at 8½ cents.

ANTIMONY.—In sympathy with the metal markets generally, this metal continues quiet with prices unchanged. Chinese is priced at 6½ cents, high grade English at 7½ cents.

ALUMINUM.—Aluminum continues dull on both domestic and outside markets. Quotation is nominally unchanged at 24 cents.

Toronto, Ont.

TORONTO, September 7.—A lengthy budget of price revisions, involving both advances and declines, appears on the current hardware markets. These numerous price increases reflect the general inflation in basic products, and include cast and malleable fittings, galvanized sheets, black and blue-annealed sheets, single and double bit chopping axes, boys' and hunters' axes, Canadian makes of files, plain wire, single loop bale ties, and boiler tubes, both lapweld and seamless. In addition to these items, an increase is pending in quotations on eavestrough and conductor pipe.

Prominent among this week's price reductions are the new list prices on various makes of clothes wringers. Other current declines cover tarred felt, alarm clocks, asphalt felt, and aluminum ware kitchen utensils. Revised quotations are also noted on joiner clamps. The impression is evident that pig iron scarcity may boost scrap prices, but present trade in waste materials is quiet. Lack of aggressive trading is noted in the ingot metal markets, while some variation is still evident in local bar iron prices.

SUBSTANTIAL INCREASE IN AXE QUOTATIONS

Toronto.

A substantial advance has been made in prices on axes. Chopping axes, both single and double bit, have been increased to the extent of $2.50 per dozen. Boys' and hunters' axes are higher by $1.50 per doz. The discount on bench axes has been revised in proportion. The new prices are contained on the current market quotation pages.

NEW LOWER QUOTATIONS ON ALARM CLOCKS

Toronto.

Certain makes of alarm clocks have been reduced in price, the Big Ben and other popular makes being correspondingly lowered. The Big Ben and Baby Ben alarm clocks are quoted at $3.03 each in dozen lots and $3.12 in less quantities.

SOME EASIER PRICES ON ALUMINUM WARE

Toronto.

Manufacturers of aluminum ware are quoting lower prices of varying extent, on different articles. Quotations on one special make have been lowered all through the list.

BALE TIE PRICES FIFTEEN CENTS HIGHER

Toronto.

Single loop bale ties have also been increased to the extent of fifteen cents per 100 lbs. Following are revised quotations on these products, with the usual extras for length:

BALE TIES—

No. 12—$4.65 per 100 lbs. No. 13—$4.75. No. 13½—$4.80. No. 14—$4.85. No. 15—$5.15. No. 16—$5.35.

FILES ALSO REGISTER ADVANCE IN PRICE

Montreal.

Through a revision in discounts the Nicholson make of files have been advanced in price. The revised quotation is list less 30 per cent, compared with the former discount of 40 per cent. Prices on other lines are increased in proportion, and the revised levels, recording advances of between 5 and 10 per cent. will be available within a few days.

FIFTEEN CENT ADVANCE IN PLAIN WIRE PRICE

Toronto.

An advance of fifteen cents per 100 lbs. is recorded on plain wire, this development bringing the base quotation to $3.80 per cwt. Wire, including bright, annealed, tinned and coppered, is quoted at the new level, effective from September 2, plus the usual extras. The f. o. b. points are Toronto, Hamilton, Montreal, London, Collingwood, Owen Sound and St. John.

NEW NET PRICES ON MALLEABLE FITTINGS

Toronto.

In some cases jobbers are quoting new prices on malleable pipe fittings, instead of the list and discounts. The current revisions, therefore, bring the following prices into effect:

MALLEABLE FITTINGS— Per lb.	Blk.	Glvd.
Class B	0 23	0 32
Class C	016	0 23

REVISED PRICES NOTED ON ASPHALT FELT

Toronto.

New prices are now in effect on asphalt felt. The revised quotation is $3.75 per 100 lbs. on asphalt felt in 10 and 15 lbs.

REVISED QUOTATIONS ON WELL WHEELS

Toronto.

New prices on well wheels are announced by the Canada Foundries and Forgings Ltd. These goods are now quoted at the following levels:

WELL WHEELS— No. 2	Per doz.
8 inch	$ 9 25
12 inch	14 50
10 inch	11 75
14 inch	19 00

UPWARD REVISION IN PIPE FITTING PRICES

Toronto.

Advances varying in extent from five to twenty-five per cent. have been made on pipe fittings, both cast and malleable. Following the change to higher price levels on wrought nipples and couplings two weeks ago, a similar upward change is noted on cast iron fittings, plugs, bushings and unions. The discount on the malleable fittings list, which was adopted last June, is also changed. there no longer being a uniform discount for the three classes. Effective September 1, Class A is quoted at less sixty per cent., and classes B and C at less 70 per cent. Following are the revised quotations which are in line with the general inflation in manufactured iron and steel products, this movement being attributed to higher production costs through increased prices on basic elements. This development was also outlined in a market report appearing in a recent issue of Hardware and Metal.

PIPE FITTINGS—	
Cast iron fittings	27%
Plugs, cast iron	27%
Do., solid	27%
Do., countersink	27%
Bushings, mail	30%
Bushings. cast	30%
Unions, ¼ in. to 2 in.	45%
Unions. ⅛ in., 2½ to 4 in.	45%
Flanged unions	27%
Flanged fittings	30%
Dart Unions, blk., ¼ to 2 in.	34%
Do., ⅛ in., 2½ in. and larger	23%
Do., galv., add to black	30%
Nipples, blk. and galvd. ⅛ to 4 in., close and short	55%
Do., 4½ in. and larger	45%
Do., long, ⅛ in. to 4 in.	60%
Do., 4½ inch and larger	50%
Do., runing thread	35%
Couplings. 4 in. and under	25%
Do., 4½ in. and larger	5%

MALLEABLE FITTINGS—

New piece list, adopted June 1, 1922.
Discounts: Class A, less 60 per cent.
Discounts: Class B, less 70 per cent.
Discounts: Class C, less 70 per cent.

NEW PRICES ANNOUNCED ON JOINER CLAMPS

Toronto.

The following revised quotations are announced by the manufacturers on joiner clamps:

JOINERS CLAMP—	Each
3½ ft.	$ 1 60
4 ft.	1 70
4½ ft.	1 75
6 ft.	2 00

UPWARD REVISION IN BOILER TUBE PRICES

Toronto.

Revised quotations on boiler tubes are now in effect from September 1, the entire list, both seamless and lapweld, being on a higher level. The current advances are attributed to recent increases in production costs, such as the higher prices on coal and foundry iron, the advance in wages at steel mills, and the difficulty in securing transportation from production centres. For some time past, distributors assert that seamless boiler tubes have been selling below nominal values, and with a recovery in these markets now considered imminent, the new quotations govern the situation. Following are revised prices:

BOILER TUBES— Size	Seamless.	Lapweld
¾ inch	$19 00	$.....
1 inch	20 00	.....
1¼ inch	22 00	.....
1½ inch	24 00	.....
1¾ inch	24 00	23 00
2 inch	22 00	19 00
2¼ inch	26 00	.....
2½ inch	26 00	22 00
3 inch	32 00	26 00
3¼ inch	36 00	33 00
3½ inch	38 00	32 00
4 inch	55 00	38 00

RANGE STILL EVIDENT IN BAR IRON PRICE

Toronto.

Bar iron quotations in certain departments continue to show slight differences in range. This is regarded as an indication that some warehouses have far larger stocks available than generally supposed. Difficulties of supply are manifesting themselves more widely, and conditions that made for scarcity in sheets, are now manifesting themselves in other sections. Pig iron, naturally the basic factor serves to illustrate more strikingly the problems of the situation. Domestic producers are not in a position to deal with the situation and quotations are largely nominal.

The local base price continues to hover around the $3.25 mark, with quotations both a few cents above and below this level having been recorded.

IRON AND STEEL—		
Mild steel bars, base		3 25
Mild steel bands 3-16 in. base		3 75
Bar iron, base		3 25
Angle iron. base		3 35
Horse shoe iron		3 85
Tire steel		3 45
Spring steel	7 00	8 00
Sleigh shoe steel		3 25
Cold drawn steel		4 50
Hoop steel	4 25	4 50
Norway iron		12 50
Toe cauk iron		4 10
Crucible cast sheet steel		28 00
Mining drill steel		18 50
Cast tool steel, high grade		30 00
Cast tool steel, medium		18 00

GRINDSTONE FIXTURES ON NEW PRICE LEVELS

Toronto.

New prices recently put into effect by the Canada Foundries and Forgings Ltd. on their line of grindstone fixtures, are as follows:

GRINDSTONE FIXTURES—	Per doz.
No. 22	$ 7 80
No. 33	8 10
No. 2½	9 70
No. 3	10 20

MARKED PRICE ADVANCES ON SHEET PRODUCTS

Toronto.

Another advance is now in effect on galvanized sheets, also black and blue annealed sheets. The increases are of varying extent, being a forty-cent advance on galvanized, a fifty-cent climb in black sheet prices, while blue-annealed are higher by twenty-five cents per cwt. These developments represent the tone of the market which has been gaining momentum each succeeding

week. The changes on the domestic market were preceded by the announcement of higher price levels in southern primary centres, and are attributed to the rising cost of production. It is pointed out that fuel, and labor costs have advanced, while the American railroad situation is not improving to any great extent. The settlement of the coal strikes has no immediate effect on the steel industry, as some time must necessarily elapse before the volume of output can be expected to reach full capacity and keep pace with the current demand. Following are the revised quotations:

BLUE ANNEALED SHEETS—

10 gauge, base	$ 4 25
12 gauge	4 30
14 gauge	4 35
16 gauge	4 40

BLACK SHEETS—

18-20 gauge	5 30
22-24 gauge	5 35
26 gauge	5 40
28 gauge	5 50

A charge of 25c. per 100 lbs. is made for less than case lots. An extra 10c. per 100 lbs. is also charged on sheets 26 in. wide.

GALVANIZED—	Queen's Hd.
28 gauge	7 75
26 gauge	7 50
24 gauge	6 90
22 gauge	6 55
18 and 20 gauge	6 05

	Premier	and Apollo
10¾ oz.	7 15	7 65
U. S. 28 base	6 75	7 25
U. S. 26 base	6 45	6 95
22 and 24	6 30	6 80
18 and 20	6 15	6 65
16	6 00	6 50
12 and 14	5 85	6 35

An extra 40c. per 100 lbs. is charged for Keytone and Premier bands copper-bearing sheets.

An extra is now charged on galvanized sheets, 0¾ oz. and 28 ga., when shipped out in sheets feet wide. The extra charged over prices shown n 20c. per 100 pounds.

NCREASE PENDING IN EAVESTROUGH PRICES

oronto.

An increase in prices of eavestrough, onductor pipe and conductor elbows to he extent of approximately ten per ent. is predicted in many quarters. his development is considered imminnt, and it is stated than an announceient is being contemplated which may esult in higher quotations on these roducts in the near future. The reaon for such a change is attributed to ie higher prices of raw materials such s flat galvanized sheets, the recent rength in this direction having been pparent throughout the galvanized arket. Following are the present unianged list and discounts:

ROUGH (Eave)

G. Square Bead—

Per 100 ft.		Per. 100 ft.	
inch	$15 90	15 inch	$28 80

NEW PRICES IN EFFECT ON SCREW PULLEYS

Toronto.

Revised quotations on screw pulleys are announced by the manufacturers, the following price levels now being in effect on these products:

SCREW PULLEYS— Per doz.

No. 45: 1 in. $0.60; 1¼ $0.62; 1½ $0.70; 1¾ in. $0.80; 2 in. $1.05; 2¼ in. $1.60; 2½ in. $2.00; 3 in. $2.40.

No. 46, guarded: 1½ in. $1.00; 1¾ in. $1.20.

No. 43, encased: 2 in. $1.80; 2½ in. $2.40; 3 in. $3.10.

Packed 1 dozen to a box, 5c dozen extra.

EASIER TENDENCY NOTED IN PRIMARY OIL MARKETS

Toronto.

Gasoline and coal oil prices are unchanged at the revisions of a few weeks ago. There is however an easier tone reported in primary centres, further price recessions being announced on crude oil, with lower quotations also appearing on gasoline and other products in the south. September usually brings a heavy consumption of gasoline, and in months following coal oil is used more extensively. Whether this will offset the softer tone and assist in maintaining a steady market is considered problematic by local refiners, but the opinion is expressed in certain quarters that with a continued easier tendency in the undertone of these products a further recession in prices on domestic markets would not be surprising.

LOWER LIST PRICES ON CLOTHES WRINGERS

Manufacturers of clothes wringers have revised list prices, effective from September 1, and net prices show a reduction on the various lines, averaging from 2 to 13 per cent. Discount remains as formerly at 30 per cent. off. Following are new list prices on some of the well-known makes:

CLOTHES WRINGERS	Per doz.
Warranty	100 00
Bicycle, 11 in.	95 00
Eze	94 00
Rapid	86 00
Eureka	63 00
Blue Belle	100 00
Do., Folding B	160 00
Rival	95 00
Model	85 00
Imperial	94 00
Domestic	100 00
Do., Bench	160 00
Favorite No. 511E	95 00
Royal Canadian	88 00
Ottawa, No. 23VE	95 00

Discount 30 per cent.

TARRED FELT PRICES ARE AGAIN LOWERED

Toronto.

Quotations on tarred roofing felt have again been reduced twenty-five cents per 100 lbs. The new price is $3.20 per cwt. for 7, 10 and 16 oz. tarred felt.

RAW MATERIAL COSTS SUSTAIN BOILER PRICES

Toronto.

The improvement recently noted in the movement of range boilers is reported as now reaching a spotty condition. In certain sections dealers note a steady movement, while others attribute activity to the requirements of the large number of new buildings, especially dwelling houses. With construction work not quite so extensive during the fall months as has been the case during recent weeks, others record that the call for range boilers has somewhat subsided. The raw material markets, however, continue strong, and the higher prices now in effect on flat galvanized sheets, have reflected a firmer tone in production circles. The upward climb in raw material costs has served to maintain current prices on the finished goods. No change has been announced from the following list and discounts:

RANGE BOILERS—

Size	List Price
5 gallon	$ 13 50
12 gallon	14 00
18 gallon	15 00
25 gallon	16 50
30 gallon	17 50
35 gallon	20 50
40 gallon	22 75
52 gallon	38 00
66 gallon	60 75
82 gallon	74 00
100 gallon	103 00
120 gallon	117 00
144 gallon	164 00
168 gallon	187 00
192 gallon	210 00

Discounts:—Standard weights, 50 per cent.; Extra heavy, 40 per cent.

STOVE AND FURNACE PRICES STILL FIRM

Toronto.

Manufacturers of stoves and ranges, in outlining the market situation, state that although the tendency is upward there is no present indication of a revision in prices. Production costs have undoubtedly increased, but in view of the fact that fall trade will shortly commence, advanced quotations will be withheld until it is found that they are absolutely necessary. Apart from the rising costs of raw materials there is now the question of coal shortage and the rail strike which must not be overlooked. These have reached more serious proportions in the United States, and while not yet keenly felt on domestic markets, the situation is certainly well worth watching.

Bookings for fall requirements have been comparatively small and reports from merchants throughout the country show that a considerable quantity of stoves have been carried over from last year. However this does not indicate that fall business will not reach favorable proportions, in fact manufacturers anticipate an active season on both lines.

PIG IRON SCARCITY MAY BOOST SCRAP

Toronto.

Scrap metal markets as yet show little activity but continuation of the coal scarcity and rail strike would certainly have the effect of boosting the price of cast iron. This at the present time is exceedingly scarce. Very little buying is being done in any department at the present time, however, and the fol-

lowing dealers' local average buying prices for fairly large quantities, show practically no change:

SCRAP MATERIALS—		
Scrap Iron		
Heavy melting steel (Hamilton)	13 00	13 50
Borings and turnings	6 00	7 00
Rerolling rails	12 00	13 00
Scrap pipe	5 00	6 00
No. 1 railroad wrought	10 25	11 25
Steel turnings (Hamilton)	9 75	10 25

Auto tires	0 25	0 50
Solid tires	6 60	1 00

LACK OF AGGRESSIVE TRADING IN METALS

Toronto.

There has been a noticeable holiday feeling in the ingot metal markets, but price developments are restricted, especially on domestic centres, due to the lack of aggressive activity at this season. Copper is generally firm, with the tin market almost reaching a dull atmosphere, owing to the increase in the visible supply. Lead, however, continues firm, and spelter is considered to be in a strong position.

COPPER.—Very light buying is generally recorded in copper, the market activity suffering to some extent during the holiday period. A firm tone prevails in primary centres, with prices unchanged on domestic markets. This metal has gained in strength in London, due to the extension of grace allowed Germany. The local price remains at 17½ cents.

TIN.—After a reaction last week, the tin market is slightly steadier again, with a better feeling having developed on account of the six months respite on reparations, which has served to improve the British tin market. An increase in the visible supply, however, hampers recovery. The local quotation is now around 35½ cents.

LEAD.—The lead market remains steady with orders from consumers during the past few days having been in fair amounts considering current conditions. Increased activity is looked for in primary centres during the ensuing weeks, while prices are firm. The domestic quotation remains unchanged at the $7.50 mark.

SPELTER.—This market also continues in a firm position, with a good demand reported for prompt shipment. This activity in southern primary centres is chiefly on account of strike restrictions in American freight schedules, consumers being fearful of delay in securing further supplies. The general market tone is therefore firmer. Local prices continue at the recent new level of $8.25.

London, Ont.

LONDON, September 4.—Business here continues seasonably good and is steadily increasing as various fall lines start to move. Electric and oil heaters, and also stoves and stove accessories, are beginning to record activity.

Among the price changes this week are higher prices on axes and fence wire, and lower quotations on linseed oil, shellac and alarm clocks.

CAST AND MALLEABLE PIPE FITTINGS REDUCED

London, Ont.

New prices in effect on pipe fittings about 5 per cent. higher.

Malleable Fittings—Class A, each, list less 60 per cent.; classes B. and C, list less 70 per cent.

Malleable Unions—List less 45 per cent.

Cast Iron Bushings—List less 30 per cent.

Cast Iron Plugs—List less 27 per cent.

All Iron Stop Cocks—List less 30 per cent.

LOWER PRICES NOTED ON ALARM CLOCKS

London, Ont.

Several lines of alarm clocks are now quoted at lower prices. Big and Baby Bens, plain dial now retail at $4.50 each.

Following are revised quotations:

ALARM CLOCKS—	2 Doz. Lots Each	1 Doz. Lots Each	Smaller Lots Each
Big Ben Plain Dial	2 94	3 03	3 12
Baby Ben Plain Dial	2 94	3 03	3 12
Big Ben Luminous Dial	3 84	3 96	4 09
Baby Ben Luminous Dial	3 84	3 96	4 09
	4 Dozen Lots		
Jack-O-Lantern	2 60	2 67	2 75

LOWER QUOTATIONS ON PUTTY

London, Ont.

Reduction in putty prices is made, the present costs being under consideration in view of a brisk movement anticipated during the ensuing weeks.

PUTTY—	Per 100 lbs.
Standard, 100 lb. drums	4 80
Do., 25 lb. drums	5 05
Pure, 100 lb. drums	6 05
Do., 25 lb. drums	6 30

BAR IRON BASE NOW AT $3.15 LEVEL

London, Ont.

The upward tendency recently apparent in the steel industry is now reflected in the current local quotation on bar iron, the higher level of $3.15 per 100 lbs. now being in effect.

SHELLAC QUOTATIONS ON SLIGHTLY LOWER LEVELS

London, Ont.

Shellac prices have now been adjusted to slightly lower levels on nearly all size jugs and bottles. Following are current revisions:

SHELLAC—	Orange Gallon	White Gallon
1 gal. jugs	5 25	5 35
½ gal. jugs	5 45	5 55
Quart bottles	5 65	5 75
	Dozen	Dozen
Pint bottles	8 75	9 25
½ pint bottles	4 50	4 75
¼ pint bottles	2 65	2 85
¼ pint bottles	1 50	1 60

BRISK CURRENT SALE NOTED ON TURPENTINE

London, Ont.

Demand for turpentine is keeping up remarkably well, with buyers displaying a keen interest in the present market. Following are local unchanged price levels:

TURPENTINE—	Imp. Gal.
1 bbl. lots	1 80
2 to 4 bbl. lots	1 79
5 gal. lots	1 95
	Gal.
	1 85
	1 84
	2 00

DECLINE IN LINSEED OIL

London, Ont.

With the new crop of flax seed now coming on the market, linseed oil quotations have registered a gradual decline during the past few days. Following are current prices:

1 to 2 bbs., per gal.	1 10	1 13
3 to 5 bbls., per gal.	1 09	1 12
6 to 9 bbls., per gal.	1 07	1 10

Les barrels, add 15 cents gal.

OILED AND ANNEALED WIRE PRICES HIGHER

London, Ont.

Prices on oiled and annealed wire have been advanced fifteen cents per 100 lbs. Cut hay baling wire is also increased to a similar extent. Following are revised quotations:

OILED AND ANNEALED WIRE—
No. 11—$4.02 per 100 lbs. No. 12—$4.10 per 100 lbs.

ANNEALED HAY BALING WIRE—
No. 14. in coils, $4.15 per 100 lbs.

STIFF ADVANCE IN EFFECT ON AXES

London, Ont.

A marked price advance is now in effect on axes, the revised quotations containing an increase of $2.50 per dozen on chopping axes, a rise of $1.50 per dozen on boys' axes, and a similar upward movement on Hunters' axes.

IMPROVEMENT NOTED IN WINDOW GLASS SALES

London, Ont.

A good increasing sale is reported for window glass. Current local quotations on the domestic product follow, with imported glass at the revised levels recently announced:

WINDOW GLASS—	Domestic Small Lots	25 Case Lots
Single Diamond	10% off list	15% off list
Double Diamond	10% off list	15% off list

Cut lights, 75 per cent off light list.

GLASS OVENWARE IN SEASONAL MOVEMENT

London, Ont.

Fall sale of Pyrex glass ovenware has started and merchants are stocking up to meet the demand. The current quotation is unchanged at, list less 33-1/3 per cent.

Winnipeg, Man.

WINNIPEG, September 7.—Reports received from merchants in the country districts are of an encouraging nature as they all indicate an improvmeent generally throughout the trade, and when the crops are harvested they look for a revival of business; in fact it is beginning to show effects already. Merchants are buying more freely but in small quantities. Galvanized sheets are in good demand and the market has shown an advance. Black sheets as well as Canada plate have also stiffened up. With a number of small buildings as well as a few larger ones the demand for builders' hardware continues active.

FURTHER ADVANCE IN GALVANIZED IRON

Winnipeg.

Galvanized iron continues on an upward trend and quotations are advanced. One of the chief reasons being the increased cost of production. New quotations are as follows:

IRON, GALVANIZED—	
Premier: Apollo and "Fleur de Lis"	
10¾ oz. or 28 Eng.	8 25
28 Am. or 26 Eng.	7 85
26 Am.	7 55
24	7 40
22	7 40
18 and 20	7 25
16	7 10

HIGHER PRICES ON SHEETS AND CANADA PLATE

Winnipeg.

Black steel sheets and Canada plate have advanced. Ten-inch gauge has shown an increase of 10 cents bringing quotations to $5.45 and other sizes advancing accordingly. Canada blued plates have advanced 25 cents per box and quotations are $6.75. Revised price list reads as follows:

STEEL SHEETS, BLACK—	
10 gauge	5 45
12 gauge	5 50
14 gauge	5 65
16 gauge	5 70
18-20 gauge	6 30
22-24 gauge	6 35
26 gauge	6 40
28 gauge	6 50

PLATES, CANADA—

18 x 21, per box, blued, $6.75; 18 x 24, blued, $6.75; 20 x 28, blued, $6.75.

BINDER TWINE STILL IN HEAVY DEMAND

Winnipeg.

Binder twine is in good demand and orders received have passed all expectations owing to the heavy yield of crops in the Western provinces this year.

AN ADVANCE RECORDED IN BAR IRON PRICE

Winnipeg.

Bar iron is moving fairly well. The market tone is strong and new higher levels are recorded locally. These revised quotations are contained in the current market price pages.

GOOD SEASONAL TRADE FOR PIPE FITTINGS

Winnipeg.

There is a good local trade for soil pipe and fittings at the present season. The undertone of the market is firm in sympathy with the upward trend in the iron and steel market.

NO CHANGE IN TURPENTINE QUOTATIONS

Winnipeg.

A seasonable demand is noted for turpentine with quotations ruling firm at the present levels of $1.85 per gallon.

FIRM TONE IN CORRUGATED SHEETS

Winnipeg.

Prevailing conditions in the galvanized sheet market where the tendency is strong contribute a firm undertone in corrugated sheets. The movement continues fair at this season of the year and prices show no change.

FIRM SITUATION IN WROUGHT PIPE

Winnipeg.

The undertone of this market is strong due to the production difficulties through the coal and rail strike situation. At present there is a fair demand for this line.

WROUGHT PIPE—	Black	Galv'z'd
⅛"	6 84	9 24
¼"	4 68	7 12
⅜"	4 82	7 26
½"	6 15	8 00
¾"	7 48	9 55
1"	10 45	13 72
1¼"	14 15	18 56
1½"	16 90	22 26
2"	22 72	28 87
2½"	36 00	47 22
3"	47 00	67 77
3½"	61 10	78 28
4"	72 36	93 28
4½"	84 27	107 15
5"	98 28	124 92
6"	127 47	162 06

LOWER PRICES NOTED ON LINSEED OIL

Winnipeg.

Linseed oil has shown another decline and quotations are $1.10 for raw and $1.13 for boiled per gallon. The demand continues good and an improvement is looked for just as soon as harvesting is concluded.

Hamilton, Ont.

Early Fall Activity Now Evident In Hardware Wholesale Circles

HAMILTON, Sept. 7.—A general review of the hardware jobbing trade shows quite a marked activity over recent weeks, especially in crop requirements. Orders are very plentiful but the quantities remain small and the general volume still short of the years of freer buying and higher prices. Jobbers generally are encouraging the retailer in careful buying and in careful credits and look for the returns from this crop to be used for purposes of liquidation rather than expansion. Collections are described as in fair shape considering.

Ready-mixed paints, varnishes and paint products generally are still enjoying a moderately good sale, and one manufacturer described the current movement as mighty good for this time of the year. While this activity was not being looked upon as the commencement of the fall trade, yet the call for paints, varnishes and enamels has kept up exceptionally well throughout the present period. Mid-summer is usually the quiet session, but the spring movement lasted longer than in previous seasons, while many distributors expect that the fall trade will become manifest a little earlier than usual owing to the ideal weather conditions for painting which usually exist at that period.

Building activity is continuing throughout most parts of the country and dealers are featuring substitute lines in case of fuel shortage, such as oil stoves, wood cutting equipment, etc. Special steps are being taken by many merchants to stimulate business.

Though marked progress has now been made in settling the coal strikes, fuel shortage and the threatened difficulty of moving coal even when it is available has given further strength to the already firm market for iron and steel and advances are being recorded on iron and steel products throughout.

A firm attitude is still evident in steel with a strong tendency on bar products, galvanized sheets, and other lines appertaining to the industry. Higher prices are recorded on many of these commodities on American markets. Metals on primary markets now display an irregular tone although quotations show little change. Trade in jobbing circles is commencing to reflect the usual Fall season, an improvement being noted, especially in lines for earlier dealer trade.

Business continues to ebb and flow in the ingot metals, with prices on primary markets registering minor fluctuations. These changes, however, are not considered of sufficient extent to affect domestic quotations, which are unchanged all through the list. The mid-summer customary conditions are now apparent in the non-ferrous group, and quiet trading is the general rule.

Calgary, Alta.

Ammunition and Hunting Accessories Form Seasonal Window Displays

CALGARY, Alta.—Guns, ammunition, shooting outfits and other needs incidental to the opening of the duck season, have occupied first place in window displays and advertising over the last week. Retailers report the sales of guns rather under the average, with ammunition and other shooting sundries moving in quite satisfactory volume. Some splendid windows were noticed, well calculated to appeal to the man with inclinations towards the freedom of camping life. Early reports seem to show that it has been hard to find a body of water within twenty-five miles of the city without too many shooters around it.

The threshing season has brought its usual crop of requirements and business in small size pipe fittings, valves and engine trimmings is reported as quite active. Orders are of the sorting nature but quite numerous and promise to continue fairly active throughout the season. A few cars of grain have been received by the elevators but this movement will not be general for another week at least.

Sheet Metal Business

Enquiries among the sheet metal manufacturers show a surprising volume of business over the last few months. One manufacturer described the season as the most satisfactory they had ever experienced. The general inclination of the past two years to postpone needed alterations and additions has made a lot of this work a present necessity, and the activity noted in this business seems due to continue throughout the winter. Further advances in flat sheets put in effect this week will in all probability be reflected in higher levels in corrugated sheets, eavestrough and kindred lines. With the approach of fall weather there is more of an inclination to close on pending furnace jobs and this line is reported active to a quite satisfactory degree, with more than usual enquiries from rural points.

Reports from the coal fields indicate that the mines are absorbing returning miners at a good rate; shipments are already going forward; and a busy fall and winter in this trade is assured. The miners returned to work at a 15 per cent. reduction under last winter's schedule, pending certain adjustments to be made in the American fields. The latest report is that this adjustment has been effected and Alberta mines will return to the schedule in effect last winter. If this report proves correct the general expectation of cheaper coal will not be realized at least, not to the extent that will satisfy the hope of the public. Jobbers report a noticeable activity from the coal fields both in general merchandise and mine supplies.

Price Developments

The most noticeable price changes this week place some of the heavier commodities on a higher level, and seem to confirm the opinions formed by those making a study of eastern industrial conditions.

Local quotations show the market change on wrought steel pipe, of two points advance on black and one point on galvanized, with demands fairly active on the smaller sizes for quantities to cover current needs. Current prices are as follows at Calgary, Edmonton and Lethbridge:—black pipe per 100 feet: ⅛, 7.09; ¼, 5.10; ⅜, 5.38; ½, 7.00; ¾, 8.61; 1, 12.13; 1¼, 16.43; 1½, 19.63; 2, 26.43; 2½, 41.81; 3, 54.69; 3½, 70.30; 4, 83.24; 4½, 96.91; 5, 113.09; 6, 146.65; 7 in., 211.36; 8 in., 222.12 Galvanized pipe per 100 feet; ⅛, 9.49; ¼, 7.54; ⅜, 7.82; ½, 8.85; ¾, 10.68; 1, 15.40; 1¼, 20.84; 1½, 24.93 2, 33.54; 2½, 53.03; 3, 69.38; 3½, 87.95; 4, 104.16; 4½, 119.79: 5, 139.73; 6, 181.21; 8, 305.00.

Such an advance is also reflected in higher levels on wrought nipples and couplings. Wrought nipples up to 4 in. are now less 45 per cent.; 4½ in. and over 32½ per cent. Wrought couplings up to 4 in. are less 10 per cent. and 4½ in. and over are plus 20 per cent. at Calgary, Edmonton and Lethbridge.

Brass Y blow off valves and fusible plugs both show substantial reductions over recent levels; new prices issued being as follows: Brass Y blow off vales, 1 in., 5.25; 1¼, 6.60; 1½, 8.60; 2, 12.20. Fusible plugs Alberta pattern ½in., 80; ¾, 1.00; 1, 1.30; 1¼, 2.75; Calgary, Edmonton and Lethbridge.

Flat sheet levels show a sharp advance of 35 cents per 100 lbs. on galvanized, and 25 cents on black, with stocks generally low and supplies slow in coming through. A fair activity for present needs is noted with no evidence of speculation. New prices Calgary, Edmonton and Lethbridge follow: galvanized sheets 10¾ oz., 9.25; 28 ga., 8.85; 26 ga., 8.55; 24 ga., 8.40; 22 ga., 8.40; 20 ga., 8.25; 18 ga., 8.25; 16 ga., 8.10.

Black sheets: 28 ga., 7.50; 26 ga., 7.40; 24 ga., 7.35; 22 ga., 7.35; 20 ga., 7.30; 18 ga., 7.30; 16 ga. 6.70; 14 ga., 6.65; 12 ga., 6.50; 10 ga., 6.45.

Canada plate is another commodity reflecting the stiffening effect of eastern industrial conditions. New quotation are 25 cents advance over recent levels and stand at 7.90 for 18 x 21 and 18 x 24 and 8.15 for 20 x 28 at Calgary, Edmonton and Lethbridge.

(Continued on page 50)

St. John, N.B.

Improved Tone in Maritime Hardware Business; Many Motor Tourists

ST. JOHN, N. B.—Activity in the harbor this week reached a level almost unknown before in the summer season, making it necessary for several vessels to anchor in the stream, until their berths were vacated. There has been another big increase in custom receipts for the month of August over the same month of 1921. The large increase this year is accounted for by the fact that sugar imports have been tremendous compared with other years. The energies of the St. John retail merchants are all directed towards making the Exhibition a success, and the local branch of their association has been very active in looking after the accommodation of visitors. Special parking places have been alloted for the use of automobile parties. The St. John Board of Trade is expecting many important men from all points of the Maritime Provinces at the Maritime Board of Trade meeting to be held in St. John during exhibition week. In looking over the list of guests, the representative of Hardware and Metal noticed the names of many prominent hardware merchants from Fredericton, St. Stephen, Moncton, Woodstock, Sackville, Chatham, Port Elgin, Caraquet, Halifax, Amherst, Kentville, Liverpool, Charlottetown, Summerside and Alberton.

Paint Trade Active

The paint business continues to be good in St. John, but the coal miners' strike in Nova Scotia caused the buyers at and near the coal mining centres to very much restrict their buying, and in some cases to cut it out altogether. This applied to all commodities, but now that the mines have resumed operations a feeling of optimism prevails, and it is believed that business in this part of the Maritimes will rapidly come back to ordinary routine. Aluminum ware is receiving a good deal of attention from the various hardware merchants, and so far as St. John is concerned the sales of this class of household hardware are very satisfactory. Many of the stores occasionally run special sales of aluminum goods with good results. One merchant stated that a special sale of a particular utensil always had the effect of speeding up sales of all aluminum

goods, and that very often the sale of the aluminum ware not advertised equalled the sale of the "special." Some time ago Emmerson & Fisher, Ltd., held a most successful sale of aluminum ware, and sold completely out of some articles very soon after the doors were opened to the public. W. H. Thorne & Co., Ltd., have held many successful sales, and during the day of the sale their kitchenware department was crowded all day long.

Senator Todd is quoted as stating that the factories in St. Stephen, Milltown and vicinity are all working full time, and that the merchants are doing a fair business. He also stated that there was very little unemployment in that part of New Brunswick. Premier Foster recently called a meeting of coal dealers in the province to consider the coal shortage. The dealers in St. John were caught with very low stocks of anthracite coal, but many of them are announcing that they have large cargoes of Welsh coal due at St. John within a few days, so there will be no coal shortage here.

Motorist traffic has been very heavy during the past few weeks, and a large number of visitors have called at the St. John office of the New Brunswick Automobile Association. One sees every day in the streets many American cars. To attract more of these tourists as well as several local needs, the provincial roads department is completing the missing links to provide continuous good roads from the borders, through the province, and over a hundred miles is being done this year under the Federal aid scheme. Hon. Mr. Veinot announces that he hopes next year to have a patrol system over 1,600 miles of main trunk roads to keep them in good condition, with a patrol crew for every ten miles, from May until the end of October.

Early Fall Activity

In St. John the first touch of Autumn weather always brings a big increase in the hardware business, owing to the fact that most property owners begin to realize that they cannot put off any longer the necessary repairs to their property before the winter is upon them.

Improved Tone in Maritime Hardware

Some revised prices in effect at the present time are as follows: Pig lead, $7.50. Sheet zinc, 10 cents in casks, smaller quantities 11 cents. Spelter, 15 cents. Ingot tin, 40 cents. Lead pipe, $12.50. Lead waste, $13.50. Cast steel, 20 cents. Tire steel, $3.50. Spring steel, $3.75. Machine steel, $4.75. Toe calk, $6.00. Sleigh shoe steel, $2.50. Bar iron, $3.30. Carriage bolts, ⅜ diameter and smaller, 6 inch and shorter, 40% off list, longer lengths 30% off. Lantern globes, short, $1.70; high, $1.70. Black sheets, 16 to 21 gauge, $5.05; 22 to 24 gauge, $5.15; 25 to 26 gauge, $5.20; 28 gauge, $5.35. Galvanized sheets, 16 to 21 gauge, $7.05; 22 to 24 gauge, $7.20; 25 to 26 gauge, $7.35; 28 gauge, $7.75. Churns, No. 0, $11.25; No. 1, $11.25; No. 2, $12.24; No. 3, $13.25; No. 4, $15.12. Screws, flat head, bright, 82½% off; flat head, brass, 77½% off; round head, bright, 80% off; round head, brass, 75% off; coach screws, 45% off. Steel thumb latches, No. 2, $2.20; No. 3, $2.80; No. 4, $4.25. Linseed oil, raw, $1.24 to $1.30; Boiled, $1.26 to $1.32. Horse nails, No. 3, $20.00; No. 4, $10.00; No. 5, $525; No. 6, $5.00; No. 7, $4.75; No. 8, $4.75; Nos. 9 to 12, $4.50. Putty in 25-lb. irons, $6.85; in 12½-lb. irons, $7.10.

Pittsburg, U.S.A.

Quotations on Pig Iron and Steel Still Continue Upward Swing

PITTSBURG, September 7.—The upward swing in pig iron and steel prices continues and with greater speed. There is the double influence of material being scarce and of sellers, as indicated in the report of a week ago, having concluded that there is no use trying to hold prices down, in the interest of stability, for the astonishing victory of the United Mine Workers and other labor matters, have forced inflation into the situation. The individual now feels that a reaction is inevitable some time, followed by a serious depression, and that meanwhile the only reasonable course is to secure as high prices as possible. As to when the break will come there is a wide range of predictions, from say two or three months up to a year.

Of particular interest in this connection is the appearance that the United States Steel Corporation is not making its usual effort to hold prices down. The corporation does not originate price advances, but shows little hesitancy in following advances, once made, by the independents. In 1920, and in the fore part of 1917, the corporation was very conspicuous in holding its prices at levels far below what was obtainable generally in the open market.

Coal and Coke Strikes.—Following the "Cleveland settlement" by which about 15 per cent. of the bituminous coal capacity formerly union signed the 1920-22 wage scale of the United Mine Workers for a period up to April 1, next, various individual operators or districts held out for a time, there being a drift towards signing. The Pittsburgh district held out the longest. On one day, after the Pittsburgh Coal Company had withdrawn, the Pittsburgh Coal Producers' Association decided to sign, and the next day the Pittsburgh Coal Company also signed, whereby the regular union bituminous coal strike was practically over, with a tremendous victory for the miners.

As to the strikes in the Connellsville region, which the trade has been calling "nonunion" since the region has been nonunion for over 30 years, but which the strikers considered union as they had suddenly joined the United Mine Workers by paying $1 or $2 each initiation fee, the posting notices, August 22 and 23, restoring the scale of September 1, 1920, the record high scale of the region, did not stop the strikes instantly.

The Brush Department

Cabinet Which Helps Sale of Brushes

Goyette Co., Montreal, Use Glass Fronted Cabinet Grouping Brushes in Bins According to Quality, Price and Size—The Customer Must Have the Right Brush to Make a Satisfactory Job

"THERE ARE few who enter the store who do not see our line of brushes," was a statement made to Hardware and Metal by A. Goyette, hardware merchant of Montreal, in discussing paint and brush business. An illustration appearing elsewhere in this issue shows that use is made of a distinctive cabinet which classifies the brush stock according to price, quality and size. This brush cabinet is one of the outstanding features of the paint department.

Mr. Goyette emphasizes the fact that to establish a good reputation in the paint department it is necessary to see that customers use the best brush for the application of paint or varnish. To this end he sees that every paint salesman is thoroughly acquainted with the various types of brushes and able to intelligently advise customers how to proceed.

The brush cabinet is altogether separate from a large display board which is used to show samples of stocked brushes. The various brushes are grouped in bins with tickets on each bin telling both the customer and salesman the number and cost of the brush. The glass front on the case enables the customer to see the wide range stocked and yet it keeps the stock comparatively free from dust.

Brush business has been active in this store, and much of the success is attributed to the attention paid to the brush stock and the steps taken to intelligently advise customers. The brush cabinet in question is one which might be copied to advantage by other hardwaremen.

BOECKH'S BRUSH NEWS

New Price List

Our new price list is now about ready and will shortly be mailed to the trade. We realize that considerable interest will be created by this new price list. If you do not receive one, send us a post card and we will mail you one at once.

It is of interest to all that among other changes the prices have been reduced on Boeckh's longer-length bristle brushes. We feel sure that the new prices will meet with the warm approval of merchants in all parts of the Dominion.

Boeckh quality is, if possible, now even higher than ever before in the history of this old-established Canadian firm. For this reason we wish to stress the importance of using our guarantee whenever extra selling arguments are necessary. The guarantee is a splendid selling point and should be used always.

Paint as Dividend Paying Investment

Hardwareman Finds it Helpful to Sell Paint as Insurance and a Paying Investment Combined—Householders Will Have New Appreciation of Value of Paint if Linked up in Tangible Form With Such Factors

A HARDWAREMAN who has developed an active paint business from small beginnings within the last few years credits most of his success to a sort of natural ability he possesses to make the point of his argument very plain to all prospects. He believes that too much of the publicity given to the subject of paint is so general that it runs off people's backs like "water off a duck." One of the ways in which he drives home the real meaning of his arguments is in making comparisons with other things with which people for various reasons are probably better acquainted. Take for instance the question of selling paint not only as insurance, but as a dividend paying investment. Does not such an argument make the prospect sit up and think? Read what he says in his own way:

"Honest, now, do you genuinely think that the average householder realizes the investment value of paint? Is he aware that, from the viewpoint of the man who buys and uses paint, it is an investment, a dividend payer and an insurance all in one? In short, that paint when applied to a house has a definite monetary value?

What They Say

"I've met lots of men who've painted their homes. I've met lots of others who are still postponing what they regard as an evil hour. In nine cases out of ten, I've heard one or other of the subjoined remarks (or something in effect the same):

"'I know my place looks shocking, but—well, it cost like fury to paint. I don't think I'll paint till next year.'

"Or this from the man who has painted: 'Yes—I know it costs money, but a chap has to do something now and then to keep his street looking nice. It's worth while, I assure you, from the standpoint of civic patriotism. I believe a man should make a sacrifice for his town now and then.'

"Boys, it just looks to me as though the Paint Man (I don't mean the Wonder-of-Wonders who does all things right, but the plain, average fellow) isn't rubbing into the universe the plain, solid, substantial, financial facts regarding paint.

"For paint is worth more than it costs to the man who buys it intelligently and uses it right. The man who buys paint (good paint, that is) invests his money to reap dividends. And this idea the Paint Dealer or salesman can't study too closely, digest too thoroughly, or hammer too hard.

"Just reason the thing out for yourself. Glance about your own neighborhood. It doesn't matter whether it's a rented house or an owned house, the logic holds good.

"Did you ever go house-hunting in a city where you had just decided to locate? Did you visit house after house, and house after house, your wife rejecting first this and then that—and did you at length, suddenly turning a corner, hear her say:

"'Isn't that cottage just too cosy looking for anything?'

"And the first thing you perceive about that cottage, when you mentally analyze it, is that the exterior paint is fresh and bright and new.

A Good Real Estate Agent

"Paint—Fresh Paint—is a ripping good real estate agent. It's the exterior appearance of a house that creates the first impression, and first impressions go furthest and are most lasting. Nor does it make much difference whether it's a $200-a-month house or a $25-a-month house. The rule holds good for both. It dovetails in different fashion—that's all. The big man who rents the $200 house demands fresh paint because he's aesthetically inclined, and insists on his surroundings looking bright and clean. The poorer chap, regarding things more from the superficial point of view, is unconsciously caught by the brightness, the cosiness, the suggestion of home, that comes of a freshly adorned exterior.

"That's true also of selling a property. Most people buy because they believe that buying is cheaper than renting; and they do it in the full expectation of having to sell it again. Smith may be promoted to another city, or Jones may build a larger house; both will need to sell. Let them both negotiate with the same prospective buyer, and Jones will hold the advantage if he can say: "That house was freshly painted this year. It won't need another coat for quite a while now." That means a surer sale; or, if the sale is sure, it means a better price. And when a man has to sell in a hurry, these considerations have each a money value that goes a long way toward paying for the paint.

Greater Wearing Value

"Then there's the greater wearing value of the house that's regularly painted. Paint adds years to the life of a building. It saves minor repairs. The painted building defies the attacks of wind and weather, of rain and snow and sleet, in much the way that the traditional duck's back sheds aqua pura. If the life of an unpainted house costing $8,000 is twenty years, that house is worth $400 a year, plus interest and taxes. Grant that one coat of paint adds a couple of years to that house's natural life—and you can paint it for $200 or thereabouts—you're saving the cost of the painting four times over. As a matter of fact, the life of an unpainted house will fall short of twenty years, and the paint will add a deal more than two years to the span. On the most cautious reckoning, paint is mighty cheap longevity medicine.

"That's paint talk from the investment standpoint—and that's the sort of thing householders need to be educated to. If every houseowner knew the investment and insurance of paint, house-painting would be a regularly recurring ceremony instead of an occasional dissipation.

"And it lies with you, Mr. Hardwareman, to educate the customer. Don't read him the entire lecture right off the

Barrett Roofings, Cements Industrial Paints etc.

Everlastic "Rubber" Roofing

Everlastic Liquid Roofing Cement

Everjet Elastic Carbon Paint

Everlastic Asphalt Multi-Shingles

Wherever there's a roof, there's a Barrett customer—

Nobody wants to put on new roofing unless he has to — he'd much rather make the old roof last longer. That's why dealers everywhere are making big profits on Barrett Roof Repair materials.

It will pay you to tell your customers about these famous products — how they put off the expense of new roofs. Your efforts plus our advertising in the leading newspapers, farm and technical publications are sure to bring quick sales and good profits. Is your stock of these two well known Barrett products ample?

Barrett Plastic Elastigum Patching Cement

This tough, elastic, waterproof cement is the best and quickest cement for all kinds of patching. It has the consistency of thick molasses and is easily applied with trowel or putty knife. Adheres to any surface — wet or dry.

Plastic Elastigum forms an air-tight, water-tight joint or patch that is proof against the action of steam, fumes, acids and alkalies. It is widely used for waterproofing gutters, stuffing cornices — for flashing work of all kinds, and for damp-proofing parapet and fire walls, etc. Can be used on metal, stone, wood, concrete, glass, terra cotta, etc. Put up ready for use in standard sized packages from 1-lb. tins to barrels containing about 600 lbs.

Plastic Elastigum being used to repair an old roof

Barrett Liquid Elastigum

Recommend this preparation to customers whose roofs are beginning to show signs of wear. It is unequalled for reconditioning roofing of all kinds—"rubber," felt, and metal.

Forms a smooth, new waterproof surface that gives new life to a roof—stops small leaks and holes—reinforces the weak spots.

Liquid Elastigum is composed of time-tested waterproofing oils mixed with asbestos fibre. It is easy to apply with either brush or squeegee, dries quickly, and stays tough and elastic. One gallon will cover 100 to 250 square feet, depending on the condition of the roof. Comes all ready for use in packages ranging from 1-gallon tins to 40-gallon barrels.

DOES STEADY TRADE IN ELECTRIC APPLIANCES

A steady demand for electric stoves and ranges is reported by George A. McMurtry of St. Thomas, Ont. Despite keen competition from various sources including the electrical shops and a Hydro shop, Mr. McMurtry has been placing a number of stoves. He has an unusually attractive window display, the background of which is a handsome range. In front of it are various electrical utilities. In his adjoining window Mr. McMurtry has a display of builders' hardware.

Business he states has been very good all season and he is looking for it to be maintained throughout the coming months.

Discussing the trade he is doing in washing machines he stated that they have been moving steadily and that since he started handling them over 4 years ago he has placed more than 500 machines.

Lately the firm has been making a drive in wireless outfits and equipment and has placed a number, including one $700 outfit. This was a community affair and was sold to the citizens of Springfield. Every day at noon and in the afternoon there is a wireless concert given by Mr. McMurtry. The outfit is installed on a special table right up in the front of the store and is of sufficient range to pick up the service of the broadcasting station at Detroit.

In connection with wireless the firm is installing a special laboratory where wireless equipment will be specialized in and in the coming months plans to make an even bigger drive than formerly.

CALGARY MARKETS

(Continued from page 45)

All centre fire American metallic ammunition shows a reduction of five per cent.; ruling prices being changed from plus 15 per cent. on American list to plus 10 per cent. on with a further plus in both cases of 1½ cents per lb.

Boat and bridge spikes are marked lower with demand reported light; the change being a general leveling to eastern quotations. Current prices are ¼, 8.25; 5/16, 7.55; ⅜, 7.35; ½, 7.05.

Another advance of 10 cents per 100 lbs. is in effect on bar iron and mild steel and present prices on this commodity are as follows:

Rounds and squares 3/16, ¼ and 5/16, 6.25 base; Rounds and squares ⅜, 2 and flats up to and including 1 x 4, 5.20 base; Rounds and squares over 2 up to and including 2¾ and flats over 1 x 4 up to 6 in. wide, 5.65 base; Rounds over 2¾ up to 6 in. 5.95 base; Band Iron or Steel, 5.70 base; Sleigh shoe steel, 6.45 base.

PAINT AS DIVIDEND PAYING INVESTMENT

(Continued from page 48)

reel. Don't try to teach him the whole lesson at a single sitting. But today when you talk paint call attention to the fact that freshly painted houses rent more easily than others. Tomorrow or next day take a shot at the insurance phase. Sift in this information regularly, systematically and conscientiously.

"It will pay. It will pay best and most in the long run; and if you have the right idea of the paint business, you're building for tomorrow as well as for today. And if you doubt the need of some such education as this, just take a walk down any middle-class street in your town, and take note of the houses that ought to be painted, and are not. You'll come back ready and willing to do your share in instilling the investment idea of painting into the heads of your prospective customers.

"P. S.—While you're taking that trip, jot down in your note-book the addresses of those houses that need paint, and be sure to mail each owner a letter and some of your circulars."

Hot Protest by Retailers re Jobber

(Continued from Page 26)

"We are always ready to assist you in any undertaking that will improve and straighten the retail hardware man's footing and to combat the unfair competition of to-day."

In addition to the foregoing Secretary Macpherson also read this following letter which was received by him from a Western Ontario hardware merchant:

"We have written Hobbs telling them just how rotten we think they are acting. We buy a pile of goods from Hobbs but I feel that we shall have to side-step them unless they take some other stand.

"Will you please let me have a statement and the result of your conference so that I may know just what stand the Hobbs people are taking.

"I certainly wish you continued success in your efforts to put this just where it should be."

Warm Discussion by Executive

A rather warm and lengthy discussion followed the statements of the London delegates and the reading of the letters. President George May, of Toronto, stated that it was interesting that those retailers not directly affected by the alleged competition had pledged their support in the interests of those who were feeling its effect. John Caslor thought that letters from retailers to manufacturers protesting against allowing their products to be sold at wholesale prices would be effective. H. N. Joy stated that he thought all retailers doing business with the company should discontinue such relations until such time as the company would show itself to be definitely a retail or a wholesale firm. He also referred to the resolution passed at the last annual meeting of the Ontario Retail Hardware Association which strongly opposed the sale of hardware direct to consumers by wholesalers except in the case of contractors and factory trade.

Secretary Macpherson was requested by the Executive to send a letter to the Hobbs Hardware Co. on the subject; to write other jobbers through the Canadian Wholesale Hardware Association; and to write manufacturers, particularly those whose products carry a suggested resale price, directing attention to the situation which exists in London. Further action in connection with the matter will be taken upon receiving replies from these firms.

Hobbs Hardware Company Official Makes a Statement

C. A. Whitwam, vice-president and managing director of the Hobbs Hardware Co., London, Ont., was reached over long distance telephone by Hardware and Metal and asked if he had any statement to make regarding the charges made at the executive meeting of the O. R. H. A. that his company was doing a large retail business and selling goods at wholesale prices direct to the public. Mr. Whitwam's statement is as follows:

"We are not selling retail at wholesale prices and if there are any cases where sales of Oneida Community ware or such lines have been made at wholesale prices they have been made without my knowledge or consent. In view of the fact that we have not yet seen the material which will appear in connection with the meeting we will withold our reply until your issue is off the press and will give you a statement for your next issue. In an organization with over one hundred employes something of this kind may slip through but it is certainly without my knowledge."

Mr. Gibson of the Toronto branch, Oneida Community Ltd., stated to Hardware and Metal that this company would secure its own evidence in regard to the situation in London, judge the relation between wholesale and retail trade on the merits of the case and take action accordingly. A definite statement of the company's position will be issued to the trade through Hardware and Metal very shortly.

Weekly Paint Markets

Montreal

MONTREAL, September 7.—A further reduction in linseed oil prices in some quarters, thus bringing present quotations on raw oil below the dollar mark, is a feature of the paint markets this week. After a period of over a week when the flax-seed market recorded an easier tendency, the tone is now a little steadier. With the new crop appearing on the market in the near future, the trend of oil prices is hard to determine. Easier prices usually follow the advent of the new season's crop, but on the other hand present levels are considered very reasonable for this product. Turpentine prices are unchanged, with the market at primary centres fluctuating considerably. Demand is reported as lighter than formerly and there is not the same amount of strength in the undertone as was evident in recent weeks. There is a softer tone in shellacs and certain local distributors have reduced prices. Although new price lists have not reached the hands of local offices of brush manufacturers it is now understood that new prices are effective from September 1st and a revision, as outlined in previous issues, is made.

LOWER SHELLAC PRICES IN CERTAIN QUARTERS

Montreal.

The easier tone in shellac markets in primary centres is now reflected locally to an extent when certain distributors have reduced their quotations, approximately 50 cents per gallon. Other firms are maintaining former price levels, and there is still a wide variation among local houses. The usual summer dullness is reflected on primary markets, and demand is reported as being only of a very moderate nature. Average local quotations are as follows:

SHELLAC—

	Pure White		Pure Orange	
In barrels	4 60	5 05	4 35	4 55
5 gallon jugs	4 75	5 15	4 50	4 65
1 gallon jugs	4 85	5 25	4 60	4 75

BRUSH PRICES, EFFECTIVE FROM SEPTEMBER FIRST

Montreal.

Although new price lists have not yet reached the hands of local branch offices of brush manufacturers, it is generally understood that new prices are issued, effective from September 1st. Changes made are in accordance with reports in previous issues; a general revision including some declines, also increases in quotations on certain lines, while a number of lines remain unchanged.

FLUCTUATIONS NOTED ON TURPENTINE MARKETS

Montreal.

There is no further change in turpentine prices, and the local market is described as fairly firm with the question of obtaining further supplies having its effect in maintaining a stronger tone than would otherwise be the case. Fluctuations have occurred in the markets at primary centres during the past week, and there is not the same amount of strength in the undertone as was apparent in previous weeks. Demand has fallen off to an extent, buyers not anticipating future requirements to any extent and apparently willing to hold off with expectations of lower prices. With these fluctuations continuing, an easier market may be looked for, although certain importers are still of the opinion that the market will steady down and with demand again improving, will assume a stronger tone. Prevailing prices are as follows:

TURPENTINE—

1 barrel lots	1 60	1 75
2 to 4 barrel lots, per gal.	1 58	1 73
Broken lots	1 70	1 85

NO FURTHER CHANGE IN WINDOW GLASS PRICES

Montreal.

Current trade in window glass is still on the quiet side, although importers and distributors anticipate a more active movement within the next few weeks. It is pointed out that the period when heavier requirements are called for usually does not commence until the latter end of this month. Bookings up to this date have been comparatively light, dealers apparently willing to wait the actual consumptive demand. Quotations locally are unchanged at 20 per cent. off list prices, with a net list quoted, which offers slightly lower quotations for import orders.

LINSEED OIL NOW BELOW DOLLAR MARK

Montreal.

Linseed oil prices are now reduced below the dollar mark, raw oil being quoted at 98 cents per gallon in one barrel lots. The easier tone in the flaxseed market continued during the week, although at the present time it is reported as somewhat steadier. With the time when the new crop will first be marketed gradually drawing closer, developments in the oil market are expected, but with present levels now at reasonably low figures, it is thought questionable by some whether the market will show a further recession to any extent. It is reported that the by-products, cake and meal, are also much easier in price, and this tendency should assist towards a firmer attitude in oil. Although confirmation of the report that English oil had reached this market has not yet been heard, it is admitted that the London market is being watched with interest, and competition from this source may play an important part in the market in the near future. Reduced price levels are the following:

LINSEED OIL—

	Raw		Boiled	
1 to 2 bbl. lots, per gal.	0 98	1 06	1 00	1 08
5 to 8 bbl. lots, per gal.	0 96	1 04	0 98	1 06

Less quantities, add ten cents per gallon.

Toronto

TORONTO, September 7. — Easier prices on both linseed oil and shellac offer the premier developments in the current paint material markets. The softer tone in shellac was pointed out in recent issues of Hardware & Metal, and prices have consequently receded on the domestic markets. Another reduction of five cents per gallon is recorded in linseed oil, this development being chiefly attributed to the trend of the flax seed market and the new crop now appearing. Turpentine quotations are unchanged this week, but the wide range in quotations recorded by the various distributors is still a noticeable feature. The new brush price lists are now being distributed to the trade by the different manufacturers, according to the revisions announced last week. The fall movement of putty is now commencing at new lower levels, while a satisfactory volume of trade is recorded in white lead in oil. Seasonal window glass sales are also in evidence, and an early fall movement in paint products is leading both manufacturers and distributors to look for another record season.

LINSEED OIL PRICES STILL FURTHER REDUCED

Toronto.

Another reduction of five cents per gallon is recorded in linseed oil prices this week, the change again being attributed to the current conditions in the flax seed markets. This development brings prices down to around the dollar mark for raw with the usual differential for boiled in some cases, while other distributors are showing quotations at $1.05 per gallon in one or two barrel lots. Thus the range previously referred to is still noted on the local market.

THE INNER CASING, DIVIDING THE WARM A.R AND RETURN AIR CHAMBERS IS MADE WITH AN OUTER LAYER OF HEAVY GALVANIZED IRON, AN INNER LAYER OF TIN AND AN ASBESTOS INTER-LINING.

DIRECT DRAFT DAMPER HANDLE IS LOCATED IN A HANDY AND CONVENIENT PLACE. THE DAMPER ROD LEADING FROM THIS HANDLE TO THE DAMPER IS OUTSIDE OF THE COMBUSTION CHAMBER AND FLUES. THE DAMPER IS OF FULL SIZE AND EQUIPPED WITH AUTOMATIC GAS EXPLOSION ATTACHMENT, WHICH IS VERY ESSENTIAL WHERE COAL CONTAINING A HIGH PERCENTAGE OF GAS IS USED.

SUITABLE PROVISION HAS BEEN MADE FOR THE INSTALLATION OF A HOT WATER SECTION. THE HOT WATER PIPE MAY BE TAKEN THROUGH THE TOP OF THE RADIATOR OR THROUGH THE UPPER PART OF THE FIRE DOOR FRAME, THE RETURN WATER PIPE THROUGH THE LOWER PART OF THE FIRE DOOR FRAME.

THE TWO DOORS GIVE A VERY LARGE OPENING TO THE FIRE CHAMBER MAKING IT CONVENIENT FOR ADDING LARGE CHUNKS OF COAL OR WOOD AND THE CLEANING OF THE FURNACE. THE TOP DOOR, IF LEFT CLOSED WHEN FIRING THE FURNACE, ACTS AS A SMOKE PLATE AGAINST THE ESCAPE OF SMOKE AND GAS WHEN ADDING FUEL. THE DOORS ARE ALSO PROTECTED FROM THE HEAT BY HEAVY METAL LININGS.

THE HOUSING FOR THE LARGE COMBUSTION CHAMBER IS MADE OF HEAVY STEEL. THE PARTS COMING IN DIRECT CONTACT WITH THE EXTREME HEAT FROM THE PRODUCTS OF COMBUSTION ARE PROTECTED WITH HEAVY CAST SHIELDS AND CAST LININGS. THIS CONSTRUCTION IS DURABLE AND GIVES RAPID RADIATION OF HEAT UNITS.

THIS DUST FLUE ARRESTS THE DUST WHEN GRATES ARE BEING SHAKEN, THUS PREVENTING IT FROM ESCAPING INTO THE BASEMENT.

THE GRATES ARE TAKEN OUT SIMPLY BY REMOVING THIS GRATE PLATE.

LARGE WATER PAN IS CONVENIENTLY LOCATED IN THE OPENING UNDER THE FIRE DOOR IN FRONT OF THE DUST FLUE AT A POINT WHERE THE HEATED CASTINGS EVAPORATE THE WATER RAPIDLY. THE HUMIDITY FROM THIS PAN GIVES MOIST WARM AIR CONDUCIVE TO GOOD HEALTH.

THE GRATE BARS ARE HEAVY, DURABLE AND OPERATE INDEPENDENTLY OF EACH OTHER, OR MAY BE OPERATED IN PAIRS BY THE ADDING OF GRATE BAR COGS. THEY ARE ALSO EASILY REMOVED BY TAKING OFF THE GRATE PLATE.

THE LARGE ASH DOOR IS EQUIPPED WITH A DROP DRAFT DOOR PROVIDED WITH CHAIN AND PULLEYS FOR CONTROLLING THE FIRE FROM THE FLOOR ABOVE. THE ASH DOOR IS ALSO PROVIDED WITH SLIDE DAMPER.

THE HOUSINGS FOR THE AIR CHAMBERS CAN BE ADJUSTED TO ANY BASEMENT HEIGHT.

ABSENCE OF ANGLES AND SHARP TURNS REDUCES FRICTION AND PREVENTS THE POCKETING OF AIR, THEREBY GIVING AN EASY AND FREE CIRCULATION OF AIR INTO AND OUT OF THE FURNACE.

SPECIAL LUGS WITH LONG THREADED SCREWS ARE ATTACHED TO THE INNER AND OUTER CASINGS AND SO ARRANGED THAT THE FURNACE CAN BE ASSEMBLED WITH EASE AND A GOOD TIGHT JOINT OBTAINED.

RADIATOR IS OF THE HORSE SHOE DESIGN AND OF LARGE SIZE. THE INNER PART OF WHICH FORMS THE COMBUSTION CHAMBER. IT IS OF HEAVY WEIGHT AND STRONGLY CONSTRUCTED, ALL RODS AND BOLTS BEING OUTSIDE OF COMBUSTION CHAMBER AND FLUES. THE STEEL HOUSING OF THE RADIATOR IS DRAWN TIGHTLY AGAINST HIGH CAST METAL RIBS, THEREBY MAKING A PERFECTLY GAS TIGHT JOINT.

SHIELD PREVENTING THE DIRECT HEAT OF THE FIRE POT FROM COMING IN CONTACT WITH THE LOWER PART OF THE INNER CASING PREVENTS THE FORMATION OF EDDIES OF HOT AIR AND THUS INCREASES THE FREE AND EASY FLOW OF THE HEATED AIR IN THE WARM AIR CHAMBER.

HEAVILY RIBBED TWO PART FIRE POT FITTING TOGETHER WITH DEEP CUP JOINTS MAKES THEM DURABLE AND PREVENTS THE ESCAPE OF DUST OR GAS. GUARANTEED.

THE WARM CHAMBER CASING BEGINS AT THE PROPER HEIGHT FROM THE BASE AND PERMITS THE RETURN AIR AT ONCE TO COME IN CONTACT WITH THE HOT CASTINGS.

VERY LARGE ASH PIT, WHICH MAY BE CLEANED EASILY ON ACCOUNT OF THE SQUARE ENDS.

WEEKLY PAINT MARKETS

(Continued from page 52)

With the new crop appearing on the seed markets, the trend of oil prices is said to be more difficult to determine. Lower quotations on linseed are more or less usual this season of the year, especially if flax seed conditions are normal. Linseed oil is now considered to be at a reasonably low figure, and further recessions are considered as doubtful in some quarters. Crushers point out that the by-products, cake and meal, are also easier in price, and this factor has a decided tendency to maintain oil quotations. Following are the revised local prices.

LINSEED OIL—	Raw		Per Gallon Boiled	
1 to 2 barrels	1 00	1 05	1 03	1 08
3 to 4 barrels	0 99	1 04	1 02	1 07
6 to 9 barrels	0 97	1 02	1 00	1 05

Less barrels, 15 cents per gallon.

RANGE STILL EVIDENT IN TURPENTINE PRICE

Toronto.

The wide range in prices on turpentine being quoted by different distributors on the local market is again in evidence this week. Fundamentally quotations on this product are unchanged, but the fluctuations noted in southern primary centres have not affected the domestic values to the same extent as formerly due to the difficulties in transportation. This firmness apparent in the local market is due to the question of obtaining further supplies, this having some effect in maintaining a stronger tone than might otherwise be the case in view of the quiet trading in turpentine. Buyers are described as not anticipating their future requirements of this product to any marked extent. Recent reports from southern producing centres indicate that some trouble is being experienced in moving supplies owing to the transportation labor troubles. On developments in this direction depend the future trend of turpentine prices in production circles. Local quotations record the following range:

TURPENTINE—		
1 barrel lots	$1 70	$1 85
2 to 4 barrel lots	1 69	1 84
5 gallon lots	1 85	2 00

Less than one barrel lots, 15 cents per gallon extra.

Turpentine steel drums galvanized, 5c per gallon less than barrel price. Drums charged $10 each, returnable in 30 days, freight paid.

All quantities sold f.o.b. Toronto, Hamilton, London, Brantford, Collingwood, Guelph, Windsor, or Montreal but freight may be equalized from any of these points.

Carload lots of 70 barrels, price on application.

SHELLAC NOW REACHES LOWER PRICE LEVELS

Toronto.

As recorded in last week's issue of Hardware & Metal, the shellac market is headed towards easier levels and local quotations have gradually been lowered to the new levels quoted below. The demand for shellac at this season is considered as moderate, and with shellac gum in primary market centers recording an easier tone, quotations on shellac have consequently been reduced in many directions. In some quarters it is stated that the previous levels are being maintained. Anticipations for increased activity when the seasonal fall movement of paint products develops are cited as the reason for the variation in quotations. With an increase in trading in shellac, an improvement in current market conditions is naturally expected. Following are revised local price levels:

SHELLAC—	White	Orange
In barrels	4 60	4 20
One gallon jugs	5 10	4 70

NEW BRUSH PRICE LISTS BEING PREPARED

Toronto.

The revision to a slightly lower level in prices on painters' and household brushes is now general on the markets. Manufacturers announce that revised price lists are being issued, which show approximate revisions of a varying nature on the different lines. The new lists will be distributed as soon as received in printed form.

In making these revisions, the manufacturers point out that all brushes have been refigured at the prevailing replacement values, wherever possible, and the current price changing is the result. The new quotations are said to be as conservative as practical, taking into account the present state of the bristle markets, and will likely remain in force without further change for some time.

Prices on the bristle markets have remained firm, and no outstanding decline is looked for in this direction.

FALL MOVEMENT OF PUTTY NOW COMMENCES

Toronto.

Shipments of putty are now being made at the new revised prices, but the demand is not yet as active as anticipated for the coming fall months. Recently revised quotations are the following:

PUTTY— Standard, per 100 lbs.	5-ton lots	1-ton lots.	Less
Bulk bbls.	$3 70	$3 95	$4 20
100-lb. drums	4 20	4 45	4 70
25-lb. irons	4 45	4 70	4 95
Bladders in bbls.	5 45	5 70	5 95
Do., less quantities	5 70	5 95	6 20
1-lb. tins	10 45	10 70	10 95

Pure Linsed Oil Putty, $1.25 per 100 lbs. advance ever above prices for similar quantities.

SATISFACTORY TRADE IN WHITE LEAD IN OIL

Toronto.

Current business in white lead in oil is reported by distributors to be quite satisfactory, sales being of a steady volume. Whether the recent extension of the booking date to November 30 will offer a stimulus to trade seems problematic at present, but the trade is satisfied that a good amount of fall painting will be done, and this will reflect to a great extent on white lead. Present quotations on white lead in oil are as follows:

WHITE LEAD IN OIL—	
In 5-ton lots	12 70
In 1-ton lots	13 45
Less quantities	13 80

SEASONAL GLASS SALES NOW IN EVIDENCE

Toronto.

The current market for glass is stated to be slightly improving, and the seasonable fall movement now shows signs of getting under way. Building proclivities have enhanced the demand for glass in various sizes, and it is felt that a large proportion of this season's glass sales are intended for installation in the many new homes that have been erected throughout the country.

Quotations remain at the revised discounts recently announced of less 20 per cent. on imported glass, while domestic window glass is quoted at list less 10 per cent., with an extra 5 per cent. on lots of 25 cases or over.

PITTSBURG MARKETS

(Continued from page 46)

Various meetings were held at which resolutions were passed to hold out for union recognition. Men drifted back to work in somewhat larger numbers than formerly. Day by day the trade watched the situation, but considered the strikes still in force, to an extent. September 1 came an almost comical denouement, for on that day car shortages were serious. There remained many strikers but the available jobs were filled. Actual shipments of coal and coke have simply increased somewhat more. They have been increasing more or less since last May. They are not large now, in proportion to requirements, and since September 1 the market has been stiffening. Connellsville steam coal is $4.75 to $5.25, furnace coke $11 to $12 and foundry coke $13 to $13.50, all per net ton f. o. b.

The pig iron market remains one of spot or prompt shipment, practically out of stock. Bessemer is up, on small sales, $2 a ton to $34, valley. It is said basic could not be had under $30, valley, but there is no likelihood any could be had at that figure. As to foundry iron the last valley foundry was sold some time ago and consumers have had to go farther afield. A couple of days ago a transaction occurred disclosing the situation plainly. A consumer in Pittsburgh wanted about 400 tons of foundry iron, and had to buy it in Buffalo, paying $34 at furnace. Adding freight to Pittsburgh and deducting freight from the valleys makes a valley equivalent of approximately $35.50, or $2.50 above the valley market previously quoted. Last March the valley market was $19.

Steel Production.—While coal production is increasing it can hardly increase to anything like the level of requirements, on account of transportation limitations, and steel producers and consumers are not given sufficient preference in the railroad distribution to improve their supplies much, while the few remaining stocks of coal have been playing out. It is a question whether the rate of steel production will be materially higher 30 days hence than it has been in the past week or two, when the rate of steel mill operation in general has been between 50 and 55 per cent., or say a little over 25,000,000 tons of ingots a year. The maximum this year was between 70 and 75 per cent., reached late in June, with an ingot rate of about 37,000,000 tons a year. It is doubtful whether such a rate will again be attained at any time this year.

The Perfect Grip

An ordinary hammer will slice the head off a nail, because it gets a grip on the head and not on the nail. With the head off, it's all off.

Williams' perfectly balanced Hammers will grip the **body** of a nail and pull it, head and all, clear through a plank. All nails are trailers to Williams' hammers.

Heads on or heads off, for drive or pull, Williams' Superior Drop-Forged Hammers are the bosses in the nail world. Good workmen want them because they fit the hand, are perfectly balanced and are good all through.

HASH!

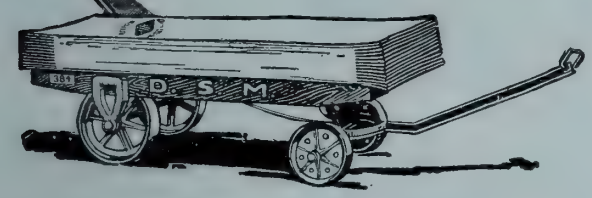
Just a few little "clean-up" items before the big fall rush.

STOCK ITEMS—Send for our list just compiled showing gauges and sizes "Premier" Steel and Toncan Metal Galvanized Sheets for immediate shipment.

WEIGHT CARDS—Do you want a clean, fresh card to tack up in the shop? Shows weight per sheet and per bundle, all gauges, Nos. 12 to 30. Will mail you one on request.

SAMPLE SHEET—How about sending for a sample sheet Toncan Metal and making up a Furnace Flue Pipe—It costs you nothing but the request.

TINKER TOM



MADE IN PREMIER CANADA

Hardware and Metal is the only paper in Canada giving a weekly market service on hardware, metals, paints, varnishes and other lines allied with the hardware trade.

Hardware and Metal is the only hardware publication in Canada with circulation audited by the Audit Bureau of Circulations.

Hardware and Metal is the only weekly hardware paper in Canada.

THE NAME "STILL" ON HANDLES IS YOUR GUARANTEE

that the handles have been made by handle specialists, who have reached their present high position in the handle business through many years of honest effort to give the hardware trade "the best possible" in handles.

Our aim is satisfied customers because we want your repeat business. Specify Still's Axe, Pick, Hammer, Sledge, Cant Hook and Peavie Handles. Always look for the name "Still's."

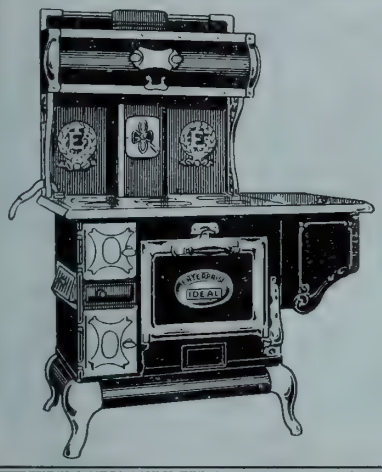
THE IDEAL RANGE

Like all stoves and ranges manufactured by the Enterprise Mfg. Co., the Ideal Range is unsurpassed for perfect operation, fine finish, beauty of design and durability. This is not a high priced range but an ideal range for those who wish a quality stove at a moderate price.



The body is made of heavy rolled steel, polished, all seams, etc., are strongly riveted and bolted together. Detachable reservoir. Trimmings and curved supports are highly nickel plated and polished. White Enamel Panels.

Write to-day for illustrated catalog of Enterprise Stoves and Ranges.

THE BUYERS' GUIDE

If what you want is not here, write us, and we will tell you where to get it. Let us suggest that you consult also the advertisers' index, facing the inside back cover, after having secured advertisers' names from the directory. The information you desire may be found in the advertising pages. This department is maintained for the benefit and convenience of our readers. The insertion of advertisers' headings is gladly undertaken, but does not become part of any advertising contract.

EVERY MacLean Circulation Salesman (excepting resident Local Agents who would be personally known to you) is provided with an Authorization Card such as this:

This is the Home of
THE MACLEAN PUBLISHING COMPANY
143-153 University Avenue, Toronto

The Largest Organization of its Kind in the British Empire

This is to certify that

.....

is authorized to take subscriptions until

APRIL 30, 1922
(*New Card Given Each Month.*)

to our publications mentioned on the back of this credential, at the regular subscription rates.

NOT GOOD AFTER ABOVE DATE

Circulation Manager.

ALWAYS demand to see this card before giving either a new or a renewal order to any MacLean publication.

This is the protection we offer you against the Menace of the Fake Agent. By looking for this card you are protected.

AND if anyone unable to produce this card attempts to sell you a subscription or make collection for your present subscription, please telephone or wire us at once and we will not only appreciate your action, but we will gladly pay all charges in connection with the call.

Our whole object is your protection, but we can not help you unless you help us. And don't forget that we will gladly pay any expenses.

Ford CAR WINS GOLD MEDAL as Pathfinder of the Canadian Rockies

FORD CAR PILOTED BY GEORGE GORDON MAKES FAST TIME TO COAST AND GETS GOLD MEDAL.

Made Trip of Seventeen Hundred Miles Over Rocky Mountains in Eight Days without Repairs or Change of Tires.

[*From the Edmonton Journal, July 15th*]

The recent pathfinding tour from Edmonton to Victoria, B.C., brought further laurels to the Ford Car and it demonstrated that this popular car can be operated successfully under the most severe conditions.

When the City of Victoria offered a gold medal to the driver of the first car to blaze a trail from Edmonton to Victoria via Jasper Pass, Yellowhead Pass and Kamloops, it was considered an almost impossible feat, and if accomplished the trip would take from three to five weeks and the car would be almost a wreck.

A motor road between Edmonton and Victoria has been the dream of Western Canadians. An automobile had never crossed the Rocky Mountains. Mr. George F. Gordon, the winner of the Gold Medal gives unstinted praise to the Ford Car in which he made the trip:—"I knew that if any car got through in reasonable time it would be the Ford, and to back my own faith, I purchased a new Ford Roadster. We never had the slightest trouble with the engine, and we found it economical on both tires and gas. We had no further damage than a broken spring leaf, and never used any of the spare parts. The tires do not show any wear at all, nor did we have a puncture. If I should ever have occasion to make a similar trip I will take a Ford."

Remarkable, Yes! Unusual, No! Every day on the ragged edge of civilization, hundreds of Fords blaze new trails, do the impossible. Sufficient publicity has not been given to the unbelievable performances of the Ford.

Hundreds of Hardware Men use this Special

DAYTON

Hardware Scale

You don't need to take OUR word for its merits. We'll wager you have a fellow hardware merchant in your district who is using a Dayton Hardware Scale—because hundreds of hardware dealers all over Canada are enthusiastic users. Ask him. He will tell you what it has meant in HIS business.

It will Safeguard your Profits

Profit leaks are impossible when you use a Dayton Hardware Scale. Weights and prices are automatically computed for you—no fumbling and thumbing—no little overweights that soon total into big business losses. We'll explain why in detail if you'll write us.

We also make the International Recording Door Lock and Autograph Recorder—the finest protective system that any business can have. Write us for descriptive literature.

The Dayton is sold on attractive monthly payments. Discount for cash.

TOM KEPT RIGHT AFTER THEM

Tom and Bill went out after partridge. Bill walked a mile, found a likely looking spot in the depths of a hardwood bush and settled down. "This is a great spot for birds," said he to himself. "I'll just sit here and bag 'em as they pass."

But Tom kept on going. He combed the open places and the dense woods, and the partridge fell before his expert aim. By sunset Tom's bag was full.

Bill brought back one bird. "I found a wonderful spot in the bush, but darned if I could knock down more than one. I only had three shots!" Bill cried.

"Ah," jeered Tom, "you didn't go after them! I kept right after them all day, Bill, and I've got a bagful. If you'd kept on the jump and chased the birds, instead of waiting for them to come to you, why, you'd have a full bag, too. You're as good a shot as I am, and you had just as good ground to cover—just as good ammunition!"

There's a lesson there. Are you Bill? Or are you Tom? Do you sit down and wait for customers to come to you, or do you go after them? The woods are full of people who want enameled ware in their kitchens, who require SMP goods in their homes. Are you waiting for them or are you going after them?

We supply you with the ammunition—beautiful window trims, counter cards, giant ads, newspaper advertising on a large, forceful scale, a "Manual of Selling Points" to help you sell, price tags and other things. Toms all over Canada are using this ammunition to wonderful effect.

How about you? Particulars on request.

A Safety Hasp That Does Not Bind

A safety hasp that does not work easily is a nuisance to the user, and a bad advertisement for the merchant. Like poor hinges, a poor hasp will cause loss of time, and irritation. The spinning of the pin is an important operation and one that is often neglected or eliminated entirely in some makes of hasps.

In the **No. 915 Wrought Steel Safety Hasp** there are several features of considerable importance to the merchant, and the ultimate user. Smooth spinning of the pin, and snug joints ensure easy, even working. The strap of the hasp is offset at the joint, allowing it to be perfectly flat along the front surface. The screw holes of the hasp and staple plate are countersunk and are perfectly smooth. The hasps are made with concealed screw holes, making it impossible to take the hasp off when locked. There is also the moveable plate to take care of shrinking of door without re-setting plate. The vertical staple permits the padlock to hang straight. The No. "915 Safety" hasps come neatly packed, dozen hasps in a strong, neat box. Made in 3″, 4½″, 6″ sizes, from bright, Cold Rolled Steel.

The Difference

1. The trolley — rigid. In Slater No. 1914 hanger the trolley is made of malleable iron—not light pressed steel pieces.

2. The top loop—more rigidity. And the top loop is made of heavy malleable iron, too—not pressed steel—an added reason for rigidity.

3. The lower loop—stronger. 10-gauge pressed steel—about twice as wide as the average loop.

4. The pendant — adjustable. Will fit any door 1½" to 2¾" thick.

5. The packing—easy handling. Neatly packed ready for setting up.

6. The selling — profitable. You can sell—when you know these differences—more No. 1914 hangers than any other.

Strathcona Pattern

Teaspoons
$6.00 per dozen

STRATHCONA is a new Rogers Anchor brand pattern of unusual beauty and distinction that will quickly appeal to your discriminating trade.

Rogers Anchor brand is priced midway between the costly extra heavy plate and the low priced ware.

It has a base of fine nickel silver; it is heavily plated and staples are reinforced with still heavier plate at all points subject to hard usage.

Strathcona has a beauty and dignity of line rarely found in anything but sterling silver. And this combined with the long wearing quality and reasonable price of Rogers Anchor brand makes Strathcona the most attractive value you can offer your trade today.

Announcing

two beautiful
new patterns

WE TAKE pleasure in presenting two new patterns in our well-known medium-priced flatware — Rogers 1881 brand.

The Salem and Essex patterns are worthy of being used for the best quality of flatware, representing, as they do, in the highest degree the characteristics of design most acceptable to the discriminating buyers of flatware.

There is now a very considerable sale for medium-priced flatware, especially for a quality as well-known as our "Rogers 1881" brand, and with these two new patterns, the dealer will be in the favorable position of being able to offer an assured quality with a choice of distinctive patterns.

List prices are the same as other patterns in "1881" quality

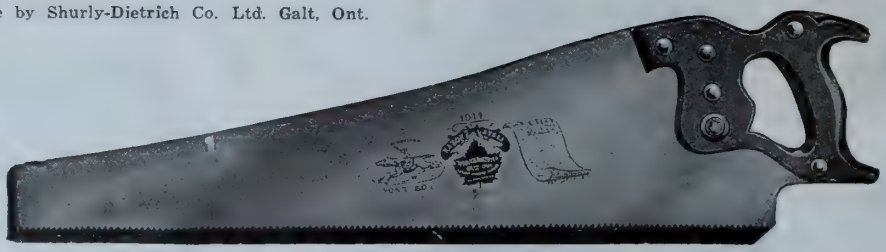
MAPLE LEAF SAWS—The Proven Best

Made by Shurly-Dietrich Co. Ltd. Galt, Ont.

MADE IN CANADA



Since 1873

Maple Leaf Hand-saws have been made in Canada since 1873, by a Canadian company, supported by Canadian capital, and employing Canadian workmen. **Maple Leaf Saws** are now famous throughout the world, and wherever they are introduced they are taking first place against all competitors. Their superiority in workmanship, and the quality of steel used, makes them the favourite amongst carpenters, lumbermen, and all who use saws. The saw illustrated is our No. 1914 with the unbreakable handle which cannot work loose.

To Holders of Five-Year 5½ per cent. Canada's Victory Bonds

Issued in 1917 and Maturing 1st December, 1922

CONVERSION PROPOSALS

THE MINISTER OF FINANCE offers to holders of these bonds who desire to continue their investment in Dominion of Canada securities the privilege of exchanging the maturing bonds for new bonds bearing 5½ per cent. interest, payable half yearly, of either of the following classes:—

(a) Five year bonds, dated 1st November, 1922, to mature 1st November, 1927.

(b) Ten year bonds, dated 1st November, 1922, to mature 1st November, 1932.

While the maturing bonds will carry interest to 1st December, 1922, the new bonds will commence to earn interest from 1st November, 1922, GIVING A BONUS OF A FULL MONTH'S INTEREST TO THOSE AVAILING THEMSELVES OF THE CONVERSION PRIVILEGE.

This offer is made to holders of the maturing bonds and is not open to other investors. The bonds to be issued under this proposal will be substantially of the same character as those which are maturing, except that the exemption from taxation does not apply to the new issue.

Dated at Ottawa, 8th August, 1922.

Holders of the maturing bonds who wish to avail themselves of this conversion privilege should take their bonds AS EARLY AS POSSIBLE, BUT NOT LATER THAN SEPTEMBER 30th, to a Branch of any Chartered Bank in Canada and receive in exchange an official receipt for the bonds surrendered, containing an undertaking to deliver the corresponding bonds of the new issue.

Holders of maturing fully registered bonds, interest payable by cheque from Ottawa, will receive their December 1 interest cheque as usual. Holders of coupon bonds will detach and retain the last unmatured coupon before surrendering the bond itself for conversion purposes.

The surrendered bonds will be forwarded by banks to the Minister of Finance at Ottawa, where they will be exchanged for bonds of the new issue, in fully registered, or coupon registered or coupon bearer form carrying interest payable 1st May and 1st November of each year of the duration of the loan, the first interest payment accruing and payable 1st May, 1923. Bonds of the new issue will be sent to the banks for delivery immediately after the receipt of the surrendered bonds.

The bonds of the maturing issue which are not converted under this proposal will be paid off in cash on the 1st December, 1922.

W. S. FIELDING,
Minister of Finance.

Suggested Amendments to Sales Tax

Movement Under Way to Have Present Act Amended in Such a Manner as to Place Manufacturers and Wholesalers on Parity in Method of Collection—Would Also Eliminate Option of Absorbing Part or Whole of Tax

EDITOR'S NOTE:—During recent months many articles have appeared in Hardware and Metal, giving the views of various branches of the trade regarding the present method of collecting the Sales Tax. It is quite evident that there is a great deal of opposition to the present plan, and that in some cases it is working a hardship on certain branches of the trade. A great many objections to the present plan, and some suggestions for improvements have been suggested. With a view to getting the matter on a more definite basis the following article has been prepared by Mr. Royal Cluxton, Manager Canada Paint Company. This is a definite suggestion for a proposed amendment, and it is known that the plan is greatly favored in many quarters.

Hardware and Metal would be glad to receive expressions of approval or disapproval of the plan outlined by Mr. Cluxton. There is every indication that at the next session of the Dominion Parliament the amount of the Sales Tax will be increased, and it is of the utmost importance to all branches of the hardware trade, that the application of the tax be made in a manner which is practical, and also fair to all branches of the trade.

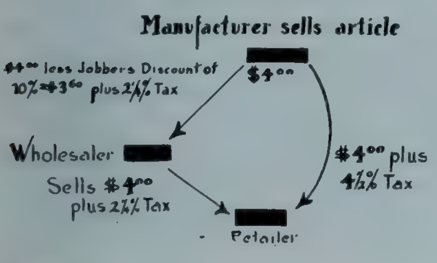
THE PRESENT method of collecting the Government Sales Tax is a serious hardship upon Canadian manufacturers as well as wholesalers holding Government Tax Licenses.

A strong movement is under way and the Minister of Finance will shortly be approached with a view toward having the present Act amended in order to offer some relief to the situation.

Proposed Amendment

(1st) It is desirable that the present Act be amended so that sales by manufacturers to wholesalers holding whole-

Present Plan



sale tax license for re-sale by the latter, also wholesalers to other wholesalers holding wholesale tax license for re-sale, be exempt from sales tax.

(2nd) That wholesalers holding Government tax license collect 4½% Government tax from retailers or consumers.

(3rd) That manufacturers continue to collect 4½% Government tax from retailers and consumers.

(4th) That the collection of 4½% Government tax by wholesalers and manufacturers be compulsory and with no option of absorbing a part or all.

The above proposed amendment will place the manufacturers upon the same footing as wholesalers and eliminate the present unfair position in which the manufacturers find themselves, whereby wholesalers only collect 2¼% tax from retailers whereas manufacturers must collect 4½%, thus giving the wholesaler an advantage of 2¼% on the selling price.

Then again the wholesaler under the present Act has to absorb 2¼% tax which represents that much loss to him and this would also be corrected by the proposed amendment.

The Government will gain by the proposed amendment as they are losing the tax on the discount which is allowed the wholesaler by the manufacturer under the present operation of the tax.

It also simplifies the collection of the tax for the Government.

Manufacturer sells article to wholesaler at $4.00 less 10 per cent., which is $3.60, plus the 2¼% sales tax. The wholesaler sells the article at $4.00, plus 2¼ per cent. to the retailer. On the sale of goods direct from the manufacturer to the retailer the present method is $4.00 plus 4½% sales tax.

Proposed Revision in Sales Tax

Manufacturer sells article to wholesaler at $4.00 less jobber's discount of 10 per cent., but **no sales tax**. Wholesaler re-sells article to retailer at $4.00 plus 4½% tax. On sales direct from manufacturer to retailer, existing method of collecting 4½% sales tax be adhered to, with no option of absorbing any part of said tax in either case.

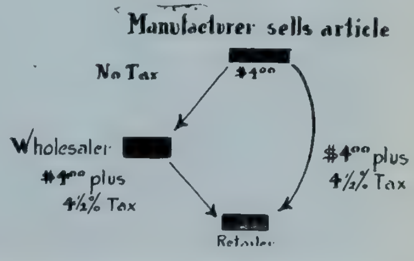
It will be noted by the illustration that the Government is losing 2¼% tax on 10% of every sale by manufacturers to wholesalers and in some cases the loss is even greater where wholesalers' discounts amount to 15 or 20%.

On the other hand, under the present form of collecting the tax, manufacturers have in many cases been obliged to absorb all or part of the tax to the retailers in order to place themselves on the same footing as the wholesalers.

Then again, some manufacturers are absorbing a portion of the tax when selling the wholesaler in order to protect the wholesaler against the loss of 2¼% which he is obliged to absorb.

The proposed amendment will do away with the necessity of absorbing any tax

Suggested Plan



and will eliminate the vicious form of competition that the Government has set up among manufacturers and wholesalers, and incidentally the Government will be the gainer.

Specialized Newspapers and C. N. E.

Address Delivered at Directors' Luncheon of Canadian National Exhibition on Press Day, August 31st, by Horace T. Hunter, Vice-President, Canadian National Newspapers and Periodicals Association

MR. PRESIDENT, directors and fellow publishers: You have heard from the Daily Newspaper Association, from the Weekly Newspaper Association, and I have been asked to speak for the Canadian National Newspapers and Periodicals Association, which might be termed the residuary legatee of the newspaper publishing business. It is not, however, an uncommon thing for the residuary legatee to get a very large part of an estate.

Nearly Three Million Subscribers

The extent and influence of publications represented by our Association are indicated by the following approximate statement of circulation:

Farm Papers	1,100,000
Magazines	500,000
Religious and Educational Papers	925,000
Business and Technical Newspapers	150,000
Total	2,825,000

On behalf of the Canadian National Newspapers and Periodicals Association, representing nearly three million subscribers, I wish to congratulate you on the success of this year's Exhibition. We know that it is not like Topsy "just growed." It has been brought to the high state of perfection it occupies to-day by the shrewd and far-seeing policies of the directors and executive officers, and by their untiring energy in carrying out these policies.

You referred, Mr. President, to the old custom of subscribers to weekly newspapers sending in cord-wood to pay for subscriptions and suggested that some of this wood be sent to relieve fuel shortage in Toronto. Might I suggest that if there is still a shortage some of the "hot air" in the daily newspapers could be used to advantage. (Loud laughter).

Optimistic Outlook

It is easy to be optimistic about the Fair to-day; but there are many of us here to-day who can remember the difficulties that had to be overcome and the optimists of twenty-five years ago would probably be looked upon as the pessimists to-day. This situation reminds me of an old settler who was told that they were going to build a railroad right through the village in which he had lived for seventy years. He shook his head, however, and stated: "They'll never run it." The right of way was secured, the tracks were laid and finally a party came to him and told him to come down to the station, that the new train was there and was going to start off in an hour's time. The old settler went down, looked over the equipment and finally, as the train glided gracefully away, remarked: "They'll never stop it." This, Mr. President, must be the feeling of everyone to-day. Nothing will stop your progress.

Similar Aims and Interests

There are many points of similarity between the work of our Association and the Canadian National Exhibition. These form a strong bond of interest and sympathy between us.

Both are *national*. Our subscribers in the various provinces of the Dominion are the men and women you are most anxious to bring to the Exhibition. The fact that they are readers and subscribers of our papers is the proof that they are people of intelligence, students of business, interested in new methods and in learning of new goods. They are the people who will travel a hundred or a thousand miles when the opportunity offers to see an exhibition such as you have developed, and I congratulate you that these people are coming in increasing numbers each year.

The international aspect is also a common bond. You have an increasing number of visitors from foreign countries, thus creating a feeling of good-will with these countries, and helping our manufacturers to establish connections abroad. The same reason that brings business men from United States Great Britain, West Indies, etc., also causes them to subscribe for our publications. These foreign subscriptions have become such a big factor with some of our publications that they are now issuing Export editions.

Educational Aspect Most Important

Then we are on common ground in educational work. I believe this Exhibition was started primarily for educational purposes and its great success is due to the fact that you have never allowed the amusement side to dominate. I believe the educational features should be given wider publicity. The individual exhibitors do a good deal in this connection but there is much to be done collectively. A few people would come to see a few exhibits of motor cars, but thousands will come when they know there will be seventy exhibitors representing probably seventy per cent. of the manufacturers who are seeking Canadian business. In our Association there is a publication for practically every line of business. These publications have told, year by year, the outstanding events of the Exhibition that would be of interest to their readers, and I think we can claim that this has been a factor in increasing interest and attendance of a very desirable class of people.

Influence of Business Press

I would like to quote briefly from an address delivered within the past year by His Honor, the Lieutenant-Governor of Ontario, who officially opened the Exhibition this year. Addressing the Canadian National Newspapers and Periodicals Association, His Honor said:

"I believe that the influence of the business press will be one of the most important factors in re-establishing business conditions in Canada on a safe and sane basis. I make a distinction between the business newspapers and the daily press because I believe that your papers—the business newspapers of Canada—exert a greater influence than the daily press because of the greater confidence your readers have in them. People read the daily newspapers to keep abreast of the general news of the day. They are interested in what is happening around them and they read to satisfy their desire for excitement or interest or entertainment. What they read in the daily newspapers to-day is forgotten to-morrow.

"But this is not the case with the business newspaper. Business men need the service of these papers in the conduct of their every-day business life. I have noted that they usually have a business paper or two in their pocket when they go home Saturday night. I do not say that they read them on Sunday, that I do not know, but I do know that they study them carefully and a great number of your readers will come to their business on Monday morning with some clippings from your paper in their pockets. They will say to their associates:

(Continued on page 40)

How Hardwareman Got Radio "Bug"

Obtains Information From Well-Informed Boys in Locality—Knowledge of Radio-Telephony Grows Both Among the Boys and Store Proprietor—Receiving Set Now Placed in Store With Antennae Above Counter—Miniature Outlay of Crystal Set in Window Develops Sales During Summer Holidays

"WHEN I placed my first order for radio equipment last May I was almost totally ignorant of the requirements of the amateur enthusiast. I felt that the boys in the locality were just commencing to become anxious to learn wireless telephony, and some had already started to build their receiving sets, purchasing odds and ends such as copper wire, batteries, etc., which were carried in stock. We could not supply them with all their needs and most of the business was lost. It appeared to me that many of them were soon past the amateur stage, and from the enquiries they would make I was convinced that we should go after this trade. Becoming interested, the first order for parts was placed in May last, leaving it to the supply house to forward an assortment of the more inexpensive equipment," said W. D. Otter of the Montreal West Hardware Co., when relating to Hardware and Metal how the first step was taken in endeavoring to secure the business from radio enthusiasts.

Continuing, Mr. Otter stated that within two days after the goods arrived they had been purchased by the smaller boys in the district. Only the smaller, more inexpensive parts had been sent by the supply house, such as copper wire, aluminum, switches, binding posts, etc., and the boys soon recognized the miscellaneous articles required. It was at this time that Mr. Otter himself got the radio "bug," and from then on he read every article he could lay his hands on relative to the radiophone industry. Boys, some of whom had already built their receiving sets and had them in working order, continued to come to the store asking about some certain part of equipment. In all probability the part was not in stock and both store proprietor and the boys would get together and discuss the improvement if this particular item was attached rather than some other appliance. In this way Mr. Otter became a fairly well-informed radio enthusiast.

"My first impression, on deciding to carry a line of these accessories, was that they would sell well until the summer holiday seasonn, but would then become quiet. Many people go to the country for this season and have little interest in radio. However, I have found that the mid-summer months have been particularly good because boys are out of school and devote some of their time to building their sets," continued Mr. Otter.

Doubtless, by fall, radio will become even more popular because of the long evenings when entertainment is offered. The younger folk will have by this time become almost professionals in assembling sets, and interest will be conveyed through them to fathers and mothers. With progress made in this direction the sale of the more expensive phone sets should become more extensive, and rather than separate parts constituting practically the whole of the business now being done, complete sets should sell well.

Receiving Set in Store

A miniature outlay of a crystal set in the window recently attracted a good amount of attention, and helped to first develop sales a great deal. It clearly showed each part required to complete a set, although the antennae were only about four feet long. Realizing such good results from this it was decided to place a set on the inside of the store capable of receiving from city broadcasting stations. The antennae were placed over the counter near the ceiling, and the remainder of the set in full view of anyone entering the store. At hours when messages are sent or concerts given through the down-town stations people can see and hear just what can be accomplished.

A seasonable combination of lines in window display is that shown herewith including ammunition, flashlights, rifles, camp stoves, kettles and other such hunting equipment for the Fall shooting of ducks and big game in one window and heaters in the other window. Oil heaters are shown along with the coal heaters at the change of the seasons. Note that prices appear on all lines shown. Under the banner showing ducks on the wing appears a sticker on the window asking "Are you Ready?" Bowers Bros., of North Battleford, Saskatchewan, are going to be ready, that's sure.

Turnover—What it is, What it Does

Deliberations of the University of Nebraska on Subject Vital to Every Retailer—Rate of Turnover is the Measure of a Manager's Ability—Capital Turnover Takes Three Forms—Six Reasons Given for Importance of Turnover

UNIVERSITY of Nebraska has recently embarked upon a research dealing with business and business methods. It is one other evidence of the growing interest and importance attached to the science of retailing and the economy of distribution. In a bulletin they have just issued on the question of turnover, they deal with some of the fundamentals of business success and administration which it is well to keep ever fresh in the mind. This year, more than many that have passed, is one in which great attention is being given to the question of turnover and its importance to the well-conducted business. The term, turnover or stock-turn, is a familiar one and the rapidity with which a stock of merchandise or commodities moves in trade may be taken as a measure of a manager's ability.

What is Stock Turnover?

In defining the term, turnover, the bulletin of the Nebraska University says:

To the manufacturer who makes over the form of the materials which he buys before he resells them at an increased value, the rate of turning his entire investment in working capital may be more significant than the rate of turning that portion invested in stock of materials or commodities. For him the cost of goods sold consists not alone of purchases of materials, but also of labor in the form of wages paid, fuel, supplies and other elements of manufacturing, and turnover is consequently a more complex matter. He usually conceives of turnover as meaning the turning of his working capital as a whole rather than of only that portion which is immediately invested in merchandise materials.

Capital turnover may, therefore, be considered as taking three forms:

In the first place it is the turning of the amount of capital invested by the merchant in merchandise. This rate may be found by dividing the cost of goods sold by the average amount of working capital invested in merchandise during a given period.

In the other two forms turnover, as viewed by the manufacturer, may refer either (1) to the annual rate of movement of the entire working capital invested in his business or (2) to the rate of turning his total investment of capital, fixed and working, which may be employed in the business. These two forms of turnover may be found by dividing in the first instance, the cost of goods sold by the average amount of the entire working capital, and in the second instance by dividing by the amount of the total investment. The former method gives the turnover of the entire working capital of the manufacturer, and this corresponds roughly to the merchant's stock turnover within a given period. The latter method shows the turnover of the total invested capital. Each one of these rates is important and must not be overlooked but the turnover of working capital is given particular attention because of the fact that it can be speeded up and managed more advantageously than can that of the total investment.

Importance of Turnover

Six reasons are assigned for the importance of turnover to the successfully operated business.

1. Increasing the rate of stock turnover is one means by which a manufacturer or a merchant may increase his sales of goods without a corresponding increase in expenses. It must be borne in mind that operating expenses include both indirect, or fixed, and direct expenses. The former include such items as insurance, rent, interest on borrowed money, and taxes, while direct expenses consist of wages of the sales force, advertising and the like. A high turnover distributes the fixed expenses over a larger number of units, and thereby reduces the cost of handling each unit sold. So long as the fixed expenses and the profits on each unit sold remain the same, increasing the number of annual turnovers will make possible a greater net profit on the same capital invested in the business.

Even though the percentage of profit on an article is only 15 per cent., if it is earned often enough, in a year the turnover on money, or rate of profit on investment may be many times 15 per cent. It has been found that an article like Uneeda Biscuit may turn over as many as 52 times a year, and a dollar invested in such goods might,

(Continued on page 56)

The Prince Edward Home Guards

Under command of Lieut. Colonel Moneysaver, marching to the tune of Cash and Lower Prices, invaded Carter Bros.' store last Saturday, 387 strong, and retired with a goodly amount of merchandise in Hardware, Agateware, Tinware, Cement, Paint, Oils., etc., in their possession, and were more than pleased with the prices they paid and the service they received. Carter Bros. naturally were delighted with this invasion as they waited on 37 more people than on the corresponding Saturday of a year ago, and their sales were $160.18 greater.

CARTER BROS. - CASH HARDWARE

CARTER BROS., *Picton, Ont., use a number of original ideas in connection with local publicity and they are meeting with good success in so doing. The above ad. is of novel style and points out that $160.18 more business was done on that Saturday than on the same day a year ago. Carter Bros. give wide publicity to actual figures of the increase in their business. They find this has somewhat of a psychological effect because people like prosperity and activity and the indication of this attracts them to this store.*

In a news item appearing in the local paper it was pointed out that sales to the amount of $468.42 were made on another Saturday, 76 more customers than on the corresponding Saturday a year ago. This record is being consistently maintained by following out the cash system, passing on to customers the benefit of cash prices.

Another idea which this store makes use of is the wrapping of all parcels in a distinctive wrapper. This wrapper is a deep red shade and quite recognizable at a distance. When the public see a parcel carried on the street wrapped in this paper they know it came from Carter Bros. and was paid for. The latter feature makes people proud to carry parcels so wrapped and each parcel is an advertisement for the store.

Farmer as an Auto Accessory Prospect

Some Interesting Figures Compiled Showing Farmers Own by Far the Most Motor Cars Even in Ontario—Tradesmen Second on List With Merchants Third—No Class Distinction, Laborers Own Nearly as Many Cars as Travellers

THE KEEN interest which was taken in the automobile display at the Canadian National Exhibition, which has just closed for this year, is an indication of the fact that an active period is ahead for the automobile industry. Manufacturers state that reductions have brought present prices to very attractive levels and that much buying interest was shown on the part of people who have never before driven automobiles. Many of these placed orders for delivery this fall. With prospects good for the use of motor cars this fall and winter, the automobile accessory department will in all likelihood continue its activity throughout the winter months.

Some figures have been secured by Hardware and Metal which are representative of the province of Ontario but which are typical of the country as a whole. Classifying all our owners by occupation, figures show that out of a total of 181,978 passenger cars registered last year over one-third, or exactly 64,045, were owned by farmers. Tradesmen constituted the second largest owning class, with 23,680 cars to their credit, with merchants in third place, owning 16,700 cars. Other figures showing the utility of the motor car in divers occupations are: Commercial travellers, 5,311; doctors, 3,934; real estate agents, 1,098; contractors, 2,961; drovers, 651. Any idea that the motor car is a source of class distinction is shattered by the figures showing laborers as owners of 4059 cars.

At the beginning of 1912 there were in use in the Dominion a total of 21,682 passenger cars and trucks. Ten years later, at the beginning of the present year, this total had been increased more than twenty-fold to 454,040. A conservative estimate places the number of passenger cars and trucks in use in Canada today at 500,000.

In the number of cars in use, Canada is exceeded only by two other countries in the world—the United States and Great Britain; while in the proportion of cars to population—one car to every eighteen persons—the Dominion of Canada ranks next to the United States.

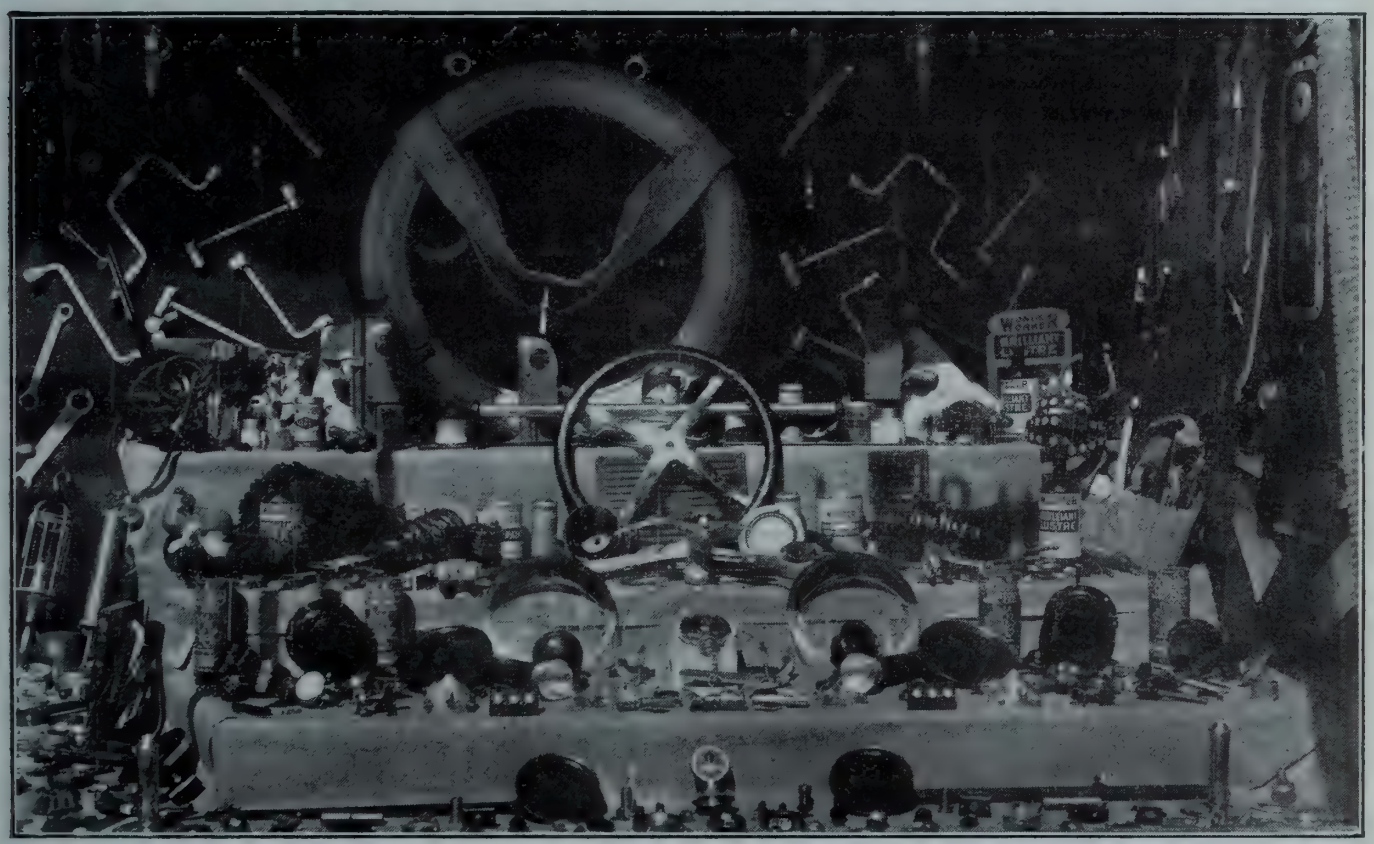
The country ranking next to Canada in motor vehicle registrations is France, with 236,148—not quite one-half this country's total. The next in order is Argentina, with 70,000, a total about equal to the registrations in the Province of Saskatchewan.

The Provinces of Canada in 1921, from automobile registration and licence fees, received a total revenue of $7,769,493. The revenue of the Province of Ontario last year from this source was about $3,000,000 and this year's revenue is expected to exceed $3,500,000.

It has been estimated from available statistics that the number of passengers carried by motor cars in 1921 was five times as great as the number carried by railroads.

In the 500,000 cars in use in Canada, the owners have at an average of $600 per car, an investment of $300,000,000.

(Continued on page 60)



In planning to stimulate business in the auto accessory department it is well to keep in mind the nature of the prospects for such business. The figures given in the article above show that farmers are much the largest class of motor car owners. With these figures in mind the hardwaremen's local prospects might be surveyed and merchandising plans figured accordingly. Such extensive displays as that shown here by Leduc Hardware, Montreal, can be designed to appeal to certain classes of motor car owners. Supplying gasoline at the curb helps draw motor owners to this store front when such window displays as this are expected to do the rest.

Involved Points in Taxes

THE NEED for a thorough study of the details of the various tax regulations is indicated by points which are continually being raised by retailers. If the present taxes are likely to continue, as would seem to be the case judging from the manner in which the government is developing plans of direct taxation, it is just as well that all details of these taxes be understood fully. In connection with the Sales Tax the point is raised this week by a prominent manufacturer that retailers have stated that they do not need to pay Sales Tax on the gross amount of the invoice when they are entitled to and take advantage of discount terms. From rulings received it is evident that the retailer is entitled to revise Sales Tax as applied on an invoice so that it is figured on the net value of the goods. In other words if a manufacturer bills a retailer for $100 of merchandise which with Sales Tax will be $104.50 and a 2 per cent. discount is taken by the retailer, the tax should be figured only on the $98. By figuring discount on the gross amount the retailer gets a slightly larger discount and by figuring Sales Tax on the gross amount a slightly higher Sales Tax is arrived at. Provision has, however, been made that where the buyer takes advantage of the discount a credit may be taken by the seller in his next tax return for the tax paid on the amount of such cash discount.

In regard to the stamp taxes retailers have taken a definite stand against the paying of stamp tax on drafts drawn on them. Hardwaremen in Kingston and other points are already pointing out that they have to suffer loss of stamp tax on drafts returned, neglect to put on sufficient stamps on cheques, in dealings with customers and that every branch of trade should bear its own expenses in collection.

Factors at Root of Improvement

THERE ARE several recent developments which would seem to lend justification to a feeling of optimism concerning the business outlook. Reports of the extent of Canada's Western crop this year indicate that a yield of over 370 million bushels is to be expected, an increase of ten million bushels over the bumper year of 1915. While this will give a larger total crop the yield per acre is not so high as the number of acres under cultivation has increased practically one third. This fact is in itself indication of the rapidity with which the arable land in Western Canada is being put under cultivation. In the interests of the farmers, who in many cases owe large bills to local retailers, it is to be hoped that this large crop will bring monetary return sufficient to reward them for the difficulties they have suffered in recent years. Some fear has been expressed that so urgent are the farmer's needs for money that the whole crop will have to be marketed in a hurry with consequent reduction in price.

That national revenues are improving in volume is indicated by the report of customs collections throughout Canada for last month. Toronto led with an increase of over a million dollars in customs and excise receipts. The Sales and Stamp taxes brought considerably increased revenue. The use of revenue department stamps on cheques, drafts, notes, etc., in place of the common usage of post office stamps, would allocate this excise revenue to the proper departments so that some intelligent knowledge would be had of the revenue producing ability of various branches of the mail service. Big gains in total income from these sources are reported from a great many cities indicating that the improvement is general. It is not due solely to the increase in these impositions but in the broader movement of merchandise which is now taking place.

Inflation in Market Values

A TEMPORARY inflation of values is now generally apparent to those who have followed hardware market developments during recent weeks. The majority of price changes have been in an upward direction. While several declines have also been announced during this period, such reductions are chiefly on lines which have not recorded any change for some considerable time, and where manufacturers have been able to effect economies in production and quantity distribution and are not usually attributed to any lowering of raw material costs. The trend of basic elements in manufactured hardware has been steadily on the upward swing of the pendulum, and while it may bring a further reaction in a few months time, the current movement itself is described as the natural rebound from the deflation of 1921. One prominent Canadian hardware manufacturer advises Hardware and Metal that owing to the increasing cost of raw materials during the past few weeks, they now contemplate advancing practically everything they manufacture, concluding with the statement that "there is no other course open but price increase."

Another Co-Operative Failure

THE FAILURE of a wholesale and retail co-operative society in the State of Illinois, as announced recently, adds another to the long list of failures of similar organizations. This particular scheme was more enterprising than others of its kind, in that it involved a wholesale house and 67 branch stores. $80,000, it appears, was paid in as capital and $385,000 is represented as borrowed money from the various coal miners' unions, which means that the society has lost $185,000 or a fraction more than $5,000 a month.

Whether the recent coal strike had anything to do with increasing the loss recently is not stated, yet it is apparent, says a U. S. exchange, that when the coal miners could not succeed with an evident plentiful supply of money, it is plain to be seen that other attempts with less resources could not hope to get away with it. This has been the history of a great many co-operative retail stores started in various parts of both Canada and the United States, that have resulted in failures.

Organizations of consumers bent upon reducing the cost of living, who have attempted similar co-operative societies must now be impressed with the success, or rather the lack of it, that attends such ventures. Labor organizations have been especially prone to such attempts to reduce living expenses. It is evident that co-operatives cannot run a store any cheaper than any individual running on the same basis, and the fact that many of these co-operatives are headed by inexperienced managers, makes the likelihood of success even more remote. Members soon learn that prices as between co-operatives and independents do not vary so much, and the latter giving first-class service usually get the greater patronage.

OPEN SEASONS FOR GAME, 1922

The open seasons here shown are inclusive of both dates.

The term "rabbit" includes hare; "quail," the bird known as "partridge" in the South; "grouse" includes Canada grouse, sharp-tailed grouse, ruffled grouse (known as "partridge" in the North and "pheasant" in the South) and all other members of the family except prairie chickens, ptarmigan and sage hens; "introduced pheasant" is restricted to the old world.

Persons are advised to secure from provincial game departments full text of game laws in provinces where hunting is contemplated as provisions of minor importance are omitted from this table.

OTHER GAME

(Season closed in provinces not mentioned)

BIG GAME

Antelope

Manitoba..Dec. 1-Dec. 10*

Bear

Quebec ...Aug. 20-June 30 (Unprotected in other provinces)

Sheep and Goats

Alberta	Sept. 1-Oct. 31 a...
Br. Columbia	Laws of 1922 not received.
Northwest Terr. .	Sheep— Dec. 1-April 1 a.. Goats— Sept. 1-April 1 ...
Yukon	Aug. 1-March 1* ...

DAYS EXCEPTED

All hunting prohibited on—

SUNDAYS.—In all provinces east of the 105th meridian, except Quebec.

Quail—Closed season in all provinces except British Columbia. a. * Males only. a Additional provisions and exceptions. N Laws of 1922 not received.

Under the regulations for the protection of Migratory birds the season is closed on band-tailed pigeon, swan, woodduck, eider duck, auk, auklet, bittern, crane, fulmar, gannet, grebe, guillemot, gull, heron, jaeger, loon, murre, petrel, pufkin, shearwater, tern and all shorebirds (except woodcock, Wilson snipe or jacksnipe, black-bellied and golden plovers and yellowlegs) in the United States and Canada.

a. ADDITIONAL PROVISIONS AND EXCEPTIONS.

Alberta.—All big game must have horns at least 4 inches long. Deer, moose and caribou, in Forest reserves of Rocky Mountains, under special license, Sept. 1-Oct. 31.

British Columbia.—Open seasons on big game and upland game fixed annually by Order-in-Council which may be obtained from Secretary, Game Conservation Board, Vancouver, B.C. Waterfowl, rail, Wilson snipe, black-breasted and golden plovers, yellowlegs, in Northern and Eastern Districts, Sept. 2-Dec. 17, and in Western District, north of 53rd parallel. Sept. 9-Dec. 24; goose, brant, Western District, south 53rd parallel, Nov. 11-Feb. 26; other migratory game birds, south of 53rd parallel, Oct. 21-Feb. 5. Northern District includes Atlin Electoral District and north of main line of Grand Trunk Pacific Railway and east summit Cascades Eastern District, east summit Cascades and south Grand Trunk Pacific Railway. Western District, west summit Cascades and south Atlin Electoral District.

New Brunswick.—Deer, on Grand Manan, Campobello, and Deer Islands, no open season. Partridge, season may be opened by order in council.

Northwest Territories.—Additional season on Caribou and sheep, Aug. 1-Oct. 1. Female caribou, Mountain sheep or mountain goat with young at foot, and their young at foot, no open season. Governor-General in Council may, by regulation, alter seasons.

Nova Scotia.—Big game, on Cape Breton Island, no open season. Caribou (male) in Inverness and Victoria Counties only. Ruffed grouse, Oct. 15-Nov. 14; other grouse, no open season. Waterfowl, rail, coot, gallimule in Cumberland County, Sept. 15-Dec. 31.

Ontario.—Moose, deer, reindeer or caribou north of Canadian Government Railway, from Quebec to Manitoba boundary line, Sept. 15-Nov. 15; south of French and Mattawa rivers, Nov. 5-Nov. 20; north and west of French and Mattawa rivers, Oct.25-Nov. 30. Ruffed grouse, commonly known as Partridge, Nov. 5-Nov. 20. Not more than 10 per year to one person. Pheasant or prairie fowl, season closed until 1923.

Quebec.—Moose, south of St. Lawrence River, Sept. 20-Dec. 31.

Saskatchewan.—Deer, moose (Males only) caribou, north of Township 34, Nov. 15-Dec. 14; South of Township, 35, no open season.

Newfoundland.—Caribou, also Aug 1-Sept. 30. Goose, unprotected.—(From Rod and Gun).

Events in the Trade

NEW STORE

Armand Gravel has opened a hardware store on Laurier Ave., West, Montreal.

BUSINESS CHANGES

The Ripley-Peck Hardware Co., of Windsor, Ont., has been succeeded by Lafeve & Wallace.

Cleve Fox has taken over the Lander hardware store, at 20 Simcoe street, Oshawa, Ont.

Harry Boniface is now sole proprietor of the Boniface Hardware store, Hamilton, Ont., succeeding W. Boniface, senr. This business has been established for 29 years, being one of the oldest hardware stores in the locality.

MOVE TO NEW PREMISES

The Toronto warehouse of the Consumers Cordage Co. has moved to larger premises at No. 204-6 King Street W., Adams Building, the space at their former location on Church Street having proved inadequate to existing needs.

FIRE LOSS

Fire of undetermined origin broke out in the hardware store of F. O. Ranger, 1236 Ontario St., Montreal, and considerable damage was caused to store and stock. It is thought that the fire started in a pile of wall paper at the rear of the store.

PARTNERSHIP DISSOLVED

The firm of Cohoon and Pugh, Montreal, manufacturers' agents, has dissolved. G. S. Cohoon continues the business alone.

PERSONAL

T. Mortimer & Co., manufacturers agents, Toronto, have been appointed agents in the Province of Ontario for the Societe Generale de Coutellerie et Orfevrerie, 31 Rue Pastourelle, Paris, France, manufacturers of high-grade French cutlery, including pocket and pen knives, table knives and forks, paring knives, butcher knives and "Sabatier" cooks' knives.

J. A. Pelletier, formerly with Lamontagne Limited, Montreal, has severed his connection with that concern and has accepted the position of sales manager with the Asbestonos Company at East Broughton, Quebec. Mr. Pelletier will open an office and warehouse in Montreal for the Asbestonos Company, where a complete stock of brake lining will be kept.

OBITUARY

The death is announced in Claremont, Ont., of Mrs. George Cooper, mother of Frank Cooper, hardware merchant, Claremont. The late Mrs. Cooper, who pased away after an illness extending over many months, was in her seventy-first year.

The death occurred this week in Dixie, Que., of D. W. Lockerby, a prominent figure in Montreal business circles for a number of years. Mr. Lockerby was born in Montreal, and was for a long time connected with the Alex. McArthur Co., roofing manufacturers. He then went into business with J. H. McComb as partner, the firm being known as Lockerby, McComb, Ltd. Failing health in late years obliged Mr. Lockerby to retire from active business affairs.

After a prolonged illness Rupert MacDonald Watson, prominently associated with Canadian explosives industries, died at his home in Montreal on Sunday, September 10. He was fifty-eight years of age and was born in Hamilton, the son of James Watson, late managing director of the Hamilton Power Co., now known as Canadian Explosives Ltd. Mr. Watson came to Montreal about thirty years ago to take up his employment as assistant to the president of the Dominion Cartridge Co., with whom he remained until a few months ago, when both he and the president, B. Brainerd, retired.

THIRTY SEVEN YEARS A HARDWAREMAN

The death of John Fennell of Kitchener, Ont., as briefly referred to in last week's issue of Hardware and Metal, removes one of the pioneer hardwaremen of this province.

Deceased came to Kitchener when it was a village, starting up a hardware store of which he has since been the active head. He was born in Cobourg on August 8, 1837, and received his early education there. In 1885 he began his career in the hardware business, conducting a store at Stratford for three years before coming to Kitchener. Mr. Fennell was identified with the early growth of Kitchener, serving for more than a quarter of a century on the school board. He was also associated with the Liberal-Conservative party in politics, being president of the North Waterloo Association a number of years. He was also the first president of the local board of trade and was still a member of the board at the time of his death, and was instrumental in the organization of the Economical Fire Insurance Company, of which he has been president for over a decade.

VETERAN FILE MANUFACTURER DIES

Port Hope, Ont.—Frederick Outram, one of Port Hope's oldest and most enterprising citizens, died after an operation at the Port Hope Hospital.

Mr. Outram was born in Sheffield, England, in 1846, and came to Canada when 18 years of age. Entering into business with his father in the city of Montreal, they started the Outram File Works, and built up a large trade. In 1888 Mr. Outram, sr., sold his interest in the factory to Mr. Walter Grose, and the same year Mr. Grose and Mr. Fred Outram moved to Port Hope and started the Globe File Factory. Year after year the business increased, and the factory was one of Port Hope's chief assets, and furnished employment to a large number of men.

Twenty years ago the Globe Company sold out to the Nicholson File Co., and since then Mr. Outram had lived retired.

The late Mr. Outram was at one time a member of the city council.

INCORPORATIONS

These lumber companies have been incorporated at St. John, N. B.: Elm Tree Lumber Co., Ltd., with head office at Elm Tree, Gloucester County, capital stock $24,000. Those incorporated are Theodule Roy, J. Phillip Richard and Leon P. Roy, all of Beresford.

Doaktown Lumber Ltd., with head office at Doaktown, capital stock $20,000. Elwood Burtt, of Fredericton, Edmund Story and Stephen A. Story of Blissfield, Northumberland County. Mr. Burtt recently acquired the milling property and store at Doaktown and lumber limits in that vicinity. He also acquired the milling property of the Southampton Lumber Co.

Bert. V. Holmes, Akerley Holmes, Samuel Holmes, Hazel Murray, Grace Rutledge, all of Blissfield, are incorporated as James H. Holmes, Ltd., to acquire the business of James C. H. Holmes & Sons. The company is to carry on a general lumber business with capital of $45,000, with head office at Doaktown.

COAL FROM ENGLAND

Six thousand tons of English coal have been delivered in Toronto for the Consumers Gas Company.

Chas. Adcock, Montreal, was interested this week in showing J. Mohr of Marshall Wells Alberta Co., Edmonton, and Frank Rowat of Marshall Wells Co., Winnipeg, some of the manufacturing plants of Montreal.

The Facts About Beatty Bros., Ltd., and the 1900 Washer Co.

SOME weeks ago Hardware and Metal stated that negotiations were under way between Beatty Bros. Ltd., and 1900 Washer Co., whereby the latter company would be merged with Beatty Bros. Ltd. Many contradictory reports have appeared in newspapers and other publications regarding the merger. The following statement has been made by Beatty Bros. Ltd., to Hardware and Metal:

"The 1900 Washer Company, of United States and Canadian Branch was owned by Mr. Crary, a very successful and wealthy business man of Binghampton, N. Y. He had entered the washer business with a manually operated washer in 1898, putting the Gravity on the market in 1906 and the Cataract in 1915. Prior to 1915 his company had sold a swinging tub machine driven by electric motor and resembling the 1900 Gravity in method of washing. Beatty Bros. Limited had for many years made wood-tub, dolly style electric washers, but had felt the competition of the 1900 company. They had approached the 1900 company with the idea of making some arrangement, but these overtures came to nothing. However, a year ago this last spring, Mr. Crary died, though still in the prime of his life and presently negotiations were in progress again. On Sept. 1st the business was taken over, with all patents and copyrights and exclusive rights to sell anywhere in the British Empire. The complete 1900 line will be manufactured in Fergus, a large stock of all machines having been accumulated to tide over the period of transfer. Beatty Bros. Limited, will distribute through their eight wholesale warehouses in Canada."

EDDY OFFICIALS VISIT WEST

Lethbridge, Alta.—Chiefs of the E. B. Eddy company of Hull, Quebec, have arrived in Edmonton on a two months' tour of the west. In this party are J. T. Sherriff, vice president and assistant general manager, and John F. Taylor, secretary and assistant sales manager.

This is the vice president's first visit to the west and he readily admits that the trip is an "eye-opener." On all sides he has been beseiged with hospitality and that is something which will long be remembered by him. He finds that the spirit of the west is something to yearn for, and well justified a trip across Canada.

The executives of the company are making the trip for the purpose of getting in closer touch with the selling agencies.

Nearly ten thousand residents of Cornwall, Ont., and surrounding districts turned out on the invitation of the Retail Merchants' Association to take part in and watch the first street masquerade carnival and dance ever held in Cornwall.

Western Canada News

Lorne Muir, manager of the hardware department of Revillon Wholesale Ltd., Edmonton, spent last week in Banff.

The Thos. Davidson Mfg. Co. Ltd., of Montreal, has opened a British Columbia branch on Powell street, Vancouver B. C., next to the Simson Balkwill plant.

The Grill Sheet Metal Works, Vancouver, B. C., whose partners have been Albert Grill and I. N. Kidd, has been dissolved.

Clifford Wilkinson, manager of the Wilkinson hardware store, of Stettler, Alta., spent a very pleasant holiday in Calgary.

R. S. Hodson, retired hardware merchant of Maple Creek, Sask., motored through Calgary on his way home from Banff.

Chin, Alta.—Capt. Orr, who arrived on the 1st inst., is taking the position of manager of P. Lund's hardware and lumber yard here.

Col. Stark, of Stark, Seybold & Company, Limited, Montreal, while in Winnipeg, called on the J. H. Ashdown Hardware Company.

Gordon C. Hewer, who a few weeks ago started construction of a building on Twelfth avenue west, Vancouver, B. C., has now got in his stock and is carrying a full line of shelf hardware and house furnishings.

C. H. S. Bamford, sales manager of the J. H. Ashdown Hardware Company Limited, Winnipeg, has just returned from an enjoyable fishing trip at Kenora. Mr. Bamford had the pleasure of catching one of the largest pike caught there this season. It weighed 15 pounds and was about 3 feet in length.

The Calgary Paint Club held their second annual picnic at Bowness Park, west of Calgary. Most of the employees of the paint houses with their wives and children forgot about paint for the afternoon and concentrated on fun with results that appeared highly successful. A busy committee was well repaid for its efforts by many evidences of sincere enjoyment.

Metals Ltd., of Calgary and Edmonton, have inaugurated a new price service to their customers in the form of three monthly price lists. The price lists are in booklet form, each with a different colored paper, one covering plumbing and heating supplies, the second covering fittings, valves, engine trimmings, tubular goods and kindred lines, and the third general hardware and blacksmith lines. This service is a departure from any in use in Western Canada up to date, each article being illustrated by a small, neat cut. The booklets are gotten out neatly and are attractive and the information they contain is very easy to locate.

Peart Bros. Hardware, Regina, Sask., has bought out the retail business of British American Paint Co. of that city.

H. B. CARBRAY TO SEATTLE

H. B. Carbray, advertising manager of the Wood Vallance Co., Ltd., Winnipeg, who for the past thirteen years has been associated with this firm, has severed his connection and has taken a position with a large wholesale hardware house in Seattle.

The warehouse and office staff gave him a splendid send off in the way of a dance and corn feed in the Odd Fellows Hall and presented him with a black walrus fitted club bag. The sales staff entertained him at the home of Don Fergusson, Oak Street, River Heights, Winnipeg, Col. Gillespie on behalf of the salesmen presented Mr. Carbray with an illuminated address and a silver waiter, two silver entree dishes and a silver bread tray.

Mr. Carbray got his early hardware training with Lewis Bros., of Montreal, and travelled out of Moose Jaw for nine years for Wood Vallance Limited, after which time he came to Winnipeg and was in charge of the advertising department for over three years.

CROP RETURNS BRING TRADE IMPROVEMENT

Calgary, Alta.—A distinct improvement in wholesale and jobbing lines, hardly reflected as yet in the retail business, is noticeable in the Calgary district as the direct result of unusually good crop returns in southern Alberta.

SASKATCHEWAN FARMERS MAY SHOOT DUCKS OUT OF SEASON

An order in council was issued recently at Regina by the provincial government making it legal for farmers to shoot out of season, wild ducks which are damaging their crops.

Many reports have been received from districts where the birds are causing much havoc in the grain fields and at Duval, Sask., they are said to be so plentiful that the efforts of two boys employed for the sole purpose of driving them off proved unavailing.

HUNTING SEASON OPENS

The season for ducks and geese opened on September 15th. Ducks are said to be very plentiful throughout Manitoba and from reports received from the Department of Agriculture it is evident that chickens will be found in large numbers in almost all districts. The season for chickens is from October 16th to 21st this year. Last year several requests were received by the department urging that the season for chicken be lengthened.

Postmaster-General Expresses Views Regarding C.O.D. System

Claims Department Stores Will Not Benefit, But That New System Will Work Out to Advantage of Smaller Retailers

THE Postmaster General does not think it advisable to hold up the new C. O. D. system, details of which have appeared in previous issues of Hardware and Metal. A request was made that the matter be held up for 6 months in order to give retail and other associations an opportunity of making any suggestion which they might think advisable in connection with the working out of the new plan. The new C. O. D. was sprung suddenly, and becomes effective Oct. 1. If the matter is handled as the Postmaster General's letter suggests, and it can be shown that the new system will pay its own way, there will probably be no great objection from retailers. The retailers feel however that a close watch should be kept on the cost of operating innovations of this kind, and strongly object to deficits being charged up against other departments. The letter from the Postmaster General follows:

Ottawa, 8th September, 1922.

W. F. Macpherson, Secretary, The Ontario Retail Hardware Association, Prescott, Ont.

Dear Sir:—

I have your communication of the 6th inst., quoting a resolution passed at a meeting of the executive of your association held in Toronto, Monday, 2nd instant, to the effect that the introduction of the C.O.D. service in connection with mail matter should be deferred for six months for the reason that the extension of this service will be an advantage to city departmental stores and mail order houses, and will work to the detriment of the retail stores, and will impose an additional burden on the postal service, while at the same time competing with the National Railway Express Service, and I am inclined to the opinion that the resolution was passed on a misunderstanding of the whole situation, and that the fears of your association are groundless.

As a matter of fact no request for C. O. D. service was made by any departmental store or mail order house in Canada. As I understand it they make very little use of the C. O. D. service which the express companies have provided for many years, for the reason that it is becoming a general practice to pay the cost of transmission of goods and as the goods are ordered from catalogues in the hands of the customers and the prices are correctly stated, all difficulty is removed in regard to enclosing the proper remittance, that this has become the established method of conducting mail order business. It is not expected that their method of doing business will be changed nor that the C. O. D. system in connection with mail matter will have any material effect in so far as these houses are concerned.

To tell the truth it is expected that the retail stores will be the ones that will benefit most as they do not as a rule issue catalogues, and a C.O.D. system would therefore be a distinct advantage to them as rural customers would be able to order goods by mail even though they have no knowledge as to prices, the C. O. D. filling the deficiency in this respect. In fact it has been local business firms, particularly those engaged in repair business, such as jewellers, automobile accessory manufacturers, etc., who have been pressing the Derpartment for the establishment of the C.O.D. service in connection with mail matter. It is in the response to the request of such firms that it is being established and it is proposed to give it a fair trial.

It is not intended that it should add any expense to the Department, in fact it is being placed on a basis that will enable it to pay its way and possibly yield a small profit. It is the intention that very close check will be kept on the operation of the system, so that full and exact information will be obtained as to exactly how it operates and who are taking advantage of it.

If, after the system has been given a fair trial, your association has evidence to show that it is working out to the detriment of the retail merchants and to the advantage of the departmental stores and mail order houses, and will submit the evidence to us, then that phase of the question will be carefully considered.

Yours sincerely,

CHAS. MURPHY.

Further Discussion of Hobbs Hardware Matter

NO FURTHER statements have yet been made in connection with the charges of the London retail hardware men regarding the alleged selling by the Hobbs Hardware Co., of hardware in a retail way at wholesale prices. C. A. Whitwam, managing director of the Hobbs Hardware Company stated to Hardware and Metal that owing to the Western Fair being held at London this week, it had not been possible to call a meeting of the directors of the company, and a stateemnt from them was therefore not forthcoming at the present time. The meeting, it was expected, would be held within the next few days.

Secretary Macpherson of the Ontario Retail Hardware Association has this week sent the following letter to the Canadian Wholesale Hardware Association and to the jobbers of Ontario.

"Dear Sirs:

The following resolution was passed at the last convention of the Ontario Retail Hardware Association, and duly published in Trade Press:—

"That as a matter of principle, the function of the jobbers should be to sell to the recognized retailers who carry stocks of goods offered for sale, except special cases, such as factories, etc., when a slight preferential in prices should be allowed the dealer."

At a meeting of the executive held in Toronto, September 4th, several complaints were received regarding certain wholesale houses who were selling direct to the consumer at practically wholesale prices, vitally affecting the trade of the retail stores in localities in which these wholesale houses were situated, and that this practice was growing, to the great detriment of the retail dealers.

The executive desire to express their disapproval of this unfair competition, and while recognizing the fact that the wholesaler has a true status in the distribution of merchandise, believe that to function properly with the full co-operation of the retailer, this practice will of necessity have to be discontinued.

W. F. MACPHERSON."

SPECIALIZED NEWSPAPERS AND C. N. E.

(Continued from page 32)

"This is the situation, I can show it to you in this clipping." For that reason, gentlemen, I say that yours is the greater obligation, because you are leaders, because you are helping to build up the business fabric of the country."

We appreciate the honor the C. N. E. has conferred on the Press in singling out a day in their honor. In a larger sense, however, every day is "Press Day" for some of the publishers in our association. Our publications are of such a varied nature and cover such diversified fields that in nearly every case there is one or more publications devoted to the industry that gives the day its name.

Quality Not Quantity

Now, I believe the directors are interested not merely in bringing the numbers but in bringing the men and women with a stake in the country—the responsible people, the people of large buying power. To put it in newspaper language, you are interested in class in circulation rather than in the mass circulation.

In every one of the lines mentioned above, our publications reach a large percentage of the best men and women engaged in the business, and reach them with publications that they have come to regard as their business associates.

I believe the big development of the future for the Canadian National Exhibition is to develop the exhibits of the various industries as units.

I can assure you the publications in our association will be very glad to co-operate with you, not only in organizing exhibitors and inducing them to guarantee the cost of the building, but in making the buildings a success after they are erected by bringing to the Exhibition the class of people these exhibitors want to reach. For, after all, the real success of an Exhibition does not consist in large buildings or elaborate exhibits but in the class of people who attend.

Markets at a Glance

CURRENT hardware market developments continue to indicate a temporary inflation of values. The majority of price changes this week are again of an upward nature. Among the increases noted are such products as galvanized pails, tubs, garbage and ash cans, tanks and sinks. Range boilers are also higher through revised discounts, while bright, brass and bronze wood screws, stocks and dies, certain makes of files, jute and duck horse blankets, rasps, pig iron, bench axes and wire nails are included in the lengthy budget of similar revisions. New quotations are now in effect on various styles of spring hinges and screen door sets.

VARIOUS reductions are in evidence, the primary change of this nature centering on lawn mowers. The Stanley line of boxwood rules, Wostenholm stainless steel cutlery, hack saw blades and aluminum numerals, are other items appearing at easier price levels. Linseed oil prices record the third reduction in as many weeks.

FROM the viewpoint of hardware manufacturers, the coal situation still contains plenty of room for improvement. Production of soft coal in United States fields is limited by current transportation conditions, and while anthracite mines have resumed operations, this handicap also has to be faced in distribution. Coupled with the rising costs of certain raw materials, higher fuel prices have increased production costs and manufacturers in several instances are confronted with advancing quotations.

COLLECTIONS are reported to have improved during the past two weeks, this development being attributed in certain quarters to the favorable crop returns. With the advent of fall weather, a seasonal call for oil and electric heating appliances, stove accessories and lamps and lanterns is being experienced. More interest is evident in furnace and repair work.

WESTERN centres record the fact that with the opening of the duck shooting season, guns and ammunition continue in brisk demand.

Montreal, Que.

MONTREAL, September 14.—Another long list of price revisions is recorded on the hardware markets, including both price increases and decreases. Following the firm trend of galvanized iron for some time past is the announcement of higher quotations on galvanized ware such as galvanized pails, tubs, garbage and ash cans, tanks, boilers and sinks. Range boilers are also quoted higher by manufacturers, discounts off standard list prices being revised. Another important change in an upward direction is made on bright, brass and bronze wood screws. The new base price on wire nails is given, showing an advance of twenty-five cents over former quotation. A further revision is made on boiler tube quotations, when practically all sizes of both seamless and lapweld tubes are shown at higher figures. New discounts are now available on certain makes of files, and stocks and dies have new higher quotations. Lower prices appear on the Stanley line of boxwood rules, lawn mowers, and Wostenholm stainless cutlery. Such lines as corrugated sheets, eavestrough and conductor pipe, are as yet unchanged in price.

WIRE NAILS INCREASED TO $3.75 BASE

Montreal.

The expected advance in wire nail prices is now announced, jobbing houses quoting the new base price of $3.75. This quotation again brings the local price to a higher level than other domestic markets, but both manufacturers and distributors state that higher raw material costs warrant the increased figures, and the recent revisions in wire and other wire products indicate the trend of these products.

Increased extras for galvanizing are also announced, and 1 inch and larger will now cost $3.00 per 100 lbs. extra, smaller than 1 inch $3.25 per 100 lbs. extra.

NO PRICE CHANGE YET IN TROUGH AND PIPE

Montreal.

No change is made yet in quotations on eavestrough, conductor pipe and elbows, but the market remains in a very firm position. One local manufacturer stated that he would not be surprised if higher prices were announced at any time. The stronger tendency in raw materials such as flat galvanized sheets has firmed the market for these products for some time past, and with continued strength being shown in the sheet markets increased prices are considered imminent. Present unchanged list prices and discounts are as follows:

EAVESTROUGH:

O. G. round and half round, per 100 ft. 8 in., $16.90; 10 in., $18.70; 12 in., $22.20; 15 in., $29.80; 18 in,, $37.80.

O.G. Square bead, per 100 ft.: 8 in., $15.90; 10 in., $17.70; 12 in., $21.20; 15 in., $28.80; 18 in., $36.80.

Discount 70|10 per cent.

Conductor Pipe, Round, Plain and Corrugated, per 100 ft.; 2 in., $18.40; 3 in., $22.30; 4 in. $29.60; 5 in., $40.00; 6 in. $49.00.

Discount 70|10 per cent.

CONDUCTOR ELBOWS—

Plain or corrugated, price per doz.

2 in., $5.25; 3 in., $6.00; 4 in., $10.50; 5 in., $24.00; 6 in. $29.00.

Discount 60 per cent.

EXPECT FURTHER RISE IN GALVANIZED PRICES

Montreal.

With a very firm undertone continuing in the sheet markets, prices locally remain unchanged. The firming tendency in Southern producing centres, when prices generally were advanced, has not yet affected the local market insofar as prices are concerned, although certain

distributors anticipate a change in an upward direction in the not far distant future. Having a more direct bearing on the local situation in this regard is the condition of stocks. Available supplies are none too ample, and although recent shipments from overseas have arrived, it is felt that a more active demand during the coming weeks will retain stocks at a comparatively low level. This question has been on the minds of local distributors for some time past and while it was thought that ample cargoes would reach here during the fall months from overseas, this point is again receiving much attention. Following are present prices which are very firm:

BLACK SHEETS—		
10 gauge, base	4 00	4 50
12 gauge	4 10	4 60
14 gauge	4 20	4 70
16 gauge	4 30	4 80
18—20 gauge	4 55	5 05
22—24 gauge	4 60	5 20
26 gauge	4 65	5 25
28 gauge	4 75	5 35
GALVANIZED SHEETS—		
Queens Head—		
28 gauge	7 25	7 50
26 gauge	7 00	7 25
24 gauge	6 40	6 65
22 gauge	6 05	6 30
18—20 gauge	5 35	5 60
Other Brands—		
10¾ oz.	7 00	7 25
28 U. S. gauge	6 60	6 85
26 U. S. gauge	6 30	6 55
24 gauge	6 15	6 40
22 gauge	6 15	6 40
18—20 gauge	6 00	6 25
16 gauge	5 85	6 10

These prices are for full bundles, an extra charge of from 25c. to 35c. is made for broken lots. Extra for sheets 3 ft. wide, 28 gauge and 10¾ oz., 20 cts. per 100 lbs. Further extra for sheets 4 ft. wide, according to gauge.

TIN PLATE—Coke	
20 x 28 x 100 lb. basis	12 50
20 x 28 IC, 112s	13 00
20 x 28 IX, 112s	15 00
20 x 28 IXX, 56s	9 00
20 x 28 IXXX, 56s	9 75
TERNE PLATE—	
20 x 28 IC, 112s	14 00
CANADA PLATE—	
Half bright 52s	5 00
Half bright 60s	5 10
Blued, 52s	5 25
Blued 60s	5 35
Welsh, polished, 52s	7 00
Welsh, polished, 60s	7 25
Galvanized, 52s	7 25
Galvanized, 60s	7 75

REVISED DISCOUNTS ON WOOD SCREWS

Montreal.

Through a revision in discounts quotations on wood screws are advanced to a varying extent. Bright screws show a price increase of approximately 15 per cent., while brass and bronze screws record an advance of a minor nature. Following are revised discounts:

WOOD SCREWS—	
F. H. Bright	80 5%
O. H. Bright	77½ 5%
R. H. Bright	77½ 5%
F. H. Brass	75/5%
O. H. Brass	72½ 5%
R. H. Brass	72½/5%
F.H. Bronze	70 5%
O.H. Bronze	67½ 5%
R.H. Bronze	67½/5%

STANLEY RULES ARE REVISED IN PRICE

Montreal.

The Stanley Rule and Level Co. announce a revision in prices on boxwood rules. The change in prices agrees with that made by Canadian manufacturers two weeks ago; certain lines reduced from 5 to 10 per cent. while others show little if any change.

Higher Quotations on Galvanized Ware

New Levels at Less 10 Per Cent., Former Quotation Being Less 17½ Per Cent.—Trend of Galvanized Sheets Decidedly Upward

IN SYMPATHY with rising costs of raw materials, particularly galvanized iron, quotations on galvanized ware, such as pails, tubs, garbage and ash cans, tanks, boilers and sinks, now show price increases of varying extent. The discount on these goods is now 10 per cent., former discount being 17½ per cent. off list prices.

This is the second revision in these lines during the current year, quotations in June last being reduced from list prices to 17½ per cent. discount. Manufacturers in naming present prices state that since that time the trend of galvanized sheets has been upward, but increases in the finished products were withheld until the continued rise in raw material would not permit manufacture at former lower levels. It was thought some time ago that the gain in sheets was more or less of temporary duration, but with firmer prices continuing for some months following, it would appear that the rise was of a healthy nature, with prevailing higher levels likely to rule for some little time to come.

NEW DISCOUNTS QUOTED ON CANADIAN FILES

Montreal.

As announced in last week's issue of Hardware and Metal, new discounts on many lines of files, showing higher prices, would be issued in the near future. These are now given as follows:

FILES—	
Globe	60%
Arcade	60%
P. H. and Imperial	60%
Nicholson	30%
Black Diamond	35/5%

STAINLESS STEEL CUTLERY SUBSTANTIALLY REDUCED

Montreal.

An appreciable reduction is made in the Geo. Wostenholm & Son line of English stainless steel cutlery. This price decline varies on the different priced lines.

SLIGHTLY FIRMER TONE IN SOME SCRAP METALS

Montreal.

Minor price changes in an upward direction are reported on the scrap metal markets, such as zinc, heavy copper, and machinery cast. Markets in general, however, remain in a quiet position, with very little buying in any line. Machinery cast is increased $1.00 per gross ton, a slightly firmer tendency being noticed in this metal owing to the scarcity of pig iron. Local dealers' average buying prices are the following:

WASTE MATERIALS—		
Automobile tires		**0 50**
Rubber shoes		0 02
Yellow brass	0 05 to	0 06
Red brass		0 08¾
Light brass		0 04
Scrap zinc		0 03¾
Lead, heavy		0 04½
Lead, tea		0 03
Light copper	0 08½ to	0 09
Heavy copper		0 11¼
Wrought iron R. rd., No. 1, per gr. ton		10 00
Malleable scrap (ton)	9 00	10 00
Pipe scrap (ton)		7 00
Heavy melting steel	9 50 to	10 00
No. 2 busheling		3 00
Boiler plate	8 00	9 00
No. 1 machinery cast		22 00

BAR IRON QUOTATIONS ARE STILL UNCHANGED

Montreal.

Although the increased price of $3.25 was thought probable on the local market even before this date, quotations are still unchanged with $3.15 base generally quoted. Distributors describe present trade as remaining quiet, and stocks are fully ample to take care of present requirements. Undoubtedly the market is very firm from a production standpoint, but owing to it being unnecessary to enter the market to any great extent the situation is not as strong as it otherwise would be from a distributor point of view.

Steel works in the United States report an improvement, a gain in output capacity being reported. Although slight up to the present it is taken as an indication that a betterment may be looked for during the following fall months. Consumers of steel in a number of lines are showing more concern over their ability to secure continuous supplies from the mills, and apparently the biggest handicap is the rail strike situation, and transportation difficulties. Average local prices are the following:

IRON AND STEEL—	
Common bar iron, 100 lbs.	3 15
Refined iron	4 65
Irish finish machinery steel	3 20
Mild steel	3 15
Single recled machinery steel	5 25
Band steel	3 50
Spring steel	4 75
Sleighshoe steel	3 15
Tire steel	3 35
Harrow tooth steel	3 30
Toe caulk steel	4 05
Mining tool steel, per lb.	0 20½
Black Diamond tool and cast steel, per lb.	0 20½

NOTE.—Refined iron is approximately $1.50 per 100 pounds over base, but fluctuates owing to unsettled market.

Band steel in scroll bundles, 50c per 100 lbs. extra.

ALSO STRONG TENDENCY IN CORRUGATED SHEETS

Montreal.

The market for corrugated sheets is still described as firm, with little actual change in the situation from previous weeks. The stronger market tone in flat galvanized sheets and a slightly improved demand, are the two factors contributing a firm tendency in these products. Although there is no direct indication that higher prices will be named in the near future, manufacturers state that the trend is undoubtedly in an upward direc-

tion. Unchanged prices and discounts are the following:

CORRUGATED SHEETS	Per 100 sq. ft.
No. 28 gauge	6 50
No. 26 gauge	7 00
No. 24 gauge	9 00
No. 22 gauge	11 00
No. 20 gauge	12 50
No. 18 gauge	16 50

Less 10 per cent.
Lighter than 24 gauge and wider than 27 ins., 75 cents per square extra.

RANGE BOILERS HAVE HIGHER PRICE LEVELS

Montreal.

Manufacturers and distributors announce an advance in quotations on the various sizes of range boilers. Standard boilers are now quoted at less 45 per cent., extra heavy at 35 per cent. off standard list prices. Manufacturing costs are said to have gradually increased with the advances made in raw material prices, especially galvanized sheets. Although market levels on sheets have shown repeated increases during recent months, quotations on range boilers have remained unchanged for many months past. The market for these products is also reported as somewhat more settled, price shading not being in evidence to any great extent among distributors such as was the case earlier in the year. Following are list prices and revised discounts:

RANGE BOILERS—

Size	List Price
5 gallon	$13 50
12 gallon	14 00
18 gallon	15 00
25 gallon	16 50
30 gallon	17 50
35 gallon	20 50
40 gallon	22 75
52 gallon	38 00
66 gallon	60 75
82 gallon	74 00
100 gallon	103 00
120 gallon	117 00
144 gallon	164 00
168 gallon	187 00
192 gallon	210 00

Discounts:—Standard weights, 45 per cent. Extra heavy, 35 per cent.

STEADY TONE IN LEAD AND ZINC PRODUCTS

Montreal.

Lead and zinc products are still on a firm basis, metals on primary markets showing a steady to firm market tone notwithstanding a quiet period is now in evidence. Lead has recently shown signs of weakening, but has recovered to an extent in the past few days. Zinc is steady at present but higher prices in the not far distant future would not be surprising. Current business in the finished goods is described as fair at following quotations:

LEAD AND ZINC PRODUCTS—

Lead pipe, per 100 lbs., up to 2″	13 00
Do., 2″ to 8″	14 00
Do., 8″ and over	15 00
Lead waste, per 100 lbs.	14 00

Note—Lead pipe is subject to a discount of 10 per cent.

Lead traps and bends	15%
Lead wool, lb.	0 13½
Lead sheets, 2½ lbs. sq. ft., lb.	0 10½
Lead sheets, 3 to 3½ lbs. sq. ft. lb.	0 10¼
Do., 4 to 8 lbs. sq. ft., lb.	0 9¼

Cut sheets ¼c. lb. extra, and cut sheets to size, ¾c. lb. extra.

Solder, guaranteed, lb.	0 26½
Do., strictly, lb.	0 24½
Do., commercial, lb.	0 21½
Do., wiping, lb.	0 22½
Do., wire, lb.	0 35
Zinc sheets, casks	0 11
Do., broken lots	0 11½

TAYLOR FORBES LAWN MOWERS NOW 25 OFF

Montreal.

Prices on Taylor-Forbes make of lawn mowers for next season are now quoted at 25 per cent. off list, dated Sept., 1921. This is a reduction compared with the previous level of 20 per cent.

ADVANCED QUOTATIONS ON STOCKS AND DIES

Montreal.

Through a revision in discounts quotations on both adjustable and solid stocks and dies are increased. These are now quoted at 37½ per cent. off list prices, former discount being 40 per cent.

HIGHER QUOTATIONS NOW RECORDED IN BOILER TUBES

Montreal.

Current quotations on boiler tubes are again revised, practically all sizes in both seamless and lapweld being brought to higher price levels. It is stated by distributors that the firmer tendency in the steel industry generally is now reflected on these products and prices are increased in line with replacement costs. There is a slight improvement in demand owing to a fair amount of repair work being done and dealers have found their stocks becoming depleted thus making it necessary to enter the market for new supplies. It is pointed out that higher levels have been quoted at primary centres for some weeks past, but distributors did not increase their selling prices until they were forced to purchase.

GOOD MOVEMENT OF BOILERS AND RADIATION

Montreal.

Manufacturing of boilers and radiators report a steady demand for their products, activity in building circles continuing quite satisfactory, especially in the larger centres. Current quotations on both lines are unchanged, with the undertone of the market remaining in a firm position. Recent increases in pig iron quotations and the present coal situation which is none too satisfactory even yet are said to be two factors contributing added strength to the former stiffening tendency in products of this nature.

IMPROVED MARKET TONE IN MOST INGOT METALS

Montreal.

After a period when the summer dullness was evident in the ingot metal markets, an almost general improvement is noted and some metals are now showing a decidedly firmer tendency. Copper and spelter are the strongest metals on the list, the latter touching a new high point in East St. Louis. Antimony, which has been in a dull position for some weeks past, now has a much improved tone.

TIN.—There seems to be a waiting attitude in this market to ascertain how statistics shape up for the month. Although tin has recently shown a reaction, the future outlook continues more promising. The London market is weak, but an improvement is looked for in the near future. Quotation unchanged at 36 cents.

COPPER.—The London market is firmer and there is a temporary scarcity reported in the U. S. A. Producers are holding firm, and the market generally presents a strong outlook. Quotation on electro remains at 17¾ cts., casting at 17½ cts.

LEAD.—The lead market remains quite firm. Although the London market is a shade easier at present, this tendency is not sufficient to materially affect the market in general. There is, however, said to be nothing to indicate any great advance and a steady market is looked for. Local price 6¾ cents.

Toronto, Ont.

TORONTO, September 14.—Again the majority of current price changes represent a general movement to higher levels. Through revised discounts, wood screws are advanced, also galvanized range boilers, both extra heavy and standard. Other increases are evident on rasps, both jute and duck horse blankets, various makes of files, and bench axes. Pig iron prices are again higher, although the quotation is purely nominal. Revised discounts are in effect on galvanized products such as galvanized steel sinks, both light and heavy galvanized tubs and pails, also garbage pails. New quotations on the various styles of spring hinges and screen door sets are now in effect.

The reduction in lawn mower prices is the feature of current declines. Hack saw blades are now lower, and a minor reduction is noted in aluminum numerals. There is also a fractional decline in cement quotations per barrel in carload lots. No revision has yet been made in discounts on eavestrough and conductor pipe.

PIG IRON PRICE AT INCREASED LEVELS

Toronto.

Practically all Canadian pig iron is off the market temporarily, in-so-far as new orders are concerned. The nominal quotation is $39.30, but no business is being done at this figure. Practically the only iron available at the moment is Summerlee, and this stock is limited. It is expected that Carron iron will be offered at an early date. The consumption of the foundries at this time is only nominal. Most firms bought heavily

some weeks ago and the producers are protecting their customers who placed orders well in advance. Thus there is little actual demand for pig iron at present.

EASIER PRICE LEVELS ON LAWN MOWERS

Toronto.

A reduction is now made in quotations on lawn mowers, effective from September 9. Those lines quoted at list and discount are now shown at 25 per cent., compared with the former level of twenty per cent. A corresponding reduction is made on other lines carrying net prices. Manufacturers have announced the following revised price levels, which are guaranteed against any further decline until June 30, 1923:

LAWN MOWERS—

	Discount

WOOD SCREW PRICES REACH HIGHER LEVELS

Toronto.

Through a revision in discounts, another advance has been recorded in quotations on wood screws. The average increase is in the neighborhood of fifteen per cent. The new discount is as follows:

WOOD SCREWS—

Flat Head Bright, 80 -5% off list.
Oval Head Bright, 77½-5% off list.
Round Head Bright, 77½-5% off list.
Flat Head, Brass, 75 -5% off list.
Oval Head, Brass, 72½-5% off list.
Round Head Brass, 72½-5% off list.
Flat Head, Bronze, 70 -5% off list.
Oval Head, Bronze, 67½-5% off list.
Round Head, Bronze, 67½-5% off list.

NEW DISCOUNT NOTED ON HORSE RASPS

Toronto.

Quotations on horse rasps have been advanced, this revision corresponding to the higher price levels announced on files. The increase on rasps is in the neighborhood of twenty per cent. The revised discount is list less 70 per cent.

HIGHER NET PRICES ON BENCH AXES

Toronto.

New higher net prices are announced locally on bench axes, this change being in line with the general advance in quotations on these products. Revised levels follow:

BENCH AXES—

No. 2, $19.75 per doz.; No. 3, $22.00 per doz.; No. 4, $24.00 per doz.

PRICES ON HACK SAW BLADES NOW REDUCED

Toronto.

Quotations on hack saw blades have again been revised, a reduction of approximately ten per cent. now being in effect.

PRICES ON HORSE BLANKETS INCREASED

Toronto.

Quotations on jute and duck horse blankets have been advanced this week to the extent of 10 and 15 per cent. respectively.

DISCOUNT ON NICHOLSON FILES AGAIN REVISED

Toronto.

Jobbers announce that the revised discount on the Nicholson line of files is 35 and 5 per cent.

MINOR REDUCTION IN ALUMINUM NUMERALS

Toronto.

A slight reduction is now in effect on aluminum numbers, the 3-inch size now being quoted at $2.10 per hundred.

REVISED DISCOUNTS ON GALVANIZED PRODUCTS

Toronto.

Revised discounts are announced on galvanized wares, this change affecting such products as galvanized steel sinks, painted steel sinks, both light and heavy galvanized pails and tubs, and also garbage pails. The new discount quotation is ten per cent.

REVISED QUOTATIONS ON SPRING HINGES

Toronto.

Revised price levels on various styles of spring hinges are also announced by the manufacturers this week. New quotations are as follows:

HINGES—

Spring Hinges, per gross pair, No. 201, $35.00; No. 202, $28.75; No. 200, $20.00.

Double Acting Spring Hinges, per gross pair, $62.50.

Screen Door Sets, per gross, No. 1200, $37.50; No. 1201, $45.00.

No. 711 Loose Pin Steel Spring Hinges, Per gross pair, $25.50.

UNCHANGED QUOTATIONS IN BAR PRODUCTS

Toronto.

No further change has been announced in prices on bar iron and steel, although many warehouses are firm in their conviction that quotations on bar products generally are due for another advance in the near future. The current demand is described as fairly good for this season of the year, with orders being several weeks behind from mill centres due to coal and transportation difficulties.

The opinion is expressed that with the miners back to work and the possibility of coal piling up at the mine head, there will, no doubt, be a much greater effort made to settle the railway trouble, which, for the last two months has had a greater effect on prices than the coal strike. Settlement of the strikes will, no doubt, have a softening effect on the market, but it is not likely to result in any decline in prices in domestic circles until the end of the present year at the earliest.

IRON AND STEEL—		
Mild steel bars, base		3 25
Mild steel bands 3-16 in. base		3 75
Bar iron, base		3 25
Angle iron, base		3 35
Horse shoe iron		3 85
Tire steel		3 45
Spring steel	7 00	8 00
Sleigh shoe steel		3 25
Cold drawn steel		4 50
Hoop steel	4 25	4 50
Norway iron		12 50
Toe calk iron		4 10
Crucible cast sheet steel		28 00
Mining drill steel		18 50
Cast tool steel, high grade		30 00
Cast tool steel, medium		18 00

RANGE BOILERS ON NEW DISCOUNT LEVELS

Toronto.

Through a revision in discounts, prices on range boilers are approximately ten per cent. higher. This development reflects the current changes in the galvanized sheet market, which has recently recorded several advances. The new discounts on range boilers are 45 per cent. on the standard and 35 per cent. on extra heavy, compared with the former levels of fifty and forty respectively. These discounts apply to the list adopted in January, 1922. While current movement is described as moderate, manufacturers point towards the rising production costs and higher raw material price, these factors creating a firmer undertone to the market.

RANGE BOILERS—

Size	List Price
5 gallon	$ 13 50
12 gallon	14 00
18 gallon	15 00
25 gallon	16 50
30 gallon	17 50
35 gallon	20 60
40 gallon	22 75
52 gallon	38 00
66 gallon	60 75
82 gallon	74 00
100 gallon	103 00
120 gallon	117 00
144 gallon	164 00
168 gallon	187 00
192 gallon	210 00

Discounts:—Standard weights, 45 per cent; Extra heavy, 35 per cent.

FRACTIONAL DECLINE IN CEMENT QUOTATIONS

Toronto.

A fractional reduction is now in effect on cement prices, the local quotation per barrel in carload lots having been lowered from $3.70 to $3.68. No variation is announced on other quantities, the quotations given below remaining in effect. The seasonal call for cement is described as falling off to some extent during recent weeks, but conditions are described as fair for this time of the year. Current prices follow:

CEMENT—Carload Lots—	
Per barrel	3 68
Less Carload Lots—	
Per barrel, f.o.b. yard	4 40
Per barrel, delivered	4 60

Single bags, $1.15 each; 4 bags to barrel.
Extra charge of $1.50 per load on less than 24 bag lots.
Rebate of 20 cents for empty bags.

FIRMER MARKET TONE IN COMPRESSION GOODS

Toronto.

Although no change in quotations affecting brass compression goods has been announced, distributors of these products

state that a slight change in an upward direction would not be surprising. Such a development to the extent of around five per cent. was stated as possible in view of recent increases in basic materials. No step in this direction has yet materialized, and the following unchanged discounts are at present in effect:

COMPRESSION GOODS—	
Compression work, standard	45%
Fuller work, standard	30%
Bath cocks, compression	41%
do., Fuller	25%
Flat way stop and waste cocks, standard	54%
Brass steam cocks, standard ¼ in. to 2 in.	50%
Do., 2½ in. to 3 in.	43%
Globe angle and check valves, standard	25%
J. M. T.	20-10%
J. M. T. C.	25-10%
J. M. T. Gate Valves	25-10%
Jenkins gate or straightway	25-10%
Jenkins Globe	19-10%
Radiator valves, standard	58%
do., removable disc	58%
Emco check valves, standard	25%
Emco, J. D. rad. valves, screwed	33%
Emco swing check, ⅜ in. and ½ in.	40%
Do., Do., Do., other sizes	33%
Webber gate valves	33%
BASIN COCKS:—	
No. 0 and 1, Fuller pattern	30%
Quick opening, No. 3633	50%
No. 3623, plain or index handle	34%

NO NEW DISCOUNT YET ON TROUGH AND PIPE

Toronto.

No developments have been announced in respect to revising prices on eavestrough, conductor pipe and conductor elbows. While higher levels are considered imminent, no decision has yet been reached, although manufacturers of other galvanized lines such as flat sheets, have placed certain revisions into effect. The fact that a brisk movement of these products is recorded, and that increased levels at this time might retard to some extent the incentive to carry building operations along well into the fall season, are stated as considerations in spite of the firm undertone apparent in the market. Following are, therefore, current unchanged lists and discounts:

TROUGH (Eave)—

O. G. Square Bead—

Per 100 ft.		Per. 100 ft.	
8 inch	$15 90	15 inch	$28 80
10 inch	17 70	18 inch	36 80
12 inch	21 20		

O. G. Round and Half Round—

8 inch	16 90	15 inch	29 80
10 inch	18 70	18 inch	37 80
12 inch	22 20		

Less 70 and 10 per cent.

PIPE (Conductor)

Plain, round or corrugated. Per 100 ft. in 10 ft. lengths.	
2 in., in 10 ft. lengths, list	18 40
3 in. in 10 ft. lengths, list	22 30
4 in. in 10 ft. lengths, list	29 60
5 in. in 10 ft. lengths, list	40 00
6 in. in 10 ft. lengths, list	49 00

Less 70 and 10 per cent.

CONDUCTOR ELBOWS—

Plain, round or round corrugated:	
2 inch, list	$ 5 25
3 inch, list	6 00
4 inch, list	10 50
5 inch, list	24 00
6 inch, list	29 00

Less 60 per cent.

BRISK SEASONAL CALL FOR CORRUGATED SHEETS

Toronto.

While there remains a brisk seasonal call for corrugated sheets, a variety of elements are apparent in this market. The improvement recently noted has failed to remain for any length of tir due to the fact that a certain amount of damaged corrugated sheets is being offered in certain quarters. Therefore, while a firmer tendency was developing on the one hand due to the strength of flat galvanized sheets, the resumption of slightly easier levels in certain quarters again became apparent to some extent on the other hand as a result of these conditions. As already noted, however, the movement of corrugated sheets at this season is usually brisk, and distributors point to this factor as serving to maintain the following unchanged current price levels:

CORRUGATED SHEETS—

	Per 100 sq. ft.
No. 28 gauge	6 50
No. 26 gauge	7 00
No. 26 U. S. gauge	8 00
No. 24 gauge	9 00
No. 22 gauge	11 00
No. 20 gauge	12 50
No. 18 gauge	16 50

Less 10 per cent.

Lighter than 24 gauge and wider than 27 ins 75 cents per sq. extra.

DELIVERY OF SHEETS IS IMPORTANT FACTOR

Toronto.

Continued activity is reported in the sheet market, with delivery still remaining the important factor. Producers of sheets, as in all other steel products, are confronted on the one hand with an extremely brisk seasonal demand and on the other with uncertainty regarding future operating conditions. Southern sheet producers state that in spite of the improvement in the coal supply conditions, the ability of the railroads to move fuel from the mines becomes the controlling factor in the current situation. A flood of price advances has followed the recent wage advances at primary steel works, and in many quarters it is thought possible that galvanized sheet quotations may reach higher levels in the near future, as a result of this pressure in the basic elements.

The appearance in the steel market is that the shortage of coal has affected the production of steel more than its consumption. There is more pressure upon the mills for deliveries than there was a couple of months ago. Prices on blue annealed sheets now reach a slightly higher level:

BLUE ANNEALED SHEETS—

10 gauge, base	$ 4 25
12 gauge	4 30
14 gauge	4 35
16 gauge	4 40

BLACK SHEETS—

18-20 gauge	5 30
22-24 gauge	5 35
26 gauge	5 40
28 gauge	5 50

A charge of 25c. per 100 lbs. is made for less than case lots. An extra 10c. per 100 lbs. is also charged on sheets 26 in. wide.

GALVANIZED—	Queen's Hd.	Premier and Apollo
28 gauge	7 75	
26 gauge	7 50	
24 gauge	6 90	
22 gauge	6 55	
18 and 20 gauge	6 05	
10¾ oz.	7 15	7 65
U. S. 28 base	6 75	7 25
U. S. 26 base	6 45	6 95
22 and 24	6 30	6 80
18 and 20	6 15	6 65
16	6 00	6 50
12 and 14	5 85	6 35

An extra 40c. per 100 lbs. is charged for Keystone and Premier bands copper-bearing sheets.

An extra is now charged on galvanized sheets, 10¾ oz. and 28 ga., when shipped out in sheets 3 feet wide. The extra charged over prices shown in 20c. per 100 pounds.

SEASONAL REVIVAL IN TIN PLATE TRADE

Toronto.

While a distinct falling off in the tin plate trade, and a falling off in the volume of new business was noticeable a few weeks ago, this condition has now been reversed and a seasonal revival is considered at hand. Large consumers are again coming into the market and this has served to considerably firm up the current market tone at the following unchanged local price levels:

PLATES, CANADA—	
Ordinary, 52 sheets	4 90
Do., 60 sheets	5 00
Blued and oiled, boxes, 52s'	5 20
Do., Do., 60's	5 30
WELSH CANADA PLATES—	
Cold polished, 18 x 24,—52's	6 25
Do., do., 60's	6 50

IC, 20 x 28, 112 sheets	12 50
IX, 20 x 28, 112 sheets	15 00
IX, 20 x 28, 56 sheets	8 50
PLATES, CHARCOAL TIN—	
IX, 20 x 28, 56 sheets	10 00
IXX, 20 x 28, 56 sheets	12 00
PLATES, TERNE—	
IC, 14 x 20, 112 sheets	12 00

STILL SLUGGISH TONE IN SCRAP MATERIALS

Toronto.

There is hardly any degree of improvement to record in the local scrap material markets, the sluggish attitude still being apparent.

Scrap rubber prices are without change and business is pretty near at a standstill in this group.

Scrap iron and steel is moving along quietly. Cast iron is the strongest part of the market. Scrap metals have been firm. Red and yellow scrap is reported to be moving fairly actively both to domestic and U. S. buyers. White metals are firm, but rather slow. The following are the usual averages of dealers' buying prices for large quantities:

SCRAP MATERIALS—

Scrap Iron		
Heavy melting steel (Hamilton)	13 00	13 50
Borings and turnings	6 00	7 00
Rerolling rails	12 00	13 00
Scrap pipe	5 00	6 00
No. 1 railroad wrought	10 25	11 25
Steel turnings (Hamilton)	9 75	10 25
Agricultural malleable	12 00	13 00
Railroad malleable	13 00	14 00
Net tons—		
No. 1 cast	18 00	19 00

Boots and shoes	2 00	....
Lumbermen's rubber boots	1 25	1 50
Auto tires	0 25	0 50
Solid tires	6 60	1 00

INGOT METAL PRICES ON STEADIER BASIS

Toronto.

Trading in ingot metals continues to be on a moderate scale, with very little fundamental change to be recorded. The current demand is described as just fair, with buying, on domestic and primary centres, of a conservative character. On the whole, the non-ferrous group are considered to be on a steady basis.

London, Ont.

LONDON, September 14.—Hardware business in this district is good and sales continue to show an increase. Fall lines are moving nicely and merchants are stocking up for fall and winter trade as shortages of goods and higher prices are anticipated on some lines.

A number of price changes go into effect this week, including higher quotations on wire nails, wood screws, and files. Linseed oil is reduced five cents per gallon.

NEW DISCOUNTS APPEAR ON WOOD SCREWS

London, Ont. —

New prices, about 15 per cent. higher, are now in effect on wood screws. The discounts have been changed to the extent of 2½ points all through the list, thus bringing quotations to a higher level. The revised quotations are given in the current market pages.

HACK SAW BLADES TEN PER CENT. LOWER

London, Ont. —

Prices on hack saw blades have been reduced approximately ten per cent. New quotations on the Victor line follow:

HACK SAW BLADES—

8", 54c. doz.; 9", 60c. doz.; 10", 67c. doz.; 12", 80c. doz.

LINSEED OIL PRICES STILL FURTHER REDUCED

London, Ont. —

Another reduction of five cents per gallon is recorded in linseed oil prices this week, the change again being attributed to the current conditions in the flax seed markets. Following are revised price levels now in effect:

LINSEED OIL—

1 to 2 bbls., per gal.	1 05	1 08
3 to 5 bbls., per gal.	1 04	1 07
6 to 9 bbls., per gal.	1 02	1 05

LOWER LIST PRICES ON CLOTHES WRINGERS

London, Ont. —

Manufacturers of clothes wringers have revised list prices, thus showing a reduction on the various lines, averaging from 2 to 13 per cent. Discount remains as formerly at 30 per cent. off. The new prices are contained in the current market quotation pages.

TARRED FELT PRICES ARE AGAIN LOWERED

London, Ont. —

Quotations on tarred roofing felt have again been reduced twenty-five cents per 100 lbs. The new price is $3.20 per cwt. for 7, 10 and 16 oz. tarred felt.

FILES ALSO REGISTER ADVANCE IN PRICE

London, Ont. —

Through a revision in discounts various makes of files have been advanced in price. The revised quotation is list less 30 per cent. on the Nicholson line. Prices on other lines are increased in proportion, the revised levels recording advances of between 5 and 10 per cent. Black Diamond are now quoted 35 and 5 per cent., with Globe files at 60 per cent. off list.

HIGHER PRICES IN EFFECT ON WIRE NAILS

London, Ont. —

Higher quotations are now in effect on wire nails, the base price having been increased ten cents per keg. The revised level is $3.75.

There has been no change reported in cut nail quotations, factories still being behind with their orders.

NAILS—

Wire, base	3 75
Cut, base	4 60

HORSE RASPS REACH HIGHER PRICE LEVEL

London, Ont. —

With the increase in the prices on files comes a corresponding advance in prices on horse rasps. These are approximately twenty per cent. higher. The revised discount is 70 per cent. off list.

FAIR SEASONAL TRADE NOTED IN TURPENTINE

London, Ont. —

Turpentine sales are noticeably good for this time of the year, and the price remains unchanged at present.

TURPENTINE—	Imp. Gal.
1 bbl. lots	1 85
2 to 4 bbl. lots	1 84
5 gal. lots	2 00

LAMPS AND LANTERNS IN SEASONAL CALL

London, Ont. —

The arrival of fall weather is stimulating the sale of gasoline lamps and lanterns. Following are current quotations on the Coleman make:

LANTERNS—

No. 327, $7.00 each.

LAMPS—

	Each
With Plain Shade, No. 329	8 25
With Tan Tinted Shade, No. 318	9 25
With Green Tinted Shade, No. 324	9 25
With White Shade and Fringe, No. 317F	9 25

ORDERS FOR CATTLE CHAINS BEING FILLED

London, Ont. —

Booked orders for cattle chains and stall fixtures are now being shipped. Quotations are unchanged, cattle chains being at list less 25 per cent., while the current price on hollow stall fixtures remains at $2.10 per dozen.

Winnipeg, Man.

WINNIPEG, September 14.—There is a better feeling in business circles and although orders are for small quantities, bookings are more frequent. Threshing is practically general all over the Prairie Provinces and as Western grains arrive on the market a high average of quality is noticeable. Optimism prevails and business is expected to show a vast improvement a little later on. A general revision of Lufkin box wood and spring joint rules has been made. With the duck season open the demand for ammunition and guns is showing an improvement. Galvanized sheets are reported scarce and the market is showing a firmer tone. Axe heads have been advanced. Boiler tubes are slightly higher. Some lines of files have advanced five per cent. Linseed oil is showing a firmer tone and an advance of five cents per gallon has been reported. Turpentine at primary points is advancing and has been reflected with a ten cent advance on the local market.

GUNS AND AMMUNITION IN GOOD DEMAND

Winnipeg. —

The duck shooting season opened on the 15th of September and wholesale houses report an active sale of guns, rifles and ammunition. With ducks and chickens plentiful, the trade is looking forward to a good volume of business.

UPWARD CHANGE IN PIPE FITTING COSTS

Winnipeg. —

Higher quotations are now in effect on pipe fittings. Close and short from four inch are quoted at fifty and five per cent., four and a half and larger at forty and five per cent. Long four inch and smaller—fifty five and five per cent. Four and a half and larger—forty and five per cent.

GALVANIZED SHEETS NOW REPORTED SCARCE

Winnipeg. —

Galvanized sheets are reported scarce on the local market. There is a seasonable demand at present and a gradual improvement in prices with the approach of the fall months. Manufacturers announce that the tone of the market is upward and this is an indication that future shipments will be higher and also hard to obtain.

UPWARD TENDENCY IN BOILER TUBE PRICES

Winnipeg. —

The strength of the steel industry is reflected in an advance in boiler tubes. New price revision is as follows:

BOILER TUBES—

1¾ inch, per ft., 20c.; 2 inch, per ft., 22c.; 2¼ inch, per ft., 26c.; 2½ inch, per foot, 27c.; 3 inch, per foot, 36c.; 3½ inch, per foot, 42c.; 4 inch, per foot, 55c.; 4½ inch, per foot, 66c.

REVISED QUOTATIONS ON LUFKIN RULES

Winnipeg.

A revision in quotations is announced on the Lufkin lines of rules. Some lines are reduced from two and one half to five per cent. Following are quotations on some of the popular lines:—

No. 54 2 ft. rules, per doz.	9 85
No. 63, 2 ft. rules, per doz.	4 00
No. 68, 2 ft. rules, per doz.	2 05
No. 62 2 ft. rules, per doz.	8 20
No. 51 2 ft. rules. per doz.	3 75
No. 84, 2 ft. rules, per doz.	6 45
No. 61, 2 ft. rules, per doz.	2 80
No. 70, 2 ft. rules, per doz.	4 50
No. 66½, 3 ft. rules, per doz.	5 55
No. 66¾, 3 ft. rules, per doz.	16 35

GOOD TRADE FOR GALVANIZED RANGE BOILERS

Winnipeg.

Galvanized range boilers are reported to be in fairly good demand as activities in building circles continue splendid. The undertone of these products is reported firm owing to the strong tone in galvanized sheets and other raw materials. The market is steady at present quotations:

RANGE BOILERS—

Size	Price
30 Gallons	9 00
35 Gallons	12 50
40 Gallons	13 75
52 Gallons	22 60
66 Gallons	35 00
82 Gallons	42 50
100 Gallons	60 00
120 Gallons	65 00

RADIATORS AND BOILERS IN GOOD DEMAND

Winnipeg.

The movement for radiators and boilers is seasonable and is stimulated by the continuation of fairly extensive building operations. The number of dwelling houses under construction and the prospects of further building during the fall months is promising for the sale of these products. The firmness of the steel market reflects a firmer tone for these goods. Following are latest quotations.

RADIATORS—

16 inch, $1.50; 18 inch, $1.40; 20 inch, $1.36; 22 inch, $1.30; 26 inch, $1.20; 32 inch, $1.10. 38, 42, 44, 45 inch, $1.00.

Steam less 54 per cent. Hot Water less 53 per cent.

WALL RADIATORS—

5 ft., $1.15; 6 ft., $1.10; 7 ft., $1.05, 9 ft., $1.05. Discount 50 per cent.

SEASONAL TRADE CONTINUES IN TROUGH AND PIPE

Winnipeg.

Current trade in eavestrough, conductor pipe and sundry lines continues in seasonable proportions. With the harvest season well in hand there is usually a falling off in the demand but with the approach of fall an improvement is expected. **Quotations are:**

EAVES TROUGHS—

O.G. 8 inch, per hundred ft.	5 75
O.G. 10 inch, per hundred ft.	6 38
O. G. 12 inch, per hundred ft.	7 65
O. G. 15 inch, per hundred ft.	10 63

CONDUCTOR PIPE ROUND AND CORRUGATED—

Per 100 ft. 2 inch, $7.02; Per 100 ft. 3 inch, $8.08; Per 100 ft., 4 inch, $10.20; Per 100 ft. 5 inch, $14.45.

LINSEED OIL ADVANCES

Winnipeg.

There has been an advance of five cents per gallon on linseed oil. Raw is quoted at $1.15 with boiled at $1.18.

St. John, N. B.

Many Attractive Hardware Booths at St. John Annual Exhibition

ST. JOHN, N. B., September 14.—Throughout New Brunswick, during the week, all interest has been centered on the St. John Exhibition, and the many hardware houses have been meeting their out-of-town customers, who make a visit to St. John at Exhibition time. Extraordinary fine weather helped to make the exhibition of this year a great success, and the officials state that they are well satisfied with results. It is estimated that well over 75,000 people passed through the turnstiles.

Some of the exhibitors of interest to the hardware trade were: W. H. Thorne & Co., Ltd. This St. John firm showed automobile accessories, builder's hardware, kitchenware and paints, occupying altogether four stands, and in another section they showed deep sea fishing supplies. Messrs. Emmerson & Fisher, Ltd., who are the selling agents for the Enterprise Foundry Co., Ltd., of Sackville, showed ranges, stoves and furnaces. Consumers Cordage Co., Ltd., made a very attractive showing of ropes and twines, from the smallest size to the largest. The Barrett Co., Ltd., occupied a large stand, showing roofing supplies and building necessities. T. McAvity & Sons, Ltd., made a very elaborate display of the many products of their brass foundry. The A. R. Williams Machinery Co., Ltd., exhibited machinery of all kinds used in the lumbering industry, and also showed private house electric lighting installations. The James Robertson Co., Ltd., made a special exhibit of water systems for the country home. The Christie Woodworking Co., Ltd., and Murray & Gregory, Ltd., showed products of their woodworking factories, and lines for which they are selling agents. The St. John Spring Works made a very attractive display of carriage and automobile springs. T. S. Simms & Co., Ltd., occupied a very large stand in which they exhibited a fine line of brooms and brushes of their manufacture. The decorations of this booth came in for a good deal of favorable comment, and was considered to be one of the most attractive exhibits made. The Galt Stove Works made a good display of stoves and ranges. One of the most interesting exhibits was that of the Foley Pottery Co., Ltd. This firm demonstrated the manufacture of all classes of pottery.

Improved General Conditions

One of the pleasing features during exhibition week was an offer from the New Brunswick Automobile Association to convey patients from the local military hospital to the grounds, and was very much appreciated by the soldiers. Business in St. Johns is not affected greatly by the exhibition. Some of the customers of the larger houses take advantage of their visit to the city, and call on their jobbers, leaving orders, and with the object of giving these out-of-town visitors the best possible service, most of the jobbing houses make a point of having all their traveling staffs in town during exhibition week. T. Felix Michaud, of Buctouche, N. B., while in St. John, stated that business was much better this year than it was last year in his part of the province. He said that the farmers were buying stock as they have plenty of hay this year, while last summer's cut was so small that many of them were compelled to sell their cattle rather than buy hay. The lobster business is very brisk at the present time; the canning factories and the shippers of live lobsters are very busy owing to the large catches of this season.

Retail Merchants Advertise

During the past week the St. John hardware merchants have been using very large spaces in the local papers, as is their custom during exhibition week, inviting visitors to visit their stores. Extra pains were taken with the window displays, and everything possible done to create favorable impressions.

The recent heavy rains did damage to the value of not less than $100,000 to the roads and bridges in New Brunswick, is the statement given out by Hon. P. J. Veniot, minister of Public Works. The new Brunswick Telephone Company also were affected by the heavy rains, causing insulations to become badly soaked. The quarterly bulletin of the New Brunswick fire prevention board contains the following interesting fire loss figures:

Moncton, $182,114, twenty-four fires; Edmundston, $126,896, ten fires; St. John city, $79,348, fifty fires; Bathurst, $57,524, twelve fires; Fairville, $48,938, two fires; Doaktown, $32,000, two fires; Fredericton, Shediac, Sackville, St. Stephen, St. Andrews, Sussex, Chatham, Gagetown, Dalhousie, Andover and Perth were immune from serious fires during the three months period under review. It will be noticed that the Moncton fire losses are the greatest in the province, with Edmundston coming second. The total loss in the province, exclusive of forest fires, was $925,489.

The provincial department of public works is calling for tenders for the construction of the Wilson Brook Bridge, parish of Derby, Northumberland County.

Calgary, Alta.

Seasonal Interest Now Manifested In General Heating Appliances

CALGARY, Alta., September 14.—An evidence of the season is the general movement on the part of the retail hardware merchant to make a more prominent display of heating stoves and other heating appliances. The time is a little early for actual sales but interest is evident and keen competition will be displayed in filling the usual crop of requirements that develop with the first frosty weather. Fall gas heaters are in and beginning to move. With a little more assurance of sufficient gas, this line will take a prominent place in the month's turnover. Furnace jobs and repairs are keeping most of the tinsmithing departments quite busy. Enquiry among the plumbing and heating trade shows similar conditions. Large work is scarce, but the small jobs needed to keep plants efficient and up to the mark are quite plentiful. One old established firm volunteered the information that it was the first time in two years they had too much to do.

Paint Lines Active

Paint departments are showing up well as compared to other departments. The small paint sundries particularly have been more than usually active. It is noticeable that the paint department in most retail stores occupies more space and in a more prominent position than was usually the case a few years ago. It would appear that the retailer had sensed the fact that every one who walked into the store needed paint whether he knew it or not, and the department's function was to make the abstract need a conscious one. Attractive paint departments are performing this function and account for this department being good for an all year business rather than a distinctly seasonable one.

Threshing is now general and reports available indicate the yield to be of good grade and rather above expectations. Estimates up to date are based on conditions as they were a month ago and could not take into account the producing value of a month of crop weather such as prevailed here during August. Sufficient farm help has been available throughout this district. The question of unemployment is not a present issue and should at the worst only develop in mid-winter.

Jobbers and retailers report activities pretty much confined to seasonable requirements with lines described as general showing up as fair to slow. Volume is better than in June and July but vigorous effort seems necessary to turn a prospect into a sale.

Market Developments

Price changes this week affect some of the heavier staple lines, and are mostly upward. After a steady market over some months barbed wire advanced to a level 20 cents higher on Lyman and Glidden, and 25 cents higher on Baker. While the season for the heavy movement on this line is over, there still will be steady distribution in small quantities for fencing of stacks and necessary repairs. Stocks in retailers' hands have been kept low and the demand for ton lots and less should pretty well clear up present jobbers stocks. New prices at head of lakes on Lyman 3.65, Glidden 3.50, Baker 3.45. New prices at Calgary, Edmonton and Lethbridge on Lyman 4.90, Glidden 4.65, Baker 4.60.

New prices have been issued on axes representing a decidedly sharp advance. Handled axes and axes less handles are 2.50 advance over recent levels. Boys' axes and hunters' axes 1.50 higher.

Demand is spasmodic and averages rather under normal. Indications however point to a reasonable activity in the lumber camps of Eastern British Columbia which if realized will make this line more active.

Big Ben and Baby Ben clocks are down to 3.12 for small quantities from 3.43. One dozen lots at present are 3.03 and two dozen lots 2.94. Big Ben and Baby Ben Luminous are 4.09 for small quantities, 3.96 for one dozen lots and 3.84 for two dozen lots.

After two weeks on an even level, linseed oil advanced five cents a gallon. New prices at Calgary, Edmonton and Lethbridge are 1.19 for raw and 1.22 for boiled. Movement on this line is very evenly spread over to cover current requirements.

Sheet metal manufacturers and jobbers received telegraphic advice of a general advance on galvanized ware. Galvanized pails, tubs, and garbage cans advance from plus 2½ on list to plus 10 on list. Balance of galvanized ware from plus 2 to plus 7½ on list. Galvanized oil tanks to plus 45 on list.

Hamilton, Ont.

Mild Weather Brings More Attention to Heaters and Stove Accessories

HAMILTON, Ont., September 14.—Hardware buying continues in fair volume. While orders for some seasonal merchandise are being booked the demand is largely for staple products. Deliveries by manufacturers continue fairly good, except on steel mill products.

Local retailers generally report a fair volume of sales for this time of the year. Preserving kettles, fruit cans and other goods used in the canning season are moving well and the demand for automobile tires and accessories continues heavy.

The market generally is firm and the price tendency shows an upward trend and this is expected to be further affected by the upward movement of wages in the steel and other industries and the advancing price of steel, pig iron and raw materials and increased costs of manufacturing due to the high price of fuel.

Current hardware business in wholesale circles continues seasonably good, steadily increasing as various fall lines commence to move. Marked attention is being paid to electric and oil heaters, while stoves and stove accessories are numbered among items recording activity. Reports covering general conditions show improvement and the impetus to current trade of crops safely harvested is expected to bring a revival of business which is already apparent in some quarters. Wholesalers state that buying is on a somewhat broader scale, although quantities are limited. Binder twine is in heavy demand, orders exceeding expectations.

Both hard and soft coal fields are now pretty well opened up, but the problem of adequate fuel supplies seems to hinge on transportation facilities. Under existing conditions, no matter how much may be produced at the mines, the ability of the railroads to handle it faster than the consuming demand is pointed out as the keynote to the situation.

In spite of the slightly improved coal situation brought about by the agreement in coal areas, iron and steel production in primary centres is still seriously handicapped by lack of fuel. It is growing more apparent that even under the best conditions, mill operations cannot be restored to a satisfactory rate before the end of the year.

Difficulties of supply are manifesting themselves more widely, and conditions that made for scarcity in sheets, are now manifesting themselves in other sections. Pig iron, naturally the basic factor, serves to illustrate more strikingly the problems of the situation. Domestic producers are not in a position to deal with the situation and quotations are largely nominal.

To date this year thirteen new industries have located in Hamilton and prospects are stated to be even brighter for the future. Last year Hamilton saw the establishment of twenty-four additional plants within its confines.

Vancouver, B. C.

Ready for Active Fall Campaign In Vancouver Hardware Circles

VANCOUVER, B. C., September 14.—With the holiday season over, retail hardware dealers on the coast are making preparations for an active fall campaign and to that end are paying a little more attention to attractive window displays of seasonable lines and in a small way have started their advertising campaigns. Good business is coming forward, although heating appliances continue to be in most demand. There are indications that many merchants are improving their stocks, carrying more widely diversified lines than for a considerable period. This would give the impression that the outlook for future trade is favorably regarded and that collections are showing a steady improvement.

The trend of prices is firm, advances of from five to twelve per cent. being not infrequent. The trade is experiencing some difficulty in deliveries due to the coal and railroad strike on the American side. American manufacturers have notified jobbers that they have been badly handicapped at the factory. There have been instances where premiums have been paid to force orders through on goods needed for work in hand at various points on the Coast.

Travellers reporting to their principals here state that in the Okanagan, selling has become more or less of an art during the last two or three weeks, merchants showing a disinclination to buy. This is said to be due to the naming of opening prices on apples which are lower than last year, occasioned by the reported big crops throughout the North American continent. In the Kootenay and Boundary a decided improvement is noted following the marked activity in mining operations both in the large and small plants. A few days ago one little property manned by five owners shipped two cars of ore to the Trail smelter which netted them $15,000. Other equally good reports are reaching the Coast, all of which is having a favorable effect on the hardware trade.

For the first time in weeks an improved condition is reported along the Grand Trunk Pacific, while orders from the Cariboo are holding there own. Logging camp operators are making up for lost time when forest fires were rampant and all country districts are keeping up their demand for stoves, furnaces and repair parts.

Shooting Season Near

Retailers report an active enquiry for ammunition and shooting appliances in anticipation of the pheasant and grouse seasons which are about to open. Jobbers are well stocked at present. With this exception, other lines of sporting goods are quieting down. Rather a surprise was the announcement that stove pipe joints would be reduced fifteen per cent., for it is at this season, as everywhere, that parts are more in demand. Five-inch joints are now twelve cents a joint and the sevens are one cent higher. Screen doors have fallen off in demand and dealers have offered special inducements to clean up rather than hold over the winter.

In the list of changes, machine and carriage bolts are ten per cent. up. Coach screws are up a similar amount. With the rise of ten per cent. in rivets and burrs there is a new discount of thirty-five per cent. on the list. There is no change in copper rivets. Bull Dog mop wringers are lower at $3.60 and $4.50 for the 158 and 160 respectively.

The new base price on cut nails is $6.50 per hundred which represents a jump of fifty cents. Wire nails are firm at $6.50 f.o.b. Vancouver under a strong demand.

A twenty-five-cent advance is announced on square and hexagon nuts, and stove bolts are ten cents up on the recent list price.

Pittsburg, U. S. A.

Blast Furnaces Resume Operations With Improvement in Coal Supply

PITTSBURG, September 14,—The low point in pig iron and steel production was reached just at the end of August, since when there has been an upward swing. At the low point, pig iron production was at the rate of about 20,000,000 tons a year or say 45 per cent. of capacity, and steel ingot production at about 26,000,000 tons a year, or say 50 per cent. of capacity. Production declined continuously during July and August. Average rates of production during August were about 21,500,000 tons a year in pig iron and 30,000,000 tons a year in steel ingots.

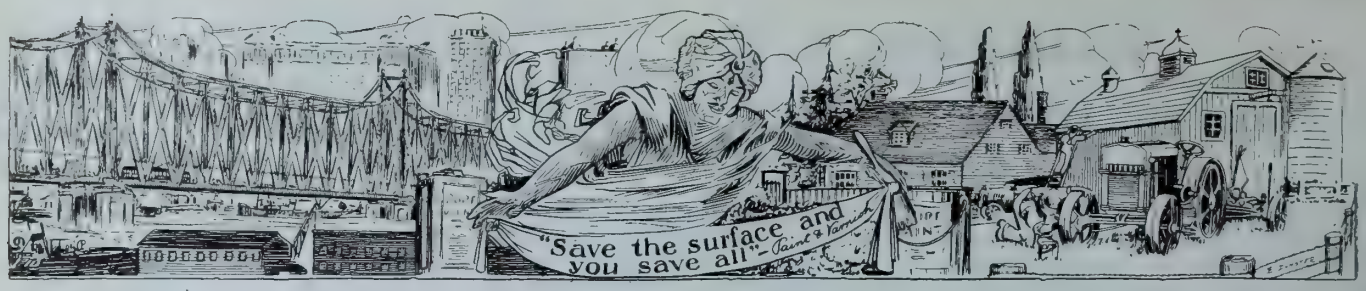
All told, about a dozen steel works blast furnaces have resumed operations since the end of August, in the Pittsburgh district, the valleys and the Chicago district. These resumptions were almost wholly at plants having by-product coke ovens, to which coal began to move rather promptly after the signing of wage scales with the United Mine Workers by various operators. There has been little if any resumption of blast furnaces tributary to the Connellsville coke region. The strike in the region did not end with the posting of the high wage scale by various operators on August 22 and 23, the men holding out for actual union recognition. Production of coal and coke in the region has increased slightly, by men drifting back to work and by men being brought into the region, just as was the case before the advance of between 40 and 50 per cent. in wages. Now, however, the strike, although apparently formidable, can hardly be considered a commercial factor, since careful study indicates that the limit of transportation from the region has been reached and if there were labor to produce more coal the additional tonnage could not be moved.

A fair guess probably is that while the production of steel was at about 50 per cent. of capacity at the end of August it is now, or will be within a few days, at 55 per cent. It would be quite unsafe, however, to conclude that a rate of improvement has been established. Coal production has been increasing rapidly, but on all hands it has been predicted that railroad congestion would develop and would severely limit coal shipments for months. Coal production, once it reaches a certain rate, may not stay there but may decline, the particular point being that there may have been many idle coal cars near mines and it is no trick to load them the first time while it may be difficult to get them to destination and back again for a second loading. The trade's view, therefore, is that nothing should be taken for granted as to increasing coal production or, in turn, increasing pig iron and steel production. While no precise predictions are made, it is commonly considered quite unlikely that, at any time in the remainder of the year, the steel industry will operate at the best rate previously attained this year, between 70 and 75 per cent. of capacity, late in June.

Pig Iron Not Helped.—A feature of the increased pig iron production seen thus far is that it is practically confined to the steel interests, those that have by-product ovens. The great majority of merchant furnaces in the north depend either upon Connellsville coke or upon surplus coke offered from by-product ovens, and there is practically no improvement in coke supplies from these sources.

Offerings of pig iron are very limited indeed. They are of iron now in stock or certain soon to be made. There is no disposition to negotiate for pig iron to be made by furnaces now idle, when they may chance to resume.

Steel Market Strong.—On the whole, finished steel products have been distinctly inactive in the open market in the past week. No particular significance is attached to the fact that there was little incentive to trading. All mills appear reluctant to sell.



Make Patron Debtor Through Service

Selling of Paint by Job is Effective—Paint Salesmen Do Not Quote Price Per Gallon Till They Know What is to be Done—Sometimes Takes Better Salesman to Turn Down Paint Order Than to Get One—What Paint Service Amounts to

MUCH has been said as to the attitude which retail salesmen should take in connection with the sale of paint, what they should know of its technical qualities, method of application, etc. This is very necessary, but some salesmen have asked what tack we would suggest for handling paint customers in this manner and what information should be given. The best answers to these points are dealt with in an article from A. F. Burdoin, manager of the U. S. Northwestern District for Lowe Bros. Co., as follows:

How many kinds of paint are there? Can anybody tell me?

Three! What are they? Linseed oil paints, varnish paints and water paints.

In comes a linseed oil paint customer first crack out of the box.

"What's your best paint worth per gallon?" he asks.

"What have you to paint?" we reply.

"My house," he says.

"How big is your house?"

"Forty by 26 ft. to the cornice, 3 bagles ½ pitch and a porch 8 ft. wide across the front, a back porch 4 by 8 with a roof over it."

"You have 4,000 sq. ft. to paint. How long since your house was painted?"

"Three years."

"What paint did you use last time?"

"Lead and oil."

"What condition is your house in now?"

"Pretty dry and dead—needs painting."

"You will need, Mr. Olson, about 13 gallons of paint, three gallons raw linseed oil and three quarts of turpentine. This material, Mr. Olsen, would cost you about $52 to $55."

"Is that all? Why, I thought paint was high. I paid more than that for lead and oil when I painted the last time."

"Very true, Mr. Olson, our paint is very reasonable in price. It spreads over a great deal of surface. You don't need to buy as much of it to paint your house. Have you a choice of colors, Mr. Olson?"

"Well, I hardly know what color to paint it."

"What colors are the houses on either side of yours, Mr. Olson?"

"Well, one is a monstrosity in dark red, a house as big as mine, too; the other is a bright cream color with white trimmings; looks like a huge cream cheese."

Suggests Color Combination

"How would you like a deep fawn or light russet color for body with an ivory trim and a neat black sash, Mr. Olson? (show combination card.) You would be safe as to colors on either side of you."

"That looks good to me, Mr. Dealer, but my wife wants a gray with a white trim. For some reason she always wants gray; we painted a light gray before, but she wants a little darker gray this time."

"Gray is always good, Mr. Olson, and goes with almost anything. Here is a rich pearl gray, with white trim and a neat black sash."

"Fine, I like it."

"Very well, will there be someone at home if we send the paint up this afternoon?"

"Yes."

"Very well, we will deliver it to-day, and, by the way, Mr. Olson, we will send up enough so your painter will not need to waste time coming to the store for an extra quart to finish up. We will put in a couple half-gallon cans of the body color and a couple half-gallons of the white so if you do not need to open a full gallon to finish up you can open a half-gallon and you may return to us any unopened package. By the way, Mr. Olson, who have you engaged to paint your house?"

Order Is Entered

"Oscar Pederson—he painted it before."

"A very good painter, too, I believe. Thank you, Mr. Olson. Good day. Come in again."

The order is entered thus: Deliver to Mr. Ole Olson, No. 17 Paint Up Ave.

1 5-gal. house paint, pearl gray, at $3.60 per gal.
4 1-gal. house paint, pearl gray, at $3.65 per gal.
2 ½-gal. house paint, pearl gray, at $3.90 per gal.
2 1-gal house paint, outside white, at $4.05 per gal.
2 ½-gal. house paint, outside white, at $4.30 per gal.
3 1-gal. raw linseed oil, at $1.13 per gal.
¾-gal. turpentine, at $1.23 per gal.

You have observed, gentlemen, that Mr. Olson bought his paint without getting the price per gallon. He bought it by the job and was satisfied with the estimate of the total cost. We purposely figured one and a half gallons too much on the job so that Mr. Olson would have some to bring back for credit, which he did a few weeks later, and was happy because his job took less paint than he thought it would. And, believe me, gentlemen, when Mr. and Mrs. Olson get ready to redecorate the inside of their home, paint their walls, varnish their floors, enamel the bathroom or fix up the furniture or paint the auto they are coming to our store to get the paint.

Now, gentlemen, that is the way the big, up-to-the-minute paint stores of the country are selling paint. Store salesmen are positively instructed not to quote price per gallon until they have found out what's doing, and if the job is of some size, to use the above method to get the order.

Offers You This—And More

A Plan of Concentration That Insures Quick Turnover and Full-line Profits

1. How successful are you? How often do you turn *your* money? How much dead stock is tying up capital that ought to be free to discount bills, and to finance larger purchases of fast-moving items? With that thought of *better retail paint merchandising* in mind, Glidden now offers you the opportunity to put it into practice—a plan of concentration on fast-moving paint products, a small investment and rapid turn-over. A safe and sure way to better profits.

Two Assortments That Tie up Little Money, but Permit Big Business

2. Suppose you were to choose those products that represent 95 per cent. of your paint demand. You could pick them readily—all staple items, and you'd be careful to choose the popular shades. Your list would exclude all shelf-warmers. Glidden is ready with such fast-selling assortments, representing a small investment which will enable you to accomplish this result. It's a proposition you must consider for your own welfare.

A Plan of Sales Co-operation Unequalled for Individuality

3. Let's suppose you accept the Glidden Short-line Assortment Idea, and arrange to go after paint profits in earnest. What then?

We help you sell your Glidden goods. A wonderful letter is furnished you with your name printed at the top, all ready for mailing. Each letter sells the assortment you have bought; each sale means a steady customer. An individual newspaper campaign comes next, all prepared to help you show a big year's profits.

Glidden Advertising for window, counter, and local newspaper advertising purposes is high-grade in every respect—a real asset for the Glidden Dealer.

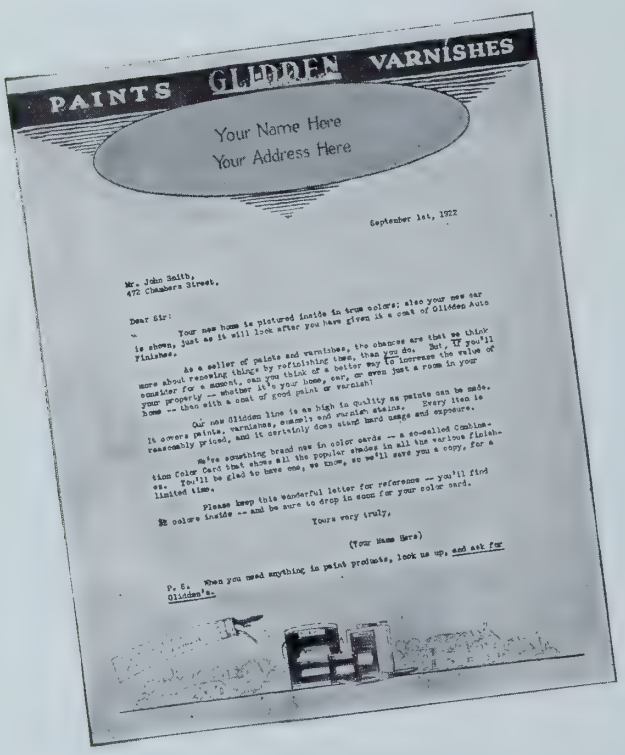
A 32-Color Letter Illustrating 32 Uses of Paints and Varnishes



PAINTS GLIDDEN VARNISHES

Your Name Here
Your Address Here

September 1st, 1922

Mr. John Smith,
472 Chambers Street,

Dear Sir:

Your new home is pictured inside in true colors; also your new car as shown, just as it will look after you have given it a coat of Glidden Auto Finishes.

As a seller of paints and varnishes, the chances are that we think more about renewing things by refinishing them, than you do. But if you'll consider for a moment, can you think of a better way to increase the value of your property -- whether it's your home, car, or even just a room in your home -- than with a coat of good paint or varnish?

Our new Glidden line is as high in quality as paints can be made. It covers paints, varnishes, enamels and stains. Every item is reasonably priced, and it certainly does stand hard usage and exposure.

We've something brand new in color cards -- a so-called Combination Color Card that shows all the popular shades in all the various finishes. You'll be glad to have one, we know, so we'll save you a copy, for a limited time.

Please keep this wonderful letter for reference -- you'll find 32 colors inside -- and be sure to drop in soon for your color card.

Yours very truly,

(Your Name Here)

P. S. When you need anything in paint products, look us up, and ask for Glidden's.

This business-building letter is the first of its kind ever developed. Glidden Dealers will find it practical and valuable.

It's a sure seller; four pages, with a sales-getting message on the first page. With *your* name printed at the top, and *your* signature at the bottom, postmarked from *your* town, it's a letter from *you* to customers who know you. It is *sure* to get attention.

The two inside pages are real order-getters. Glidden Endurance Paint, Jap-a-lac, Inside Floor, Porch and Deck, Ripolin Enamel, Flat Wall Finish, Floorette, Wearette and Barn Paint, are illustrated in popular colors printed on appropriate surfaces. Down at the bottom eight motor cars vividly portray the eight famous Glidden Auto Finishes.

Each item a fast-seller, no "dead-wood", every shade carefully selected.

FREE—Store Displays of Quality Unusual Newspaper Electrotypes

The attractiveness and business-pulling qualities of Glidden display features as illustrated on the first page of this advertisement, are rivaled only by the individuality of the newspaper electros, also furnished free. Preceding the appearance of the attractive "G" series of ads, should come the big announcement advertisement which definitely links your store with Glidden.

The displays are colorful and are designed for windows or counters. Of particular importance is the specially prepared combination color card, which covers the *whole assortment.* This is a brand new idea, avoids confusion, but best of all, once in the home, it silently sells the whole Glidden Quality idea. *And that means more business for you.*

This color-card covers the complete Glidden short-line assortment of fast-selling items. It will prove to be a valuable sales-getter, for once in the home, it helps sell the whole line.

TURNOVER—WHAT IT IS, WHAT IT DOES

(Continued from page 34)

therefore, earn the margin of profit 52 times.

A dealer might earn satisfactory profits on a five per cent. margin of profit on an article, if he sold it often enough; and he might easily lose money on an article offered at a 100 per cent. profit margin, if he carried a large stock and rarely made a sale.

2. It is necessary to know what the annual turnover is, in order to know just what margins to add to the cost price of the different commodities handled. And the average net profit desired can be best determined in this way. The business man or merchant, must know, and not guess, how many times he sells out completely the value of his stock in trade in a given period, and relate that number to the percentages of gross profits on each line handled in order to gain the general average of net profit desired. For example, if a stock of goods turns five times a year, and, assuming that each article in the stock turns with equal rapidity and with its proper percentage of total expenses added to its cost price, a net profit of 5 per cent. could be earned by setting the selling price only a little over 1 per cent. above the cost price.

If the annual cost of doing business is 25 per cent. of the total sales, the margin of gross profit, or the mark-up on the cost of individual articles, must be sufficient for all articles sold to average 25 per cent. on their cost. Obviously, this does not mean that each commodity must bear a 25 per cent. margin or spread. The vital question for the business man is always how much profit the dollar invested can be made to earn in selling the article.

3. In these days of public outcry against current prices a rapid turnover is an advantageous way to meet the high cost of operating a business. When costs rise with selling prices fixed, or when selling prices fall with costs remaining the same, dealers must buy and sell on narrower margins of profit. Under such conditions the margin of gross profit is reduced, yet small profits on a larger number of units, totaled for a year, may equal or exceed, the net gain derived from stock carrying greater gross profits but turning less rapidly.

4. Dividing or scattering the costs of doing business over many turns enables the merchant and business man to meet competition, whether of new or of old firms.

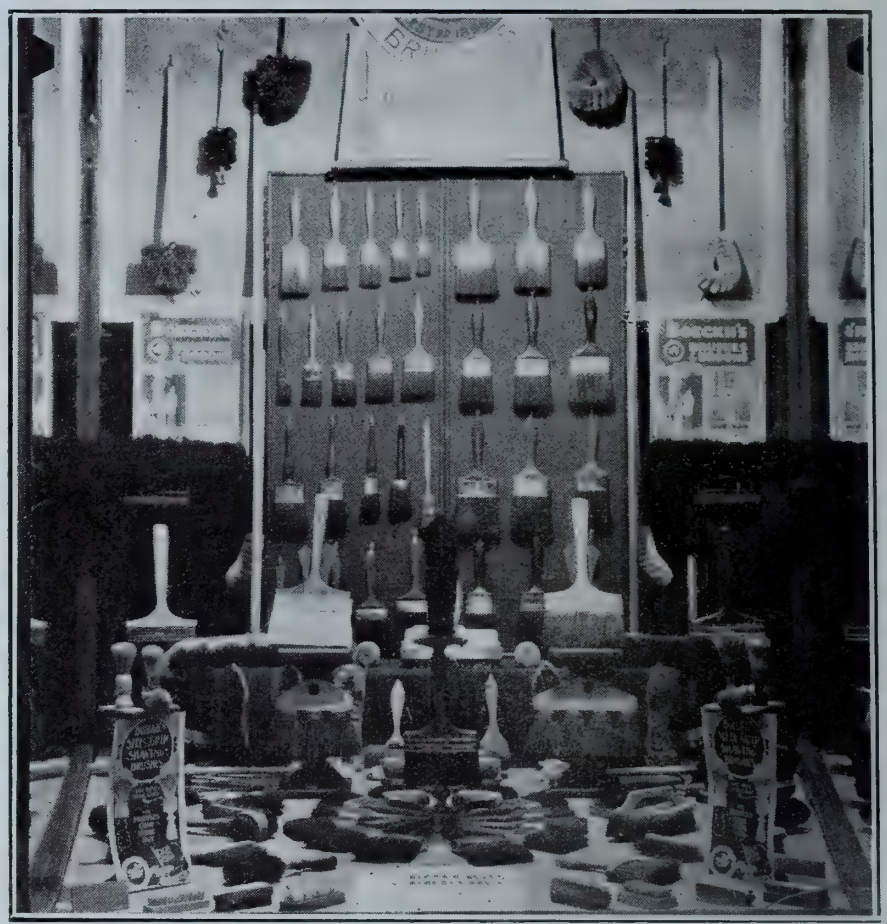
The experience of two Indiana stores may be cited: "Rapid turnovers, for example, are to-day securing the trade of a new five-story department store in a small Indiana city for a less pretentious shop diagonally across the street. Its quick returns allow the smaller store to make money on margins so narrow that it repeatedly cuts under the prices set by the big rival's slow turnovers."

5. Rapid movement and replacement of stocks eliminate shelf-worn and out-of-date goods. Clean and up-to-date lines tend to make a favorable impression upon prospective customers. The proprietor of the business might also be expected to take a keener interest in offering and advertising a clean stock of recently-produced goods.

6. Manufacturers and merchants with relatively high turnovers as compared with their competitors derive the benefit of better relations with creditors. They are also in a better position to take advantage of all discounts and to make their purchases more deliberately and independently than they otherwise would be.

Some further points dealt with in this bulletin with regard to methods of calculating turnover and increasing it will be dealt with in the next issue.

The Brush Department



An attractive brush display in a narrow window by R. Robertson, of the Manitoba Hardware Co., Vancouver, B. C. A panel from the brush department has been placed in the window showing brushes suspended on small hooks to allow samples being sold and not kept until they become shopworn. A wide range of other types of brushes are arranged on the floor of the display.

GLASS FACTORY TO INCREASE OUTPUT

The Canadian Libbey-Owens Sheet Glass Company, Ltd., is making arrangements to increase the capacity of its Hamilton plant with a view to doubling the volume of its output. This company is one of the newer industries established in the province, having been incorporated as recently as October, 1920. When manufacturing was commenced exactly a year later, it was expected that the output from two machines would be sufficient to take care of the Canadian trade. But in the short space of little more than eleven months the company reports having found itself in the position of being unable to take care of all the business offering. Hence the desire of the management to add to its facilities.

Boeckh's Brush News

Are YOU "Cashing In" On This?

Are YOU "cashing in" on Boeckh's Floor Brooms?

In these days of hardwood floors and small rugs, the housewife **must** have a reliable soft brush, floor broom. And Boeckh's is the ideal one. It is built to give absolute satisfaction. It measures up to Boeckh's standard of high quality in every way, and is backed by the Boeckh guarantee. It is made from bristles of that fine, soft variety that pick up the dust, yet do not scratch the most highly polished floor. It is strongly built, has pointed ends that get the dust out of the corners, is equipped with removable handle—and, in addition, **has rubber protectors on each end.** Note the illustration.

And these rubber protectors are certainly furniture and wall savers, besides protecting the block from unnecessary wear. Every housewife will recognize their value and will realize the need for one of Boeckh's Floor Brooms—with the rubber protectors.

Are you telling your customers about them? Are you making your window and store displays sell them for you? They are popular brooms, and it will be worth your while to speed up their sale.

If your present stock is low, write us at once for a new supply.

Weekly Paint Markets

Montreal

MONTREAL, Sept. 14.—Turpentine prices are advanced five cents per gallon in most quarters on the local market this week, although certain firms are still quoting former levels. There is a slightly firmer tone in this product on Southern markets, and with an increased demand during the fall months, a steadier market is anticipated by local importers. There is now only a slight variation in quotations among local linseed oil distributors owing to a reduction in prices being given by firms who were formerly quoting higher figures. The tone of the flax-seed market was easier in the fore part of the week, but in the past few days a slightly stronger tendency has been in evidence. The probable trend of linseed oil prices is still considered very problematic, although lower prices are hardly expected until the new crop makes its appearance at least. Window glass prices are unchanged with an easier tone again noted on the imported product. The Belgian franc is still dropping in value, causing a further unsettled feeling on the local market. White lead in oil and putty sales are improving with the approach of the more active fall season. Quotations on the former product are unchanged, while putty is now selling at recently revised price levels.

LESS VARIATION IN LINSEED OIL PRICES

Montreal.

Local quotations on linseed oil are unchanged in most quarters, although certain firms who were quoting $1.06 per gallon for raw oil in one barrel lots have reduced their quotations to $1.00, thus there is only a slight variation in quotations among local distributors. The flax-seed market continued on its easier trend during the earlier part of the week, but in the past few days it is reported as somewhat improved, with market levels quite steady. Deliveries of cash seed are small, and apart from only limited supplies of this seed being available, reports from the North-West indicate that the shortage of cars is now playing an important part in the market. This difficulty in transportation is also expected by some to affect the new crop in later weeks. Unless an improvement in the rail situation is in sight by the time the new crop is ready for marketing there is said to be a possibility of a shortage for the more active period in the fall months.

Information now available regarding English oil is now a little more definite. The imported product is being offered on the local market about two cents below domestic market prices, but up to the present little or none of this oil has been purchased. Prevailing quotations are as follows:

LINSEED OIL—

	Raw		Boiled	
1 to 2 bbl. lots, per gal.	0 98	1 00	1 00	1 02
5 to 8 bbl. lots, per gal.	0 96	0 98	0 98	1 00

Less quantities, add ten cents per gallon.

HIGHER TURPENTINE PRICES IN MOST QUARTERS

Montreal.

There is an improved tone in the turpentine market and local quotations are increased in most quarters five cents per gallon, bringing the price level most generally quoted to $1.65 per gallon in one barrel lots. The price of $1.70 is still quoted by some firms. Following the fluctuations in Southern markets during the past week or so, the market tone is now reported as slightly firmer. Demand is improved, and delayed shipments from primary markets have resulted in spot stocks being depleted. Dealers in the South anticipate a steady market throughout the following months, when a heavier demand is usually in evidence. Local prices are the following:

TURPENTINE—		
1 barrel lots	1 65	1 70
2 to 4 barrel lots, per gal.	1 63	1 68
Broken lots	1 75	1 80

BETTER DEMAND FOR WHITE LEAD IN OIL

Montreal.

Trade in white lead in oil is improving, shipments now commencing for fall trade. With a good amount of painting in the following months white lead is expected to be one of the active products in paint circles. The undertone on the market is described as steady to firm at following quotations: $12.25 in five ton lots, $13.00 in one ton lots, and $13.35 in less quantities.

STILL UNSETTLED FEELING IN WINDOW GLASS MARKET

Montreal.

With a slightly improved demand for window glass, quotations on the local market are unchanged. There is however an easier tone in imported glass, owing to the lower exchange value of the Belgian franc. This has been on a falling market until it is now at the lowest point reached for some time with the exception of one instance when it dropped below this mark, but soon recovered. Importers describe the market as not at all satisfactory, and although it is thought that recent reduced prices would establish a steadier situation, there is again an unsettled feeling among the trade.

Toronto

TORONTO, September 14.—The third decline in linseed oil prices during as many weeks, offers the premier development on the current paint market. The extent of the latest reduction is three cents per gallon, thus bringing average prices around the dollar mark in most cases. The range is still evident between quotations named by different distributors. There is no great demand for oil at present, and the flax seed markets continue on an easier trend, with the arrival of the new crop.

Turpentine quotations remain unchanged locally this week, but a firmer tendency is again apparent due to the combination of transportation difficulties and higher price levels at southern producing centres. An increased volume of inquiry at Savannah resulted in higher prices, while local stocks are reported low and with the arrival of new shipments at possible higher figures, no easing of existing levels is looked for in certain quarters.

There is a better demand now apparent for white lead in oil. An early movement of paint products is recorded, thus indicating the commencement of seasonal fall activity.

Window glass on the local market is moving quite freely, and trade in this line is generally reported as up to expectations for this time of the year. It is noted that further weakness has developed in the Belgian franc, thus again slightly easing the market on imported glass.

Shellac is described as in a market slump, but this is not expected to last long in view of the improvement generally apparent with increased activity throughout the paint trade. The foreign markets are already showing a recovery and some advancing prices and the opinion is expressed that these conditions will be reflected on domestic shellac.

ANOTHER DECLINE IN LINSEED OIL PRICES

Toronto.

A three-cent decline is announced this week on linseed oil. The current changes bring prices around the dollar mark generally, and in some cases below that figure. This constitutes the third down-

(Continued on page 60)

ANOTHER fine campaign this Fall — just as strong as it was last Spring! Pratt & Lambert advertising, like Pratt & Lambert products, constantly sets the pace for quality business wherever any surface-saving material is sold. If you would give the highest kind of surface-saving service — and cash in on this unusual advertising campaign in MacLean's, Saturday Evening Post, Good Housekeeping, American and House Beautiful — write for the introductory proposition on Pratt & Lambert Varnish Products.

Pratt & Lambert-Inc., 24 Courtwright St., Bridgeburg, Ont.

"Save the surface and you save all" Paint & Varnish

PRATT & LAMBERT VARNISH PRODUCTS

If interested tear out this page and place with letters to be answered

TORONTO MARKETS

(Continued from page 58)

ward revision in prices during as many weeks, and indicates the ebb of the flax seed markets. Seed prices have continued on an easier trend, with fluctuations every few days. This is having its consequent effect on linseed oil quotations. The present decline is considered only temporary in some quarters, being usually in evidence at this time of the year when the new crop of flax seed is appearing on the market, combined with the current slack demand for oil. That linoleum and paint manufacturers are following prevailing trends closely is one of the viewpoints expressed, and should large buyers enter the market on an active basis, a recovery in the near future may result. Current average figures on linseed oil follow:

LINSEED OIL—	Raw		Boiled	
	Per Gallon		Per Gallon	
1 to 2 barrels	0 95	1 02	0 97	1 05
3 to 4 barrels	0 94	1 01	0 96	1 04
6 to 9 barrels	0 92	0 99	0 94	1 02

Less barrels, 15 cents per gallon.

BETTER MOVEMENT IN WHITE LEAD IN OIL

Toronto.

The current movement of white lead in oil is generally reported to be increasing and distributors state that sales are on a satisfactory basis. With renewed activity in paint circles during the ensuing weeks, brisk activity in white lead is generally looked for. Current quotations are unchanged at the following levels:

WHITE LEAD IN OIL—	
In 5-ton lots	12 70
In 1-ton lots	13 45
Less quantities	13 80

TURPENTINE PRICES ON FIRM UNDERTONE

Toronto.

Turpentine prices continue firm and unchanged on the local market, the principal factor being the condition of local stocks. It is pointed out that there is very little turpentine on hand, and the supply situation would undoubtedly be acute if the demand for this product was at all active. Current trading, however, is quiet, and there is no big activity. Distributors are doing business on a hand to mouth basis, and turpentine is only being sold in very moderate quantities, owing to the fact that deliveries from southern producing fields are still bad because of the lack of improvement in transportation strike conditions.

At southern primary centres, the prevailing prices have again recovered their former levels, and thereby sustain domestic quotations to some extent. The recent reaction came sooner than was expected, due to the conditions outlined above. A renewal of inquiries for foreign export trade has improved the Savannah market, while the railroad strike has restricted distribution and resulted in maintaining firm prices on available supplies. A slight range is still evident among local distributors, but it is said that little turpentine is available at the lowest figure.

TURPENTINE—		
1 barrel lots	$1 75	$1 85
2 to 4 barrel lots	1 74	1 84
5 gallon lots	1 90	2 00

Less than one barrel lots, 15 cents per gallon extra.

Turpentine steel drums galvanized. 5c per gallon less than barrel price. Drums charged $10 each, returnable in 30 days, freight paid.

All quantities sold f.o.b. Toronto, Hamilton, London, Brantford, Collingwood, Guelph, Windsor, or Montreal but freight may be equalized from any of these points.

Carload lots of 70 barrels, price on application.

FARMER AS AUTO ACCESORY PROSPECT

(Continued from page 35)

Probably another $100,000,000 has been invested in private garages, bringing the owner investment up to $400,000,000, and the entire automotive investment of the country, manufacturer, dealer and owner to a total of over $600,000,000.

Figures quoted on the production of automobiles in Canada indicate that approximately half a million automobiles had been turned out of Canadian factories during the past six years. In the following table is given the annual production from 1917 to 1921. While 1922 figures are not yet available it is quite possible that the year's production will bring the total up to over half a million. The figures follow:

1917	93,810
1918	82,408
1919	78,462
1920	97,868
1921	65,355
Total (five years)	417,903

These figures represent a wholesale value of approximately $500,000,000.

MAKE PATRON DEBTOR THROUGH SERVICE

(Continued from page 50)

I know of one retail paint store in a city of 150,000 population, whose sales in 1920 were approximately $500,000, which follows that method. I know of another retail paint store in a city of over 1,000,000 population, whose business runs several hundred thousand per year, and whose competition is of every kind imaginable in a big city, from the cut-throat variety up to the decent kind, which has practised this method for years and found it successful. And I know of others.

Now, before we pass on to the next customer we are going to look up Oscar Pederson, who is going to paint Mr. Olson's house, and get acquainted with him and try to establish a basis of mutual co-operation.

Another Type

Now, in comes Mr. Green, who is an economical gentleman.

"I just want to give my house one coat to brighten it up a little," says Mr. Green. "I usually paint my house one coat about every three years. I think that is a good way to do, don't you, Mr. Dealer?"

"It is certainly better than not painting at all, Mr. Green, but we tell our customers frankly that if their houses do not need two coats of paint they do not need painting. Sooner or later, Mr. Green, your method of painting will cause you a world of trouble, and if your house does not need two coats of paint we would advise you to let it go until it does and then paint it right. Two coats of paint are needed for a job, because the first coat must be a preparation coat for the finishing coat. The old surface must be satisfied with oil—that is, by thinning your first coat with oil and turpentine—thereby satisfying and sealing the pores of the surface that the finish coat may stand out and give you the years of protection and beauty you have a right to expect from your investment.

Why One Coat Will Not Do

"If you apply but one coat you will put it on without thinning, with the result that the surface will absorb the oil—suck it in and away from the surface of the pigment—leaving the pigment without sufficient binder. The paint will soon look dry and dead and disappointing. If your method is continued, Mr. Green, your paint will sooner or later begin to scale. That is what we meant a moment ago when we said your method of painting would lead to a world of trouble for you and possibly for us were the scaling to begin shortly after you had painted with our paint. Naturally the paint last used gets the blame of all the evils that have preceded it."

To make a long story short, Mr. Green either puts two coats on his house, defers his painting for a season, or buys his paint elsewhere. We are not looking for dissatisfied customers and trouble, and possibly the loss of Mr. Green's entire trade at our store.

It sometimes takes a better salesman to turn down an order than to make a sale.

The psychology of the situation is that when Mr. Green sees that we would rather lose the sale than have him use a wrong method with an immediate profit to us that he will be convinced of our sincerity, whether he understands what we have told him or not, and we will get the business when the job is painted, either now or later, but if not let the other fellow have it and be thankful. In other words, "Make your patron your debtor, through service."

(To be continued next week)

NICKEL PLANT RESUMES

The plant of the International Nickel Co., at Copper Cliff, Ont., has re-commenced operations after having been closed down for 18 months. The company is operating at one-third of its war-time capacity. It is proposed to operate with 650 hands and an eight-hour shift has been inaugurated.

RAPID INDUSTRIAL PROGRESS IN CITY OF TORONTO

"TORONTO is one of the most progressive and rapidly growing cities which I have been in," was the statement heard this week from a business man attending the Canadian National Exhibition. This man has recently done much travelling throughout the United States and Canada and his remarks about Toronto, after examining the progress which is being made in improving the city, indicate how visitors to the city are struck with the development which is going on.

Definite progress is being made in Toronto in connection with harbor work, the intention being to make the port of Toronto one of the most important on the continent. This development provides miles and miles of new docking facilities and much new area is available for dock warehouses. It also provides protected channels on which many industries are locating. The construction provides for an ultimate depth of 30 feet so that vessels of greater than ordinary lake vessel draft can be accommodated. In all harbor plans steps have been taken to prepare for ocean carriers coming right to Toronto, as this city will be an important port for such vessels when the St. Lawrence Waterways plan is carried out.

Much Industrial Space

The Harbor Commission in Toronto owns and controls over 99 per cent. of the total inner and outer waterfronts, whereas most other ports are not controlled by the cities in which they are located. Accommodation is provided for over 100 ocean vessels of 5,000 tons and upward with equipment necessary to unload their cargoes in 24 hours. The Commission is reclaiming 1,200 acres for industrial purposes, creating two industrial districts which formerly were under water. Many hundreds of acres of land have been reclaimed and over thirty industries established and in operation. Buildings and plants in this district are valued at over ten million dollars, with over twelve miles of main leads and sidings constructed to facilitate movement of their products. These new industrial areas in the waterfront district provide plenty of room for expansion, and are in addition to the many other extensive industrial districts in Toronto which are well located for rail or ship transport.

Public work being undertaken in Toronto is helping to make Toronto an attractive city for both industries and from a social standpoint. Part of the harbor development work includes the recovering of land at the west end of the city on which an extensive amusement resort, bathing houses, etc., have been established. Part of this development is illustrated in this article showing the splendid facilities provided Toronto citizens for enjoyable recreation. Right along the waterfront, around the island and extending east to Woodbine avenue, a driveway is to be constructed which will be part of a driveway to extend around the whole city.

Will Extend Radials

The City Council of Toronto has just sanctioned an agreement with Provincial Hydro interests and the Harbor Commission whereby a right of way for a six-track radial is given

City Hall and Ontario Parliament Buildings

A view of the new Sunnyside Boulevard, one of Toronto's chief summer attractions.

Some of the prosperity of the citizens is seen in the large number of automobiles.

along the city's waterfront and underground connections into the heart of the city. Steps are to be taken immediately to link up the connections necessary on the present radial lines so that a through service can be given to the U. S. border. The radial lines throughout Western Ontario will also be linked up. A terminal building is to be erected in the centre of the city and this is expected to provide such facilities as will attract much more tourist travel through improved transportation. This agreement also places within the administration of the city officials various power lines necessary to bringing electricity to the city from Niagara.

Progress is also being made in the rehabilitation of the city's street railway service since it was taken over by the city officials. Many miles of new track have been laid and millions of dollars spent on rolling stock and renewal work. Tracks are being laid to the outlying districts and fast transport provided to help open up many of such districts. Under such conditions the city is bound to grow and extend.

Toronto stands out pre-eminently as one of the leading centres of industry and commerce in Britain's Overseas Dominions.

Leads Financially

Industrially Toronto leads among the other cities of the Dominion. There are 2,181 factories within the city limits, representing an investment of $259,610,000, with an annual output of $288,460,000 worth of goods.

Educationally, Toronto's position is well known, as among the foremost centres of learning on the North American continent. Statistics point to her as the leading wholesale and distributing centre, and as a financial centre it is of first importance. With 64 Anglican, 59 Methodist, 50 Presbyterian, 40 Baptist, 30 Roman Catholic, five Congregational and 50 other churches of various denominations, she is obviously well-favored in a religious sense.

Toronto Business Section From the Waterfront

This is a splendid illustration of the new bath house at the Sunnyside amusement resort.

This building, one of the finest on this continent, is a popular acquisition to Toronto's many attractions.

A Place of Meeting

The name "Toronto," is the Indian interpretation of "Place of Meeting." The site of Toronto was the termination of several Indian trails, which supplied the shortest route, and also the most convenient way between Lake Huron and Lake Ontario. It was through this road that the Six Nation Indians passed during the middle of the 17th century, through to the present County of Simcoe, and in a series of bloody conflicts almost exterminated the Huron tribe of Indians.

Fort Rouille, named after the Colonial Minister of France, then in power, was the first name given to the Queen City. This fort was established in 1759, being a French trading post, and it was burned the same year by the French, who withdrew from the town, after being conquered by the British.

Name Changed to York

Toward the close of the 18th century, Toronto was selected as the capital of the Province of Upper Canada, but the name Toronto was changed to York in honor of the Duke of York, son of King George the Third. During the war between the United States and Great Britain, forces from the United States occupied the town of York in 1813, and burned the Legislative Assembly buildings and the Archives. At the conclusion of the war the town grew by leaps and bounds.

In 1834, the population having reached 9,254, the municipality was incorporated as a city and re-named Toronto, and William Lyon Mackenzie became the first mayor. Since that time the progress of the municipality has not received a single set back, and it has doubled its population every 15 years, until recent years, when it grew even faster. In 1884 the population was 105,211; in 1905, 238,642; 1910, 341,991; 1914 470,144; 1915, 463,705; 1916, 460,526; 1917, 473,829; 1918, 489,681; 1919, 499,287; 1922, 525,000.

A Residential City

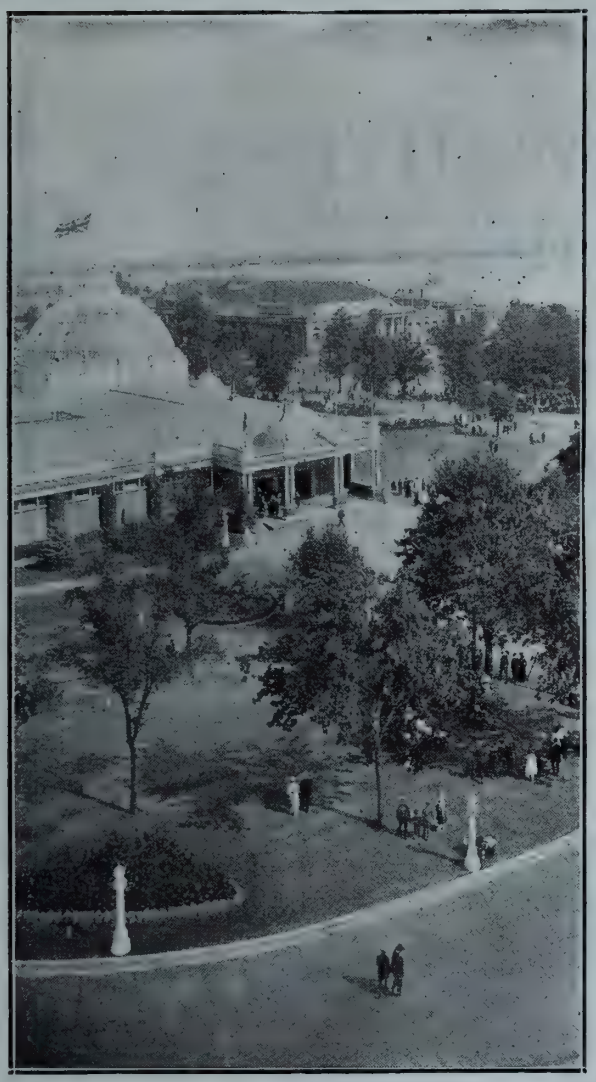
Toronto as a residential city has no peer on the continent. There is no city of equal size in the United States or Canada in which there are so many substantial and artistic homes, a striking feature being that a large percentage are owned by the occupants.

Canadian National Exhibition

The Canadian National Exhibition held in Toronto each year is fast growing in importance. It is said to be the largest annual fair held on this continent and with many new countries taking advantage of the opportunity to show their products it is evident that it may shortly become known as The Annual World's Fair. This year all records for attendance were broken, total attendance being over the million and a quarter mark which was set as a record for this year.

Crowds Entering Canadian National Exhibition

Some Views of the Exhibition



Showing a couple of the buildings of the Canadian National Exhibition, with a glimpse of the lake.

Illustrating the main entrance to the Canadian National Exhibition

Great interest was taken in the various booths, both retailers and consumers being anxious to investigate processes of manufacture. Representatives of the various firms exhibiting, including many hardware firms, told of keen interest being taken in their booths. That the management of the exhibition appreciate the value of having retailers in attendance is indicated by the fact that a special Retailers' Day is set apart on which the interests of this class are given special attention.

Manufacturers and producers generally regard this exhibition as the gateway to the Canadian market, through which they can be brought in direct and personal touch with the distributor and ultimate consumer. It is a specialized market where the whole nation concentrates itself. Brought together here is the whole range of Canadian production, and it is the one big opportunity during the year for direct contact between buyer and seller. It depicts and demonstrates Canadian activities artistic, technical, cultural, agricultural, industrial, and commercial and registers the enterprise, the energy and the development of the country. It is an arena for the display of the industrial strength of Canada and the testing ground for much that the country has to offer.

The Showcase of Canada

Last year 1,242,000 people passed through the turnstiles of the grounds, a record better than ever recorded by any World's Fair for the same number of consecutive days. In the crowds last year 36 states of the Union, all the Provinces of the Dominion, Australia, New Zealand, the British Isles, and several countries of Europe were represented. This Exhibition is the great Show Case of Canada, and here is mirrored Canadian advancement in every line of effort. Two new buildings were opened this year. The exhibition Coliseum is the largest and most costly single structure ever erected on a permanent Fair grounds. It cost $1,000,000, and an additional $500,000 will be spent on equipment. The building has 8½ acres under roof and one of its many features is a judging ring 300 feet long with seating capacity for 7,600 people. The other new building is the Pure Food building. A new machinery hall to cost $300,000 will be started this fall.

The situation of the exhibition grounds, along the lake front, is ideal, and constitutes one of the prettiest parks in the city of Toronto. The natural advantages of the grounds and the thousands of semi-tropical flowers and domestic plant life in bloom, their colors blending into harmonious effects, convert the Park into a vast garden. There are shady paths, restful retreats, focal points and open spaces among the majestic buildings.

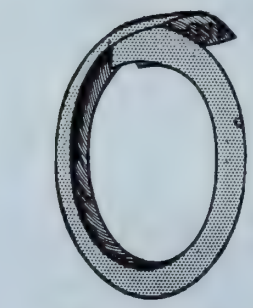
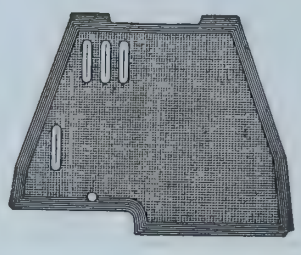
AUTOMOTIVE EQUIPMENT

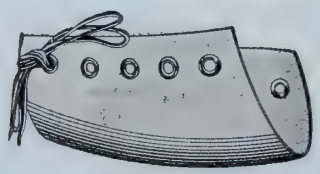
That Motorists Know and Like



Reliners—When the "blow out" is nearly due, and the "soft-spot" causes anxiety, this handy Reliner comes to favorable attention and effective use. This reflects good-will to the man who sold it. You'll find their agreeable experience with the Reliners brings you good business in other lines.



Windproof Mats (for Fords)—There are good all-the-year-'round sales for these effective Mats. In winter, they stop the cold draft; in summer, they keep out the odors, dust and heat from below. Supplied in suitable models for Ford Coupes, Sedans and Touring Cars. Fit closely over brake and clutch lever openings.



Lace-on Boots—These give promptly the effective reinforcement needed immediately when a soft spot begins to cause anxiety. They are easily slipped on and held firmly in place with the staunch leather lace through the brass grommets.

Sealtite Patches—A handy, reliable way to avoid long roadstops for punctures. Sealtite Patches are quickly and easily applied with no other tools but the hands. The tube can be used at once. Just having them in the car eliminates the anxiety that spoils many a motor trip. Customers like them.

Is the Sawdust Soaking Up Your Profits on Oil Sales?

With the ordinary barrel and measure "system," oil drips from the barrel faucet, oil is spilled from over-flowing measures—every drop of which is wasted.

But with Bowser tanks there is no waste of oil. You check in each amount received—it is stored in leakproof, fire-proof tanks—it is dispensed through accurate measuring pumps directly into the receptacle.

In operation, if oil is carelessly spilled it goes back into the tank through the Bowser drip pan—no sawdust is needed. Thus every drop of oil you buy is sold and pays you a profit.

The time saved by the Bowser will alone pay a handsome dividend on the investment.

And the fast, accurate, cleanly service makes every customer a friend of your business.

For specific figures as to the possible economies in your oil department ask for booklet C-16 and get the Bowser story.

LIVINGSTON SERVICE

The "Livingston" business was founded on service, has grown and prospered on service, and we intend that its future shall be based on service that merits your continued patronage and good-will.

We have recently extended and improved Livingston service so that your wants may be attended equally well from Vancouver to Prince Edward Island. The extended service is new, but Livingston Brand is older than Confederation.

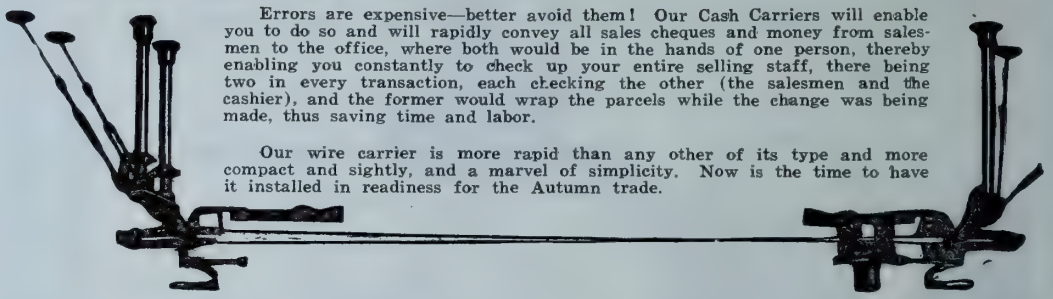
HARDWARE & METAL'S

unique circulation as proven by the A. B. C. Audit is due to 34 years of honest effort to give the retail trade the best possible service.

Further information for the asking. All kinds of wire Cash and Parcel Carriers, and Pneumatic Tubes.

Gipe-Hazard Store Service Co., Limited
113 Sumach St., Toronto, Ont.

Also 318 Homer St.,
Vancouver, B. C.



Errors are expensive—better avoid them! Our Cash Carriers will enable you to do so and will rapidly convey all sales cheques and money from salesmen to the office, where both would be in the hands of one person, thereby enabling you constantly to check up your entire selling staff, there being two in every transaction, each checking the other (the salesmen and the cashier), and the former would wrap the parcels while the change was being made, thus saving time and labor.

Our wire carrier is more rapid than any other of its type and more compact and sightly, and a marvel of simplicity. Now is the time to have it installed in readiness for the Autumn trade.

OUR EAVETROUGH AND CONDUCTOR PIPE ARE NOTED FOR THEIR EASY FITTING QUALITIES.

Now is the time to order conductor elbows, ridge roll, valley iron, corrugated galvanized iron roofing and siding. All kinds of eavetrough and conductor pipe accessories, galvanized iron sheets, etc.
We ship while others are thinking about it.

WHEELER & BAIN, LTD. TORONTO

Subscription price for HARDWARE and METAL is $4.00 per year or less than eight cents per issue.

WHAT WE LEARNED AT THE "EX"

The Toronto "EX" this year lived up to its reputation as a National Institution. It does not represent the achievements of any section of Canada, or any particular line of endeavor. The man with railroad trains to sell is no more welcome than the man with the biggest turnips. It is safe to assume that the "EX" has been a tremendous and invaluable stimulus to the industry and achievement of Canadians in every possible line of endeavor.

it also affords the purchasing public and those who cater to their various wants, the great opportunity to bring their knowledge "up-to-date," to compare the progress of manufacture, invention and achievement with past years.

Our particular hobby is Brushes—Brushes for every conceivable purpose. And the tens of thousands of visitors who passed The Rubberset Booth this year were once more reminded that Rubberset Trade Mark stands for perfection in brush manufacture. It was a pleasure, as well as an interesting privilege to answer the thousands of questions that our demonstrators were asked, to explain the care and skill that goes into every Rubberset Brush, the process that makes it impossible for bristles to come out, and the fact that they could purchase Rubberset Brushes from Druggists, Hardware Dealers, General Stores, from one coast to the other.

We also made it a point to gather what information we could from those who came from the various parts of the Dominion, and we can safely assure Rubberset Dealers everywhere, that never was there a more generally optimistic feeling abroad—"Things are better—much better—and rapidly getting back to normal." We believe trade will be good for Rubberset Dealers this Fall. That's what the "EX" taught us.

THE Gurney EXHIBIT

AT THE CANADIAN

TORONTO, AUGUST 26th

We created much favorable comment, and dealers all over the country should "cash in" on this wonderful publicity. The Gurney Foundry Co. spent thousands of dollars showing the buying public their lines, and the dealers should send for our new catalog, No. S-221, especially gotten up for them and theirs for the asking. It might be timely to mention that at this Exhibition we showed some good equipment suitable for the burning of soft coal. This should be interesting, as we expect that a great deal of this fuel will be used this winter.

Some of the famous names in the Gurney line:
Royal Combination, Oxford, Chancellor, Laurentic, Arcadia, Glenwood, Keystone, Rockland.

TORONTO—*the buying centre of Canada*

THE Gurney EXHIBIT

NATIONAL EXHIBITION

TO SEPTEMBER 9th, 1922

REMEMBER

Your Stove Department is of first importance to your business.
Gurney Stoves are known to your customers as good stoves.
We have sold stoves to Canadians for eighty years.
Gurney Stoves are modern to the last detail.
Gurney Merchandising Service is yours for the asking.

The Gurney Foundry Company Limited

TORONTO, CANADA

MONTREAL VANCOUVER WINNIPEG

The Thos. Davidson Mfg. Co. Exhibit

As crowds upon crowds of Exhibition visitors filed through the Stove Building, the above exhibit was the one that attracted the maximum attention.

With specially selected salesmen in attendance to answer inquiries and to give demonstrations, hundreds of householders from different parts of Canada are now familiar with and appreciate the advantages of using our stoves, heaters, enamelled ware, etc., in preference to any other make.

You can readily see by the photograph the exhibit was composed of ranges, stoves, heaters, combination heating stoves, refrigerators and enamelled ware, and there is no doubt that hardware dealers selling these lines will feel the beneficial effect of this splendid advertising by the Thos. Davidson Mfg. Co., Ltd. during the record breaking Canadian National Exhibition. An extra amount of interest was evinced in our new Premier Knight, the all steel kitchen range whose chief merit lies in its economy of fuel consumption and its cost. It is so attractive in appearance with the white enamelled tile back and nickel plated trimmings that it required only a demonstration to cause many among the daily crowd to decide that the very next stove they bought would be a Premier Knight.

Another range that received the amount of attention it deserves is the Premier Marathon, another all steel range which embodies every feature of construction to make it the highest class modern steel range on the market today. The main features of the Premier Marathon are quick baking, correct regulation, economy and as its name indicates, endurance. This range can be supplied with white enamelled panels on the back and oven door, nickel plated trimmings, high warming chest or Persian closet or tea shelf; heavy copper reservoir at the back guarantees warm water at all times. The oven is well insulated and ventilated and is superior for baking and roasting, and the front section of the stove conveniently lifts for toasting, broiling or adding more fuel.

A splendid display of heaters and heating stoves will ensure for our dealers a large demand for them during the coming months. The excellent heating qualities are today well known everywhere, and their sturdy construction was demonstrated to the satisfaction of every visitor at the Exhibition.

The best manner in which to take advantage of the good work of the above exhibit is to show your prospective customers your stock of Davidson products by devoting more space to their display in your store and show windows, making use of the advertising matter furnished by this company.

Out of the 1,372,500 people who attended the Canadian National Exhibition at Toronto during the last two weeks there will be very few localities which were not represented. It certainly is worthy of every effort on your part to cash in on the effects of this splendid advertising.

AT THE SIGN OF THE SNIPS

The Brown-Boggs Exhibit

Visible from almost every corner of the vast machinery building was a huge pair of tinsmiths' snips, which, suspended above The Brown-Boggs Co. exhibit, broadcasted to all concerned that this enterprising company was now making tinsmiths' snips in its Hamilton factory —a Canadian product for Canadian mechanics.

This new departure created considerable interest among members of the trade who, there, took the opportunity of examining the snips and making many inquiries.

To judge from the many fine compliments that were paid to The Brown-Boggs Company and the universally favorable comment of hardware men and tinsmiths on the new Canadian Made Snips, there will be some mighty nice business done in this line in the immediate future.

The exhibit included all the well known tinsmiths' tools that carry the "B", "B" Stamp as well as Cornice Brakes—Power Presses—equipped with their own special safety device, Large Power Shears, and circular shears for cutting inside and outside circles.

It was a splendid, well decorated, well grouped exhibit which demonstrated the capacity of The Brown-Boggs Company's Plant to turn out tools and machinery both large and small that for quality and precision hold their own in any company.

Exhibit of the McGlashan-Clarke Co.

Niagara Falls, Ontario

Directly opposite the main entrance to the Manufacturers' Building, in a particularly commanding position was the artistic exhibit of the McGlashan-Clarke Co., Ltd., of Niagara Falls, Ont., makers of "Niagara" silverware.

Magnificent oak and mahogany chests of gleaming silverware formed the background. In front, temptingly grouped was a glittering display of their King's Plate flatware, in Patricia, King George, Lenora and Niagara patterns.

The above patterns with Stainless Steel Carvers, and Table knives, guaranteed not to stain even when used on acid foods, vinegar, or the like, were also on display. At the opening of the Exhibition a number of lemons were sliced by these knives and the knives left imbedded in the fruit; their bright, unstained surfaces, maintained for weeks in the face of this telling test was a source of surprise and interest to the thousands of visitors who stopped at the booth.

An entire case was devoted to a display of their very attractive line of Ivoroid stainless steel carvers and table knives.

The McGlashan-Clarke Co., Ltd., are the pioneer makers of Stainless Steel Cutlery in Canada; their output grows steadily from year to year; and the inquiries made at this year's exhibition—the interest manifested by both dealers and public, promise even greater things for the immediate future.
Catalog on request to the trade.

How Many of Your Customers Went to Toronto Exhibition?

Scores and scores of your customers visited the "Ex."

Few, indeed, of these failed to inspect the exhibits in the Manufacturers' Building.

And every visitor to that building halted, looked and asked questions, when he came to the Connor Booth. Here was startlingly contrasted the old and the new way of washing clothes; here our salesmen and demonstrators by word of mouth and by folders and booklets spread the tidings of Connor service and Connor performance.

They demonstrated Connor washers; they pointed out their economy and desirability to **These Customers of Yours.**

To Your customers—think of that. Now it's up to you to cash in on our missionary work to actually close the sale.

Show Connor Washers on your floors and in your windows, mention them in your advertising—talk about them to customers, and splendid business is sure to follow from our joint efforts.

The exhibit, which occupied three sections, showed besides the Connor Electric Models 1 and 2, the Perfection and Economy washers, various styles of Hand Power Machines, including the Canada First, Connor Ball Bearing and the Gem, also two styles of Connor Low Pressure Water Power Machines.

The Connor Electric Model No. 2 has tilting tub, extension bench for rinsing tub, with improved four-wing dolly agitation or flat rub board, 12-inch wringer and quarter horse-power motor.

The Connor Electric No. 4 occupied the foreground of the exhibit. This machine has copper tub, aluminum cover with aluminum disc agitator with extension folding bench for tub. Any position 12-inch wringer with aluminum trimmings and quarter horse-power motor.

Exhibit of Community Plate

Blue, Royal Blue, a background of soft blue velvet on which glimmered softly the sheen of exquisite silver; that was one's first impression of the Oneida Community Plate exhibit.

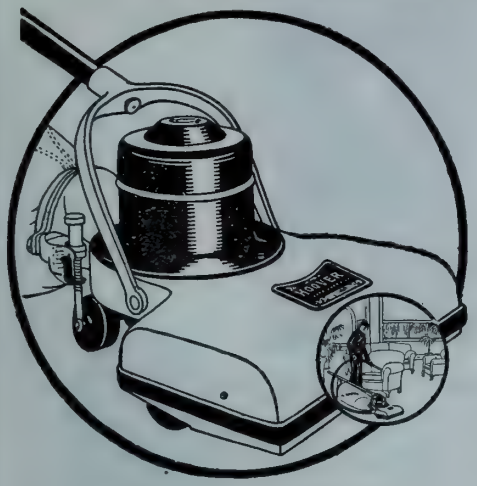
The blue velvet lining of the silver chests and gift boxes blended smoothly with the background, and cunning grouping of units drew the eye gradually to the central feature of the booth; an original drawing by Coles Philips.

Coles Philips girls have become identified, through extensive advertising, with Community Plate, and thousands of visitors stopped to admire the original of one of these delightful drawings.

In Community Plate, Grosvenor, Adam, Patrician and Sheraton patterns were displayed, and in Tudor Plate, Marquis and Baronet.

The back cover of this magazine shows a number of these patterns. While Oneida Community Limited is known to the general public as makers of silverware, only, dealers do not need to be reminded that it is also the oldest and largest maker of game traps in the world.

Announcing



Partial view of the wonderful new Hoover, Model 961. Sturdy and durable. Requires no oiling. Quiet running. Easy to operate. Ball bearings throughout. Weighs only 29 pounds. Retails at $155, east of Rockies. Attachments, $16.50

A Big HOOVER

for Stores, Hotels, Clubs, Offices, Large Homes, etc., etc.

After several years of experimentation and study, the new big Hoover, Model 961, is ready.

It introduces a new era in the sale of electric cleaning apparatus for use in large residences, dormitories, institutions, stores and fine shops, as well as hotels, clubs and offices.

There is nothing to rival it, either for economy or efficiency. It far surpasses all installed plants. It outclasses all other portable cleaners.

Practically "Fool Proof"—rough treatment or neglect can not harm it. Built for continuous heavy work. No skill required to operate it.

No Oiling Required—forgetting to oil the motor can never cause trouble. This new quiet-running Hoover has a *ball-bearing*, *dust-proof* motor made for us by the General Electric Company.

Operates on Direct or Alternating Current—without change and at a uniform speed. Therefore, the dealer need stock only one model.

Very Light in Weight—weighs only 29 pounds. Glides easily; all-day use will not tire the operator.

Other Exclusive New Features include a ***ball-bearing*** Beating-Sweeping brush, a wider cleaning mouth, a non-marring fibre handle grip, and a new device which adjusts the cleaning mouth and automatically locks it at the proper cleaning height for carpets of different thickness.

Cleans Thickest Rugs

Especially designed to clean even the heaviest, thickest rugs, the new Hoover beats out all nap-wearing grit, sweeps up all clinging litter, erects crushed nap, freshens colors and cleans by powerful suction.

So easily is it shown that The Hoover imparts to carpetings a longer lifetime of wear that a strong argument can be built around this fact.

In many instances the value of carpets run into thousands of dollars. The replacement of these is a heavy and frequent expense. The Hoover will pay for itself repeatedly by saving this cost. Furthermore, any prospect with whom cleaning is a costly matter can readily be shown that savings in labor will also quickly pay for each Hoover purchased.

Attachments Easily Connected

A new, easily connected "converter" allows the greatly improved Hoover air-cleaning attachments to be easily used. Extremely strong suction is provided.

Profits Are Large

Authorized Hoover Dealers have, in this fine new Hoover, an unprecedented opportunity to add greatly to their profits.

In numerous cases, a number of these cleaners can be sold practically without competition.

Write us today. Production of this new model is in full swing.

SANDERSON HAROLD EXHIBITS NEW VENTILATOR

The Sanderson Harold Co., Ltd., Paris, Ontario, had an interesting display of refrigerators, ventilators, screen doors and window ventilators in the Industrial Building.

A particularly seasonable line shown was the Paris ventilator for which there is developing an increasing demand during the Spring, Fall and Winter months to provide fresh air, while keeping out soot, rain, dust or window drafts. The ventilator is built like a window screen, the sliding panel being filled with a chemically treated cotton gauze stretched to prevent sagging, the hardwood frame being made adjustable by easy running metal slides. These are used instead of wooden slides preventing the ventilator from binding in wet weather. For bedrooms, sickrooms, pantries, etc., where ventilation is needed without drafts, the Paris ventilator is very useful and hardwaremen should have a large sale for this new line.

The All Season Combination Storm and Screen Door was also displayed, the door staying on its hinges all the year round, being made of solid quarter-cut oak with two coats of special waterproof varnish. It has a mortised frame and in the Summer an attachable screen door panel is inserted while in the Winter the screen panel is replaced with a solid, substantial, storm panel fitted with four glass windows. In the winter the glass occupies one third of the door surface and in the Summer the screen covers five eighths of the door surface. Once hung, it is always hung, while it takes but a few minutes to change the panel in the Spring or Fall.

The Sanderson Harold Co., make about thirty types of refrigerators and about nine of these were on display, the Paris Seamless being quoted as Canada's finest refrigerator. It is made of solid oak and has ten insulating walls which shut out the warm air and keep the cool air within the refrigerator. A fresh current of pure, dry air is kept in circulation by placing the ice about the provision chamber, the falling cold air displacing the slightly warm air at the bottom of the refrigerator, no foul air being allowed to accumulate. The lining is of porcelioron, seamless and in one piece with rounded corners. It will not wear out or become stained. It is water tight and easily cleaned.

The Sanderson Harold Co., argue that no other equipment is so closely related to the family's health as the refrigerator as a storage container and preservator for food, and a porcelain interior should be used to ensure the health of the family as much as a porcelain bath tub.

The Everlasting Veneer Toilet Seats

This is the strongest and cleanest toilet seat made. There are no cracks —made of 7 and 9-ply, air-seasoned wood veneer, held together by our special wood cement.
These seats are proof against heat, cold or dampness—will never crack, warp or split. They cost no more than the so-called "cheaper" toilet seats, and always bring repeat business.

An Increase in Business

Given desirable merchandise, salesmanship to-day plays the stellar role in the effort for more business.

Brushes, for instance, are often left to sell themselves and with very indifferent results.

On the other hand many live hardwaremen who use Meakins display containers to show Meakin's Brushes—who talk brushes, introduce Meakin's brushes to purchasers of paint, and who overlook no opportunity of pushing this profitable, well known line, are making gratifying increases in their brush business.

Our new 1923 brush catalogue listing our complete line will be mailed to you on request. This will be printed and distributed to the hardware trade about the middle of September.

Remington

Announcing

The New Remington

Oil Proof Pistol Cartridges

Remington again offers a brand new and exclusive process in ammunition manufacture. Research has proved that ordinary cartridges allow the seepage of oil into the powder chamber, thus impairing the ignition properties of the powder.

All Remington automatic pistol cartridges are now sealed at the mouth of the shell and at the primer—making them absolutely oil proof.

Here Is Your Market

The Home Owner frequently keeps a pistol for protection. At the critical moment he wants to KNOW that his ammunition will function properly. Remington Oil Proof Cartridges are SURE FIRE when used in an arm of standard manufacture.

Transportation Guards Express and Postal messengers require this absolutely dependable Remington ammunition.

Peace Officers Police, sheriffs and private guards will welcome Remington Oil Proof Cartridges, which need not be changed frequently and are always absolutely trustworthy.

Sportsmen especially those who follow the big game trials and at times have to depend upon the pocket arm for safety, will find the Remington oil proof process a warrant of dependability.

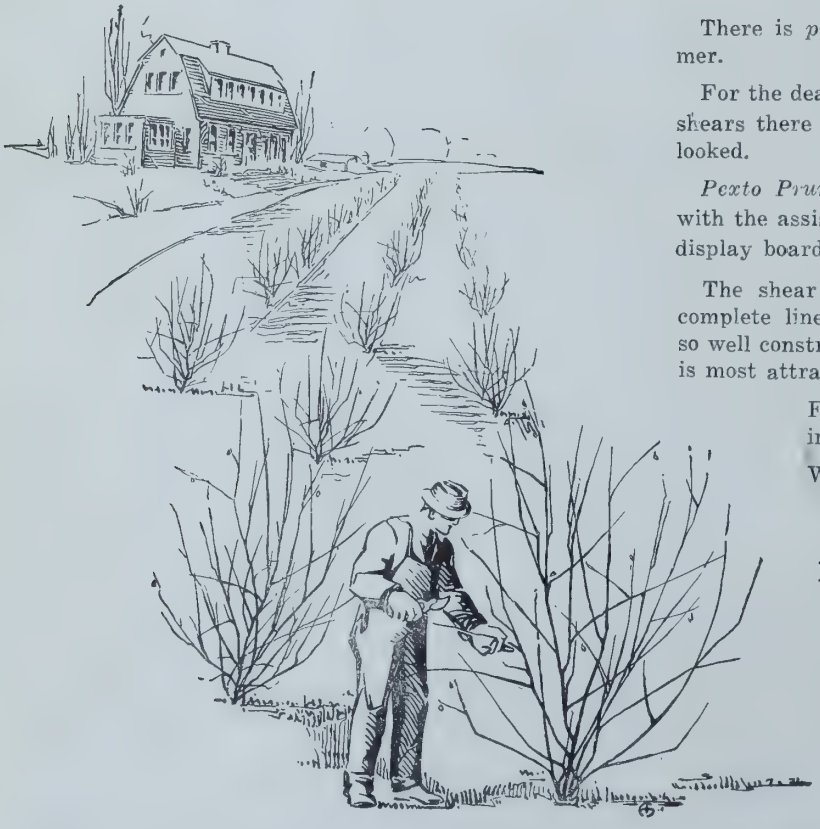
Profit in Pruning



There is *profit in pruning* for both dealer and consumer.

For the dealer who stocks a rapid selling line of pruning shears there is a money profit which should not be overlooked.

Pexto Pruning Shears will make rapid turnovers, and with the assistance of one of our handsome pruning shear display boards they practically sell themselves.

The shear illustrated herewith is representative of a complete line. They are designed to cut easily and are so well constructed that they will last a lifetime, the finish is most attractive and durable.

For the consumer—the profit resulting from intelligent pruning is beyond figures.

Write for further details.

O.P.W.

There is a proper thickness for paint. The very best paints, spread thinner than tissue paper, cannot be expected to give maximum protection. They will chalk rapidly. The best paints, spread too thickly, must, sooner or later, give trouble in cracking, or scaling. There are limits on either hand, beyond which it is not safe to go. Care and judgment should be used by those who paint, and O.P.W. should be their paint

Many people use paint without knowing how it ought to be applied, and if results are unsatisfactory, they blame the paint and the store. A common idea regarding paint is that, so long as it hides the surface satisfactorily, it can be spread as far as it can be brushed out.

NOT for today but for TOMORROW, sell your customers O. P. W.

Ottawa Paint Works, Limited

Ottawa, Ontario

Branches: Montreal and Toronto

Fall Painting Time Is Here
Are your Stocks well Assorted?

You've seen for yourself many times that painters are "pernickety"—if you haven't the **exact** size and style they want they are apt to go elsewhere.

Don't lose sales and drive good customers away — keep your stocks well assorted and give your customers the best.

CANADA Brushes are guaranteed — the bristles won't bush, flare or come out—they are recognized everywhere as GOOD brushes.

Have you received our dealer proposition?

Barrett Roofings, Cements Industrial Paints etc.

Powerful Advertising for Quality Products

THROUGH 1922—all over Canada—millions of advertisements will point out the economy, the reliability, the superiority of Barrett Roofings, Cements, and Specialties.

Such a powerful sales-making force is bound to bring new customers to Barrett dealers everywhere.

But that's only half the story. Barrett Roofings and Specialties stand head and shoulders above any similar goods—once a man buys them he buys again and again. For Barrett customers are always satisfied customers.

The biggest profits are made by dealers who carry a complete stock of Barrett goods. *You* should have every one of these popular, fast-selling products on hand.

TINKER TOM'S TALKS.

No. 376

Back to School!

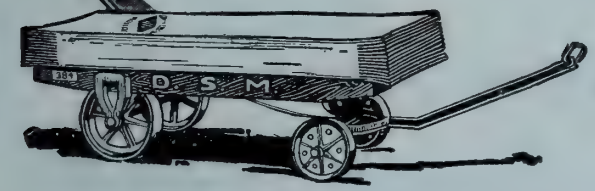
The vacation days are over and the kids are back to books again.

How about the rest of us getting back to work, too?

When winter comes there's little doing outside, so get busy now, and if you're short of sheets (very possible, too) tell your jobber to put it up to us.

Will do our best to help out.

TINKER TOM



DOMINION SHEET METAL CORP. LTD
MADE IN PREMIER CANADA
HAMILTON, CANADA.

Glass Specialists

We carry in stock all kinds of

Glass

For Buildings

Order your requirements from

The Saskatchewan Glass And Supply Company, Limited

MOOSE JAW, SASK.

Dollar Turpentine

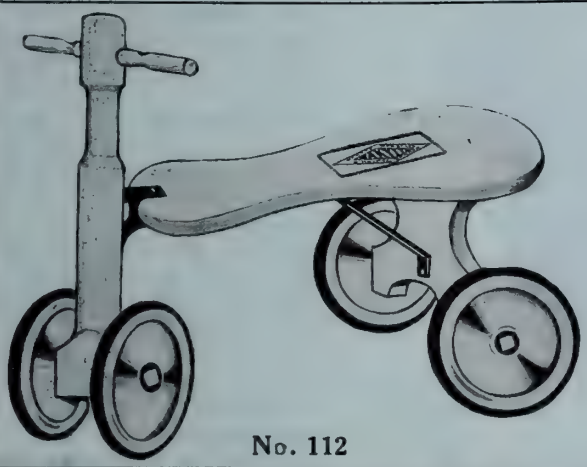
All lines are fully illustrated and described to help you in your selection.

The J. H. ASHDOWN HARDWARE CO., Limited

Calgary Winnipeg Saskatoon



No. 112

Where the name "Wakyte" appears there is Perfection of Workmanship

We manufacture Buster Cars, Pony Cars, Shoofly Rockers, Wheelbarrows, etc., and have made it our business to see that the best possible service is given for the money expended.

The Wakyte Buster Car illustrated, is equipped with four pressed steel disc wheels and rubber tires. The body is artistically finished in Canary Yellow-Enamel wheels in Vermilion Enamel. Shipped three to a crate.

When writing us ask about the "Comfort" Weather strip made in Quarter Cut Oak. Set consists of two pieces 7 ft. and two pieces 3 ft. long.

Where Quality and Price count the "Comfort" Weather Strip must appeal to all Buyers.

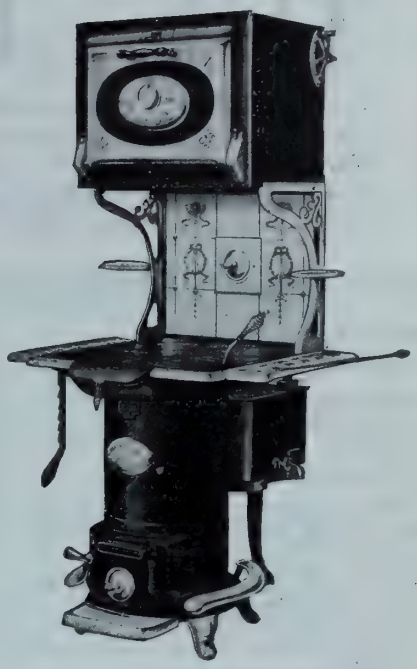
Maple Leaf Has No Competitors

WE cannot make all the stoves and ranges that are used so the Maple Leaf line includes only the best. The style and designs that have the Maple Leaf brand have earned it only through a severe process of elimination. It is a case of the "survival of the fittest." The dealer who handles this line is in an enviable position. Are you one of the lucky ones?

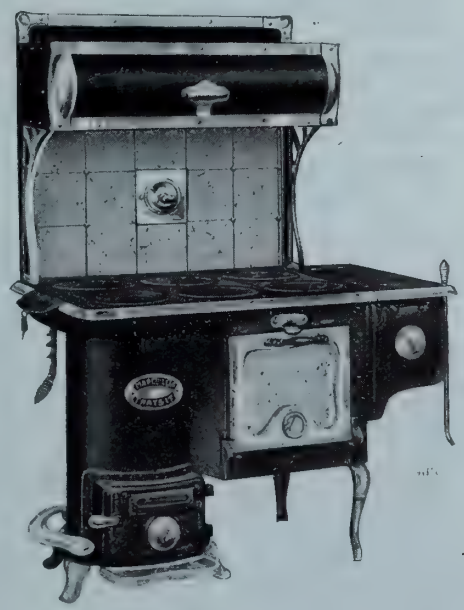


The Maple Leaf Composite

This range is unique—There is nothing like it on the market. There never will be because of its patented flue system which makes the high oven possible. It is the peer of all "Quebec" heating, cooking and baking ranges. It occupies only a small floor space. It has all the modern attachments. It burns all kinds of fuel and every woman who buys one will help you sell others.

The Maple Leaf "That's It" Range

A side-oven, 6-hole "Quebec" Range that leaves nothing to be desired. The heat units are so controlled by the new undertop that the fire must pass under all six covers. The oven is 13¼ x 11½ x 20" deep with balanced spring type drop door, friction catch non-heating handle and thermometer. It has a broiler lift and a pouch feed door. It can be fitted either with a hot water boiler or copper reservoir and with or without warming closet. This is a stove that is hard to beat.



The Maple Leaf "Falcon"

An aristocratic steel range that will back up every claim you can make for it. It is made in several handsome designs which makes it an ornament in any kitchen. It gives perfect satisfaction at all times—The Falcon is both a money maker and a friend maker for the dealer.

The Maple Leaf line contains everything from a Quebec heater to a cooking range or a furnace. It enables you to meet every demand of your trade and to give them always perfect satisfaction.

Maple Leaf Quebec Heaters

There has never been a heat-making machine invented for this northern climate that excels in simplicity and efficiency the so-called "Quebec." It burns any and all kinds of fuel—consumes it completely—extracting every last heat unit. Maple Leaf "Quebecs" are made in many sizes and many designs—all of them are winners.

DEALERS:

If your town has no Maple Leaf agency, better write us to-day.

THE BUYERS' GUIDE

If what you want is not here, write us, and we will tell you where to get it. Let us suggest that you consult also the advertisers' index, facing the inside back cover, after having secured advertisers' names from the directory. The information you desire may be found in the advertising pages. This department is maintained for the benefit and convenience of our readers. The insertion of advertisers' headings is gladly undertaken, but does not become part of any advertising contract.

Investigate

ROUND OAK

The Complete Quality Line

As there is a Round Oak specialty for practically every heating or cooking purpose, dealers find the Round Oak an exceptionally good line upon which to concentrate.

The line is strictly a high grade one, of more than half a century's standing as such. Every sale of a Round Oak means a thoroughly satisfied user, a permanent asset to the dealer.

The exclusive dealerships which we grant assure to each merchant undivided future returns for the effort he expends in his locality.

Sales and advertising co-operation, which the Round Oak Folks extend to their dealers with a liberal hand, makes the proposition highly attractive.

The Round Oak line includes the famous Moistair Heating System, Iron-Bilt Furnaces for pipe installation, Pipeless Furnaces, Heating Stoves, Coal and Wood Ranges, Combination Three-Fuel (gas, coal, wood) Ranges, and Porcelain Enameled Ranges.

Let us send catalogs and full particulars.

Keystone Reversible Ratchet
Combination No. 200
A Proven Record for Good Sales

This handy combination is well made of first-class materials. It consists of ratchet for taper shank, twist drills, sleeve for square shank drills, and short boiler socket for square shank drills. The sockets are interchangeable. The working parts are all enclosed, preventing dust and grit from clogging the mechanism.

If your jobber cannot supply the demand, write us.

Desolvo

A Time and Money-Saver

If you do plumbing in addition to your hardware business, it will pay you to keep Desolvo on hand. It will shorten your time on jobs and will make profitable sales to customers.

Desolvo just has to be mixed with cold water; it generates heat that quickly removes any stoppage from pipes. It saves tearing up floors, lawns, etc.

Order from your jobber

The Chamberlain Desolvo Co., Ltd.
35 Richmond St. E. Toronto

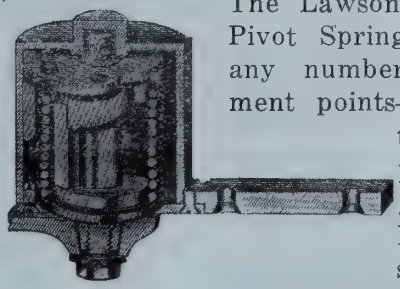
"UNIVERSAL"

has many adjustments



The Lawson "Universal" Pivot Spring Hinge has any number of adjustment points—not merely three 90° points of adjustment. Door can be set to remain open at any desired point in a jiffy. Fine quality—best materials. For right or left hand doors. Sagless—with adjustable alignment and spring tension. Ask us about it.

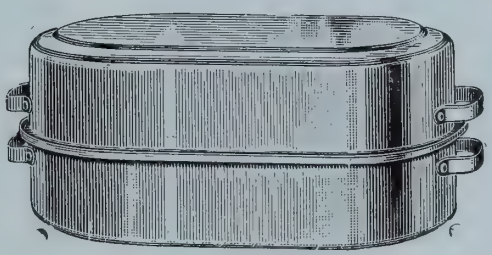
SUPREME CUTLERY



Viko Roasters Have Many Uses

Viko Popular Priced Roasters are used daily for baking bread or cake, for frying doughnuts, and for making escalloped potatoes or puddings as well as for the roasting of meats. Between baking days they are used as bread or cake boxes.

Suggest these uses to your customers —it will mean extra sales.

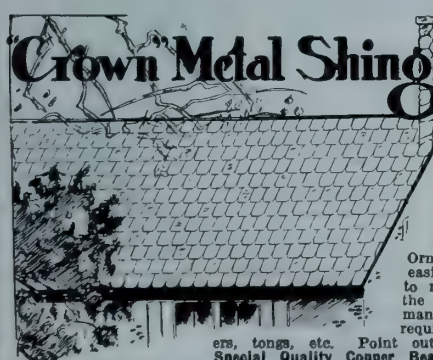
These durable, guaranteed, self-basting roasters are made in sizes to suit every cooking need.

Write for Literature and Prices.

HURTUBISE LIMITED
222 NOTRE DAME ST. WEST - MONTREAL

"Crown" Metal Shingles

Will Outlast Them All



They are being used where efficiency in roofing is of the greatest concern. They are absolutely storm and wind proof. Locked together securely on all four sides, they make the strongest roof on the market. Ornamental in design; they are easily sold and you have only to mention the ease with which the roof can be laid to make many sales. Point out that they require no solder, mallets, seamers, tongs, etc. Point out that they are made from **Special Quality Copper Bearing Shingle Plate**, a guarantee of their long life. We will be pleased to give you further details or any advice on sheet metal work—write us.

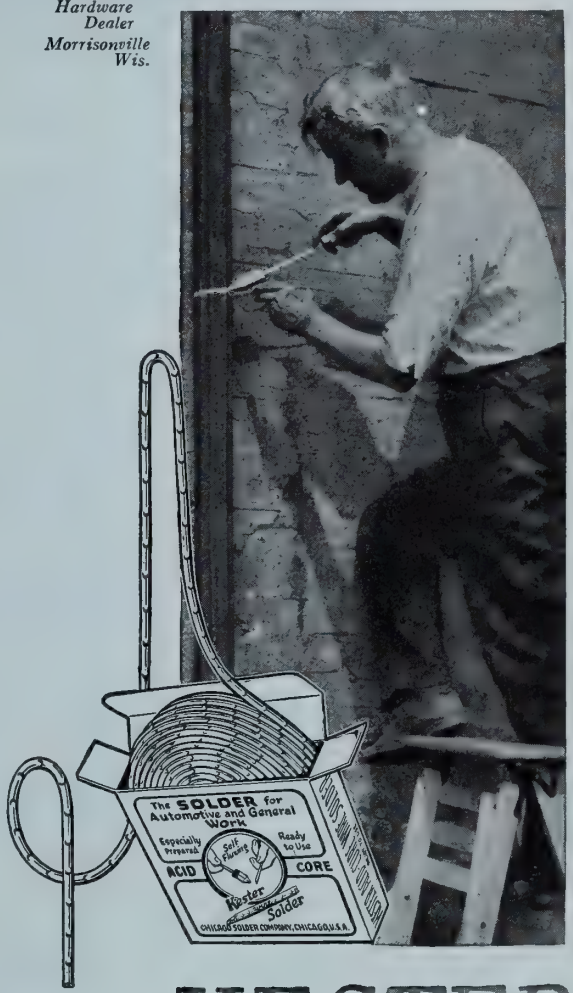
NO ACID POT NEEDED

"In answer to your letter of April 30th, will say I am more than pleased with your Kester Acid Core Wire Solder. It saves having an acid pot sticking around.

"It is the best thing I ever used when up on a ladder soldering eaves spouts, etc.

—Geo. Morrison
Hardware Dealer
Morrisonville Wis.

—because the acid is *inside* that *hollow* Kester Acid Core Wire Solder. It's used everywhere now. Be sure to get your sample spool by using the coupon today.



KESTER
Acid Core WIRE SOLDER

In the illustration above the black spot indicates the flux that fills the inside of the hollow wire solder. Notice the crimps in the solder shown above. They keep the flux from running out except as you wish to use it, and keep the amounts of flux and solder always in proper proportion.

CHICAGO SOLDER COMPANY A&M9-11-22
4225 Wrightwood Ave., Chicago, Ill.

Please send me the sample spool of Kester Acid Core Solder described in your advertisement, no charges, postage prepaid.

Bissell's Fall-Xmas Offer

To The Trade:

An extra sweeper free with an order for a dozen or more, in consideration of nominal advertising co-operation, is our Fall-Xmas proposition again this year and we are presenting it in time so you may take advantage of it during the fall selling season for housefurnishing goods.

Also, realizing the position of the trade due to the increased sales tax, we have decided to make a special allowance equal to one-half of the 4½% tax, effective September 6.

That business generally will be good this fall seems to be the consensus of opinion. Surely the evidence points that way with an excellent crop forecast, improvement in industrial employment, general firmness of labor and commodity prices as well as other factors which indicate the way the wind is blowing. For ourselves, we can report a record-breaking spring business in Bissell sweepers. Following a very large business last fall, this is proof enough that the need and demand for carpet sweepers is unabated.

Let us mail you a copy of our Fall-Xmas Offer announcement containing full details.

Yours truly,

BISSELL CARPET SWEEPER CO.

Why Hardware and Metal has Such a Large Western Canada Circulation

THERE are many reasons why Hardware and Metal covers Western Canada as thoroughly as the other parts of the Dominion. Some of the outstanding reasons are:—

Hardware and Metal is the *only* hardware paper giving a weekly market service from Western Canada.

Hardware and Metal is the *only* hardware paper giving a weekly news section for Western Canada.

Hardware and Metal is the *only* hardware publication giving the trade in Western Canada a weekly market service from Montreal, Toronto, London and Pittsburgh—and Westerners are even more interested than any others in the activities in the primary markets of the East.

Hardware and Metal is the *only* publication in Canada giving the Western hardware trade a weekly service covering the activities of the hardware trade in a National way.

Hardware and Metal is the *only* hardware publication giving the Western Canada trade a weekly market service on paints, oils, varnishes, etc.

Hardware and Metal is the *only* hardware publication giving the trade any Western Canada weekly information regarding, "What Other Merchants Are Doing," Legislation, New Hardware Goods, Illustrated Articles on Display, Advertising, Etc.

Hardware and Metal during the twelve months of the year, supplies the Western Canada hardware trade with more market information, more new goods information, publishes more illustrations of window displays, store interiors, and retailers' advertisements than all the other Canadian hardware trade publications combined.

Incidentally, Hardware and Metal is the only hardware trade publication in Canada that will supply you with an Audit Bureau of Circulations statement, thus proving what it really has in the way of circulation in Western Canada.

MORAL—*If you are interested in Western Canada trade, advertise in the paper that is read by the Westerners and has gained its present dominating position in the West, as well as in other parts of Canada through 34 years of honest effort to give the trade each week the best in hardware trade newspaper service.*

Member A.B.C. **HARDWARE & METAL** *Member A.B.P*

Canada's National Hardware Weekly since 1888

143-153 University Avenue, Toronto, Canada

Published every Saturday since 1888. The only weekly hardware paper in Canada and the only hardware paper in Canada that gives you a circulation statement audited by the Audit Bureau of Circulations.

Montreal Branch, Southam Bldg. **Winnipeg Branch, Confederation Life Bldg.**

UNITED STATES OFFICES—New York, Room 1606, St. James Building, 1138 Broadway, (corner 26th Street; Boston, Room 734, Old South Building, Telephone Main 1024; Chicago, 405-6 Transportation Bldg., 608 South Dearborn St., Phone, Wabash 9430.

WANT ADS

If you want a buyer, clerk, salesman, traveler, position, you can reach the best men in the trade through these columns.

If you wish to buy or sell a business, or dispose of overstocks, you can reach a larger number of hardware men through this page than in any other way.

Rates (payable in advance) 2 cents per word. An additional charge of 10 cents for each insertion is made when Box Number is required. Each figure counts as one word. When panels are desired a charge of $2.20 is made for a panel 1 inch deep by 2⅛ inches wide.

Address all advertisements for this section to HARDWARE AND METAL, 143-153 University Ave., Toronto, Can.

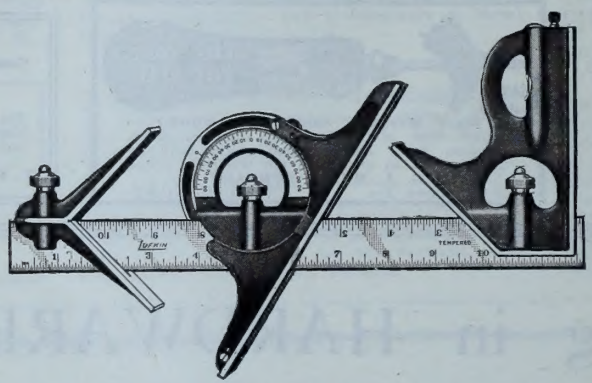
LUFKIN

COMBINATION SQUARES



LUFKIN

BEVEL PROTRACTORS
COMBINATION SETS

JUST PUT THEM ON DISPLAY

At a glance every mechanic's eye will be caught by their nicety of design and finish, and their distinctive color.

On closer inspection he will see among other improvements that both legs of center head are exactly same length and ends formed, insuring accuracy on any circumference, large or small. That the double protractor is readily convertible into single protractor, serving perfectly for every sort of work.

Backing Up the Man Behind The Counter

BACKING UP the man behind the counter by helping him to sell Carborundum Products—that's the job for Carborundum Displays.

And they do their work mighty well.

For years Carborundum Displays have been welcomed into the Hardware Stores of the nation.

They have been welcomed because they are not cheap—because they are designed to be used in the window, on the counter, on the shelf—because they have a Sales Creating Message that makes them pay.

Carborundum Displays have character. They are worthy of prominence in your store.

Carborundum Displays are of course furnished free.

Please write for complete descriptions and details.
